Golden Gate spans building

The Golden Gate Bridge, along with about two dozen architectural phenomenons, will be a display in the main patio area of the Architecture and Industrial Design building. The Pol Royal project of models of famous structures is a refined effort of classes and individual volunteers.

Architecture major Jay O'mano was one such volunt-
er. "I was just asked to help out," O'mano said. "There were supposed to be twelve of us working on it but only four have spot.

The bridge will span the models walkway.

The hardest part in building is where to get the parts," Lamasano said. "We will use a lot of glue on what we have.

Another project in the display will be a scaled-down model of Stonehenge. Dr. Alan Cooper's design class volunteered to build the model in lieu of lab this week.

One student said that the class chose Stonehenge because it was the easiest to build. Those hours of work and eight Kawasaki motorcycle boxes later, the class was still struggling with the model.

A replica of the section of the Great Wall of China, near the Chu-yung-kiw Pass, guards the entry to the Architecture Building.

The wall has been under construction since Monday and, it is hoped, it will be completed by Friday morning.

The display will include replicas of the Eiffel Tower, St. Peter's Church, the Acropolis, the Taj Mahal, the Hanging Gardens of Babylon, King Tut's tomb and the Great Pyramids.

Royal craft sale to have variety

A variety of handcrafted items will be offered for sale at the Pol Royal craft sale.

The sale will be held in the Cal Poly Crafts Center on Friday and Saturday, April 25 and 26, from 10 a.m. to 6 p.m. The Crafts Center is in Room 111 of the University Union.

Most of the items to be sold are student-made. Ceramic, stained glass, leather goods, and silk screen art are among the crafts to be represented in the sale.

Dr. Siebert does not feel comfortable about being the only Safeguard dentist in the area or by the possibility of being swallowed by a possible 1,800 Cal Poly faculty and staff members, he said.

"We handled large groups before," said Siebert. "There is not a problem with our backlog. The number of people that need immediate care is really quite small.

Siebert also mentioned that he has three or four assistants who handle a large number of people.

"We have a large facility. We have the necessary facilities to handle a large number of people."

"We have a large facility. We have the necessary facilities to handle a large number of people."

Ron Brendzel, administrator for Safeguard, also feels that Safeguard and doctor Siebert will be able to handle those who sign up for the dental program.

"The thing to remember is that the plan is voluntary. The statewide average membership for this type of program is as low as 3 percent and as high as 10 percent. We expect 10 percent of enrollment, 180 families is no problem," Brendzel said.

He added that Safeguard is prepared, just in case more people enroll than expected.

"If there is more enrollment we will add another dentist," he said. "Chances are we won't get those extras.

Panel to discuss Jarvis II

The San Luis Obispo Social Services Coordinating Council is hosting a presentation to discuss the impact that passage of Proposition 9 (Assembly Joint Resolution No. 11) would have on public health, public assistance, and social services.

Dr. Merna McNamara, SSCC chairperson, will moderate the discussion. The five panel members will be Geraldine Doye, League of Women Voters; Carol Dagle, legal counsel for the San Luis Obispo County Employees Association; Dr. Howard Mitchell, San Luis Obispo Health Agency director; Frank Schmidtle, Lucia Mar School District personnel director; and Randi Jarnell.

The presentation will be in the Veterans Memorial Building on Tuesday, April 29 at 7:30 p.m.
Huff vs. apathy

The ASI presidential race this year is shaping up to be a tooth and nail contest—between candidate Willie Huff and student apathy. So far, it seems apathy is winning. It's an old story now: ASI pleads for student involvement, students bicker about unfair treatment, and little happens thereafter. That only one student wished to run for ASI's top office reflects what students really think about participation.

What it implies is students don't care about ASI decisions and would rather not be bothered by them. This is what candidate Huff must contend with—finding what makes students interested.

The mission isn't easy. For three years the ASI has been incapable of providing leadership necessary to rally student opinion. It would be easy to blame students in general for the situation, but student apathy is not reflected. ASI presidents must be easily recognizable, their policies known.

If ASI opinion is to be taken seriously, strong student agreement must be shown.

To garner such support, it is necessary for the president to hold forums, speak at ASI-sponsored events and participate in activities. Student awareness of issues and activities, through press releases if necessary, must be increased dramatically.

Issues, such as fair rent or improved housing, need attention. -ASI-student relations must be improved. This is where ASI should be best but unfortunately ranks worst; student opinion is not reflected. ASI presidents must be easily recognizable, their policies known.

If ASI opinion is to be taken seriously, strong student agreement must be shown.

Minority students have not leveled charges of blatant, across-the-board prejudice at students, faculty or administrators. What they have charged is we are asleep. What upsets the minority students is not that black, chicano, Asian or other minority persons were not shown on the posters, programs and generally from consideration in any type of planning.

Student awareness of issues and activities, through press releases if necessary, must be increased dramatically.

Poster problems

You blew it again.

That is what ethnic minority students pointed out to Cal Poly when they protested Wednesday in the University Union Plaza.

The demonstration was prompted when it was realized the 1980 Poly Royal poster had no minority representation.

What upsets the minority students is not that black, chicano, Asian or other minority persons were not shown on the poster. Their main complaint is against the lack of awareness that leads to omission of minorities from posters, programs and generally from consideration in any type of planning.

Minority students have not leveled charges of blatant, across-the-board prejudice at students, faculty or administrators. What they have charged is we are asleep.

For the sake of the majority as well as for ethnic minorities, the voice of ethnic students should be heard. Understanding the many cultures that make up the American lifestyle is vital to our living peacefully, as one society, in the coming years.

Mental Vagrancy

By Manuel Luz

HEY TOM—you know, there's only ONE THING THATS KEEPING ME FROM BECOMING A GENIUS.

YOU BLOW IT AGAIN.

MINORITY STUDENTS HAVE NOT LEVELLED CHARGES OF BLATANT ACROSS-THE-BROAD PREJUDICE AT STUDENTS, FACULTY OR ADMINISTRATORS. WHAT THEY HAVE CHARGED IS WE ARE ASLEEP.

WHAT UPTSET THE MINORITY STUDENTS IS NOT THAT BLACK, CHICANO, ASIAN OR OTHER MINORITY PERSONS WERE NOT SHOWN ON THE POSTERS, PROGRAMS AND GENERAL FROM CONSIDERATION IN ANY TYPE OF PLANNING.

Bass fishing Amador Lake

BY BOB BERGER
Daily Outdoors Writer

"Hey, are they all this big in here," shouted Cal poly student Joe Angello as he hefted an 11-pound, 11-ounce bass out of the bottom of his boat. A state game warden called back with a smile, "No."

Angello landed his huge bass at Lake Amador while on spring vacation. The 11-12, as they often do on the lake now, refer to Angello's fish, a record at what is probably the hottest bass lake in the state.

Nestled in the hills of the historic Mother Lode, near the small gold-rush towns of Amador and Detour, Lake Amador is a small body of water that, until lately, has often been overlooked by uninformed fishermen. Amador is surrounded by three large lakes that usually get all of the publicity. Until now.

"In the last month the lake has turned out 20 bass over 6 pounds," said Bob Lockhart Jr., lake manager. Four weigh-ins the sizeable bass, with water temperatures in the 70s, have been best early in the year, asвезаме many specimens grown to six and nine-inch begins to take fish.

The top fishing spots on the lake area the Jackson Creek arm, Rock Creek and the spillway area of the dam. Angello said his fish, known as the "Pacific strain," were taken off the dock, however, while the fisherman was waiting to rent his boat.

Lockhart has 15 boats for rent with four horsepower motors and a half dozen with six horsepower rates range from $20 a day for a boat with motor and $12 an hour for a boat without motors go for $12 and $6 a half day.

There is a $2.25 fee for rental, with a $5.25 boat launching fee. Also, there is an additional $1 per day fee per angler.

For those prospective anglers who feel that it would be fun to try the bass lunker: Angello had never fished Amador before, he had never really fished a four-pound, six-ounce fish, it would be a dream come true. He rented his boat and caught his bass on the first day of the season.
Romantic elephants on display

BY MARY KIRWAN
Daily Staff Writer

Romance, in a very unusual form, will be displayed by Dr. Jacob Feldman’s structural engineering class for Poly Royal.

Two human-sized elephants, the male made of velvet and the female of wood, will be on display today in the Engineering West A-Lab.

Ten students are in the delicate process of constructing a female companion, out of three-inch-long wooden sticks for the gray velvet costume elephant, made a year ago. The students chose to construct an elephant for their structure project because Feldman said he has a “thing for elephants.”

The students began the project April 14 and Feldman estimated the completed project will have taken 150 hours, with each student putting in about 15 hours of work.

Feldman said he is not helping the students with the project. “I’m just serving tea...”

Construction of the beast consists of 8,000 toothpick-sized pieces of wood stuck together with hot glue. Materials, contributed by the students, cost $30.

“The thing is more of a joke. It’s a celebration for spring; that’s why the two are courting,” Feldman said of the elephants.

Feldman said the two lovers will be posed with the female lying on her side and the male sitting on her lap and trunks intertwined.

The students named their creation “Polyderm,” “Poly” for Poly Royal and “derm” from “packaderm,” meaning elephant.

The female will be without tanks and wear a wreath of flowers.

Feldman said he developed a fetish for elephants 18 years ago when he spent two years in Africa with the Peace Corps.

“I like them because of their strength and gentleness,” he said. Feldman since has become a collector of elephant art. He has numerous pictures of the animals about his home and said he has an elephant pillow he sleeps with. Recently, he received an elephant hot-water bottle as a gift.

After Poly Royal, Feldman plans to take Polyderm home and place her alongside her mate, “Elepante Elegante” in his living room.

The students named their creation “Polyderm,” “Poly” for Poly Royal and “derm” from “packaderm,” meaning elephant.

‘How to teach sex’ book on view

A preliminary copy of a new resource book elementary and secondary teachers titled Educo: Human Sexuality will be available for public review at the Instructional Materials Display Center in Room 600 of the library through April 25. The book has created wide interest and is being cited by the California State Department of Education, who points out that the book is not a classroom textbook, a resource for teachers.

IMDC hours are Mondays to Thursdays, 7:30 a.m. to 10 p.m.; Friday, 7:30 a.m. to 5 p.m.; Saturday, 8 a.m. to 10 p.m. and Sunday, 1 p.m. to 10 p.m.

Today’s highlight in history:

Today is Thursday, April 24, the 115th day of 1980. There are 251 days left in the year.

Today’s highlight in history:

On this date in 1898, United States sailors and marines landed at Guantanamo Bay, Cuba.

Also on this date:

In 1704, the first American newspaper printed regularly—the Boston News-Letter—was published for the first time.

In 1877, federal troops were ordered out of New Orleans, ending northern rule in the post-Civil War South.

In 1916, Ireland’s Easter rebellion broke out in Dublin.

In 1947, Russian cosmonaut Vladimir Komarov was killed when the parachute-equipped spacecraft got tangled during the landing attempt.

Ten years ago, Nationalist Chinese Premier Chiang Kai-shek, the last Chiang, escaped assassination attempts in his native China.

Five years ago, people died in a terrorist attack by the West German paramilitary, the Red Army Faction.

History today

From The American Press

Today is Thursday, April 24, the 115th day of 1980. There are 251 days left in the year.

Today’s highlight in history:

On this date in 1898, Spain declared war on the United States, after receiving an American ultimatum to withdraw from Cuba.

Also on this date:

In 1704, the first American newspaper printed regularly—the Boston News-Letter—was published for the first time.

In 1877, federal troops were ordered out of New Orleans, ending northern rule in the post-Civil War South.

In 1916, Ireland’s Easter rebellion broke out in Dublin.

In 1947, Russian cosmonaut Vladimir Komarov was killed when the parachute-equipped spacecraft got tangled during the landing attempt.

Ten years ago, Nationalist Chinese Premier Chiang Kai-shek, the last Chiang, escaped assassination attempts in his native China.

Five years ago, people died in a terrorist attack by the West German paramilitary, the Red Army Faction.

Human Sexuality

The book has created wide interest and is being cited by the California State Department of Education, who points out that the book is not a classroom textbook, a resource for teachers.

Fourteen years ago, a nucleus of professionals gathered together in the purpose of providing superior ideas and technical assistance to the world of aerospace and electronics. This purpose has been realized, affording an ovenavailed reputation to the scientific community. Creativity, reliability, integrity and professionalism are our hallmarks, a reputation that you can be a part of through this career opportunity.

As a Flight Systems, Inc. Computer Programmer, you will coordinate the utilization of a small computer system between several users. In addition, you’ll define and maintain software for record keeping and data analysis. Additionally, you’ll be responsible for generating and verifying administrative reports.

To qualify, you’ll be required to possess knowledge of BASIC programming language and hold an AA in Computer Science or any equivalent combination of education and experience. The individual we select will carry out assignments at our Ventura area facility. We provide our people with an excellent salary and outstanding employee benefits which include: comprehensive group insurance, retirement plan, paid vacation and profit sharing. Apply by sending your resume and salary history in confidence to: Margio Thomps...

Recently, amid the ear-shattering pound of a jackhammer, Norm Johnson spoke of the complex system of cables under the Poly campus.

Johnson, supervising equipment technician for the audio-visual department, said the underground electrical cables carry 12,000 volts.

"They could literally blow the head of a manhole," But students needn't worry, he said. The cables are safely buried two to four feet below the ground's surface, and are consistently checked and maintained by trained technicians of the planning operations department.

The electrical cables run next to those cables. Johnson is responsible for the signal cables.

The signal cables are used to operate computers and computer terminals; instructional television and fire alarm signals.

Installed by the audio-visual department, the signal cables are "the state of the art," said Johnson.

Additional computer cables recently installed are capable of handling both voice and data signals. These "co-axial" cables are gradually being used to replace the less complex multi-pair cables, which can only handle a few terminals.

"We have about five to six miles of cables on the campus," he said.

The signal cables are surrounded by four-inch diameter polyethylene pipe, encased in three or four inches of concrete. They are connected, or spliced, inside concrete underground storage areas, accessible by manholes. The manholes are located near buildings, and direct connections run from the manhole to systems inside the building.

Cables are also connected to various systems-testing areas set up by the audio-visual crew. Here, the systems are tested for faults, television amplification, and audio feedback. Everything is correct prior to the cable being put into use.

Johnson said he feels the signal system greatly affects the lives of students.

"We live on the brink of the computer age," he said.

The increased amount of information available to students, with decreased time, is really an advantage.

He also said students will feel safer knowing the signal system exists. A complex system within the signal cables notifies the public safety department instantly if fire breaks out in any of the campus buildings, including the dorms.

Johnson is somewhat concerned about the effects of Proposition 9. Johnson said additional temporary employees will probably be hired for the summer. Student labor will be needed for the work created by the Robert E. Kennedy Library. Communication systems will be installed in the library, including computer terminals for students and inter-library services, as well as extensive instructional television.

Other future projects will include expanding the signal system on the south side of campus, a new radio system for the Public Safety Department, and additional television aids for classrooms.

Thanks to Terry Tracy, left, and Ann Wessel.

Computer course offered

Half-unit professional-credit course is $18.75, which includes lunch.

Pre-registration is required by April 25. Call 546-2053 for more information.

Six miles of cables link campus

"After composing the Ninth Symphony, I wouldn't need of celebrating with any other beer but Grenzquell." – L. V. Beethoven

Grenzquell is a premium beer with a rare German particularly true. Its, they value Grenzquell as highly that they are a specialty beer. Over 50 years of experience in the art of creating a fine natural beer has given Grenzquell a rich velvety flavor. A beer that is so good you will find that this day is, indeed, special. And Grenzquell is available in a superb dark Pilsner as well.

So the next time you're looking for a really special beer, try Grenzquell. If you're a regular customer, Grenzquell. Beethoven certainly would have approved.

Ballard Canyon Wines are available at these selected outlets:

Cork 'n Bottle
Wine Street Wines
Spyglass Liquor & Deli
Sun Lakes Bay Inn
McLintock's

LEADVILLE, Colo. (AP) – Too shy to find a match for the prom? A high school computer dating service promises to take the "hassle" out of finding a match in the mountains, said a representative of the school computer dating service.

"How much do you plan to spend on a date? "How long do you plan to stay out?"

The "matched dates" will be notified by a slip of paper two weeks before the May 10 prom.

20/20

Boycott destined to fail

BY TOM JOHNSON
Daily Sports Editor

The U.S. hockey team's stunning victory at Lake Placid this winter proved to be much more than just another entry in the Olympic history book, but a source of inspiration and pride for the American people. Americans, at least for a short time, could put away their problems and revel in the accomplishments of these modern-day Davids.

But all the joyous and sorrowful times so poignant for Americans in the Winter Olympics will not be when the nations of the world converge at Moscow for the 1980 Summer games. For as even the casual media follower must know, the United States Olympic Committee, which has been under the thumb of President Carter, declared April 17 that the United States will not send athletes to Moscow. This will, apparently, somehow avenge the Soviet invasion of Afghanistan.

Many arguments, most of them emotional, have been advanced. They present a good case for why the United States should not boycott the Olympics. But all such emotional pleas have fallen on the deaf ears of Carter and the USOC. However, there is one argument that the president can't turn his back on, one that he cannot ignore: the boycott will simply not work.

The stated purpose of the Olympic boycott is to make a symbolic statement condemning the Soviet invasion of Afghanistan. But by not competing in the Olympics, the United States does not make a positive statement against the Russians, but rather makes a non-statement.

To make a worthwhile statement against the Soviet invasion, the United States must use the Olympics as a stage to act out their displeasure with the Soviets’ actions in Afghanistan, not climb on its soapbox and hope the Russians can hear the protest all the way from theeventId in Afghanistan, not climb on its soapbox and hope the Russians can hear the protest all the way from the

world. The Soviet Union has demonstrated that it will not sit down and listen to platitudes. The United States does not make a positive statement in the Olympics by using our Olympic athletes as a pawn, the statement must be made at the Games itself not by a boycott. Carter should follow the suggestion of the late Jesse Owens, who advocated that the American athletes wear armbands, refuse to participate in the opening and closing ceremonies, and not accept any medals.

If the United States followed the recommendation of Owens, an equitable compromise would be reached—the American athletes could attend their goal of competing in the Olympic Games, which was reached in 1960. The United States could make the strongest condemnation possible of the invasion of Afghanistan.

Lastly, the Palestinians used the 1976 Montreal Olympics as a grisly showcase of their anti-Zionist views. The United States considered not sending athletes to the 1936 games when it became obvious that Hitler was going to manipulate the Olympics to make a show of Nazism, but the United States stole his thunder by completely dominating the Games.

If the United States must make a statement against the Soviet invasion by using our Olympic athletes as a pawn, the statement must be made at the Games itself not by a boycott. Carter should follow the suggestion of the late Jesse Owens, who advocated that the American athletes wear armbands, refuse to participate in the opening and closing ceremonies, and not accept any medals.

If the United States followed the recommendation of Owens, an equitable compromise would be reached—the American athletes could attend their goal of competing in the Olympic Games, and the United States could make the strongest condemnation possible of the invasion of Afghanistan.

The Cal Poly women's tennis team, undaunted by rain which washed out the last doubles match, poured it on against cross-town rival Cuesta College Tuesday, whipping the Cougars 7-1.

The Cuesta match proved to be a warmup for this weekend's Ojai Valley Tennis Tournament which begins today and runs through Sunday. Four Mustangs will be making the trip to Ojai, including Weigandt, Anderson, Kobara and Wilden.

The Mustangs had little problem dispatching the Cougars, as no match went beyond two sets. Cuesta's Michelle Archuleta pulled the only major surprise, edging Cal Poly's third seeded Liz Kobara 6-4, 6-4. Mustang's Reese Weigandt pumped up the crowd by winning every point. The Mustangs had little problem dispatching the Cougars, as no match went beyond two sets. Cuesta's Michelle Archuleta pulled the only major surprise, edging Cal Poly's third seeded Liz Kobara 6-4, 6-4.

Weigandt and Anderson teamed up to sink the Cuesta tandem of Samson and Archuleta, while Cougars Perras and Vanharrevelde were forced to forfeit to Meredith and Jakobson. Cal Poly's Kobara and Wilkins are the first two teams to be defeated, Grant and Calvert held rain-halted play.

Advanced Micro Devices will be on the Cal Poly campus May 5, 1980. Contact the Career Planning and Placement Center for more information.

ADVANCED MICRO DEVICES
BUDGETARY SICKLE THREATENS SLASH SPORTS' FUNDS

Under the new budget, the school's athletic teams will have to perform in the NCAA and qualify them for postseason play.

"With high inflation, the cost for maintaining a team is going up," said Coach Buconna. "The same amount of money that we had last year is a hard time holding on to," he said.

Buconna is the man who recommends whether a team will be funded or not and he has stated that unless ASI allocates a minimum of $500 to each team season next year, he will not recommend those teams be funded. The ones who get hurt in these times are the athletes said Assistant Coach Paul Cutino.

"The players get a poor deal because they don't know if the program will be around next year," Cutino said.

"It (sports) should be a learning experience for the athletes. Without the funding, the dedication is just not there. Players need goals and challenges to strive for. They have to have the desire to play," Cutino said.

Another problem for the athletes if they cannot compete in NCAA post season play, is their chance to be judged as All-Americans. Mark Johnson, coach of the swim team, said he will quit if his team does not get funded next year. "I'll quit," said Johnson. "I won't coach if the team doesn't get funded next year."

Holding winds blow out stadium

When the wind blows in like a jet stream and combines with San Francisco's chilly summer air, the resultant conditions would make Adaline Byrd put in for a provision. Games have been suspended because of fog.

Candlestick has undergone renovations over the years, the most notable being the enlargement to accommodate football's San Francisco 49ers in 1972. But just because it is a good experience does not mean it is the easiest. Mark Johnson, coach of the swim team, said "It is the goal of our team to be around the nation's top 15 in the nation this season." Ken Peet's tennis team finished with a 3-2 conference record and placed second in the NCAA conference tournament. He has two players invited to the NCAA national championships.

It was the general consensus of the coaches, who have their budgets cut that their teams have young and enthusiastic players that hope to play next season. The coaches said their teams have the will and desire to compete if the school is willing to give them the necessary $100 funding.
Stress program
Health Center personnel can help students suffering from stress. Make an appointment anytime from 2 p.m. to 5 p.m., Mondays through Fridays.

Fusion speech
Dr. Adrian Smith of PG and E will speak on "An Overview of the Current U.S. Fusion Program." on April 24 in EE-140, 11 a.m. to noon. Admission is free; refreshments will be served.

Business frat
A meeting is planned to organize a San Luis Obispo chapter of the national business fraternity, Delta Sigma Pi, on April 28 at 11 a.m. in Fischer Science, Room 292.

Greek barbeque
Alpha Phi sorority and Sigma Pi, on April 28 at 11 a.m. in Fischer Science, business fraternity, Delta chapter of the national organization of Poly Royal workforce at 11 a.m. in UU 217-D on April 24.

Stress prevention workshops
The American Welding Society will have a mandatory meeting for all engineering technology/welding majors for the organization of Poly Royal activities on April 24 at 11 a.m. in the welding department.

SLO Seabrook
The SLO Friends of Seabrook will host a Stop-the-Nukes Coffeehouse at the Dandelion Wine Broke Co., 738 Higuera St., San Luis Obispo, on April 25 from 7:30 p.m. to 11:30 p.m. Price for the evening of music, poetry and a short presentation is $1. Childcare is provided.

Arab students
Arab Students will meet on April 24 at 11 a.m. in UU 217-D to discuss plans for Poly Royal.

Norma Rae
ASI Films will show the academy award-winning Norma Rae on May 4 in Santa Rosa Park. Price is $3. Benefits go to the American Heart Association. There will be many activities for all ages.

MECHA
M.E.C.H.A. plans a meeting to coordinate the Poly royal workforce at 11 a.m. in UU 217-D on April 24.

Craft Center
The Craft Center in the UU offers mini-workshops: one day, 2-3 hours workshops in several crafts. Details are available at the center.

Newscope
Welders
The American Welding Society will have a mandatory meeting for all engineering technology/welding majors for the organization of Poly Royal activities on April 24 at 11 a.m. in the welding department.

Yearbook sale
Yearbooks will be on sale this week in the UU Plaza from 11 a.m. to noon for $12.50.

Folk dancers
The Latter Day Saints Student Association is sponsoring a performance by the B.Y.U. Folk Dancers, who are internationally known. The evening starts at 8 p.m. in the Main Gym on April 30, the public is invited. $2 per person; $5 per family.

Sun bowl
Recreation 424 is sponsoring Recreation Sunbowl in Mustang Stadium on April 29 from 1:30 p.m. to 3:00 p.m. Ultimate frisbee and volleyball are open to all recreation majors.

Birth control
The Economic Opportunity Commission is now offering classes in natural birth control to assist you and your partner in planning or preventing a pregnancy. Call 544-5478 for more information.

McKay's Bookstore
Special order books faster, easier at no extra charge.

To Kill A Mockingbird
The American Academy of Dramatic Arts will present the stage adaptation of "To Kill A Mockingbird" at 7:30 p.m. to 11:00 p.m. in the Dandelion Wine Brook Co., 738 Higuera St., San Luis Obispo, on April 25 from 7:30 p.m. to 11:30 p.m. Price for the evening of music, poetry and a short presentation is $1. Childcare is provided.

Norma Rae
ASI Films will show the academy award-winning Norma Rae on May 4 in Santa Rosa Park. Price is $3. Benefits go to the American Heart Association. There will be many activities for all ages.

Norma Rae
ASI Films will show the academy award-winning Norma Rae on May 4, 2 p.m. to 5 p.m., in Chumash. Price is $3. Also, on April 28, To Kill a Mockingbird will be shown free in Science E-27 at 7 p.m.

Birth control
The Economic Opportunity Commission is now offering classes in natural birth control to assist you and your partner in planning or preventing a pregnancy. Call 544-5478 for more information.
