R-1 zoning may change
California Supreme Court to rule on zoning

BY MIKE CARROLL
Daily Staff Writer

The controversial R-1 city zoning ordinance—allowing no more than three unrelated people to occupy the same residence—may be affected by an upcoming California Supreme Court ruling.

The case of Santa Barbara v. Adamson, involving an ordinance similar to the San Luis Obispo R-1, could affect all similar laws in the state, said defense attorney Benjamin Bycel.

Godfrey Grote, the legal assistant to San Luis Obispo’s city attorney, said there is reason to believe the Adamson case will strike down many city zoning policies in California.

The R-1 zoning law is inequitable, Grote said, because a family or relatives living in a R-1 district could have a greater impact on a neighborhood than a group of unrelated occupants.

A decision favoring Adamson would restrict San Luis Obispo’s ability to designate who can occupy a dwelling in a single family zone, Grote said.

Half of the city’s residential areas are designated as single family zones, said San Luis Obispo Associate Planner Dan Smith. Smith said the restriction on the number of unrelated people per house was not consistently enforced until last year, leading to the numerous complaints by R-1 residents made enforcement necessary.

The long case began three years ago when Santa Barbara brought a suit against homeowner Beverly Adamson for living with 13 unrelated persons.

Santa Barbara has an ordinance that prohibits more than four unrelated individuals from occupying a single housekeeping unit.

Santa Barbara Superior Court and the Court of Appeals both upheld the city’s right to make Adamson comply with the zoning ordinance, and the case went to the California Supreme Court.

The court heard the legal arguments in January and is expected to render a decision on April 7, said Benjamin Bycel one of Adamson’s attorneys.

Bycel said the Court was required to make a ruling within 90 days of hearing the case, but the Court justices simply “do whatever the hell they want to do.” There is now no way of determining when a ruling will be made, he added.

Bycel said his case against the present R-1 zoning codes was based on his client’s right to privacy and the right to equal protection.

He argued that Adamson should be able to select with whom she or he wants to live, regardless of the relationships between them, and law should not determine who occupies on the basis of their relationship to each other.

Santa Barbara and Adamson’s attorney expressed optimism about the outcome of the case, saying his chances of winning were strong.

But a decision which favors Adamson may be hindered by a 1974 Supreme Court case, Bycel said. He referred to the decision rendered in Village of Belle Terre v. Boraas, which allows cities to use their police power to prohibit more than three unrelated persons from living in a single family dwelling to resolve parking or noise problems.

Bycel contended, however, the Belle Terre case does not relate to state law. He said although states could not take away rights guaranteed by the federal government, states could still grant freedoms that expand the federal guarantees, such as a less restrictive zoning code.

The attorney also said the police power the state has to protect the public’s health, safety and welfare should not restrict the number of unrelated persons in each house.

So there is no deeper estimate about the outcome, Bycel said he fears the Adamson case may result in a “Battle of the States” where one will be fragmented and difficult for city officials to understand and enforce.

Mayor: R-1’s illegal

San Luis Obispo Mayor Lynn Cooper said he supports the decision to eliminate the portion of R-1 zoning which allows no more than three unrelated persons to live in one house.

"This was voted on before I took office," said Cooper. "I do not feel the city’s ordinance is to control the expansion of student populations or to regulate the number of residential areas of the city."

"I think it’s illegal...because I don’t feel that the city has the authority to regulate the relationship of the people who live in a house — in essence that’s what this court is doing," said Cooper.

Evans comments on recession

BY CHERYL JOHNSON
Daily Staff Writer

Americans will see a minor recession as a result of slowing inflation pressures, Rep. Leon Panetta (D-Carmel Valley) said during a press conference at his San Luis Obispo office Saturday.

Panetta’s observation was in response to a question on his opinion of recent news reports that unemployment figures rise above the seven percent mark during the last reporting period.

Panetta cautioned, however, that it would be wrong to overgeneralize for higher unemployment figures by increasing government spending and programs because that would further feed inflation.

Due to high interest rates and agriculture’s dependence on the market, Panetta predicted there would probably be a loss of a large number of family farms, despite $4 billion in additional emergency assistance that is currently available to farmers.

"Higher prices for farm products will be the ultimate snare," Panetta said.

About Howard Jarvis’ recent attack on the city and county of San Luis Obispo and Cal Poly as reported in the Poly Royal and Mustang Daily, Panetta said Jarvis’ comments hurt the chances of Proposition 9 passing.

"Those people trying to look at the substance of the issue are going to be turned off by the demagoguery," said Panetta, who added that Proposition 9 is not an easy issue on which to vote since the full effects of Proposition 13 have still to be felt.

"Jarvis’ basic interest, Panetta notes, is to make headlines."

A national park concept does not fit Big Sur, Panetta responded about California senator Alan Cranston’s proposal to pass control of Big Sur’s 150,000 acres to the U.S. Forest Service and the Department of Agriculture.

"It could increase the amount of tourism and impact on the area to a serious degree," Panetta warned.

A better approach would be to provide a coordination of management between the forest service and state and local governments, Panetta maintains.

Federal assistance could be used to help purchase the needed areas, but control should be left in the hands of the city and the county, Panetta reiterated.

Addition would be introducing a motion to that effect within the next ten days.
Opinion

This year the ASI elections have been little different than previous years. The platforms—increased student awareness, frugality in spending and better relations with the city—have been heard before. But considering all arguments, we believe Nick Forestiere is the best vice presidential candidate with reservations.

While opponent Ted Sanchez offers sincerity and easy-going style, his experience at Cal Poly and in the ASI is shallow. He's a student senator but has had little other ASI experience. Sanchez himself admits he ran because there was only one other vice presidential candidate.

Forestiere has worked within the ASI for about two years, as Finance chair and member of the Instructionally Related Activities Committee. He is enthusiastic and open to student input, and would bring to ASI knowledge of the administrative system.

But Forestiere is not the cure-all to student-ASI apathy or ASI excesses. Simply because he is from within the system, Forestiere must be watchful of succumbing to tradition; that is, he must be mindful of constituents' issues when such issues are money-subsidized.

What Forestiere has most to offer is a good working relationship with lone presidential candidate Willie Huff. Inability of the two highest student officers to work cohesively resulted in inactive, and apathetic, leadership this year. It was reported by one vice presidential candidate that inter-office squabbles caused President Rose Kranz and Vice President Jeff Ladd not to communicate on occasion. That is intolerable in student government. Huff and Forestiere, former roommates, should work well together.

That's good news for the students because some of the problems they will face need quick attention: increased student awareness of issues; making themselves and their policies known; improving relations with the city. The task isn't easy—it means sloughing off ingrained perceptions of the ASI. It means appearing in front of students for support—a few minutes before the start of ASI events will do. It also means attending city council meetings.

For the year ahead, it seems apparent we need the experience and eagerness Forestiere will bring to the vice presidency.

A good shock

Editors:

Is the Poly Royal poster really a "legitimate expression of discrimination" as expressed in the article on the poster burning? I suspect it isn't. Rather, I think it is a form of veiled protest at Cal Poly which hasn't yet shown any real "transition time through"

Before we go accusing the poster designers of racism I think we should give them the benefit of the doubt, or else we'll be rejudging ourselves. You don't

conquer prejudice with prejudice.

Prejudicial discrimination is apparent enough in education, housing, employment, etc. Most of the time, such discrimination is subtle and we are unaware of it (especially if we're caucasian!). Thus, demonstrations of increase awareness of our problems are both necessary and commendable. The administration and the rest of Cal Poly probably needed a good shock. But I assume prejudice where there is no clear evidence of it (e.g. the Poly Royal poster) hurts us all more than it helps.

Michael Ramsey

Pushing student ballots

ASI is giving students a chance to tell them where to put it.

As described in the General Revenue Sharing Bill, passed by the student senate on March 12, students will be able to direct $1 of their $20 ASI activity fee to the student organization of their choice.

The direct budget allocation will be included in the ASI general elections today and Thursday.

As the bill states, the plan was designed to encourage more students to vote, and to institute a budgetary process that is more representative of student interests.

Not only will General Revenue Sharing allow students to decide the destination of $1 of their fee, but, according to the bill, it will "challenge the ASI Finance Committee’s assumptions as to which groups students value."

That is, by allocating one dollar to a group, the student senate will use the General Revenue Sharing plan as an indication of student’s priorities.

The plan is to provide a budget for a group, with the student senate voting on its budget. The group then spends the money to current ASI needs.

Backpack theft can be prevented

BY DEBORAH TUCKER
Backpack thefts on campus are a problem, but students can protect themselves through education, according to detectives Wayne Carkam and Myra Sheehan of the University Police Department.

One of the biggest problems in preventing backpack theft is the parks accessibility, according to the detectives. Backpacks stored in open cubicles are especially alluring to a thief, they said.

Out of 28 backpacks that were reported stolen in four months at Cal Poly, the total (monetary) loss was $3,122. Of that total, $1,705 was taken from the dining hall, $1,167 from the bookstore and $250 from the snack bar.

To alleviate this problem, the officers suggest that students use the lockers provided in El Corral. They also suggested that students take their backpacks into the dining hall with them, since it is not required to check backpacks before entering the cafeteria.

Drug trade in Aspen is reported.

Aspen, Colo. (AP) — Tucked up the Roaring Fork Valley 180 miles west of Denver, Aspen has always been a town where you could go to get away from the rest of the world.

For quite a while, now, state and federal authorities have considered it also a place where people can escape the drug laws enforced elsewhere in the nation, a place where cocaine and other drugs are transferred and distributed.

And for almost as long, the authorities have objected to the activities of Pitkin County Sheriff Richard Kienast, a philosopher turned lawman who has refused to cooperate with undercover narcotics investigations.

For six moths, a federal grand jury in Denver heard testimony about Kienast's department and allegations that the sheriff deliberately tipped drug dealers to an impending federal raid in the area.

The grand jury was believed to be investigating the entire sheriff's department and the sheriff's officers. Last week, it indicted a former deputy on charges of distributing cocaine.

FBI Special Agent Cliff Browning said the investigation would be renewed with another grand jury within the month.

"You don't expect me to give up," Browning said. "That's just the beginning."

Aspen's beautiful backdrop for such an ugly battle.

The Victorian frame homes of its mining era had no way of knowing what government mandate was behind the surprise raid.

Sheehan, a veteran of the university police force, reports her department has lost the records of some of the alleged backpack thefts.

Sheehan suggests that the student body not return another way to recover his or her backpack.

"It is apparent that there is a new breed of students in Aspen."

Drug trade in Aspen is reported.

Three years ago, when he took the job at the county jail, Kienast, a tireless worker, was the subject of a police raid on his house.

Kienast, a tireless worker, was the subject of a police raid on his house.

The raid was called "a massive, four near drug bust in which 120 pounds of cocaine, heroin, marijuana, and other drugs were seized."

In a press conference, Kienast said the raid was called "a massive, four near drug bust in which 120 pounds of cocaine, heroin, marijuana, and other drugs were seized."

"It was a beautiful backdrop for such an ugly battle," Kienast said.

The investigation led to the arrest of 15 people and the seizure of more than 110 pounds of cocaine, 10 pounds of heroin, and 200 pounds of marijuana.

"You don't expect me to give up," Browning said. "That's just the beginning."

ASII ELECTIONS TODAY

YOU TELL ASII WHERE TO DIRECT YOUR ASII FEES

REVENUE SHARING

This year as part of the ASII elections, you can direct 5% of your student activity fees to the club or organization of your choice. Simply by writing your club's name and code number, you've told ASII how you want your money spent. Vote today, and give your club more money next year.
FFA invades Cal Poly on a warm spring weekend

More than 1,500 came from all over the state to participate in the 52nd annual convention of the California Association of Future Farmers of America. Brenda Harris, Jim English and Lisa Derrick, right, return from Saturday morning livestock judging activities. Cal Poly dairy science major Leah Beholl, below, gets her cow ready to enter the Los Lecheros dairy barn for instruction to future farmers on judging techniques. Carol Davis helps Ron Levin knot his tie before Saturday afternoon's general meeting. Sharon Bollen, bottom, from Terrace, rests after Saturday morning ornamental horticulture competition.

BY RAEAGHAM

"Eight thoroughbreds from a Cal Poly enterprise project sold for a total of $89,100 at the annual Hollywood Park Cal Poly Sale held Monday night."

"A lot by Califobia out of Lot O'Interest was the top priced thoroughbred. She was bought by S. Grom of Arcadia for $17,500. The average price for the eight horses was $8,625."

"The eight-year-olds are all out of Cal Poly mares and the sire colt sale colts is Ticoletto (Khaled-Aidar) II, by Herod in the sale of Tom Parks Estate."

"The eight horses, three were assigned to the enterprise project in which the horses were sold to the students on contract by the Cal Poly Foundation. This non-profit organization provides the needed capital to get the students a valuable learning experience with almost nothing to worry about finances. After selling the two-year-olds, the mares were hauled, sales and after care deducted and the remaining profit is divided—two-thirds to the students and one-third to the Foundation.

"If you have an enterprise project, you have a real opportunity to make a profit after the project is over."

"The students were given the responsibility of exercising, feeding and preparing the young thoroughbreds for the Hollywood Park sale process, according to Hadley, takes about six months."

"The eight students involved in the project included Gary Carveri, Les Davenport, Barbara D Variant, Paul Protopapas, Kelly Rodgers, Karen Steele, Diane Atkins, and Kim Chavis, an agricultural business management major.

"Of the Cal Poly thoroughbred horse enterprise projects, there were 17 in 1940 at the urging of the California Thoroughbred Breeders, which donated the foundation mares for the enterprise projects."

"The industry has continued to support the Cal Poly program through the donation of stallion services to graduates at university herd."

Lean ground beef or not?

BY PIPER PARRY

"Shoppers may not get what they think when opting for extra lean ground beef over regular ground beef."

"While consumers buy extra lean ground beef, thinking it loses less weight during cooking, has more protein and less fat than regular ground beef, the content difference between the two is minimal—but the most basic difference is not, according to Cal Poly's food science department head and the U.S. Department of Agriculture."

"On the average, Lu Sizoulo's grocery store offers regular ground beef at $1.14 per pound. For 95 cents per pound, shoppers can buy extra lean ground beef."

"Perhaps the most disturbing part of the study was that the calorie and the protein content of ground beef was minimal, the palatability differences are great. When it comes to beef, there are times when you would rather have less meat, more gravy, and a dish and not just as a patty, it may be better to choose the higher fat content."

"Vance said some of the information concerning beef is confusing because of the minimal calorie content of ground beef."

"Most consumers get their information from their friends, other people they come in contact with. The butcher is the best, but not always up on the latest contents of meat."

Champion Poly steer

The grand champion steer and several champion hogs were shown by Cal Poly students at the Great Western Livestock Show in Los Angeles.

"The grand champion steer was a Chianina Angus cross shown by Cal Poly student Mike Mazzie, a champion exotic cross, sold to Eschelman Feed and Seed for $83,300. The Poly delegation also received several other awards in the beef division, including a champion English cross, reserve yearling steer and a champion group of three steers."

"The new junior division at the show was approved by A.P.D.

"Poly show team included Jay Tweten, John Olson, Mark Byne, Tony Washington, Carrie Mace, Keith Zucchi and the team's livestock advisor was advised by Mike Hall, assistant research associate at the Agricultural Science department."

"Cal Poly students also sold in the market hog section, the group showed champion and reserve champion hogs, as well as first and second place middle weight and heavyweight hampshire."

"Poly's team for the meat shows included Dave Stalder, Jeff Meyer, Rancho Cucamonga and Dennis Stuehler, a major and vice chairman animal science department."

OH junior gets contest place

A junior ornamental horticulture major was first runner-up in student competition at the American Institute of Floral Designers' symposium.

"Jeff Bell was named the first runner-up in the contest held in Hot Springs, Arkansas, by the American Institute of Floral Designers and the American Society of Horticultural Science."

"The students are flattered to one to the Schoenheit."

"They run all year around, and are the most popular."

"Cal Poly students encouraged to exhibit at the Southern California Exposition in June."

"All senior open division livestock and junior beef breeders are being asked to exhibit at the 1980 Southern California Exposition. The fair is being held in San Diego County at the fairgrounds in Imperial County from June 21 to July 6.

"It is going to be an exciting year for the beef cattle, dairy cattle, swine, sheep and dairy goats. Exhibitors of these classes have substantially increased this year."

"Students are encouraged to exhibit at the fair, but be aware of the competition."

"For more information, call the Agricultural Science Department, 759-5200, or the exhibit program, 759-5300."

Agricultural Leadership Program convenes at Poly

BY PIPER PARBY
Daily Agricultural Writer

Having just wound up the Future Farmers of America Conference, Cal Poly will host yet another group this weekend—the Agricultural Leadership Program.

Although this group is not as large—there are 30 participants in contrast to the 1,000—the impact on California agriculture may be great.

Each year for the past 14 years, Cal Poly has invited agriculture-related fields to participate in two-year programs designed to develop leadership abilities through exposure to government, economics and communications and through social and cultural understanding.

"The program is designed to sharpen skills and motivate participants to tell the story of agriculture," said Associate Dean of Agriculture John West. "The purpose is to develop a strong political muscle for agriculture—to make the wishes of agriculture known to legislators in Sacramento and Washington."

The group is convening at Poly to attend seminars ranging from leadership assertiveness and coping with stress to parliamentary procedures.

The delegation will travel to Yandoine Air Force Base to learn about military strategy, as well as receiving instruction by NASA experts on the space shuttle.

The participants in the program are "experts in ag, but not in other fields." No seminar tries to improve their knowledge of farming. They are already experts," said Dr. science professor Tim LaSalle.

The three-day program which runs from Thursday through Saturday is headed by LaSalle who is also an alumus of the Agricultural Leadership Program.

"It’s a tremendous exposure and education," said LaSalle. "I got to meet with individuals and government, corporations and foreign countries that I would never have had the opportunity to otherwise.

Each group of 10 attends 14 weekend seminars during the two-year program at the University of California at Davis, Fresno State University and Cal Poly Pomona. During the first year of each class, the participants spend two weeks traveling the East to study federal government and historical sites.

In addition to attending seminars during the second year of the agriculture program, the class will spend three weeks abroad traveling and studying similar subjects on a broader scale.

It costs approximately $900,000 per class per year, according to Associate Dean West. The program is funded by the Agricultural Education Foundation, which was created expressly for this purpose. The Foundation is maintained by grants from agriculture, industry and organizations in the state, ranging from the Bankamerica Foundation to Sunskirt Growers, Inc.

The program began in 1970 with a grant from the W.K. Kellogg Foundation, which financed the first three classes. Cal Poly's Dr. Edgar Hyer took a quarter's absence of leave to draft a proposal for the program which prompted the foundation to finance. Because of this reliance on private monies, it is "evaluated quite heavily" to insure that it is fulfilling its purpose, according to LaSalle.

"The success has been fairly good," said LaSalle. He said that in addition to benefiting agriculture as a whole, the program enriches individuals and families.

"It makes them read more, and get involved with other families and individuals grow."

New process from waste

PFOSTER (API) — From the North Coast’s redwood forests to Central California’s rice paddies and cotton fields, technology may eliminate pollution from burning wastes and produce a valuable byproduct — oil.

A conversion is being assembled here to turn the enormous amount of wastes left over from farming and lumbering into useful energy while reducing air pollution.

Polo club championships

Cal Poly’s polo club will face the University of California at Davis this afternoon in the first game of the Pacific Intercollegiate Outdoor Polo Championships. Play will run through Sunday, with Poly’s four-man squad competing against Texas A&M, Cornell University, UC Davis, the University of Arizona and Colorado State University.

According to team member Jim Perham, the Poly Polo Club has no real edge against Davis, but is hoping to beat them.

“They have quite a few years of experience on us, but we’re trying to make it up for it. We do have a chance of winning or at least we wouldn’t be travelling to Davis,” he said.

Poly also beat a team from UC twice during Poly Royal weekend, although it was not the varsity team they will be competing against this afternoon.

Despite what Perham considered evenly matched teams and narrow victories, Poly placed third and last in the 1979 outdoor championships, behind Davis and Cornell.

The two-year-old club is ranked third in national outdoor polo, traveling to California at the end of March for a week of play against teams from across the country, ranking third after York University of Toronto, Canada and UC Davis.

After returning from the outdoor championships, Davis this weekend, the club will not compete until the Mendo Three Goal Tournament at the beginning of June. On June 21 the team will travel to Poly to compete in the Four Goal Tournament.

The polo club has been awarded a little more than $400 in ASI money, whittled down from the $2,300 the club requested. The $2,300 would have covered travel and tournament expenses. Originally, the ASI Intercollegiate Committee gave the club $1,725, enough money to buy three indoor balls and twelve outdoor balls. Since then another $575 has been added.

Disputing charges that the club is an elitist group because students must own horses to participate, Perham said there is one club horse available for use and the club hopes to get additional club horses so more students on campus will be able to play.

The club hopes to have a 18-stall barn by the Cutting and Reining Arena completed in a year. The barn, which is part of the master plan for the Horse Unit, is still in the planning stages.

According to Perham, the club has no facility for indoor polo or equipment to keep horses—everything has to be done off campus. The club is working on bringing horses to the Cutting and Reining Club.

BY PIPER PARRE

Dolly Agriculture Writer

“Farm research funding is uncertain and has suffered from complacency,” said Dolly E. Miller, president of Texas A&M University. The U.S. is the most efficient nation agriculturally in the world. It is cooking on it’s record instead of increasing agriculture researcherge according to the Monitor article.

Despite the drop in agriculture research spending, Cal Poly boasts ag projects worth close to $500,000 this year. That figure is more than four times the $119,000 garnered for research during the 1970-1971 school year. Agencies ranging from the U.S. Department of Agriculture and the state government of Mexico fund projects headed by researchers in the School of Agriculture and Natural Resource Management. Research at Poly spans the spectrum of the agricultural world, not including such projects as “The Evaluation of Effects of Metals on Performance of Stocker Steers” and “The Development of High Fuel Incentives.”

According to Edgar Carnegie of the agricultural engineering department, his solar energy projects have brought in more than $1 million in the past five years.

Carnegie is the chairman of the Agricultural Research Committee. The committee includes a faculty member from each department in the School of Agriculture and Natural Resource Management. The committee, which was created by Dean Brown three years ago, meets every other week.

“It’s my job to organize and keep track of what’s going on and to encourage people to do their thing,” said Carnegie. “I put the expertise from the different areas of ag together to work on projects.”

Carnegie said there has been no drastic change in the university’s treatment of research since President Baker took over ten months ago.

“There has been no big difference with Baker. There has just been less hindrance. But there are some real big changes coming,” said Carnegie.

There will be more of what Carnegie calls “administrative support.” More help will be given by the administration to faculty members who write proposals dealing with the mechanics of writing and typing and help in preparing budgets, according to Carnegie.

“Teachers are interested in doing a job, not in doing the bookkeeping to keep a project running,” he said.

“The university makes out big in research,” said Carnegie. If a professor is released by the university to spend time on a project, that professor is paid his research time by the project he is working on.

The money the university saves by not having to pay a professor is rerouted to pay a graduate student to teach a professor’s class load or spend the same amount usually paid a faculty member and get three people.

Carnegie said students are not cheated when they take classes instructed by graduate students or student assistants.

“Students don’t get cheated. They’re probably better off. Graduate students are new, energetic and enthusiastic. They put themselves into it. Professors get tired of teaching the same classes every year.”

Carnegie said the resistance to research found among faculty and students at Poly is unfounded.

“The resistance is not direct. They just see research as decreasing educational quality of the university.”

“I see it as an excellent opportunity,” said engineering professor.

Carnegie regards research as a chance for professional development of teachers, which they need as they move to smaller departments.

“Teach a mind,” he said.

It also gives the faculty members a chance to contact professional people involved in similar types of work, said Carnegie.

Carnegie also said the equipment brought to the university through various research projects is important. Agricultural students are currently using $800,000 worth of instruments originally purchased for use in an ag project which were left behind when the research was completed.

The computer lab in the room next to Carnegie’s office is also a remnant of a past project.

“We could never have gotten these things through regular means,” said Carnegie. “Professors and students are both benefiting.”
Cloud seeding increases snow

San Francisco (AP) - A massive $1 million cloud-seeding experiment to increase the Sierra' s reservoirs some 7.5 percent will start this winter over a wide area around Lake Tahoe, under plans composed by the U.S. Interior Department.

The plan, in which cities and states are participating in the operation of their own programs, is dubbed Project Skywater, actually part of a larger department effort at a wider modification in other parts of the country.

According to the scheme unveiled Monday, the operation will involve some 1400 towers in a dozen areas toward the north and east of the country. In the meantime, the National Weather Service will continue to monitor the results and evaluate the effectiveness of the program.

Alleged CIA agent is in Iran

From the Associated Press

Iranian authorities arrested an American woman as an alleged CIA agent and three other Americans in connection with a recent wave of bombings in Iran. All three are members of the Iranian capital's intelligence agency.

According to the report, the woman was arrested in Iran, but the exact nature of her arrest is unknown. The Iranian government has not yet commented on the case.

In Washington, a State Department spokesman said he was unaware of the report and could not comment immediately.

The young Moslem militants holding the U.S. Embassy said, meanwhile, they had completed the scarring of their American hostages to a dozen provincial cities in Iran.

The militants said they had sent a final group of hostages to the city of Kerch, 550 miles southeast of Tehran. They said they were dispersing their captives in order to foil any new U.S. attempt to rescue them. According to the militants, small batches of Americans have been sent to 11 Iranian cities - Abadan, Shiraz, Mahallasht, Mashhad, Isfahan, Nijafabad, Arak, Qom, Yazd and Kerch.

Carter will not debate Kennedy

SACRAMENTO (AP) - President Carter won't debate Sen. Edward Kennedy, but he will vote for Ronald Reagan if former California governor wins the Republican nomination for president, Carter's son Chip said Tuesday.

"I will not debate Sen. Kennedy. In our 200-year history, no incumbent president has ever debated a challenger from his own party," the younger Carter told a news conference.

"I do not think the Democratic-Republican debate in the fall should be made a precedent. They hope they will be, and he will debate Ronald Reagan."

DEL (AP) - The charred, splintered bodies of the American commandos killed in an Iranian salt desert 12 days ago headed for home soil at last on Tuesday aboard a U.S. Air Force C-141.

Preparations to receive and identify the remains were under way at Dover Air Force Base, which 18 months ago identified and embalmed more than 900 bodies of another tragedy - the People's Temple mass murderer suicide in the Guyanese jungle.

The servicemen's bodies were due to arrive at 6:22 p.m. EDT. A 20-man color guard was on hand to salute the arrival of the bodies, and chaplains were to be present for a brief ceremony, said Lt. Basil Gray, base spokesman.

Ads for Prop. 9 under question

SACRAMENTO (AP) - Howard Jarvis was accused Tuesday of illegally using funds from a tax-cut initiative to promote the U.S. Senate candidacy of his former tax-fighting partner, Paul Gann.

Former White House aide Ray Hanafik, who is challenging Gann for the GOP Senate nomination, contended the ads were "illegal" and "politically immoral" and said he had filed a complaint with the Federal Elections Commission.

As a contributor to Proposition 9, I don't think I should subsidize advertisements that help Paul Gann. Besides being illegal, it is also politically immoral," Hanafik said in a statement.

A FEC spokesman, Fred Edland, said no complaint had yet been received by the FEC and that he could not comment on Hanafik's statement. But Harvey Handler, a spokesman for Gann, said that the ads were designed to promote Gann's campaign.

"All the ads we have run Proposal 9," Englander said. "I think Mr. Hanafik is a drowning candidate who is going down for the third time and he is grabbing onto something to bring somebody down with him."

Miracle men’s track comeback falls just short

BY TOM JOHNSON  
Daily Sports Editor

A miracle Mustang men’s track team comeback fell just short of achieving reality, as the Fresno State Bulldogs held on to win the 1,600-meter relay and clinch a 86%-76% dual meet victory over Cal Poly Saturday.

Cal Poly trailed the Bulldogs by 15 points with three events to go and it appeared that it would take a miracle comparable to the parting of the Red Sea for the Mustangs to pull out a victory. But Cal Poly persevered, as Mike Bush won the 200-meter run and the Mustangs swept the top six spots in the 3,000-meter run to move within five points of the Bulldogs.

A miracle comeback victory was within the Mustangs’ grasp as they needed a victory in the 1,600 relay to snatch away the victory. Fresno State won the event by two seconds, however, to give Coach Dutch Waradem a victory in his final dual meet. Waradem, the first man ever to pole vault 15 feet, announced his retirement earlier this year.

Though Steve Miller’s squad emerged a loser, the team took another step to retaining their Division II crown by qualifying more for the national finals.

Doug Avritt garnered a second and Ivoon Huff placed fourth in a fast 14:28.82 respectively under the qualifying mark of 14:37.2.

Ed Muelbacher, Bush, Tim McDonald and Harvey won the 400-yard relay with a time of 41.33 to also qualify for the Division II Finals.

Bush proved to be a triple winner for the Mustangs, winning the 200 and 400-meters in addition to being second man of the 400 relay team.

Bush’s relay compatriots McDonald and Harvey notched double victories. Harvey won the 100 in 10.63, while McDonald scaled 17’6” to win the pole vault by more than 3’.

Jim Schankel also recorded a double win, leading the pack of six Mustang 5000 runners with a winning time of 14:25.87. Schankel nosed out Fresno’s Brian Foley for the win in 1:50.0.

Brian Faulk took the shot put by over 6” feet, registering a 58-5/8” throw.

Tennis team slaughtered

The women’s tennis team dropped its eighth straight Southern California Athletic Association match, being swamped by the Irvine Anteaters 9-0 Friday.

No player managed as much as taking one set from the tough Anteater squad as Irvine breezed through the match without as much as a scare.

Sue Armst whipped Cal Poly’s number one singles Keesa Weigand 6-1, 6-2.

Cindy Keeling pumped Kristen Jacobson 6-1, 6-1.

Tom Condon equals best high jump mark, losing 6-2 in event.

Cal Poly returns Friday at San Jose to face Western Oregon.

Open Sat.
9:00-5:00

FRESNO (AP) — With help from a bamboo pole, he jumped higher than any man before.

Cornelius “Dutch” Waradem was the world’s first 18-foot pole vaulter, a feat unlikely to be excelled by anyone accustomed to 18-foot vaulters.

But in it’s time, the only 1940s Waradem’s ability to 2 times his man’s height was an athletic accomplishment akin to Roger Bannister breaking the four-minute mile more than a decade later.

“Fifteen feet at that time supposedly was like a four-minute mile,” Waradem said in an interview.

After this season, Waradem will retire to Fresno State track and field coach and director of the West Coast Relays, ancestor of America’s most prestigious meets.

This time to reminiscence on the facts that made him a legend in the truest and purest champion I have ever seen or a colleague of Jordan.

Forty three times, Waradem cleared 15 feet from April 13, 1948, to the end of the World War II stalled his vaulting career. He was required to give up pole vaulting and war for a pole vault 15 feet and was the Sullivan Award in 1948.
FATHER-SON COMBO DOT ROSTERS

BY GUILLERMO BROCK

Coaches at Cal Poly see great athletes and great teams. It is impossible to remember all of their accomplishments and the world of competitor that the coach will never

That one-of-a-kind player is the coach's son and this year there are five members of the club. The senior varsity football team is the most enjoyable and the most challenging game that I've ever seen.

Head Basketball Coach Erin Wheeler finds himself in the unique position of coaching not one, but two of his own children. As he puts it, "I'm probably the only college coach in the United States with two kids on the same team."

The eldest son, Ernie Jr., played his first year at Idaho State. The younger Wheeler shot into prominence by sinking straight free throws on national television to beat powerhouse UCLA in the Western Regional Playoffs. The 22-year-old guard returned to Cal Poly after a year in the North Country and was named to the All-Poly Cal Poly team this season. His younger brother Keith was a 19-year-old freshman this year. Coach Wheeler summed up his feelings about having his own sons on the team by saying, "As a coach, my job is to be fair and play the best players. Hopefully my own kids will do well and contribute to the ball club."

Defensive backfield coach Jim Sanderson gives a lobby-eyed stare to son Scott as the two discuss football strategy. The Sandersons are one of the few families of fathers and sons in Poly sports.

Speedy cyclists run SLO race

The normal hustle and bustle of the San Luis Obispo streets was interrupted by a three-ring circus of activities last weekend as many of the world's top cyclists converged on San Luis Obispo for the eighth annual Tour of the Central Coast race.

Saturday and Sunday. Cyclists wound through the streets of San Luis Obispo, cheered on by 45,000 people in the 40-mile criterium portion of the bicycle race. When the criterium winners crossed the finish line four hours after the race began, Keith Vierra of the Palo Alto Bicycle Club edged favorite Bill Watkins of the P.C. Orf Alpine Bicycle Club.

The criterium win gave Vierra the overall victory in the two-day event sponsored by the San Luis Obispo Bicycle Club. The victory netted Vierra $400 in bike parts and cash, a generous slice of the $1,300 total prize money.

Watkins appeared as if he would be crowned the overall champ when he grabbed first in the 102-mile road race and nine-mile individual time trials Saturday. However, Vierra employed a bit of devious strategy in the criterium race to match the overall title away from Watkins.

Vierra and his teammates from the Palo Alto Bicycle Club hung back in the pack for most of the 70 laps of the criterium. But with 25 laps to go, Vierra and three teammates broke out of the crowd to establish a big lead. Vierra's teammate stayed with the pack, which included Watkins and slowed down their pace. Vierra built up a huge lead eventually lapping Watkins.

Heidi Hopkins of the Berkeley Bicycle Club took the women's championship in a close contest.

Hopkins finished first in the 32-mile road race and placed high enough in the other two events to register the overall victory.

Teammate Cindy Olavarri tallied an overall second by winning the time trials. Madeleine Roseo of the Davis Bicycle Club finished third by pulling out a last-gasp victory in the criterium and finishing second in the road race and third in the time trials.

An unidentified Santa Cruz Bicycle Club pumps hard to move out of the pack in an criterium portion of the Tour of the Central Coast race Sunday.

Mustang Corral

The Mustang baseball team played the role of the spoiler Saturday, sweeping a doubleheader from Chapman to knock the Panthers out of contention for the California Collegiate Athletic Association crown.

The Mustangs benefited from some excellent pitching by Mark Silva and Mark Bersano. Silva suffered a three-hitter as the Mustangs to a 3-2 win in 10 innings in Saturday's opener. Bersano almost matched Silva's prowess, limiting the Panthers to four hits. Cal Poly won the second game 1-0.

Bob Parr paced the Mustang hitting attack, slamming seven hits in 11 at-bats, including the game-winning double in the second contest.

Chapman avoided a series sweep by taking Friday's game 5-4 in 11 innings.

Stu Hein, pitcher for the Mustang baseball team, will tour five countries this summer as a member of the Athletes in Action baseball squad.

Hein will embark June 10 for a 30-day, 33-game tour of the Honduras, Nicaragua, Panama and Columbia. He is one of five Californians on the Athletes in Action team.

Hein must raise $2,478.50 for the trip, $1,860 of which must be paid by May 12. Those who wish to make tax-deductible contributions to help fund Hein may write to him in care of the Baseball Office, Stadium 8, Cal Poly, San Luis Obispo.
