The previous owner of the Diablo Canyon nuclear power plant site is suing Pacific Gas and Electric, present owner of the site. The suit alleges PG&E reduced the value of surrounding ranch land by mishandling quake studies.

BY ROSEANNE WENTZ
Sacramento
If your green thumb has turned yellow, don't worry—help is available.

A group of students have volunteered to diagnose plant diseases, with the assistance of biology professor Mike Yoshimura.

A year ago this quarter, Yoshimura started a plant clinic to help his students in their plant pathology field work.

"I thought it would be a good way for students to gain more exposure and become more familiar with diseases in this area," he said.

The samples used for the clinic are donated by students, faculty members, and people in the community. First the donor fills out a form describing the plant's care and previous environment.

The clinic personnel then examine the plant to determine if it is suffering from a disease, insect, or nutritional problem.

The plant is isolated if it is found to have a virus or bacterial disease to avoid contaminating other plants. Information on the plant's status is given to the donor.

"Our major goal is diagnosis," said Laura Southworth, a senior biological sciences major. "We're not licensed to recommend chemicals. Sometimes we direct people to nurseries or to see Plants."
In June, a proposal will come before the San Luis Obispo City Council to eliminate the discount rate given to ASI for city bus tokens. ASI currently purchases the tokens at a discount rate of 28 cents for the 35-cent fare, and then sells them to students for 15 cents.

If the proposal passes, the price of student discount tokens could be increased. This would be a monstrous disservice to students who use the bus system. Students, on and off-campus, make consistent use of the fine system. Some take the bus because they don't have a car, others are merely energy-conscious and are doing their part to conserve by using mass transit.

In this day of rising gas prices and decreasing availability of fossil fuel, it is essential to encourage the use of mass transit. A rise in prices will only serve to hinder students from using the bus system. Thus, the council should make an effort—to all costs—to delay passing of this proposal. Certainly, they should wait until after the June elections to learn of the outcome of Proposition 11, which, if passed, will provide more funding for mass transit in California.

Ironically, it has been decreased gas consumption throughout the state that has caused the move to increase bus fares. The bus company receives revenue from gas taxes and, due to reduced sales, the company's revenue has decreased.

Not only will students be hurt by an increase in fares, but also senior citizens who purchase discount bus tokens. Many are in the same position as students—on a limited income and without alternate forms of transportation.

Looking at the problems of the times—less gas and less money—city council members should do all they can to further subsidize the system before they raise the prices.

**Letters**

**Misunderstood**

Editors:

It has been called to our attention that there was some misunderstanding concerning proceeds from the Monte Mills dance in January sponsored by Tau Beta Pi. The poster used to advertise the dance stated "proceeds go to Disabled Student Services."

Our intention from the outset was to donate one half of the profits to Disabled Student Services, and this fact was understood by them. In advertising, consciousness is of paramount importance. While striving for consciousness, words are used which at times are misconstrued by a few readers because of the frequent plurality of word meaning in the English language.

We wish to extend out most sincere apologies to anyone who misunderstood our intentions.

Ca Mu Chapter, Tau Beta Pi

---

**Bad Decision**

Editors:

The chalkboard in Fisher Science read: "Meet the Candidates' cancelled due to ASI free concert."

Many people were disappointed to miss a prime opportunity to hear the county supervisor's thoughts and opinions.

Whoever made the decision to cancel the forum is perhaps hating the decision on student apathy toward ASI election. Need it be stated that student apathy toward ASI elections does not necessarily mean that the same apathy will be present at county elections?

The decision to cancel reflects the decision makers' opinions of students. If the decision maker is an elected official, then they should be trying to expand activity hour, not limit.

Sincerely,

Katy Gibbs
U bowling prices low to inflation

BY MARY KIRWAN

Daily Daily writer

University Union's bowling prices, which have remained the same for nine years, have finally succumbed to inflation's demands.

March bowling prices took a 10 cent hike, from 50 cents to 60 cents. The union's ten alleys make about $900 to $1000 daily. According to Bob Jenkins, manager of the union's games, this is not enough to pay its bills.

The conversion of utility costs, repair charges and the capital game center has been running close to $1400 per month. This deficit has been absorbed by the state and the university. The game center alone expects a utility bill of $2400 per month.

Professor Bruce Finch hooks his ball down one of the University Union bowling alley's ten lanes. The game price was the highest in the state. Jenkins said bowling is an expensive operation to run. "The bowling price hike, business has not lowered mark up to prevent future price increases. For a lifetime of pleasure.

BY MIM WITTY

Daly Daily writer

The conversion of biology laboratories into chemistry labs has run into a financial snag.

Supervising Equipment Technician John Swanson said the lowest bid of $654,777 for the conversion was 44 percent higher than the $452,000 allotted for the project.

According to Executive Dean Doug Gerard, the project, known as Convert Science 3, was underfunded by the state. "The initial budget was arbitrarily low," said Gerard.

Gerard presented three alternative solutions to the dilemma:

-Make cuts in the project;

-Appeal to the state for additional funds;

-Abandon the project completely.

Gerard noted that the project architect is presently trying to find ways to cut the cost but added, "The project is minimal as it is.

According to Gerard, the best chance will probably be an appeal to the state combined with a scaled-down plan.

"We might try to convince Sacramento for more money," said Gerard. "We're always pretty fair with them.

The conversion project consists of six vacant laboratory rooms in the Science Building, installation of lab furniture, fume hoods and some structural modifications, said Gerard.

Swanson said the rooms were vacated by the biology department when it moved to Science North.

Swanson cited the constant need for good teaching facilities and the crowded situation as reasons for the conversion.

"We're very crowded and we'd like to have a better environment," said Swanson. "Jenkins didn't know when and if the conversion will start. Said Swanson. "We're frustrated and we'll do the best we can."

Bruce Finch hooks his ball down one of the University Union bowling alley's ten lanes. The price per game at the UU jumped from 50 to 60 cents in March because of rising utility costs.

Bio lab conversion hits financial snag

Summer bulletin available

BY MANUEL LUIZ

The summer bulletin for Cal Poly's summer quarter, a full ten-week program for upperclassmen and with permission of the instructor.

Thirty Cal Poly Extension courses are scheduled between June 18 and August 27, including courses in real estate, architecture, computer science, education, engineering, physical education and psychology.

These sessions should not be confused with Cal Poly's summer quarter, a full ten-week program for matriculated students and offered as part of the regular curriculum.

Summer quarter course will also be available to extension students through concurrent enrollment. Those wanting to learn a subject or take a course for fun can do so if there is room in the class and with permission of the instructor.

Fees for Cal Poly Extension courses are $35 per lecture unit, $55 per activity unit and $85 per laboratory unit.

Poly group, Sierra Club in and use fight

BY JENNY COYLE
DAILY HOME WRITER

The Sierra Club and Cal Poly Penguins locked horns about an annual motorcycle race held earlier this month, and are honing arguments for the off-road event next year.

Sierra Club conservation chairman Robert Griffin said the Santa Lucia Chapter intends to prevent the Penguin's 31st Annual Hi-Mountain Enduro in 1981.

The chapter opposes the race because motorcycle riding in this particular area of the Los Padres National Forest conflicts with all other legitimate uses of the forest, said Griffin.

The environmentalists plan to work closely with government agencies involved in the event. Griffin said the club is even willing to take the Penguins to court. He expects to be back in the pit with the Penguins in December.

“We want to work with all the government agencies that have jurisdiction over this event just to make sure there are no oversights or misunderstandings in the application for a land use permit,” Griffin said.

He said the Sierra Club also has congressional representatives working to have parts of the endurance course declared "wilderness areas" restricted from off-road vehicle use.

If the motorcycle club fails to handle the proceedings lawfully, he said, “We'll spend a few thousand dollars and take the Penguins to court.”

The Sierra Club appealed the permit for the race this year at three levels, and failed three times to overturn the decision. The event went on as planned on Sunday, May 11, drawing 320 participants.

The Penguins have also begun early preparation in hopes that the legal proceedings they expect will be completed by March.

Enduro steward Paul Peterson, who organized the race, said the Penguins will concentrate on perfecting the permit application to minimize Sierra Club criticism.

The application requests use of Los Padres National Forest. It includes approval from county sheriff, park administration, and engineering departments and permission from private landowners with property included in the course. A liability insurance policy must also be included.

Peterson said if the Penguins face a court trial, lawyers will be supplied by the American Motorcycle Association, District 37.

He said the bikes are equipped with forestry approved spark arresters to prevent forest fires, and meet some reduction requirements.

“We don’t blame any new trails,” said Peterson. “It’s not like we’re running over any green, grassy open meadows.”

Furthermore, said Peterson, the trails follow county roads, established motorcycle paths and fire roads.

The Penguins will fight for their right to use those trails, said Peterson.

“We don’t feel the Enduro race harms the environment,” he said.

Griffin disagrees.

“Anyone who would argue that 600 motorcycles streaming through a forest is compatible with the flora and fauna is irresponsible,” said the Sierra Club representative.

Griffin said the Environmental Analysis Report, assessing the impact of such a race on the environment, was "grossly inadequate."

Dirt bikes like this are the subject of a brewing feud between the Santa Lucia chapter of the Sierra Club and the Cal Poly Penguin off-road club.

“It overlooked very hazardous impacts in the area such as erosion,” Griffin also said the report used for the EAIR this year was a short form. Sierra Club will draft a new form for the Enduro.

“Convince me Mother Nature is interested in motorcycles,” said Griffin, and "I’ll reconsider my stance.”

Oil Lease 53 talk, Morro Bay saltmarsh walk and Valencia Peak hike from ECOSSO

Offshore oil drilling hearings and early morning bird watches are two of many activities planned by the Environmental Center of San Luis Obispo County during the month of June.

An informational meeting on the possibility of offshore oil drilling near Morro Bay will be held Saturday, May 31, at the San Luis Obispo County Board of Supervisors Chambers at 9 a.m.

Outdoor ventures on the same day are a climb up Valencia Peak, scheduled to begin at Montana De Oro State Park at 9:30 a.m., and a walk, through the saltmarsh, leaving from the Natural History Museum in Morro Bay State Park at 9:30 a.m.

The Central California Coastal Coalition will hold its weekly meeting on Monday, June 2 at ECOSSO, 985 Palm St. at 7 p.m. The aim of the group is to stop offshore oil drilling along the central coast.

The birds of Montana De Oro will be the subject of a nature watch on Tuesday, June 3 at 6 a.m. beginning at the park headquarters.

A bird watch of Coon Creek will begin at the southern parking lot at Montana De Oro at 8 a.m. on Thursday, June 5.

An ECOSSO potluck picnic at Laguna Lake Park—including live music, games and guest speakers—will begin at 10 a.m. on Friday, June 7.

A tour of solar homes in Arroyo Grande, Pismo Beach and Grover Beach will be held Saturday, June 8 at noon.

The tour includes homes and American manufacturer of solar collectors. Tickets are $3 for advance and $3 the day of the tour, and are available at ECOSSO.

A hike into East Arroyo Grande Canyon will begin at 9 a.m. on Saturday, June 8. A car pool will be formed at the corner of Peachy Valley Road and Woodland Drive in Los Osos.

Since Proposition I is a life-
saver for the future of parks and
recreation, I spoke to ap­
stately 75 people at a
panel of experts
the benefits of
I. This show on the June
would allow for a
of $465,000,000,000
used for
rents and purchase
Cahill was to speak by the Cal
since 1929," said Cahill
"Proposition I is a con­
tinuation of this funding." 

Cahill said. He hoped that
the proposition would not
be affected by the Jarvis
demand for tax cutting.

"It is the Pied Piper of
tax reform, telling us to
out, cut, cut," said Cahill,
describing Howard Jarvis.
"His philosophy is I've got
mine now so you get
yours some other way. 
Well, Howard Jarvis can
him.

"The voters of this state
should not look at the
benefits as a promise to
the people of California.
"It's a good deal," he
said, "The cost per person
breaks down to two dollars
per year.

Cahill said "People
should have access to the
parks, especially since gas
is out of sight. Communities
should have parks for their
enjoyment and their children's
enjoyment. If we don't pay
our dues for the future, it
will come back and haunt
us."

Prior to Cahill's speech,
the Recreation Adminis­
tration Club hosted a
to the sprawl campus
people of California."

"It would allow
San Luis Obispo County to receive
of $495,000,000

A backstage peek at Cinderella

Hours of preparation go into any stage production. The make-up call is two hours before curtain time.

Bradly Bessey, who had to look like a man in his forties, applies his facial toning and highlight make-up (upper left).

Steven Zunich had to get a hair cut before the Thursday performance because his hair was too long for the time period, and Mary Graves was the one elected to do the royal trim (above).

Tiffany Workman had the longest make-up job. She played the role of the fairy godmother and she had to look like a woman in her eighties. Gray tinting had to be applied to her hair, and Vicki Bailen had to apply the undercoating powder to the wrinkle tissue that was applied to Tiffany's face (lower left).

Kristin Jakobsen was backstage specifically to help set the women's hair. She is shown (below) drawing back the hair of Kelly Zirbes in preparation for flowers that were placed in her hair.

Zirbes is busy making a crooked nose—a job that took over an hour.
BY VICKI MILLER

I could feel my arm being crushed against the concrete, concrete wall. My head was pressed into someone’s chest, but it was too dark to see who. The pain in my arm subsided as someone jabbed his elbow into my ribs.

"Sorry," mumbled a voice from the darkness.

I was trapped by the contortion of arms and legs pinning me into the tiny niche. But even through the discomfort, I could feel the synchronization of everyone’s breathing in anticipation of the train that would be barreling through the black, dingy tunnel at any time.

Jeff Sorenson has always liked trains. But his hobby has far surpassed the stage when he just looks pictures of them. Now he watches them closely—from inside a train tunnel.

"You get up to the track and can smell all the oil and your heart beats a little faster," said the Cal Poly third year architectural engineering student.

Sorenson said he enjoys doing things people don’t usually do and train tunneling falls into this category.

He said the excitement starts when he and his friends get on old “train tunnel” clothes late at night. They wait for a train whistle to blow and then figure out which direction the train is going.

If it is headed north, they run to their car and drive up Cuesta Grade to the train tunnel.

Inside the tunnel there are holes cut in the walls which hold about five people, said Sorenson.

"You find your niche, but stand around outside the niche until you hear the tracks start clicking," said Sorenson. "Then you hear the low sound created by the trains as they slowly move toward you.

As the rumble gets louder, the light from the train hits the walls and the most exciting part begins, he said.

"Finally the light hits you and you can get the whole train tunneling experience," he said.

Scientists have had little luck forecasting what the mountain would do since it first started acting up three months ago. However, Dwight Cranfill, chief of hazards evaluation for the U.S. Geological Survey, outlined a new scenario of potential hazards.

"As long as we are getting any gas-rich magma coming out of the volcano, there is a chance of a large eruption anytime," he said.

Magma is molten rock.

Crandall said lateral eruptive blasts, like the one on May 18, could cause damage extending about 12 miles north of the mountain.

All members should attend the next meeting of the Alternative Energy Club for officers. The meeting will be in Science North 213 at 11 a.m.

Jazz Night
The University Jazz Band will present an evening of music on May 30 in the Pom Theater at 8 p.m. McClellan Peterson, tenor sax player for the NBC Tonight show, will be in attendance.

Frisbee club
The Cal Poly Disc Golf Tournament and Festival, Frisbee Competition sponsored by the Central Coast Disc Magazine (Frisbee Club) will be Saturday at 10 a.m. Participants should meet at the west entrance of the Recreation and Planning Center before 10 a.m. for more information, call 546-1291.

Resource group
At the general meeting of the Appropriates Resource Group, the films will be shown followed by a planning session. The group will meet in UU 220 from 8 to 10 p.m. on Monday, June 2.

SAM Banquet
The School of Business will have its annual banquet on May 31 at the Golden Tee in Morro Bay. Cost is $10. Cocktails will be at 6:30 and dinner at 7:30 p.m.

Palm political advertisement
"I will support careful planning to prevent the irresponsible subdivision of agricultural land, discourage sprawl development around our cities, and make sure that where new development occurs, adequate public services are provided which do not impose a financial burden on existing residents."

Vote June 3rd
Jeff Jorgensen
Supervisor District 5
WASHINGTON (AP) — Americans filed more claims for unemployment insurance during mid-May than in any week since at least 1967, an ominous sign of a new surge in the nation's jobless rate, the government reported Wednesday. The Labor Department said a seasonally adjusted record of 675,000 Americans filed new claims for jobless benefits in the week ending May 17, a sharp jump from the previous high of 616,000 first-time claims recorded the week before.

Unemployment shot up from 6.2 percent in March to a 7 percent rate in April, the largest one-month jump since the depths of the last recession. Each rise of one percentage point in the unemployment rate means 1,040,000 more Americans are out of work.

**Military to rule in South Korea**

SEOUl, South Korea (AP) — The military, unchallenged after crushing democracy-seeking insurgents, will formalize its control of South Korea by establishing a council that will govern by martial law decree, informed sources said Wednesday.

The sources said Choi Kyubah, the interim civilian president, will remain in his post, but Chun Doo-hwan, the nation's security commander, and other generals will run the country.

The popularly elected national legislature will have virtually no role to play in the decision-making process once council members are named, the sources said.

The military offered a limited amnesty in Kwangju on Wednesday, a day after paratroopers killed 17 civilians when they crushed a nine-day rebellion. The rebellion, in which 290 persons were killed, was led by students demanding greater democracy.

In Washington, a coalition of human rights groups accused President Carter of supporting the "most vicious and fanatic elements" of the South Korean military.

**Hurricanes to be male again**

WASHINGTON (AP) — Men's names will make their second appearance among hurricane titles this season, with Allen selected as the name of the first tropical storm.

The National Oceanic and Atmospheric Administration issued this year's list of Atlantic and Caribbean storm names on Wednesday. Allen will be followed by Bonnie.

**Unemployment hits 7 percent**

WASHINGTON (AP) — Americans filed more claims for unemployment insurance during mid-May than in any week since at least 1967, an ominous sign of a new surge in the nation's jobless rate, the government reported Wednesday. The Labor Department said a seasonally adjusted record of 675,000 Americans filed new claims for jobless benefits in the week ending May 17, a sharp jump from the previous high of 616,000 first-time claims recorded the week before.

Unemployment shot up from 6.2 percent in March to a 7 percent rate in April, the largest one-month jump since the depths of the last recession. Each rise of one percentage point in the unemployment rate means 1,040,000 more Americans are out of work.

Sports commentator’s styles blasted

BY TOM JOHNSON
Daily Sports Editor

Many people assume sports writers and editors are frustrated jocks—the small kid on the block who, no matter how many balls he hit in the vacant lot behind his home, could not play first string for his Little League team. That may be true of many sports editors, but it was not true of me. I was a frustrated sports analyst.

Through the years I have hashed away scores of observations and criticisms in the deeper recesses of my mind. The information has lain dormant for 10 or so years, but recently has proclaimed to get out. So I decided to devote the column this week to discussing the observations and criticisms I have made of sports analysts and other sports personalities through the years.

Boxing
—Why is it when a boxer is staggering about the ring after a monumental blow, and about to collapse, does the announcer say, “He is looking a bit groggy now”?

—Why is it when Jack Nicklaus lofts a ball 20 feet from the cup does Ken Venturi call it an absolutely perfect shot? If it was absolutely perfect it would have landed in the cup.

Baseball
—Why does Tony Kubek spend more time making bald jokes than commenting on the game?

—Why does Joe Garagiola spend more time defending his baldness, telling Yogi Berra stories and discussing rebounding.

With five minutes left in the first half, the Burnt Weeney rode off 10 unanswered points to take a 24-14 lead. Tom and Dave Krazmarzick both pumped in a pair of 20 footers and Edmonds muscled in an offensive tip to account for the 10 point run.

Tom racked up 14 second-half points and Joe Groove added seven points to put the game out of reach.

Edmonds finished the game with 12 points and Dave Krazmarzick added 10.

Mike Thompson led the Misfits with 10 points.

The Burnt Weeney earned the championship berth by downing Smegma and the Misfits outlasted Caden Bo.

In the “A” League finals, Dads II upset the Fog, 45-37. Rich Alvar scored 13 points, nine in the first half.

Other sports.

—Why doesn’t someone throttle Bill King the time he says “HOLY TOLEDO!!”?

—Why Howard Cosell?

—Why do the cameramen spend more time ogling bouncy Dallas Cowboy Cheerleaders than watching game?

—Why, when the cameramen pan the sidelines after a touchdown, does a player invariably wave at the camera and say, “Hi Mom!” Why can’t they say “Hi Dad!”

—Uncle Jim back in Scranton, Pennsylvania, “Eat Joe’s” or anything but that blasted “Hi Mom?”

My ego has been satisfied. My soul has been comforted. Now I’ll let you get back to the game.

Hi Mom!

One Good Pizza Deserves Another.

BY VERN ARENDES
Daily Staff Writer

Tom Krazmarzick pumped in 22 points to lead the Burnt Weeney to the intramural basketball “B” League championship.

Red hot shooting in the first half enabled the Burnt Weeney to coast to a 60-44 win over the Misfits.

Crisp passing and domination of the offensive boards paced the Burnt Weeney to a 28-15 halftime edge. Tom and Sam Edmonds each tossed in eight first-half points.

Edmonds controlled the middle of the Weeney 2-1-2 defense and led the team in steel production in Yugoslavia than commenting on game?

Basketball
—Why do they have the moronic slam-dunk competition which prejucice against the little men like Calvin Murphy and Nate Archibald? The contest perpetuates the myth that basketball is reserved for those with pituitary problems.

—Why doesn’t someone throttle King the time he says “HOLY TOLEDO!!”?

Football
—Why Howard Cosell?

—Why do the cameramen spend more time ogling bouncy Dallas Cowboy Cheerleaders than watching game?

—Why, when the cameramen pan the sidelines after a touchdown, does a player invariably wave at the camera and say, “Hi Mom!” Why can’t they say “Hi Dad!”

—Uncle Jim back in Scranton, Pennsylvania, “Eat Joe’s” or anything but that blasted “Hi Mom?”

My ego has been satisfied. My soul has been comforted. Now I’ll let you get back to the game.

**New cagers conduct draft**

LOS ANGELES (AP) – Austin Carr of Cleveland and Richard Washington of Milwaukee were among the 22 players selected today by the Denver Mavericks in the National Basketball Association expansion draft.

The Mavericks, who will begin play next fall, picked one player from each of the 22 existing NBA teams, who were allowed to protect eight men on their roster.

For the most part, the Mavericks bypassed the better known players, who were available, choosing to go with younger, less experienced players who may develop into solid contributors.

Besides Carr and Washington, other players chosen by the Mavericks included: Jack Givens, Atlantic; Jermaine O'Neal, Boston; Delneri Brshore, Chicago; Arvid Kramer, Cleveland; Larry LaRosa, Denver; Terry Duco, Detroit; Ray Townsend, Golden State; Alonzo Moulton, Houston; Joe Hassett, Indiana; Billy McKinney, Kansas City.
