Graduation 1980: getting out at last
Opinion

Symbolic defeat

On June 17 the Public Transportation Company of San Luis Obispo voted to strike down the 7-cent bus token discount formerly given to the ASI, and require ASI to dole out the usual 35 cents for each token it purchases.

In these troubled times, with the menace of inflation clawing threateningly at the door, and welfare lines growing longer, a 7-cent bus token rate hike seems insignificant. Indeed, the increase, which will probably mean each Cal Poly student must pay 20 or 25 cents for a token instead of the current 15 cents, will not force students to camp on street corners, begging passersby for spare change.

But the bus token decision did mark an important symbolic defeat for Cal Poly students. When the Public Transportation Company sold tokens to the ASI for 28 cents, it was engaging in a type of price discrimination: it was giving a rate break to a group which it viewed as deserving.

This mode of price discrimination is common in the transportation industry, for it recognizes that a sizeable percentage of students, as well as senior citizens, do not own a car nor can they afford paying 70 cents each day to ride a bus.

So when the Public Transportation Company stripped the ASI of its reduced rate privileges without increasing the $2.50 monthly pass for senior citizens or the rate charged to the general public for a single bus ride, it said in essence that the financial plight of Cal Poly students is not significant enough to merit a bus token rate reduction.

It would not be as disturbing that the Public Transportation Company turned its back on the needs of students if such was an isolated instance. But this is merely another in a line of decisions made by a San Luis Obispo group which works to the detriment of Cal Poly students.

The relationship between the university and the city, is, to put it bluntly, parasitic. The city thrives off the increased commerce and prestige Cal Poly brings, and the students derive most of their basic needs and much of their entertainment from San Luis and its surrounding community.

For such a parasitic relationship to exist both the university and the city must be in harmony. The bus token increase is one similar decision that disrupted this fine balance and looses the already frayed ties between the university and the city of San Luis Obispo.

When the livin’ is easy

Welcome to summer quarter 1980. You’re in for an experience.

For those of you who haven’t been around at Cal Poly during summer before, you may be in for a shock. Example: there are no Tues.

At Cal Poly, you ask? How can there be no Tues.

Look around you. Gone are the half-hour waits for french fries at the Burger Bar, and extinct are the hour-long waits for books that we suffered all through fall, winter and spring. No more of fellow students crowd the walkways between classes.

New students who start at Poly during the summer quarters are confused and bewildered when full quarter begins. All of a sudden, there’s all these people. There are lines. There are crowds. There is traffic. New students are struggling to find their way.

But back to summer. Summertime in San Luis Obispo is, in many people’s minds, close to perfection. It gets hot—usually up into the 100s by finals week—but beaches are close and the customary SLO winds keep everyone fairly cool. Students and teachers alike dress carelessly to beat the heat, and the informal atmosphere spreads to every department on campus.

It is not uncommon for a summer quarter class to start out with forty people and end up with ten. Students add and drop classes using the same ease with which they put on or kick off their beachcombers. All of a sudden, getting a tan is of more interest than Chem 121.

Added benefit: clothing is kept at a bare minimum during these months. Girl and guys alike find the scenery much more appropriate than any evening outfit.

At any rate, welcome back, everyone. Enjoy the summer while you can. If nothing else, it will be unique. But don’t get too spoiled, for it will all go back to normal—the way it was before—when September rolls around.

I mean, if you have to go to school in the summer, you might as well do it around here.

Letters

Racial inequality?

Editors:
The interview with James Patton in the June 3 Mustang Daily demands a reply.

Mr. Patton states that URSSC’s goal is to attain equality. That’s fine with everyone. But he doesn’t cite evidence of existing racial inequality other than “walking by and not looking at you” (come on, be reasonable) affirmative action (I agree, but this is a contradiction of his views—discrimination in favor of minorities and employment the laws written today prevent such discrimination).

Author Kathryn McKenzie is a senior journalism major and co-editor of the Summer Mustang.

Mr. Patton gives vague references to “ignorance” and “oppression” but no evidence. I will contest the opposite view in our society, it is generally to your advantage to be a minority.” This is because, contrary to what Mr. Patton believes, the laws in existence today are geared to help non-whites.

But why must there be this agitation? Why must we have groups like this which serve only to widen the gap between the races i.e. “stirring things up,” labelling all whites as one-dimensional, or falsely accusing the administration of unfair hiring practices? Examples he gives of being detrimental to blacks are long gone and don’t apply to today’s world. I agree, but this is a category and demands example, that the Cal Poly specifically have “black instead of the best available”.

I don’t downgrade and skin. It’s only when people unite and coalition against them: no apparent reason, the become resentful.

On the cover

Saturday, June 14, was graduation day for some 3,791 Cal Poly students who received degrees at the 76th annual commencement ceremonies in Mustang Stadium. Pictured is Pam Haynes, who apparently decided to go barefoot as she walked into the stadium to take her place among the others in the Class of 1980.
BY CHERYL JOHNSON
Mustang Staff Writer

While there may indeed be nothing new at the site, something new is sustaining seniors on the already sun-drenched scene at 1049 Higuera St. The suntan feature most modern in Europe, which differs radically from the sun-ray booths which recently became popular throughout the United States, say owners, operators and friends Madeline Hornby and Harrison.

The end result of the $59.50 for six sessions is for many what was at first an unachievable dream—a golden skin only seen on movie stars or ad models for Coppertone—the method is now the ray booths or the sun itself use to utilize the long range rays (UVA) of the ultraviolet spectrum, claim Hornby and Harrison.

According to both women, the UV A rays, found in the tropical breeze. Rattan furniture and a grass-green carpet complete the atmosphere is more like that of a resort bathroom or a high-fashion health center.

But patients exposed to UVA radiation for the treatment of skin diseases have accidentally been burned in clinical settings, particularly when used in conjunction with certain types of medication, she stated.

According to Hornby, no medical information is taken from customers before they are allowed to use the loungers. "There is nothing people would do that could have any detrimental effect going into the body several weeks to manufacture new skin, but it takes the body several weeks to manufacture new melanin that makes it impossible for a person to get a deep tan in a short period of time," said Stern.

"All that can be done quickly is to darken melanin that is already present," she adds. Dr. Stern agrees that UVA radiation is not as potentially cancer-causing as other waves in the ultraviolet spectrum—UVB.

"Tanning use," by Dr. Frederick Urbach, a dermatologist for the United States, says "People trying to get a glorious tan in two days are going against what the system can do," she said.

After the body is exposed to sunlight and the melanin in the skin has darkened, it takes the body several weeks to manufacture new melanin. That makes it impossible for a person to get a deep tan in a short period of time, said Stern.

Madeleine Hornby, one of the owners of the newly-opened Safety Tan Lounge on Higuera, tries out the Sontegra tanning equipment, which she says is safer for tanning than conventional sun ray booths or the sun itself.

The SLO transit bus, a familiar sight on campus, speeds by the University Union plaza. Cal Poly students may have to pay more for the bus service as the Public Transportation Company voted to discontinue token discounts.

Recreation facility open

Three intramural sports will be offered this summer and all recreation facilities will be open announced Activities Planning Center Director Ken Barley. Volleyball, softball and basketball intramural programs will be offered for both on-campus and off-campus students. For more information, interested intramural participants can contact the main gym intramural office at extension 2754.

For open recreation, such as basketball, the main gym will open Saturdays and Sundays from noon until 4 p.m. The weight room will be open from 8 a.m. to 10 p.m. Monday through Thursday, 8 a.m. to 6 p.m. Friday and noon to 4 p.m. on Saturday and Sunday.

The equipment cage opens at 8 a.m. and closes at 4 p.m. Monday through Friday. Swimmers can enjoy a dip in the pool any time during the week.

The discount tokens and bus passes are subsidized by the state through the fines and forfeitures fund accrued from campus parking citations. For each token sold for 15 cents, the state chips in 15 cents.

For the 1980-81 fiscal year, Adams has requested a 15 cent state subsidy for each 20 cent token, leaving 20 cents to be paid by commuters.

The total state subsidy requested by Adams for the 1980-81 discount bus program is $30,002, almost double last year's figure.

Adams and Director of Business Affairs James Landreh said the amount of money available for the 1980-81 program will not be known until July 1. Landrath added that based on a preliminary assessment, the $32,002 figure would not be available.

Adams said if his request was not met, then he would meet with ASI student fees to hammer out a discount program based off the available money.

"I would like to tell the students that we have a discount program based on the available money."

The ASI has no bus tokens available now, Adams said, and has no funds with which to buy more from the city.

"There was a run on tokens the day after the story also. The price increase was in a 4-1. The price would go up.

Adams hopes to have tokens for sale on July 2 at regular 15 cent price when program's funding formation is available.

BY JIM MALONE Mustang Staff Writer

SLO Poly bus commuters will probably pay 5 to 10 cents more in September for discount bus tokens as a result of a 7-cent increase in the volume discount price for tokens, approved in concept by the San Luis Obispo City Council on June 17.

ASI Program Director Stephen Adams said Monday that the five-year 29-cent price paid by the ASI for tokens will jump to 35 cents "probably sometime in mid-August." The ASI is in the fiscal year ending June 30 will have sold 104,500 of the quarter-sized blue tokens to students, faculty and staff for 15 cents each.

The discount tokens and bus passes are subsidized by the state through the fines and forfeitures fund accrued from campus parking citations. For each token sold for 15 cents, the state chips in 15 cents.

For the 1980-81 fiscal year, Adams has requested a 15 cent state subsidy for each 20 cent token, leaving 20 cents to be paid by commuters.

Students protest rape suspect release

Paso Robles and has been suspended of his job, Sheehan said.

County prosecutors were in court at presstime and were unavailable to confirm Gaines arrangement and preliminary hearing. Sheehan said she was told a preliminary hearing would be held by July 3.

Sheehan said prosecutors will probably drop the burglary charge and stick to the rape charge, which carries a maximum sentence of five years.

"It's the way the courts work," she said. "They'll drop it."

President of PG&E speaks in SLO

BY ELISA WILLIAMS

Mustang Staff Writer

With preliminary testing scheduled to start at Diablo Canyon nuclear power plant this fall, the president of Pacific Gas and Electric Company said Monday that PG&E is now working to establish a good neighbor policy with the San Luis Obispo community.

Speaking before the San Luis Obispo Rotary Club, Barton W. Shackelford said the debate over the licensing of Diablo Canyon is over. It is now time, he said, to educate the public on the nation's energy situation and Diablo Canyon's role in it.

PG&E will be stepping up community relations to inform San Luis Obispo residents about Diablo Canyon's role in their lives, Shackelford said. It is hoped that this will ease some of the tension concerning nuclear power in the area.

Although the opposition to Diablo Canyon has gained some positive safety benefits, the delay in starting operation of the plant has cost a tremendous amount in terms of finances and international standing. While stressing Diablo's safety, Shackelford said that nuclear energy is California's best energy alternative because of the many problems associated with coal plants. He said coal-burning plants cause air pollution and that their clean-up systems have not been proven.
Puppeteer to perform

"Magic and poetry rolled into one...it is a performance eminently worth going out of one's way to see," is one critic's appraisal of the puppetry of Albrecht Roser of Stuttgart, West Germany.

Roser will be performing close at hand this summer—however—he will bring his marionettes to the Cal Poly Theater on Friday and Saturday at 8 p.m. Roser will also give a workshop on puppetry from June 27 to July 2.

The marionettes, "Gustaf and His Ensemble," are brought to life in a series of solo vignettes. Roser simulates his shows at audiences of five years and older. It is not a puppet show for children, but entertainment for all.

Ticket sales for the performance are $4 and are for reserved seating only. They are available at Oso Records, the UU box office and at the door before each performance.

Roser, a puppeteer since 1951, has performed all over the world and the United States.

During his stay in San Luis Obispo, Roser will also conduct a six-day workshop on "The Art Of The Marionette." The workshop, which includes six three-hour sessions and several lunches with Roser, costs $115. Those interested should contact Fred Wolf at 546-2158. Space for the workshop is limited, so early registration is advised.

**UBG, ASI wrangle over use of University Union**

BY JIM MAYER

Mustang Staff Writer

In a move that could spell the end of the outgoing ASI president, Jeff Land said the administration should use the UU's northern activity space for the university Union is a local family restaurant. It also requested the use of University Union's student-owned facility, Land said, as long as it is not used for athletics.

Tickets for the performance are $4 and are for reserved seating only. They are available at Oso Records, the UU box office and at the door before each performance.

Roser, a puppeteer since 1951, has performed all over the world and the United States.

During his stay in San Luis Obispo, Roser will also conduct a six-day workshop on "The Art Of The Marionette." The workshop, which includes six three-hour sessions and several lunches with Roser, costs $115. Those interested should contact Fred Wolf at 546-2158. Space for the workshop is limited, so early registration is advised.

**Child development lab gets "dinosaur"**

BY LORI ANDERSON

Mustang Staff Writer

There's a dinosaur hanging around the play area of the child development lab.

Dennis Potts, a sophomore architecture major said, "The dinosaur was built for Poly Royal as part of the 'Transaction through Time' untanglement." After the Poly Royal weekend, the dinosaur, named Deano for the architecture department dean, George Handson, was stolen by one of the architecture lab students.

Potts said Alpha Rho Chi put out flyers in search of the missing dinosaur and eventually discovered him in one of the labs.

Once Deano was recovered, he was held in the slide library of the architecture building until an auction was held to sell him to the highest bidder.

Alpha Rho Chi bought the gray, bespectacled beast for $55 and decided to give it to the child development department.

Potts said they donated the dinosaur because the fraternity is new and would like to involve itself in school and community projects.

Mary Jo Croft, student teacher in the child development lab, said the children really enjoy the dinosaur.

"We've been doing alot on dinosaurs," she said, and some of the children have taken a special interest in the prehistoric beasts.

Adam, a five-year-old student, said, "I wish that thing was alive."
