**Hassles about computer use delay the election return tally**

**BY JIM MAYER**

Daily Staff Writer

The anxious crowd waiting for the ASI election results in the Union Thursday night dwindled as the announcement was delayed time and again. When the results were finally announced at 1:30 Friday morning, Vice President-elect Nick Foretiere was waiting for his partner on the raucous ball counts. His partner, newly-elected President Willie Huff was at home, sound asleep.

When all the votes were tallied, Huff had captured 81 percent of the ballots cast in his solo race for the ASI’s top executive post.

In a more competitive race, Nick Foretiere beat his opponent Ted Sanchez by a 2-1 margin for the office of vice president.

The Equal Registration Initiative and the ASI bylaws were both approved by wide margins.

Huff referred to the win as a “bittersweet victory.” “Of course I was excited, but it would have been nice to beat somebody,” Huff quipped.

Recovering from a weekend of celebration, Huff said planning for his administration is already taking place.

Huff said his first action as president will be to make six executive appointments: three representatives to the Instructionally Related Activities Board, two external affairs assistants and an internal affairs assistant.

Huff said the appointments will be advertised for two weeks so all those interested in the job will have an opportunity to apply.

Foretiere must complete his duties as chairman of the Finance Committee before taking office on June 1.

In an open letter program has been written for the processing of ballots, but the program had not been run prior to the night of the elections. As a result, it took some time “to work the bugs out,” said Land.

Land said a low turnout was expected because of the lack of opposition in the race for president, but the General Revenue Sharing plan allowed voting students to direct $1 of their student activities fee to the organization of their choice.

With 30 percent of these ballots counted, Christian organizations—Inniversity Christian Fellowship, Campus Crusade, and so on—seem to be taking the biggest pull, said Foretiere.

“Winning was bittersweet,” he said. “I understand Busich will not give partial credit on exams only the answers are graded.

The letter states: “It was apparent to us that Busich does not give partial credit on exams only the answers are graded.

The letter consists of two girls, who were not native of UBSCA’s.

It is a very uncommon

**Students debate electronics grade**

**BY ROSEANN WENTZ**

Daily Staff Writer

Two students have challenged the teaching and grading practices of an electronics and electrical engineering instructor.

A letter of complaint concerning Professor Richard Busich has been submitted to Dr. Jorg Raue, electronic and electrical engineering department head. The letter is signed by David Ewert, a chemical engineering senior, and by an electronic engineering instructor who wishes to remain anonymous.

The initiative recommends the registration order be: disabled students, graduate and senior students, and all other students.

In addition to the other complaints, Ewert said he was upset that Busich would not talk to students about their last quarter's grades.

“Busich has been submitted to Dr. Jorg Raue, electronic and electrical engineering department head. The letter states: "It was apparent to us that Busich does not give partial credit on exams only the answers are graded."

According to the letter, Busich does not give partial credit on exams only the answers are graded."

Ewert said the highest score on one of the midterms last quarter was 75 percent.

To determine the class curve, Ewert said, “The score was divided by two and this resulting score was bottom line for passing with a D. The class average was 73 percent, so roughly one half of the class failed.”

Raue confirmed Busich uses these grading practices.

"It is a very uncommon practice to not give partial credit," he said in a recent interview.

"A number of students have come to see me regarding the grading practices concerning Professor Busich."

In addition to the other complaints, Ewert said he was upset that Busich would not talk to students about their last quarter’s grades.

"He’s using his sabbatical leave as an excuse not to talk to us," he said.

Raue also said Professor Busich has been unavailable to talk to students this quarter.

“I asked him to make time available for the students,” said the department head, “but he said he wouldn’t be available until fall of 1980. You don’t believe I don’t like it. I don’t have enough muscle, and I guess that’s one of the reasons I’m leaving.”

Raue is resigning from his position sometime this summer.

Dr. Robert Valpey, dean of engineering, commented on Busich’s sabbatical leave.

"I understand Busich will not speak to students regarding last quarter’s grades. He claims that his sabbatical leave exempts him from his duty. However, he is still attending departmental meetings.”

Rent and Prop 10

The shortage and cost of rental housing is becoming worse every day. The vast majority of university graduates today will be unable to afford to buy housing for a substantial time into the future. Lack of established credit ratings, complicated financing and low fees, high interest rates and general loss of buying power will force most to rent. Indeed, those who own homes today in San Luis Obispo would be in most cases unable to buy their own homes again at present if they were to start over.

This housing shortage has set the stage for increased rents. In fact, there has been a demand for rent controls and in turn a response from landlords for conversion of many rental units, where possible, into condominiums.

On June 3, voters will be able to decide a constitutional initiative on rent control. The proposal would declare that rent control is a matter of local government concern and prohibit the state from taking any action to control rents. Local governments would be able to adopt rent control ordinances with voter approval. Any voter approved ordinance on this issue would need to be recertified by them every four years.

All existing rent control ordinances would expire after the first local election following the Proposition 10 vote, which would, if approved, go into effect June 4. Single family houses, hotels, motels, new units built after June 4 and public housing would be exempt from rent control ordinances under this Proposition.

Further, and perhaps most significant, Proposition 10 would require all rent control ordinances to provide a uniform criteria under which landlords would be able to increase rent and need to be generally tied to the Consumer Price Index and any substantial property improvements and costs in most code requirements. Thus, Proposition 10 generally puts the local voters in charge of deciding the issue of rent controls and established guidelines under which rent controls would work. State involvement is presented and the legislature can not change the initiative without a vote of the people.

From the political standpoint, support of Proposition 10 contend it will insure that rents remain under local control, they will create new construction jobs and ease the housing shortage by allowing landlords a fair profit without rent gouging. However, opponents say it will wipe out all existing rent control laws and make it hard to pass and keep new ones.

Polls show there is still a lot of voter confusion about the measure. About 42 percent favor the initiative, 39 percent oppose it and 19 percent are undecided. Those familiar with the measure appear to be divided as to whether it will protect rent controls or destroy them.

Since the margin of error in most surveys is about 3 to 4 percent in either direction, the fate of this initiative cannot be predicted with any certainty.

With the exception of returning the issue of rent controls to local governments and the impact of this proposition may not have any real impact locally other than its part in the cumulative changes recent initiative are having on local governments such as Propositions 13 and possibly 9 and 11 on the June 3 ballot.

Letters

Jarvis: right

Editors:
To Carol Hallett:
It was with great interest that I read of your anger with Mr. Jarvis, in regard to the remark he made about San Luis Obispo County.

First, I would like to say, that I agree 100 per cent with everything he has said; and I can say this because I was born there, in fact, my mother still has many relatives still living in San Luis Obispo and Morro Bay.

My great grandfather was very well known throughout the county, and after his death many stories were written about him.

There is a road named after some of my relatives just before you get to Morro Bay, and it is named Cannon Road. Also just a short way up the road is the family cemetery on the side of the hill.

Cal Poly is nothing but a fun school like the rest of the universities here in the state of California. All these people go to school for good times and to drink beer and come out just as dumb as they went in. I am sure that you are aware that this is the reason so many of the school bond issues fail, when, they are put to the voters. Also, what Mr. Jarvis told Andrew Jowers was also true; all the students do is a lot of talking, and a lot of protesting about nothing. The real important issues they neglect. The vast majority of these students are being put through these schools at the expense of their parents, so they don’t give a damn if they learn or not, as long as they can party and make fools out of themselves.

The tax payer that works all of the time, cannot, say much as to how his tax money is spent, because everytime something is said we hear the excuse that the poor and the elderly will suffer. Do you want to know who is really getting all of these giveaways the Federal and State handouts, it is the illegal aliens, the lazy minorities, who are constantly crying discrimination, but are always the first in line for the handouts. You drive into the area where they live and you will find that their homes look like pig pens, but they always have a new late model car parked on the lawn in front of the house, while the young bucks, are sitting around drinking beer, with some young girl, who is about to have another baby for the tax payer to support or if they do not want to have the child the next thing to do is to have the state pay by abortion.

Yes, Mr. Jarvis has every right to say what he does and I am sure that a great many other citizens agree with him also.

I would like to say in conclusion, that Mr. Jarvis does not owe the people of San Luis Obispo County or the students for a damn thing nor do I owe all of you any apology. Oh yes, my mother’s family had the big Rancho ranch, that Mr. Alex Madonna bought.

Mr. Andrew V. Finnie
Training track planned

BY JIM WITTY
Daily Staff Writer

Cal Poly's animal science department is planning to construct a thoroughbred training center on campus. According to Robert E. Hadley, the department's new specialist, the building of a complete horse racing track on campus, be it an equestrian course, and suites is getting under way. Hadley said it will be used by the horse and swine units above the reservoir.

The tractors being in now working on the site, said Hadley, and in the process of grace the area.

The existing track at the edge of the Cal Poly airport "is the only racing track in the world that is U-" said Hadley. The new track will be a continuous circuit.

The tractors stall and tracks are part of a long-ago plan proposed by the Thoroughbred Enterprise, according to Hadley. He noted it has been suggested for about the last ten years. But he didn't know if the facility would be completed.

The program would be self-sustaining and some of the funds that would come from private donations. Hadley said the thoroughbred industry will probably support the venture, because, he felt "the state would have very little money, too."

The majority of the entire training facility is estimated at $9,000.

Beans serenade seniors' breakfast

FLORI ANDERSON
Daily Staff Writer

Distinguished beans and settlement heads will sing three serenades at the senior citizens center on Tuesday, June 30, marking the beginning the yearly graduation ceremony. The department heads will also sing, adding to the 1980 ASI elections. According to Robert E. Hadley, the department's new specialist, the building of a complete horse racing track on campus, be it an equestrian course, and suites is getting under way. Hadley said it will be used by the horse and swine units above the reservoir.

The tractors being in now working on the site, said Hadley, and in the process of grace the area.

New major is proposed

BY HAROLD ARNOLD
Daily Staff Writer

A bachelor's degree in public administration may soon be offered at Cal Poly. The program will be interdisciplinary—courses from many majors compose the program. No new courses need be created, Settle said.

There will be space for 25 students when the program starts. Settle, a former San Luis Obispo city councilman and now a planning commissioner, said students from all over the state would have very little money, too.

The program will be interdisciplinary—courses from many majors compose the program. No new courses need be created, Settle said.

By Harold Arnold

An article that appeared in the "Review" section of the May 16 issue of the Mustang Daily left one piece of information.

The article, titled "Musical to be offered by speech department," left out the fact that the magazine, The Fantastics, is being co-sponsored by the music and speech departments, not just the speech department.

A Mustang Daily article by Mike Carroll headed "The Child and the State" contained several inaccuracies.

The article, published in the May 6 issue, quoted Cal Poly philosophy professor Laurence Hougate as saying "when juveniles are being tried for serious crimes they should be treated as adults and as individuals." What Hougate actually said was that older juveniles, those who have the same cognitive and emotional capacities as adults, should be accorded the same treatment that the state gives adult violators of the law.

Autos are bellying up to bar to tank up on gasohol

BY MARY KIRWAN

The county's first bar for cars, serving shots of mixed alcohol, opened last month.

The New Directions station, at 1371 Monterey Street in San Luis Obispo, is the only gasohol station between Santa Barbara and Fresno.

The Drug Abuse Prevention Center of San Luis Obispo leased the station two months ago to give rehabilitated drug station two months ago to give birth. on April 21, to the county's first drug station, at 1371 Monterey between Santa Barbara and Fresno.

Gasohol is the only gasohol station in the United States annually consumes 110 billion gallons. Ethanol can be produced from almost any starchy plant-grains, sugar crops, wood—but the main contributor in the U.S. is corn.

Greg Walier, an attendant at the New Directions service station in San Luis Obispo, prepares to fill a customer's tank with gasohol.

Small claims courts can be useful

BY ANGELA VENGE

Use of small claims courts could prove beneficial to students, according to a Cal Poly some economics teacher.

"It's a good way for students to get deposits back from their landlords if they feel that it was unfairly kept," said Prudence Zalewski. "It's a good way to get any money and it's very easy to use."

Law suits for as much as $750 can be handled in small claims court. The process begins when one side sues the other, and a judge makes a decision based on the evidence presented.

"Small claims courts are a quick, simple and informal way for consumers to handle property damage or loss of money," said Zalewski.

Before a lawsuit can be filed, a request—oral or written—must be made to the defendant that he pay the amount owed. Suits can be filed against any person, including a minor, as well as against a business or government agency.

In general, it's a good idea to sit in on a small claims court before you take someone to court," said Zalewski.

"If one has received injury or property damage, has refused payment of a personal or business debt, has received defective service or goods, it owed back rent or has been harmed in some other way, small claims court could be the answer.

"Small claims court is quick, simple and informal way for consumers to handle property damage or loss of money," said Zalewski.

However, small claims court is not always a sure win. Depending on the defendant's resources, the court may award the plaintiff only a portion of the money owed. In some cases, the plaintiff may not recover anything at all.

When a defendant is ordered to pay, the plaintiff must then file a writ of execution to collect the judgment. The court will issue a writ of execution, which is a court order that the defendant must pay the amount owed.

The defendant may then appeal the decision, but the appeal process can be lengthy and expensive. If the defendant fails to pay the judgment, the plaintiff may apply for a garnishment order, which allows the court to seize the defendant's assets, such as wages or bank accounts, to satisfy the judgment.

Small claims courts are available to residents of all 50 states and the District of Columbia. In some cases, a small claims court may not be available if the amount of money involved is too large or if the case involves a specific type of dispute, such as a contract dispute.

To use a small claims court, you must file a claim in writing, listing all of the facts, damages suffered, and the amount of money you are seeking. You must also file a copy of the claim with the defendant and the court.

You cannot use a lawyer in small claims court. You don't need one because often the judge will give you advice. He'll inform you of your rights, but no ex-

ization of 40 percent longer. than unleaded. the price of gasoline continues lower-octane gasoline, said Fields. Gasohol burns cleaner than gasoline and because of the volatility of alcohol, the engine starts faster than when using gasoline of any type.

Tampa Bay gives back victims

ST. PETERSBURG, Fla. (AP) - Salvage crews on Monday found three more crushed cars, including two with men trapped inside, in the tons of sunken wreckage from the Sunshine Skyway Bridge collapse.

Two other bodies floated up on a public beach and one was found bobbing on the surface of Tampa Bay, bringing the total known dead to 30.

So far, eight sunken vehicles have been found since a phosphate freighter rammed the bridge Friday morning, knocking down a lowering 1,400-foot span.

Hillsborough County Sheriff's officials said they still had no idea how many victims remained trapped in the twisted metal and chunks of concrete on the bottom of the bay.

By The Associated Press

Islamic fundamentalists increased their lead Monday in Iranian parliamentary voting and apparently handed Iranian President Abolhassan Banisadr another defeat by blocking his efforts to name a prime minister.

Tehran Radio said 229 of 247 seats in the Iranian parliament have been filled and that the Islamic Republican party has won 113 of them, including three decided Monday.

Victories by Moslem fundamentalists running as independents will give the I.R.P a working majority in Parliament.

Iran's revolutionary leader, Ayatollah Ruhollah Khomeini, has said the new Parliament, expected to convene in the next few weeks, will decide the fate of the 50 hostages held since last Nov. 4.

The campus Health Center offers badminton workshops for men and women every Tuesday from 3 p.m. to 3:30 p.m. and Wednesday from 1 p.m. to 2:30 p.m.

Panhellenic

Sign ups for fall rush will be held in UU Plaza from May 12 to 16.
“We wanted to go to the meet and just do well. We weren’t concerned about team finishes as we wanted to concentrate on the individual and the California State Athletic Association meet. It was a meet to be held at Cal Poly track on Saturday.”

The pared-down Cal Poly track team found itself on top of the standings after the first day in standings before host State on Sunday to take the title and points to Cal Poly. Mike Miller said that the Mustangs were in position to win the meet but had only two entries in the last events while the Mustangs have a large entry. Thus, Coach Miller is glad with a second finish, but he was all over the West Meets.

Town's, White Clear problems

CITYLAND IAP — Problems between the bad Browns and top draft choice, back the chemistry required, have been resolved, with General Manager Peter Hadhazy, the Heisman Trophy winner from the University of Southern California, clearing the air, and noon, said, “We are going to show scheduled workouts browns on Monday and Sunday. He refused to take a physical examination after last meeting last Thursday and Wednesday last Monday.

However, Hadhazy said in the discussion the situation with one of White’s agents. Mike Trope, for 2 ½ hours on Monday and Tuesday. Mamy Bautista took a second in the 3,000-meter distance being hobbled by pulled arches. Doug Avirt placed third, battling a severe case of lung congestion.

The Mustangs took two out of the first in the Los Angeles Weekly.

There is a confusion of the effects of the draft. The 6-foot-9 Haywood has been suspended by Coach Paul Haywood has been suspended by the Los Angeles Lakers, after returning from a severe problem of the past season, and not attending a team meeting Monday, and his suspension will remain in effect through the remaining games of the championship series.

Haywood, star of the U.S. Olympic basketball team in 1966, averaged 22 points per game through his first nine NBA contests but has been a lightly-used reserve most of the last season—his first in Los Angeles.

Lakers honor player's pact

A Lakers spokesman said that the 6-foot-9 Hayward did not attend a team meeting Monday, and his suspension will remain in effect through the remaining games of the championship series.

The Mustang baseball team did not earn a bid to the Division II regional but have played a vital role in determining which teams will, as Cal Poly knocked Northridge out of contention for the league crown by whipping the Matadors three times in the season's last two weekends.

The 5-4, 5-9 and 11-9 victories over Northridge capped a fine second half for the Mustangs as Cal Poly fashioned a 16-7 record after March. The strong finish made up for a dismal start when the Poly nine were sitting on top of a 5-19 mark. The Mustang's 14-16 California Collegiate Athletic Association record ranked second behind Cal State Los Angeles, the leaders.

Frank Silva proved the hero in Friday night's contest drilling a home run to pull out the 5-4 victory. The Matadors held a shaky 3-2 lead going into the seventh when Bob Weirum slipped a single in the eighth to move the runners to second and third base and set the stage for the Mustang rally that would come back next year if everyone is playing well. Coach Nickja Yeast. "It all depends on seniors and I think most students having fun and enjoying the game. Toerner, the batting hero for Northridge in the opener, was responsible for allowing the Cal Poly to score the final three runs of the season. First baseman Yumamoto, of CSULA, outfielder Conard, of Cal Poly, and left fielder Negron committed his third error.

Cal Poly had previously moved from CSULA. Her pre-season match with Cal Poly's number three seed, Yuki Hayakawa, 6-3, 6-3. The season total for the Cal Poly team came to four wins and ten losses after this match. They are 1-9 in the southern California Athletic Association.

"We have played pretty good against the teams we have played," said Yeast, "and our competition is still stiff."

"The scores are not indicative of the growth that has taken place this season," said Coach John Murray.

Yeast agreed. "Overall everyone is playing well," he said. "They have really improved."

Cal Poly has a chance of a strong team next year if funding is available.

"None of the girls are seniors and I think most will come back next year if we have a team," said Yeast. "It all depends on the budget."

Complaint meetings where voting is concerned. He recently attended a meeting concern- ing discussion of who will be the department head when Raue leaves. Valpey recommended that students having questions about their instructors should contact the Fairness Board.

Dr. Mona Rosenman, who chairs the Fairness Board, said students must first speak to the instructor, department head and dean of the school of the instructor before approaching the Fairness Board.

"The burden of proof is on the student," she said. "The instructor is assumed right until the end."

"Evert and at least two other students are still planning on taking Busich and are supposed to be up on the series with the others whereas I am not," Evert said.

"Overall, we feel that the athletic program is still minimal and can be done on a shoe budget, and over minimal financing it can still be representative and successful. With the energy crisis and pressures on athletic budgets, travel is certainly an important budget factor for intercollegiate athletics. Because San Luis Obispo is geographic a spot to hold major tournaments. An example would be the U.S. Water Polo Cup that will be held there in the spring. San Luis Obispo is the ideal place for universities in California, it is an ideal place to compete with the best in the nation.

The purpose of my letter is to bring certain facts to the attention of the editorial board. Specifically, as a member of the President of the University of California Golden Bears water polo team, I wish to state that I have called the water polo team-a team which might have eliminated me from the U.S. Water Polo Cup that will be held there in San Luis Obispo. As a member of the University of California, it is an ideal place to compete with the best in the nation.
