SANTA BARBARA RULE MAY AID HOUSING

BY MIKE CARROLL

Carroll Daily Staff Writer

Cal Poly's Board of Trustees may see an increased availability of off-campus housing and a decrease in individual rents as a result of a Thursday California Supreme Court ruling.

The court, in a 4-3 ruling, struck down a zoning ordinance in Santa Barbara that restricts the number of unrelated persons living in a single family dwellings.

Walt Lambert, off-campus housing coordinator, said the ruling "would not have a drastic, big effect," but it should cause more housing to open up for students.

Many landlords want to rent their houses to students. Lambert said, but the R-1 ordinance—allowing no more than three unrelated people per house—makes this economical.

The San Luis Obispo R-1 ordinance was apparently invalidated by the state Supreme Court ruling, said Lambert. Thus, more than three students may now be able to pool their resources and afford to occupy more houses.

The housing coordinator said the increase in student housing would probably not bring about a "student takeover" of single family neighborhoods.

Though some landlords may raise rents on houses, the increased number of student occupants will result in more responsibilities, said Lambert.

The court ruling may also make it easier for fraternities and sororities to find a house in the city, though their number should not increase, the housing coordinator said.

Lambert said he could not be sure of all the ruling's effects until city officials decide how the ruling will apply to San Luis Obispo.

Allen Settle, a member of the San Luis Obispo Planning Commission and a Cal Poly political science professor, said such a reaction could be to limit the number of bedroom family zones and the number of people within them based on the footage a dwelling unit covers.

Settle said both these options would have enforcement problems.

He also noted that the state Supreme Court was not impressed with the use of variances and appeals as "means of controlling abuses in city zones."

This could make the jobs of planning commissioners, boards of supervisors and city councils more difficult, Settle said.

The political science professor said the San Luis Obispo R-1 is essentially the same as the Santa Barbara ordinance struck down by the court, meaning the court's ruling would apply to San Luis Obispo.

The ruling will allow for increased densities of students and non-students alike to live in the single family zones in the city, and may on one hand ease the housing shortage but on the other increase densities, parking and noise problems in many neighborhoods," Settle said.

Overall, Settle said it was not a good ruling. He said courts are playing with a disastrous situation because they did not look at the impact on local government.

The possible density changes could compromise the general plan of cities and their service capacity.

The Santa Barbara News Press report Sunday the city attorney will probably petition the California Supreme Court for rehearing on the Santa Barbara v. Adamson ruling. This failing, he would decide whether to go to the U.S. Supreme Court.

Benjamin Bycel, one of Adamson's defense attorneys, said Monday once a person wins on state grounds there is no basis for an appeal or rehearing.

As for the San Luis Obispo R-1, Bycel said, "The ruling will absolutely strike down the San Luis Obispo ordinance."

He said the Adamson case was a victory for privacy in California.
Trouble ahead for Canada

The people of Quebec will decide today whether or not to take the first steps toward independence. The outlook, like the sky over Portland, is dim.

Premier Rene Levesque is asking his province for a mandate to start negotiations for a relationship called "sovereignty-association." Sovereignty will mean that Quebec will make its own laws, issue passports, collect taxes, join the United Nations and NATO, and send and receive ambassadors.

Association will mean that Quebec, through committees with Canada, will create joint economic policies.

If sovereignty-association sounds like the best of both worlds, then you're reading it correctly. The one-man support for S-A has grown; the latest polls predict an evenly split vote for the referendum.

My main objection is that S-A is a halfway measure, and halfway measures rarely work. Both sides will work to undermine what they see as a temporary compromise; either hegemony or full independence is the usual outcome of such power struggles. And squeezing the provinces more power will injure Canada's already-weak federalism. There is also the threat of fragmentation. Grumbling in the provinces will certainly get louder if Quebec moves toward independence. Oil-rich Alberta, for example, might be asking half at a balanced budget with a separatist province — with anybody else, for that matter. The prospect of different defense economic alliances among the north, U.S. border is unsettling.

I don't have the answer to the culture question. Assimilation is impossible.

Author Harold Alfirsch is a senior journalism major and a Mustang Daily staff writer.

Letters

First of all I think that the U.S. has failed in the attempt to create the hostages; but that doesn't mean that our military is a big joke. On the contrary, it shows that we care about our people in Iran and about the Iranian people.

"What can we do to help and how can we absorb them?" The question should read "inoperable fallacies," then it's time to stop reading and start writing.

Principles are not to be compromised. Sacrifices should be made to uphold our principles, not our principles sacrificed to uphold our status quo. In the case of the "Cold war mission and controversy" there is no controversy, only the choice of following principle or of cop-out. "Our current dilemma of scarce resources and high unemployment isn't relevant," nor is the fact that "Castro is laughing at us." The world is laughing louder at Castro.

The question must not be "should we help the refugees?" nor "can we absorb the refugees?" The question should read "what can we do to help and how can we absorb them?"

America needs more people who are willing to take a risk and make sacrifices for their principles. These newsmen are such people, more gone than some Americans who are already here but only willing to forget the history of hospitality that has allowed them to gain the position they are so selfishly trying to protect.

EDITORIAL

The policy of Mustang Daily regarding letters and submitted material such as letters and press releases outside of the newspaper staff is as follows:

Letters should be submitted to the Mustang Daily office in Graphic Arts, Art building 226, 9 a.m. to 5 p.m. weekdays or by mail to Editor, Mustang Daily, GRG 220, Cal Poly, San Luis Obispo, CA 93407. Letters must include the writer's signature and social security number.

Editors reserve the right to edit letters for length, style, and jibe. Letters should be kept as brief as possible. Inordinately long letters will not be printed.

Mustang Daily encourages reader comments on news stories, opinion pieces, and editorials. Press releases should be submitted as early as possible to the news editor in the Mustang Daily office or by mail. All releases should include a phone number and name where further information may be obtained.

Editors reserve the right to limit, condense, rewrite and edit press releases and make judgments based on their news value.

MARY KIRWAN

City officials concerned about potential pigeon health hazard

City attorney Mary Kirkwan said the pigeons are a potential health problem which must be dealt with.

"It would be backwards if we just waited for bodies to drop on the streets," she said.

Some of the most serious diseases carried by pigeons are histoplasmosis, a fungal disease; salmonellosis, which effects livestock and if ingested by humans is fatal; meningitis, which is less common but fatal.

Transmission of Disease: Pigeons can spread disease through contact with pigeon droppings on sidewalks, drinking fountains, driveways, and for those less lucky, clothing and hair. Inhalation of dried pigeon droppings, carried on the wind, cause numerous respiratory and fungal diseases.

Grote has studied the pigeon problem for six months with the School of Agriculture at Cal Poly, and Cal Poly, having one of the leading breeding programs in the state, has been motivated to cooperate with the city to control the population. "Their droppings are subject to diseases transmitted by pigeons." Grote said the largest pigeon population in a small area, the greater the disease potential. An estimated 1,600 pigeons feed and roost in San Luis Obispo. Cal Poly's bird control experts say the pigeons are a potential health hazard to students, faculty, and the general public.

The main drawback of trapping is that 25 traps would have to be purchased, each costing $50 to $75. Also, any personnel would have to be hired to replenish food and water in the traps every few days.

"The use of Ornitrol—Ornitrol—which would sterilize a percentage of the pigeons to be under serious consideration," Grote said. "Estimates Ornitrol will reduce the pigeon population to acceptable levels in two years."

The city has been reviewing many methods of pigeon control, but in no instance has the project stirred negative reactions, none have been properly implemented. Charles Crabb, an associate professor of agriculture, said enticing pigeons to feed with food and water to trap them has been used at Cal Poly for more than two years and has worked, resulting in significant feed losses. One method is to train the pigeons to feed directly from the building, so they do not become deserters, but the captured pigeons are given to falcons for food, or given to aviators for scientific purposes.

Consumer

If your paper needs a nice touch, there’s a service for your type

BY SUSAN MEE
Daily Staff Writer

Cal Poly students are being harried with typing services that offer everything from technical and scientific typing to French, Spanish and English proof-reading.

Six typing services are currently advertising in the Mustang Daily. These services all offer different rates and specialize in different areas. It is sometimes difficult to understand just what you are getting with a particular service. Mustang Daily spoke to the various services to see just what they had to offer.

Linda George of Last Minute Typing can type a 15-page paper in two hours—but it will cost extra for the fast service. She charges $75 cents a page and $1 a page if it’s due in 24 hours. George has kept her busy, averaging about 20 jobs last week.

“I enjoy typing and I learn different things from each of the papers,” said George.

She commented that typing provides her with additional income.

Marlene Johnson isn’t getting as many jobs as the Last Minute Typing. With her rates are slightly higher—a $1 a page for the original, $1.25 if not—she feels that she puts in a lot of extra time per page.

“I furnish all the paper and I type the letter and I do a better job,” she said.

Johnson says she would “feel bad if she didn’t do a good job” on the papers and she has found that she spends a lot of time proof-reading the papers.

“I’ve found that students aren’t very good spellers,” Johnson said.

Richard Johnson specializes in French, Spanish and English papers and proof-reading. He charges $1 and $1.25 if there are tables.

Richards has kept quite busy with her service. In fact, she says she has had turn down five offers within the last week. Richards feels her “job could be an asset in the business.”

I’ll have papers in French and Spanish, and I can read and proof-read these papers,” she said.

Lynn’s Office Service offers professional typing and the rates are varied. According to Kay Hayward, the rates run from $1.25 a page for papers that are easy to type, to $13.50 an hour for larger projects and thesis typing.

Hayward also offers discount rates for return customers. She has been the business over 30 years and guarantees her work.

With finals fast approaching, typing service will be needed frequently. Cal Poly students should check out the services that typing center provides. This will ensure the best deal for the student consumer.

University provides housing problems help

BY SUE BOYLAN
Daily Staff Writer

The Off-Campus Housing Office at Cal Poly helps student tenants find off-campus housing and work out problems with landlords.

Lindam Lambert, off-campus housing coordinator, said the office was created five years ago to help the approximately 10000 students who need to rent housing off-campus.

Her primary responsibility is to provide a housing service to students and find them a place. And we provide that service to students who have found a house or apartment, but are looking for roommates can also take advantage of the listed services.

Lambert suggested students using the off-campus housing office to look for housing by checking the listings every day.

“Don’t just look on Monday and check again Thursday, because you’re going to miss 20, 30, 40, different listings,” she said.

She said students should also be flexible when looking for a place to live.

Most importantly, if a student has made a decision, he or she should put the contract in writing.

Tenants shouldn’t be afraid to really check out their prospective living quarters storage space and appliances.

The off-campus housing office has another role—rehab and students and landlords.

“We’re here to help both sides, because if I don’t have the landlords then I won’t have listings, and if I don’t have tenants then I don’t need listings,” she said.

Communication is an important tool in solving tenant-landlord problems.

Lambert insists that students talk to their landlord when they are not, to the office with the problem.

If that doesn’t work, Lambert said, he gives student information about the relationship between student tenants and landlords is “pretty good,” according Lambert.

The housing office opens Monday through Fridays from 7:30 a.m. to 6 p.m.

Debate

From page 1

The state offers the legislature would be unable to pass fair relief later?

Noting that the rich would get bigger tax cuts than the poor, Hall said the California’s “economic” by the increase in consumer dollars would benefit all and create 200,000 new jobs in the private sector.

Hallett said the tax revenue generated after the passage of Proposition 13 will exceed spending even with the ongoing bail out of local governments.

Also, when the students suffer, she said, noting the budget of the California State University and Colleges has increased $10 percent every year despite Proposition 13.

Claiming Hall’s statistic to be “outrageous,” Vincent said the people who benefited most from Proposition 13—the middle class—will be hurt by Proposition 13.

Hall is the author of both these initiatives. Howard Jarvis is “playing the same kind of game,” she said.

“If that doesn’t work, Lambert said, it won’t have listings, and if I don’t have tenants then I don’t need listings.”

Communication is an important tool in solving tenant-landlord problems.

Lambert insists that students talk to their landlord when they are not, to the office with the problem.

If that doesn’t work, Lambert said, he gives student information about the relationship between student tenants and landlords is “pretty good,” according Lambert.

The housing office opens Monday through Fridays from 7:30 a.m. to 6 p.m.

Business

From page 1

devoted to the preparation of the two-volume request.

The second year entails investigation of that application by the AACSB, which the U.S. Department of Education has charged with accrediting business administration programs since 1916.

Once the formal application is submitted in June, it will be reviewed by an accreditation committee composed of deans of other schools of business which have already received professional accreditation, said Coe.

In its examination of the application, AACSB will look at the quality of the faculty, including their experience, education and professional activities; facilities, including the library; students; admissions standards; grading policies; disciplinary actions; curriculums, to ascertain whether the “common body of knowledge” in the business administration field is being taught; and

budgetary resources, to determine whether or not the university is capable of supporting the business school.

Aston is another factor which the AACSB will consider, and it is that factor which resulted in a delay in receiving accreditation for the degree when it was first sought in 1975.

That refusal came about primarily because of the in which the School of Business was then organized. The other would be a recommendation that the school not be accredited.

In that case, the school has the right to insist on a hearing, anyway, Coe said.
MICHENKO wrote in a report that Quebecois, a broad coalition of "independentists" from across the political spectrum, now has a mildly leftist social democratic program. Some U.S. officials say they believe it may move farther to the left if Quebec gains independence.

But many in the PQ dispute this and argue that the greater danger, from this viewpoint, would be to deny Quebec its independence and allow political pressures to build still further and thereby provide a possible opening to the militant left to take control of the movement.

U.S. officials say they expect a sovereign Quebec, in a natural aversion away from the "Anglo"-dominated West, to turn more toward the Third World.

SPINELLY'S
FOREST OF FASHION

SACRAMENTO (AP) - More than 80 percent of the residents of Big Sur oppose turning the area into a national scenic area, says Assemblywoman Carol Hallett, R-Atascadero, who wrote a report from New York. "It's one more trick by Tricky Dick," as he was known here long before the Watergate scandal.

Nixon received sympathetic treatment in the Moscow press during Watergate and was often pictured then as the victim of American "anti-detente forces." His new book calls for greater American vigilance toward the Soviet Union.

CIVILIAN was the name of 6.2 million dollars speaking Canada. "It's one more trick by Tricky Dick," as he was known here long before the Watergate scandal. Nixon received sympathetic treatment in the Moscow press during Watergate and was often pictured then as the victim of American "anti-detente forces." His new book calls for greater American vigilance toward the Soviet Union.
**Newman Community**

The Newman Community plans a meeting May 20 at 7 p.m. in Ag-227 to elect officers for next year.

The Newman Community plans a meeting May 20 at 7 p.m. in Ag-227 to elect officers for next year.

**Delta Tau fraternity plans a community workday on May 31. Those needing work done can call 543-9656 or 543-6593-a small group will be sent to the residence. Call for more information.**

**Wildlife Club**

The Wildlife Club plans a meeting in Science E-46 on May 20 at 11 a.m. Rob Frazier will give a slide show on the wildlife of Antarctica.

**Teachers Society**

Elections for 1980-81 officers for the Cal Poly Teachers Society will be held May 21 in the Faculty dining hall from 5:30 p.m. to 7 p.m. Anyone wanting to teach is welcome.

**Position open**

The School of Human Development and Education is accepting applications for officer and representative positions for the 1980-81 year. Leave name and number in Box 214. There is a council meeting in UU 219 on May 20 at 5 p.m.

**Pigeons**

From page 3, pigeon paradise, having many noks and craziness. Doherty said the pigeons "are a potential health problem, but not as serious as bubonic plague or rabies." The supervising sanitarian said the most serious animal-related hazard in the county is rabies, mainly transmitted by skunks.

**Spring Fiesta**

The Communicative Arts and Humanities Council plans a spring Fiesta night, in conjunction with the ASI Special Events, in Chumash on May 22 from 8 to 9 p.m. Price is 50 cents. Winners of the CASH photo contest will be announced.

**Cinderella**

Cinderella will be performed in the Cal Poly Theatre May 22 at 4:30 p.m., May 23 at 4:30 and 7:30 p.m. and May 24 at 2 p.m. Tickets are $1, available at ASI Tickets, One Records and at the door.

**Recognition awards**

The Social Sciences Council is taking nominations for student recognition awards to be presented at the Division of Social Sciences barbeque May 31. Submit nominations to the political or social science department offices before May 24.

**ASI positions**

Applications are being accepted for executive assistant to the ASI president. Forms may be picked up in UU 216, filing period closes May 24.

**AS! Films will show the Moonraker in Chumash on May 21 at 7 and 9:45 p.m. Price is $1.**

**Wine tasting**

Russ Cahill, director of Parks and Recreation in California, will discuss Proposition 1—the parklands and open space initiative—at a free wine tasting social given by the Recreation Administration Club in Mitchell Park on May 22 from 5 to 7:30 p.m.

**Yacht regatta**

The ASI Recreations and Tournaments Committee plans a yacht regatta in the UU Plaza on May 22 at 11 a.m. There will be three divisions custom made, store bought and unlimited. Prizes will be awarded. Price is 10 cents; boat rental is 25 cents.

**Sailing Club**

The Sailing Club plans a meeting May 21 at 8 p.m. in Science E-47 to discuss outings and sign-ups for the May 31 clinic.

**Birth control**

The SCO Family Planning services promote awareness of and protection to various forms of birth control and the use of contraceptives. They will explore the importance of the birth control mechanism and techniques, called "birth control methods." They will also discuss the need for and advantages of self-care. More information can be obtained at the Student Health Service's clinic on the campus.

**Holistic health**

The Cultural Arts Committee plans a lecture May 20 at 11 a.m. in Science E-31. Cal Poly E.O.P. director, Cal Wallace, will speak on affirmative action and equal opportunity in employment.
Cal Pol y grabs track crown

BY RALPH THOMAS
Daily Staff Writer
Cal Poly men's track team had little trouble capturing its third consecutive California Collegiate Athletic Association title here last weekend.

Dominating most of the distance events, the Mustangs tallied 165 points. Cal State Bakersfield took second with 147 and Cal State Los Angeles was third with 111.

According to coach Steve Miller, the victory came as a surprise to him.

"We thought we were going to get beat," said Miller as the two-day meet's final-mile relay—was being run late Saturday afternoon.

We asked where foresaw the Mustangs finishing, Miller said. "I had us being second.

Cal Poly's Jim Schanekel highlighted the meet with first-place finishes in the 1,500 and 5,000 meter runs. In the 5,000 Schanekel edged Steve Alvarado of UC Riverside to keep their strong rivalry alive.

The Mustangs took first and second in both the 3,000-meter steeplechase and the discus.

Jeff Swann won the steeplechase with Terry Sauer six seconds back in second place.

In the decathlon, Peter Monder broke the CCAA race record and the Cal Poly stadium record with 7,041 points. He was seconded by the Mustangs Steve Vokurka.

The Mustangs had three other first-place finishes in the field events. Brian Paul too the shot put, Dave Tucker won the long jump and Jim Timp narrowly won the pole vault.

Several other Mustangs placed in the top three in various events: Doug Aved and Eric Hult took second and third respectively in the 10,000-meter run. Richard Quigley took third in the triple jump.

Dave Albrighton received a second in the discus. Robert Riley took third in the javelin and Joe Faborts grabbed third in the 1,500-meter run.

Miller said the teams only "set down" way in the hammer throw where Rick Brunner, who was expected to win the event easily, fouled on his third attempt.

Robert Riley took third in the javelin and Jem Fants grabbed third in the 1,500-meter run.

Miller said he was pleased with his teams performance.

SUMMERTIME IS DRIVE TIME

SUMMERTIME IS DRIVE TIME

SUMMERTIME IS DRIVE TIME

SUMMERTIME IS DRIVE TIME
The anatomy of a distance run

BY TOM JOHNSON
Daily Sports Editor

The 5,000-meter clash between Cal Poly's Jim Schankel and U.C. Riverside's Steve Alvarez was billed as the dream match-up of the CCAA meet.

Alvarez had placed a close second to Schankel in the NCAA Division II Cross Country Championship this fall and seemed to average that defeat by dethroning Schankel of his three-time league crown in the 5,000. But like the national cross country championship this fall, the 5,000-meter dream match-up turned into a nightmare for Alvarez.

Schankel leaped out to an early lead in the race, determined to set the pace. Schankel then sank back into the pack, only intermittently streaking back to the lead.

"I dropped back and then started surging to see how many runners I could take with me. However Alvarez was the only one to surge with me," said Schankel.

Schankel had hoped that by surging early in the run he could upset the pace of Alvarez and fellow Riverside star Tom Westfall, wearing the pair down enough for Cal Poly's Manny Castilla and Terry Gibson to sneak into the third and fourth spot. But after the midway point when it was apparent that the Riverside duo did not fall for the ploy, Schankel abandoned that strategy.

"After the seventh lap, I decided to follow Alvarez and go for the win," said Schankel simply.

By the seventh lap, the large 5,000 field was effectively reduced to two men: Schankel and Alvarez. Alvarez had a two-step lead over Schankel, but it was obvious which runner was in command. Alvarez, who had won the 10,000 the day before, was obviously tired from his previous day's performance as his face was etched in pain and he was pulling hard.

Schankel's long and effortless strides, on the other hand, made him appear as if he were jogging around the block to the local drugstore instead of running the grueling 5,000 race.

With less than 220 meters left Schankel called upon his reserve energy and went into his final kick. The exhausted Alvarez had no kick left in him though, as Schankel streaked past, his main adversary in the winner's tape over two seconds ahead of Alvarez.

Richard Quigley sends a shower of sand flying as he lands firmly in the triple jump pit. Quigley surpassed his season's best mark to finish third in the triple jump.

San Luis Obispo County

"Old Cal" hates litter.
You hate litter.
Nobody likes litter.
Let's get rid of it.

Be sure your trash is contained.
Keep your property clean.
Carry a litter bag in your car.
Use litter receptacles.
When you take trash to the dump, cover your load to keep it from blowing or bouncing out.
