## Marrow drive draws minority student donors

By Victoria Walsh

MUSTANG DAILY STAFF WRITER

More than 50 minority students donated blood for Lambda Phi Epsilon's bone marrow typing drive on Saturday.

Fraternity president Eric Garcia said he was pleased with the student turnout.

"For it being a one-day event, I was impressed by how many students came," Garcia said.

Trace Ednacot, a graduate student studying public health at San Jose State University, coordinated the drive with the Asian fraternity. The fraternity worked with the Asian American Donor Program, its national philanthropy.

Registering bone marrow takes about five minutes, Ednacot said. First, a person fills out a form that includes the results from the bone marrow test. That information is put into a national registry where the type is then matched with someone needing a transplant.

"A person with leukemia in Florida can be matched with someone in California," Ednacot said.

Bone marrow is hereditary, meaning only people of the same ethnicity can be matched properly.

"We're trying to diversify the national registry by being here," Ednacot said. "Of the 3 million Caucasians in the registry, there are only 230,000 minorities. But that's better than 10 years ago when there was only 125 minorities registered. A Chinese-American has about a 7 percent chance to find a match."

Political science freshman Benji Yee donated his blood to help save a life.

"I was curious about the process and realized that just by getting my blood typed, I could save a life," Yee said.

Laboratory assistant Lynda Burroughs has volunteered at the fraternity's bone marrow drive for two years.

"The Asian community needs more awareness of its needs," Burroughs said. "A lot of people are

## Debate team best in West

By Victoria Walsh

MUSTANG DAILY STAFF WRITER

The Cal Poly debate team ended its season as the No. 1 ranked team in the western region, marking its second championship in four years. The team's success was good for a top-25 finish in national standings.

Among 170 universities, Cal Poly was ranked No. 24, its highest ranking since 1986.

The team brought home a total of 14 team awards and 22 individual speaking awards, including five tournament championships and four division top-speaker awards.

Debate team coach Terry Winebrenner attributed the team's successes to the differences in coaching between Cal Poly and other universities.

"The coaches (here) are more concerned about learning from debating than winning," Winebrenner said. "It's a very low-pressure environment. Given the right amount of time and effort, anyone can be successful."

The 13-tournament season lasts from September through March, which includes traveling to matches about every other weekend.

"It's hard to balance both school and the team, but the coaches and members make it so easy to participate in," team member Andrea Derrick said. "It was such an awesome experience; I learned so much already and it's only been one year."

The team of 21 students meets about two times a week to research and practice debating its one topic for the entire season.

"The topics have to be complex enough so that every team can debate it for about six months," Winebrenner said. "This year's topic was 'economic sanctions put on rogue states,' to give a concise version of it."

Because the team is an Instructionally Related Activity and is connected to the curriculum, the university takes care of all costs.

"It's such an inexpensive experience," Derrick said. "Other schools we met had to pay for everything — hotels and food — but all that stuff was completely covered by (Cal Poly)."

Debate teams don't have divisions based on school size or location. Every team meets with every other school in its region.

"We can debate against Pepperdine in one meet and then turn around and debate against a community college from Sacramento," Winebrenner said.

Students can compete in two divisions: the novice division for first-year competitors, and the open division for those who have debated for more than a year.

# Plant sale reaps student, community intrigue

By Monica McHugh

MUSTANG DAILY STAFF WRITER

Curiosity was blooming at the fourth annual spring plant sale.

Eight hundred people from all over the county attended Saturday's event to see the efforts of the environmental horticultural science department.

"There were some students, (but) mostly homeowners buying garden plants came out," said Tom Eltzroth,

arboretum director and environmental horticultural science professor.

Visitors were invited to take a 45-minute tour of Cal Poly's 5-acre Leaning Pine Arboretum, a large garden that displays plants from all over the world. The tour explained the various sections of the arboretum, including those dedicated to Australian, Mediterranean, South African and Californian plants.

Students use the facility to study

plant identification, and designers use it for research ideas.

"We wanted to introduce our visitors to the arboretum so they could see what we have and to get some planting ideas to take home with them," Eltzroth said.

Eltzroth said he suspected about 80 percent of the visitors had never been to the arboretum and probably didn't even know it existed.

The tour also highlighted plants

for sale. Hardy flowering perennials, California and Mediterranean natives, succulents, herbs, landscape shrubs and ornamental grasses were sold in 4-inch pots for \$2 each. Most of the plants are produced by the award-winning Associated Landscape Contractors of America student team and are maintained by paid student employees.

"Giving tours of the arboretum and having a plant sale gave community

members a good chance to come see what students are doing," landscape architecture junior Jenell Lefmann said.

The most popular plant for sale, Eltzroth said, was a shrub from Baja California called Verbena Lilacina De La Mina.

"It's a red-hot seller," Eltzroth said. "People like it because it flow-

see PLANT, page 2

## PLANT

continued from page 1

ers almost all year 'round and is very fragrant."

All proceeds from the event sup-

port the development and advancement of the Leaning Pine Arboretum as well as the Landscape Contractors team.

"In terms of funds raised, this year was better than ever before," Eltzroth said.

The plant shop and arboretum are located at the environmental horticultural science unit at the top of Via Carta in building 48. The arboretum is open to the public Monday through Saturday 8 a.m. to 5 p.m.

## DEBATE

continued from page 1

"Debating is fun socially, and it's also mentally challenging," team member Kevin Moore said. "It was one of the most educational experiences I've had at Cal Poly."

Since the Cal Poly team has achieved recognition, the coaches

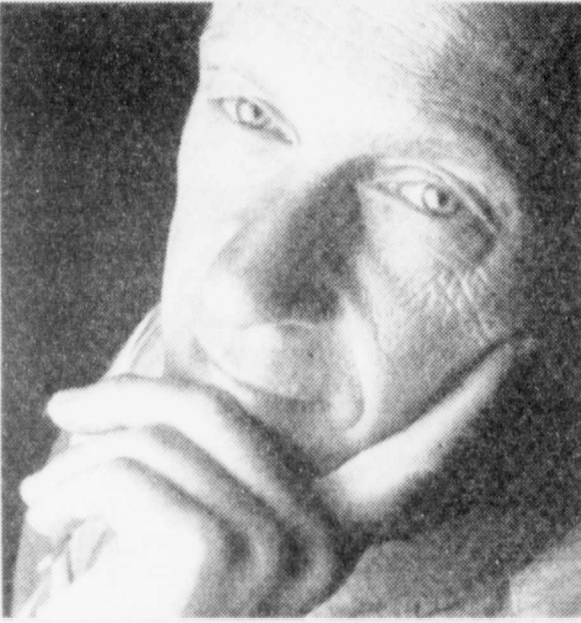

have the leverage to recruit students from other schools.

Team member Jim Zhang was one of the members recruited to Cal Poly.

"I knew some of the coaches, and they kept telling me about the team and basically recruited me here," Zhang said.

To get involved with the debate team, check out its Web site at [www.calpoly.edu/~spc/debate](http://www.calpoly.edu/~spc/debate).

## Cal Poly groundskeeper maintains classes, fields

By Christine Powell  
MUSTANG DAILY STAFF WRITER

Jodee Bennett is on campus all day, but she spends the bulk of her time out of the classroom.

Bennett is a 17-year employee of Cal Poly's landscape services. She is a groundskeeper, as well as an environmental horticulture science senior. She takes one class each quarter.

"I've got eight or nine more classes — which to some people is just a couple quarters, but for me is a couple years — at least," she said.

Bennett works 40-plus hours a week maintaining athletic fields and irrigation, picking up trash and keeping Cal Poly beautiful.

She started in groundswork while attending junior college in San Diego, and has been working at Cal Poly for 12 and a half years.

She grew up in Burbank, but says that the pace of life in San Luis Obispo suits her better. Bennett

moved here to be closer to her sister, and ended up staying because she was overwhelmed by the beautiful and relaxed atmosphere of the area.

Bennett likes working at the same campus where she attends school. She considers Cal Poly faculty and students to be "people who are not only on the cutting-edge of technology, but who are also looking at the big picture."

A typical day for Bennett consists of arriving on campus at 7 a.m. and prioritizing to see what needs to be done first. She attends one hour of class, then picks up trash and mows recreational fields. She works until 3:30 p.m., and attends a step aerobics class three times a week.

In her free time, Bennett cares for her dog and cat, maintains her own

*"When I graduate, my ambition isn't to move on so much as to better my own knowledge."*

**Jodee Bennett**  
Cal Poly groundskeeper

garden and hikes. She is a member of ECOSLO, and worked with the SLO Stewards Program in 1995 and 1996, where she helped with tree planting and creek restoration.

In conjunction with ECOSLO, Bennett is in the process of becoming a natural history docent. This entails leading walks throughout city-owned areas such as Laguna Lake, Bishop's Peak and Reservoir Canyon.

"When I read in the paper that they offered this I said, 'Oh that's what I want to do' because I love to hike," she said.

Due to serious budget cuts in the early '90s, the groundskeeping crew at Cal Poly has been working extra hard to keep up with the job.

"We've all really had more work with less people," Bennett said. She spoke highly of her fellow employees.

"Our entire crew is really educated, about one-half to one-third have college degrees."

When asked what she'll be doing in 3 to 5 years, Bennett's eyes lit up. She laughingly replied that she would continue with her work, "hopefully with a degree." She recently applied for the position of working lead.

"I love San Luis Obispo. I chose to make it my home years ago, and I haven't changed my mind. When I graduate, my ambition isn't to move on so much as to better my own knowledge."

MARKUS SCHNEIDER/MUSTANG DAILY

**Sixty percent of the Earth's species live beneath the ocean surface.**

## The voice of the sea

Lounging on the sandy beaches and soaking in the sun's rays, we rarely contemplate the billions of organisms just under the surface of the waves.

Beneath the froth are living, breathing and dying organisms that we may never be aware of, yet they are incredibly aware of us. Earth is affectionately referred to as "the water planet," but it is the actions of the land dwellers that rule the fate of the sea.

In our society we have a misconception that we can blame the big, bad industries for the despicable amount of pollution in our waters; however, it is the individuals, including you and I, who are the true culprits. Contrary to popular belief, most ocean pollution is caused by contaminated run-off from yards, parking lots and roads, not industry.

It is hard to imagine that the oil from your personal automobile or lawn mower may someday end up poisoning a young seal or otter. Statistics fall on deaf ears, and it is

easy to see why. For the average college student, the ocean is a place of relaxation. But once we begin to understand the ramifications of our actions, we cannot perceive the same leisurely atmosphere. Beneath foamy waves that crash and tumble reside 60 percent of our earth's species.

If we were to peer beneath the frothy surface, we would be confronted by another world. Right here on our California coast, coral reefs abound with color and life, stingrays hover over the rolling sands and purple urchins waltz silently across the coral.

How can we fight ignorance of our actions? Educating ourselves to the dangers we pose in our everyday lives is the first step. T.S. Elliot said, "the sea has many voices." Will you listen?

## GO WIRELESS

COM DEV International, the largest Canadian-owned designer, manufacturer and distributor of space and ground-based wireless communications products, has established an engineering development center in San Luis Obispo. The SLO group is focused on the development of COM DEV's wireless voice and data infrastructure product line.

We're currently looking for enthusiastic, hard working and talented college graduates to fill several entry-level positions. If you're a quick learner, work well with others and enjoy casual dress and a relaxed atmosphere, we want to talk to you.

COM DEV is a publicly traded company, and benefits include competitive salaries, health plan, retirement plan and stock options.

### SOFTWARE ENGINEERS

An excellent opportunity for engineers interested in developing embedded software for wireless voice and data communications systems. MSCSC/BSCSC/BSCPE degree or equivalent required. Ideal candidates will have experience in more than one of the following: C++, RTOS, SDL/UML, DSP.

### TECHNICAL WRITERS

This position is available for an individual with exceptional interpersonal and communication skills who is comfortable working with professionals with high levels of technical proficiency. You will be responsible for producing clear, accurate technical information for Software and Hardware User Manuals as well as other documents aimed primarily at a technical audience. You will work directly with software developers to ensure product support materials are accurate, professional, and produced in a timely manner.

### MECHANICAL ENGINEERS

Design of mechanical and electrical hardware for wireless infrastructure products. Familiarity with Autocad, Cadence Allegro and ProEngineer preferred. Requires BSME/MSME.

### DIGITAL HARDWARE ENGINEERS

Position available for a digital hardware engineer. Ideal candidate will have experience with Microprocessor, Embedded Microcontroller, DSP and VHDL design. BSEE required.

### SYSTEMS ADMINISTRATORS

Opening for System-Network Administrator for growing office. Must be familiar with Linux, Solaris, Qmail, Samba, CVS and Windows NT administration. Should have some experience with network administration. General computer hardware knowledge is desired.

### GRAPHIC ARTISTS

Position available for a graphic artist. Ideal candidate will have experience with Adobe Photoshop and Adobe Illustrator and be proficient in layout and design. You will be responsible for producing professional graphics for marketing materials as well as technical illustrations for user manuals. This exciting position offers you an opportunity to provide creative input in our product development lifecycle. BSGC degree or equivalent required.

Send resumes to [jobs@comdev.ca](mailto:jobs@comdev.ca), fax to (805) 544-2055, or mail to 3450 Broad Street Suite 107 San Luis Obispo, CA 93401.

## Thanks, MTV, for my identity as a woman

I have often wondered what makes two individuals come together to share life's experiences as a couple. There seems to be certain people who are always dating some new Mr. or Miss Wonderful, and others who seem to be perpetually looking. I happen to be of the latter group. I've tried to understand what makes one a member of the first category and another of the second. I thought perhaps I belong to the second group because I am really picky, or perhaps I am intimidating or don't flirt enough. My favorite theory about my desirability is that I am the type of person that men don't initially want to date, but I have qualities that would make a good girlfriend.

Then my eyes were opened to the reality of the situation. I was watching MTV — the media that is the voice of our generation, right? I noticed that the women depicted on this channel had certain common characteristics. For example, I observed that most of the women featured in MTV videos were quite thin with large breasts and supple rears, usually

wearing bathing suits or other articles of clothing that did not require a good deal of fabric. It was interesting to note that even the female artists had these qualities and were clothed in a similar manner. One would think that their talents and success would make them desirable and attractive, but it seemed that even they too needed to have a figure as stated above and to display it rather immodestly.

It seems that my theories had been completely off-base. I thought that if I was smart, funny, caring, loving, generous, understanding — qualities that in general define a likable person — that I would make a desirable companion. Boy, was I wrong. It seems that all I need is a tight body and some outfits that require less than an eighth of a yard of fabric (especially if it's shiny or fake leather), and I will have the male population at my disposal.

Since observing the proper role of our society's women on MTV, I have recognized that I need to make some drastic changes in my lifestyle if I am ever going to function properly as a female in this country. So I will drop out of school to devote my time to the gym and the tanning salon. I will change my name to Mariah, after my new idol, and I will begin looking for some rich young entertainment industry guy (I also learned on MTV that excessive wealth is desirable). Perhaps some young man will find me attractive and let me be used and abused by him for a few months. Maybe we will even get married; perhaps, I'll even get pregnant. Then, through the miracle of childbirth, my hips and bottom will spread, and he'll ditch me for some other young college dropout.

Oh, what a glorious life it will be! I just hope that young girls reach this conclusion before they reach the ripe old age of 21 like me. Hopefully, somewhere in their teens, these young American girls can realize that their worth is based solely upon on their looks. Then they can focus their energy on developing an ideal physique rather than wasting their time on an education or developing a personality, of all things.

Thank you, MTV, for showing me the way to reach my potential as an American woman.

Shauna Weber is an animal science junior.

Weber**

## Our comment: Carl Brown must resign if convicted

A man convicted for openly masturbating in a men's restroom at El Chorro Regional Park should never hold a position of importance at Cal Poly.

Carl Brown, 55, is awaiting a legal decision on his April 14 arrest at El Chorro. If the recently appointed acting director of the University Center for Teacher Education is convicted, Brown must resign and save the university further embarrassment.

Since Brown's arrest, several faculty members have been waiting for Mustang Daily to write the story. Faculty members don't want a man convicted of indecent exposure and lewd behavior in public representing them. That's understandable.

When UCTE representatives and

Provost and Vice President of Academic Affairs Paul Zingg refuse comment on this important incident that directly affects them, that is disgraceful.

The following is a list of the people who should have, but refused to, comment or provide information in the story that Mustang Daily ran Friday: Zingg's office, UCTE, the district attorney's office and the San Luis Obispo County Superior Court.

Both the Superior Court and the district attorney's office don't have any record of charges filed. This is odd for a case more than two weeks old, except in San Luis Obispo, where confusion and disorganization run rampant in our county offices (but that's another editorial).

The real problem is with Zingg and UCTE representatives.

Take a stand. If UCTE faculty members don't want to work with teachers who are arrested for masturbating in a public bathroom, they should say something. If they

don't think Brown is the type of person who would do that, then say that.

Stop cowardly hiding behind "no comment." Rather than conforming to how others tell you to behave, be your own person. You have an opinion on an important event that directly affects you, yet you say nothing.

Does Zingg condone teachers masturbating in public? Does his office have a policy on teachers who are arrested? No comment.

However the Brown case is resolved, UCTE and Zingg have no right to complain. You had your chance to express your dismay and did nothing.

In a campus environment, students are constantly looking for leaders and people who stand up for what they believe. If they are looking to Zingg and UCTE representatives, they should look elsewhere. We are.

Editorials are the voice of Mustang Daily.

## Letter to the editor

### Canceling class after five weeks is unacceptable

Walking frantically toward the science hall, my mind nervously summarizes all the materials engineering facts I was able to cram in during the past few days. Bus exhaust fills my nose and butterflies circle my stomach as I mentally prepare myself for the midterm ahead. However, nothing could have prepared me for what I found upon entering my class this morning.

Two unfamiliar professors were passing out the midterm, prompting me to question the person next to me as to their pres-

ence. I learned that this class had just been canceled, and we were being allowed to either drop the class with no penalty or crash the 7 a.m. class on Monday. Coming five weeks into the quarter, this would make anyone resentful, but the real problem here is that this is the second time this quarter I have had to deal with a canceled MATE 210, materials engineering, class.

I was no doubt a little angry when they first canceled the class (along with another of the four total sections), but I was able to crash another section without too much difficulty. Now, halfway through the quarter, I must deal with this again. Call me irrational, but this isn't acceptable. I can

understand this happening on occasion, but after dealing with two caseload sections earlier and attending class every day for five weeks, I should not be faced with this again. I would like a rational explanation as to why this has happened, and not just "unforeseen circumstances." This is a lame excuse; if I had used it halfway through the quarter and not shown up to class, I would have been left with either an F or an incomplete. I would like to hold our administration and the materials department responsible for their actions like I have always been taught to do. Therefore, administration, materials and the professors who hung us all out to dry, you have earned an F in my grade book.

Suzannah Weflen is a general engineering freshman.

"Bulk of the series, dude. Not exactly a lightweight."

# 'Frequency' promises touching story, delivers sci-fi drama

By Kara Knutson

MUSTANG DAILY STAFF WRITER

"Primal Fear" and "Fallen" director Gregory Hoblit makes his third directorial appearance with his new science fiction thriller "Frequency." The film promises much, but fails to deliver. What starts as an original and touching story about a son and dead father communicating with each other through time and space quickly turns into a formulaic and predictable film.

In the opening scenes we meet Frank Sullivan (Dennis Quaid), a risk-taking firefighter, and his family, wife Julia and 6-year-old son, John.

Then Hoblit cuts to present day. John Sullivan (Jim Caviezel) is a 36-year-old cop in Queens, NY. His dad died when he was six and all of

his life John has longed to talk with him again. On the night before the thirtieth anniversary of his death, John pulls out his dad's old ham radio and begins to play with it. He finds himself talking to his dead father, who is on the same radio in the same house, just three decades earlier.

We think the film will be about John and Frank's chance to build the relationship they never had and to express each other's love for the other, but Hoblit takes it in an entirely different direction. Unfortunately, the new direction is not a unique one.

The film addresses the trite subject of changing the course of history. Sullivan prevents his father from dying, and in the process, sets in motion the murder of his mother. It's intended to be a story about a

"The acting and the special effects are not enough to save this film."

## movie review

2 out of 4

father and son and their unique chance to communicate between time and space. Instead, it is about a father and son who try to beat fate and correct the history they altered.

To its credit, the film used some interesting special effects. Whenever something happened in the past, John's pictures would alter in the present. For example, after preventing his father's death, the pictures that used to contain solely he and his mom, now included his dad as well.

Caviezel and Quaid are convincing in their roles, although the script provided them little to room to grow. However, the acting and the special effects are not enough to save this film. Hoblit succumbs to the formulaic, happy-ever-after Hollywood ending. It doesn't fit with the rest of the film, and the viewers are left disappointed. Hoblit would have done better keeping the focus on the relationship between the father and son.

COURTESY PHOTO

The Sullivan family in happier times, before an accident changes the course of history for each character. The film delves into the question of whether or not fate can be altered without consequences.

Frank Sullivan (Dennis Quaid) takes a ride with his beloved 6-year-old son, John. The two reunite after Frank's death through an old radio.

## FOOTBALL

continued from page 8

got hurt," said junior defensive lineman Billy Beltz. "We probably could have gone a lot longer."

Other than Washington's injury, the rest of the game went smoothly. The scrimmage lasted for three quarters and ended with a Gold victory, 21-12.

There were several standouts in the game. Redshirt freshman Chris Canoles had an excellent game, catching four passes for 84 yards and a touchdown. Fellow wide receiver Adam Herzing also played well, making four receptions for 70 yards.

Joe Martinez, a sophomore taking over for Orozco at middle linebacker, showed great strength and leadership.

"I think Joe's going to do a great job taking over for Baldo," Beltz said.

But Martinez knows he will have to fill Orozco's shoes both on and off the field.

"I know that's a big task," Martinez said. "Baldo was such a vocal leader; I

tend to lead by example, so it's going to be something for me to work on."

Injuries were a major concern for the Mustangs heading into the scrimmage. The coaching staff was hesitant about the game, fearing a major injury might be suffered. The quarterbacks, Seth Burford and Kevin Cooper, wore red jerseys so they could be easily identified and avoided. Welsh instructed his players not to tackle either quarterback. This gave the quarterbacks a chance to hone their passing game without fear of being sacked.

Burford, a transfer student from Idaho State, said he loved being able to pass the ball so much. He completed 15 of 24 passes for 219 yards, including two touchdown passes.

"That's my job, to give it to the other guys," Burford said. "I'd rather throw (the football) than anything, then I get to let the other guys run."

While both Cooper and Burford are both capable of taking over the reins at starting quarterback, Burford is the early favorite to take on team leadership.

▼ *"It's really unfortunate that Dom got hurt. We probably could have gone a lot longer."*

**Billy Beltz**  
defensive lineman

"I think everyone's kind of looking toward Seth to lead the offense," Beltz said. "Defensively, Steve Prejean and Vic Greco are the seniors who lead the team."

The team as a whole played well together, and leaders of both the offense and defense said they felt a definite chemistry forming between the players.

"Both sides of the ball did well," Welsh said. "And I think we had a lot of fun — that's what matters."

Another highlight to the scrimmage was the large crowd, something that Welsh said made a difference.

"I really appreciated the crowd," Welsh said. "It means a lot to the guys, especially the newer ones."

**Cal Poly's spring practice ended with a 21-12 Gold victory Saturday.**

## STERLING

continued from page 8

Bonds, Kent, Snow, Armando "future star" Rios, Ramon "occasional starter" Martinez, and Doug "just try to steal a base off me" Mirabelli.

Within the two teams, the big three (Bonds, Kent, Snow) remains the same, while the supporting cast changes around them. The core remains intact, and that's what the fans pay to see.

Picture this — when the Giants go into Coors Field, they can start their power team and put up 20 runs a game. It won't matter that they

can't field, because they'll simply outscore their opponent.

When they visit a pitchers-friendly park like Cinergy Field, the defensive team can start. If the Giants need runs, Baker can start substituting.

The Giants need consistency, and these lineups can provide exactly that. Something needs to happen to eliminate the Giants' average play — they are not an average team, and shouldn't be playing like one.

continued from page 8

got to keep throwing for strikes."

The Mustangs were hitting Riverside pitching hard all weekend, especially in Sunday's first game. They scored seven runs on five hits in the bottom of the fifth inning. The Mustangs sent 13 men to the plate in the inning. Kyle Albright drove in two runs with a single, and Kevin Tillman and Jason Barringer picked up RBIs in the bottom of the frame.

"I was just seeing the ball really well, getting ahead in the count and getting good pitches to hit," Barringer said. "The pitcher was

outfielder

pitching inside, so on my second at-bat I moved off the plate and got a pitch inside and turned on it."

Cal Poly completed the three-game sweep with another dominant pitching performance. Jared Blasdell won his fourth game for the Mustangs, and Cal Poly cruised to a 8-0 win.

Barringer's strong hitting contin-

ued in the final game of the series, hitting his fifth home run of the season. Steve Wood also homered for the Mustangs.

"We got to keep going. We still have a shot (at an NCAA bid)," Barringer said. "This is definitely getting us rolling going into Sacramento (this weekend) and trying to sweep them."

## Sacramento avoids sweep

SACRAMENTO (AP) — Shaquille O'Neal lost his shooting touch. Kobe Bryant was slowed by foul trouble. And, suddenly, the mighty Los Angeles Lakers were not invincible.

Chris Webber had 29 points and the Sacramento bench finally came alive, sparking an 18-4 run in the fourth quarter, as the Kings defeated the Lakers 99-91 Sunday to stay alive in the playoffs.

The Lakers won the first two games by comfortable margins in Los Angeles. Game 4 in the best-of-five series is Tuesday night at Sacramento.

O'Neal had 21 points and 17 rebounds, but went 8-for-22 from the field and 5-for-14 from the foul line. Bryant, who picked up his fourth foul early in the third period, had 16 of his 35 points in the fourth quarter.

Predrag Stojakovic had 19 points and Tony Delk added 11 as the Kings' self-proclaimed "Bench Mob," which had little success in the first two games of the series, outscored the Lakers' reserves 34-11.

Delk played most of the fourth quarter instead of Jason Williams, who scored 10 points but made several poor passes early in the game.

The Kings still face a harrowing task as they try to upset the best team in the NBA this season. Only 12 teams have rallied to win a series after trailing 2-0, and none since the Houston Rockets in 1995.

The scenario is familiar for the Lakers. In each of the previous three seasons, Los Angeles has won the first two games of its first-round series, then lost Game 3 and wrapped up the series in four games.

Sacramento opened the fourth

quarter with a 7-1 run, taking its first lead of the game on a 3-pointer by Stojakovic with 9:43 remaining after Delk twice kept the possession alive with offensive rebounds.

O'Neal's dunk and two baskets by Bryant gave Los Angeles a 78-73 lead, but the Kings replied with a 14-0 run that included another 3-pointer by Stojakovic, a windmill dunk by Webber and Vlade Divac's block of a layup by O'Neal.

After Glen Rice scored for Los Angeles to end the run, Delk and Webber scored baskets to give Sacramento a 91-80 lead with 3:18 remaining.

Leading 51-46 at halftime, the Lakers used a 9-0 run - including a 360-degree spinning layup by Bryant and Rice's 3-pointer - to take a 64-54 lead early in the third period. The Kings pulled within a point late in the period, but trailed 71-66 going into the fourth quarter.

The Kings missed 11 of their first 13 shots and fell behind 15-7 midway through the first period. A three-point play by Rice gave the Lakers a 27-17 lead late in the first quarter.

The Kings hit eight of their next 11 shots, responding with a 13-3 run and tying the game at 30-30 on a jumper by Stojakovic, but the Lakers answered with a 9-0 run.

A three-point play by O'Neal, following a turnover by Williams on an errant behind-the-back pass, made it 44-36. The Lakers, led by O'Neal's 15 points and 12 rebounds, held a five-point halftime lead.

## Mustangs snag weekend series from Riverside

By Matt Sterling  
MUSTANG DAILY STAFF WRITER

The Cal Poly baseball team had been doing it with timely hitting. Now it's getting it done with strong pitching.

Behind dominant throwing performances, the Mustangs kept their chances for an NCAA bid alive with a sweep of UC Riverside this weekend at San Luis Obispo Stadium.

Joe Smith pitched his third complete game of the season on Saturday, striking out 13 batters and scattering six hits and one run en route to a 3-1 Mustang win.

The staff ace picked up his sixth win for Cal Poly, walking none and allowing only six baserunners.

Tyler Fitch pitched a gem in the first game of Sunday's doubleheader, no-hitting the Highlanders for six and one-third innings. He ended up allowing only two hits while striking out eight as he faced one batter over the minimum through the first five innings. Cal Poly gave Fitch great run support for the 8-4 win.

Fitch said the no-hitter was in his mind, but he was focusing on getting outs.

"I saw (the no-hitter), but you just have to go out and do the same thing — throw hard," he said. "You've just

MARGARET SHEPARD/MUSTANG DAILY

see **BASEBALL**, page 6 *Tyler Fitch pitched six and a third innings of no-hit ball before surrendering two hits.*

## Giants should make better use of their lineups

The 2000 San Francisco Giants are a team of contrasts.

On one hand, they have one of the most power-laden lineups in baseball, but that group can't always field their positions. The defensive-minded team can field, but isn't too strong on the offensive side.

They got a beautiful new park, promptly losing the first six games they played in it. On the following road trip, they swept division-leading Arizona at Bank One Ballpark. They went to Florida, and Robb Nen blew two straight saves, only to be saved by Armando Rios' clutch hitting in extra innings.

**Matt Sterling**

Returning home, they finally picked up their first win at Pacific Bell Park, sandwiched between losses to the mediocre Montreal Expos.

They've got almost two separate lineups they can bring into a game, depending on manager Dusty Baker's discretion. The power lineup can pound a team with hitting, while the defensive-minded team can capitalize on opponents' mistakes and nickel-and-dime their way to runs.

Usually, Baker uses a mix of the two lineups, but I'd like to see him try a few games with these lineups — he would be surprised at how successful they would be.

The power team consists of Marvin "5-9 and an \$11 million contract" Benard, Russ "defensive liability" Davis, Barry "clubhouse tyrant" Bonds, Jeff "Mr. RBI" Kent, J.T. "occasional power" Snow, Ellis "don't make him play on AstroTurf" Burks, Rich "poor-man's Alex Rodriguez" Aurilia and Bobby "36-inch-arms" Estalella.

The defensive team starts Calvin "happy not to be in AAA" Murray, Bill "offensive liability" Mueller,

## Injury mars end of spring football

Young's replacement may need his own replacement after knee injury at the Green vs. Gold scrimmage

By Katherine Hays  
MUSTANG DAILY STAFF WRITER

Cal Poly's Green vs. Gold scrimmage proved to be bittersweet for the Mustangs. The young, up-and-coming Mustangs shined in many of the positions left vacant by graduated stars Craig Young (running back) and Osbaldo Orozco (linebacker). But Cal Poly may have lost a key replacement in its backfield.

Dominic Washington, a redshirt sophomore, suffered a devastating knee injury that will sideline him indefinitely. Washington spent most of last season in the shadow of Cal Poly's all-time leading rusher Young. This season was to be his opportunity to

stand alone in the spotlight, but the injury suffered Saturday afternoon may well keep him on the bench in the fall.

Team doctors have yet to determine the extent of the damage to Washington's knee, and it is still possible he may heal in time for next season.

Head coach Larry Welsh is optimistic that Washington may be able to recover in time.

"Hopefully, it's not as bad as we think it might be," Welsh said.

Washington's injury was felt by the whole team, and it changed the pace of the game, Welsh said.

"It's really unfortunate that Dom

see **FOOTBALL**, page 6

see **STERLING**, page 6

The Cal Poly football team may have lost its replacement for Craig Young when running back Dominic Washington injured his knee at the Green vs. Gold scrimmage Saturday.
