The names of three members of Cal Poly's nationally-ranked wrestling team that were eligible to compete in the National College Athletic Association Division I tournament last month have been released Monday in a report by Vice President President Warren Baker, Athletics Director Alfa Hartz Jones.

Wrestlers Joe Davis, Gary Fischer and Wurel were not among the minimum of 11 wrestlers that the national team committee named.

Jones said his review was separate from the issue of whether there were any potential violations involved in attempted enrollment of students transferring schools.

"This latter matter is still under review," Jones said, "and, because it involves personnel issues, will not be commented upon."

Jones said his study included interviews of the faculty and staff involved and also a review of enrollment records. They showed that a report of the class loads of student athletes, which normally should have been received in early February by the faculty athletic representative, Dr. Fred Clingman, was not received until Feb. 29. The delay was caused by an unusually heavy workload on the Computer Center, the report said.

"This delay was caused by the fact that our record system does not use the computer," Jones said. "This delay was not due to any error on the part of the record system, but rather to the heavy work load on the system."

"This delay was not due to any error on the part of the record system, but rather to the heavy work load on the system."

Jones said Davis, Fischer and Wurel were included in a routing list of 40 members of the wrestling team prepared by the Records Office on Jan. 30. The next report, issued on Feb. 29, showed seven members, including the three, were not carrying the minimum 12 units. Subsequent review showed one was eligible, Davis, Fischer and Wurel were not. The remaining three were found to be ineligible, but did not compete.

The three ineligible wrestlers won individual championships at the regional meet in Las Vegas, Nev., where Cal Poly won its sixth consecutive regional team title.

Fischer, who wrestled at 118 pounds during the 1979-80 season, went on to fourth in the nationals in Corvalis, Ore., two weeks later and received All-American recognition. He will finish the season with a record of 13 wins and 2 losses.

Davis compiled a 16-8, 11-loss and 1-tie record but did not win a match in the national meet. Wopel, the top seeded wrestler at 118 pounds, was eliminated from the national meet, lost in the opening round and did not place. His record for the season was 36-3.

Sun-powered greenhouse completed

BY LINDALEWIS

Daily Staff Writer

Agricultural engineering and ornamental horticulture students have worked double-time to ensure their 1,800 square foot solar greenhouse be part of the horticulture unit's display at the Poly Royal.

Plans for the greenhouse started almost two years ago when the George Heil Company, a nursery supplier, gave the fruits and vegetables for the greenhouse to the horticulture instructor Michael Zobrist. Students from construction and special problems classes did the building.

The project has taken longer than expected," said Zobrist. "Because it has never been done before, special designing was needed."

The primary idea for the greenhouse, according to Zobrist, is to have a house that could be used for heating and growing plant material in use of a warm environment. Enterprise products are stored in the house.

The heat storage unit, connected to the greenhouse by heat pipes, was built as a senior project last year. The 1,800 square foot, 8 ft. high "Alfalfa Field" is a well drained, organic soil in a well drained, organic soil. There are 114 potato seedlings, 48 asparagus, 44 basil, 28 pansies, 28 squash and 13 tomatoes. Some of the vegetables are sweet corn, cucumbers, tomatoes, zucchini and broccoli. Some of the herbs that are grown are basil, dill, parsley, tarragon, and marjoram.

At night or on cloudy days, we can run the tubs and raise the temperature. The hot water tank will last two days without sun and still maintain the temperature.

Data collecting equipment will also be built into the greenhouse so they can determine just how efficient the product is. said Amato.

Cal Poly is testing different ideas with the solar greenhouse, on an experimental basis, and then supplying the information to the Nursery and Greenhouse Industry in California.

Home ec-child development merger suggested

BY Evren AKBAYDAN

"In accordance with a suggestion by President Warren Baker and in an effort to improve the economics of the dean of the Human Development Division, the dean of the Human Development and Home Ec Departments, Carl Cummins announced the proposal to make the merger of the child development and home ec departments.

"Mr. Cummins said he has opposed the merger for professional reasons."

"I do not think of it as much as a merger of two disciplines," Mr. Cummins said. "I think of it as an absorption of the child development department by the home economics department."

"The merged program will extend over the campus," said Mr. Cummins. "I am not as familiar with the home economics department as a whole, but that the child development department curriculum will not be changed at all."

"Both departments would benefit from the merger," said Mr. Cummins. "Child development would benefit from the availability of home economics faculty and the home economics department would be strengthened overall."

The merger will not disrupt the child development curriculum. The degree, the course offerings, the number of students and faculty will remain unchanged, but the department would be united under one administrative umbrella."

"The child development department will not lose any integrity by coming in with home economics," Mr. Cummins said.

"The merger will not cause a weakening of a program, but rather it will serve as a compliment to improve both programs."

Two other advantages of the merger are that the child development department will be less vulnerable, should Proposition Nineteen pass, and that the home economics department will be

Students worked on this sun-powered greenhouse throughout the weekend so visitors can see it during Poly Royal.

Home ec-child development merger suggested

BY Evren AKBAYDAN

"In accordance with a suggestion by President Warren Baker and in an effort to improve the economics of the dean of the Human Development Division, the dean of the Human Development and Home Ec Departments, Carl Cummins announced the proposal to make the merger of the child development and home ec departments.

"Mr. Cummins said he has opposed the merger for professional reasons."

"I do not think of it as much as a merger of two disciplines," Mr. Cummins said. "I think of it as an absorption of the child development department by the home economics department."

"The merged program will extend over the campus," said Mr. Cummins. "I am not as familiar with the home economics department as a whole, but that the child development department curriculum will not be changed at all."

"Both departments would benefit from the merger," said Mr. Cummins. "Child development would benefit from the availability of home economics faculty and the home economics department would be strengthened overall."

The merger will not disrupt the child development curriculum. The degree, the course offerings, the number of students and faculty will remain unchanged, but the department would be united under one administrative umbrella."

"The child development department will not lose any integrity by coming in with home economics," Mr. Cummins said.

"The merger will not cause a weakening of a program, but rather it will serve as a compliment to improve both programs."

Two other advantages of the merger are that the child development department will be less vulnerable, should Proposition Nineteen pass, and that the department might finally be accredited, he said.

"Proposition Nineteen does not have any drastic cuts, said Mr. Cummins. "Some sorts of child development will be vulnerable if the proportion fails."

"As it exists now, the child development department is not eligible for accreditation by the American Home Economics Association. The department could receive accreditation through the mergers."

In a question-and-answer session with about 70 students on Thursday, April 17, Associate Dean Harry Busselin of the School of Human Development and Education tried to clear up some of the confusion.

"It is recognizable that there seems to be a lack of reasons to keep child development as a separate department," Mr. Busselin said. "The advantages of the merger far outweigh the disadvantages.

Where are student concerns?

I have become disenchanted. Partly with this country's political leaders and candidates, partly with the economy, partly with the state of the environment, partly with the state of the universities. Mostly I have become disenchanted with my peers.

I can remember when students were activists. It was less than ten years ago when the campuses of this country were the center of the fight to end the war in South East Asia. It was the student who made principles the superior intelligence rather than from incessant investigation of issues and act with inordinate energy. These were people who wanted more than formal education while in school. The students were the activists and organizations. These were people who made principles the superior priority when the campuses of this country were the center of the fight to end the war in South East Asia. It was the student who made principles the superior priority. These were people who made principles the superior priority when the campuses of this country were the center of the fight to end the war in South East Asia. It was the student who made principles the superior priority when the campuses of this country were the center of the fight to end the war in South East Asia.

It is more than our responsibility—it is our calling. It is more than our responsibility—it is our calling.

As for the author of this gem of nonsense, maybe you should find some journalism classes for the skills you would economics classes. Until then, stick to local issues such as the Question of alcohol on campus that you should able to handle with some degree of competence.

Opinion

Took it wrong

Edgars:

Dear Ray, Randy, John, Paul, and Chuck: In your April 16 editorial to a previous letter of mine, you somehow inferred that I downplayed the importance of Jesus Christ. The subject of my previous letter was not about Jesus, it concerned the debunking of someone's idea that Catholicism was the only true religion.

Perhaps I have become too "educated" by the anthropological idea of ethnocentrism, but, in regard to your comments about Jesus, even though I personally believe that the only way to God is through "his only son, Jesus Christ," I feel it is wrong to damn someone who does not recognize Jesus as being God's only son.

**Women learn guts of car maintenance**

**A FERDORAH TUCKER**

The women were gathered in the hub room of the Agriculture Station when they were offered coffee and creme brulee. The basic principles of auto repair were the center of the clinic called "Women's Night and Early Morning," held every Tuesday. The clinic is sponsored by the County Sheriff's Office.

An instructor, who is a part of the clinic in the group of women who have never been instructed enough to explain it to someone else. She added that she most enjoy teaching the women who attend the course.

The slides shown in the clinic deal with how to put into practice the information. She mentioned a three-acre car which has a three-month old outing and energy consumption. A brochure from the Department of Engineering and an additional woman who attends the course.

The League of Women Voters sponsored the session because "we have a very strong position to help improve air quality and conserve energy," said Giselle Deve, a member of the League. She said a well-maintained car conserves energy and provides better air quality.

The clinic will be given in Sal Luis Osasco. On various dates through May 3. Those interested can call at 308-222-99.

"It's useful and a good opportunity to ask questions," said Beryl Reisenberg, a member of the class. "You don't really realize how much you don't know until you get here."
Blood drive
Faculty, students, staff and immediate family members are invited to donate to the campus blood account today from 9 a.m. to 2 p.m. in Chumash Auditorium.

Welders
The American Welding Society will have a mandatory meeting for all engineering technology welding majors for the organization of Poly Royal activities on Thursday at 11 a.m. in the welding department.

Recreation
The Recreation Club will meet to elect nominating candidates for next year’s officers on Thursday at 11 a.m. in the Recreation Center. A workday for Poly Royal will follow the meeting.

Women expected to get top corporate positions
NEW YORK (AP) — The advance of women executives in industrial corporations has turned sluggish in the past few years, but a study of a church group behind them is expected to reach its peak in highest levels in the 1990s.

Prof. Eugene Jennings, whose microscopic detects even the slightest mutations in the corporate life, believes the younger group, five to seven years out of college, is better equipped to reach the top.

Many of the older group, he states, received a sudden thrust forward in the 1970s because of the mood of the times. Few of them, he believes, are equipped by work experience to maintain the momentum.

In addition, the professor found that few of them really were aiming for the top, and that many of them were in staff and support positions in which managerial duties and upward mobility are greatly limited.

Jennings, whose study "The Mobile Manager" is a management classic, and whose "Anatomy of Leadership" is esteemed for its insights into political and business leadership, feels the younger set is different.

"The corporations are not taking unnecessary shortcuts with them," he says. "They are getting a broad base of experience, and they are given breaks. The survivors are those in high presidencies."

Jennings, professor of management at Mt. State University College and chairman of the corporation, reviewed the role played by women executives in his 20 years of study.

He found 40 percent serving as officers of companies, one of the few performing real administrative and secretarial responsibilities for the lower-level directions and others.

About 35 percent were in top position support positions, such as computer and public relations, and legislative affairs, indicating that they outrank general management line jobs.

Of the remainder, percent were in jobs in which they carried responsible profit-center roles.

"While the proportion in the older group has remained at the same level for the younger group’s except in next generation, there is a believing, says he.

"The patterns of the line—jobs are recognized as the unites performance responsible for the whole company," he says.

Federal activity harmful to business
WASHINGTON (AP) — The federal government today is the largest electric power producer, the largest insurer, the largest landlord, the largest warehouse operator, the largest shipowner and the largest truckload operator.

"For a country which is the citadel and the world’s principal exponent of private enterprise and individual initiative, this is rather an amazing list."

That statement was made in 1964 by Rowland R. Hughes, President Eisenhower’s chief budget adviser.

The list has grown considerably since then, with bewildering implications for this country’s small businesses, says a study prepared for the Carter administration.

That study concludes that small business could have a tax cut of nearly $3 billion if the federal government didn’t compete so heavily against private companies.

"At a time when small businesses face unprecedented problems with energy inflation, high interest rates and capital formation, it comes as a shock to find that one of the greatest threats to small business comes from its own government," says Dale Nelson, a Des Moines, Iowa businessman who chaired the Task Force on Government Competition.

Currently, the federal government engages in more than 21,000 commercial and industrial activities at a cost of $10 billion a year, the report says.

historians appeal to Khomeini

WASHINGTON ANP (AP) — Historians have appealed to the Shah of Iran not to return Monday to his native country where he was pleading for exile. But the appeal was made public only late Friday night, the day before the Shah was scheduled to return to Iran.

The historians, addressing their letter directly to the Shah, wrote, "We have been moved by the fervor of your words and the sense of urgency in your plea for freedom. We know that your return will be a signal event for all of Iran's history."

The historians also noted that the Shah's return "will have profound implications for the future of Iran and the entire Middle East."

They ended their letter by urging the Shah to "consider the broader implications of your return and to make a decision that will benefit the people of Iran and the world."
Wrestler battles back to notch fourth in AAU

Cal Poly wrestler Scott Heaton captured four of six matches to notch a fourth-place finish in the AAU national freestyle finals at the University of Wisconsin this weekend. Heaton had his back propped up against the wall when he lost his opening match and faced elimination from the tournament. But Heaton battled back to grab his next four matches, to place himself in position to earn a berth in the finals.

To reach the finals in the 163-pound bracket, Heaton only had to best Canada’s Mark Monegen. He didn’t. Monegen overwhelmed Heaton, by a 20-8 margin and went on to place second in the tourney, while Heaton took fourth. Heaton’s four victories included a pair of pins, one over Tim Calrai of the New York Athletic Club and a second against Tim Brown of the Sunnyside Kids. Heaton whipped Joe Tice, also of the Sunnyside Kids, 12-9, and pummeled John Hanrahan of the New York Athletic Club 12-5.

It was not a good weekend for undefeated “NCAA” champions, as Jim Azevedo of Cal State Bakersfield, heavyweight Howard Harris of Oregon State, and Randy Lewis of Iowa did not take the top prize in the AAU finals. Joe Gonzales, the NCAA champion in the 115-pound division, kept his unbeaten string alive by registering a first-place finish at Wisconsin.

Nature Walks on the San Luis Coast

Your guide to the beaches, birds, tides, sand dunes, mast, history, and points of interest on the coast, from Piedras Blancas (above San Simeon) to Point Sal (beyond Santa Maria) — with six maps and over 60 illustrations, including a Guide to the Birds of Morro Bay.

Sluggers avert series sweep

BY VERN ARREDONDE

The Cal Poly baseball team will be looking to shift its offensive back into high gear Wednesday in a non-conference game against visiting Westmont. The offense sputtered over the weekend in California Collegiate Athletic Association play against the U.C. Riverside Highlanders. A pair of strong pitching performances enabled Riverside to claim two out of three games from the Mustangs. Cal Poly won the final game, 7-2, after dropping the first two games of the series, 4-1 and 12-1.

The Mustangs were looking to avenge a series sweep that Cal Poly collected in Riverside two weeks ago. But Bob Vavrock stopped the Highlanders in their tracks en route to his third win of the year.

Vavrock went the distance allowing just three hits striking out three. Both runs charged against him were unearned. The only real threat mounted against Vavrock came in the seventh. Riverside loaded the bases with one out. Tom Smith blasted a Vavrock offering but Dave Kirby hauled in the solo home run.

On the other side of the track in center field.

In the first game of the CCAA showdown.

The Mustangs will seek their 14th win Wednesday at 4 p.m. against the Highlanders. The game is a 2:30 start on the Poly campus.

The Westmont Baptist Church will hopefully have the big bags of CCAA showdown.

The Mustangs aren’t sure of their first game of the Pomona series against the Procter Field. The game will be played at 3:00. The Mustangs will enter the series at 2-2-0. The Mustangs would be a fine double header in a fine double header in a fine double header in a fine double header in a fine double header in a fine double header in a fine double header in a fine Carter criticized
ASI at Washington meeting

BY DEBBI WARREN
Daily Chief Writer

The Center for the Study of the Presidency's 11th annual conference was attended by two senior political science majors who represented Cal Poly. Neal Meyers and Chris Weisshuhn spent April 11, 12 and 13 at the Washington conference, "The Presidency and Priorities for the '80s."

The goal of the conference, ASI internal affairs assistant Meyers explained, "was to inform the students and make the students think about a lot of issues, specifically the presidency."

He said about 400 universities were represented at the conference by some 700 students, mainly from the East, and estimated there were 15 students from the West Coast.

Meyers and Weisshuhn applied to attend the conference through the political science department. Applicants were judged on leadership, academic achievement and interest in the subject.

The pair paid $140 each from their own pockets for improvement, thus making the steel industry "very inefficient," Meyers said another point made by most of the people at the conference was," if anything, we're a little bit behind the Soviet Union in military power."

"Now that we're pretty much one to one with the Soviet Union, they can test us, like with Afghanistan. We're in no position to push an issue," Weisshuhn said.

"Everybody was taking a pretty conservative stance on fiscal policy," Weisshuhn said.

"The press was the most critical about Carter," she added.

"All of them agreed that as far as they're concerned things are as bad as they're going to get," he said.

"Our political system is creating a situation where there is self-interest rather than national interest," Meyers said, attributing this to a lack of leadership.

He said the conference "put a lot of questions in my mind."

Weisshuhn concluded, "There are no cut-and-dried answers."

Author directs Cal Poly play

The roles have been cast and rehearsals are under way for an adaptation of "Cinderella" both written and directed by a guest director from San Jose, who is teaching at Cal Poly this quarter.

Gayle Cornelison, the executive director of the California Young People's Theatre, said "It's coming along really well."

He said five of the eight parts in the play are held by students with only high school experience, but they are already showing remarkable improvement. The other three parts will be played by students with some previous theatre experience at Cal Poly.

Cinderella in the play will be portrayed by Marcelle Allgaier, who is a sophomore business major in her first role at Cal Poly. Russell McBrinn will play the part of Prince Roland, Tara Andrews will be the stepmother and Tiffany Workman will be the godmother.

Cornelison's Cinderella, a version adapted from the German script, is scheduled for one evening and three afternoon showings on May 22, 23 and 24.

Tickets for the play, which is sponsored by the speech and drama department, are $1 and will be available May 12.
