Poly may cede from troubled state student group

BY JOE STEIN

The ASI may be pulling out of the statewide organization created to represent the 360,000 students in the California State University and Colleges.

ASI President Willie Huff told Daily that he's giving employees and voting members of the California State Students Association "another couple of months" to reform before suggesting to Poly's student senate that the ASI pull out.

Poly's withdrawal from the CSSA would not be unprecedented. Humboldt State University pulled out last January after four years of troubles with the association.

Huff said he favors withdrawing from the association partly to save ASI dollars. Cal Poly students pay the association $4.19 in dues and have paid ASI presidents about $3,000 a year to travel to the CSSA's monthly meetings. Huff also complained about entire weekends being taken up during CSSA gatherings which could be spent setting out the ASI's own problems.

A more serious problem, however, is Huff's disagreement with CSSA members and staff about a change in personnel. Huff and others would like more of the CSSA represented in Long Beach, where most CSUC administrators are located. CSSA staffers in Sacramento and Long Beach and their supporters among the association's members prefer the raising of money among the 18 schools still participating in the organization in order to fund a fourth staff position.

Huff, however, prefers firing one of the two staffers in Sacramento—namely, Legislative Director Steve Glazer—and replacing him with a staffer in Long Beach.

Glazer hasn't made his suggestion officially to other CSSA members and staffers but it will not come as much of a surprise. Several CSSA members (all members are student body presidents) have expressed doubt about Steven Glazer's performance on and off the record. Glazer's misunderstanding of the performance of Legislative Advocate Donnie Brownsey and liaison to the Chancellor June 30th. Glazer's performance and on his predicament until after the CSSA's next meeting.

Those who are critical of his performance would not detail their objections for the record, but a former CSSA member still involved in CSSA politics explained why her university stopped paying dues to the organization.

Preses differ on city-college relations

BY RALPH THOMAS

A difference of opinion over city-college relations marked the Wednesday evening speeches of Cal Poly President Warren Baker and ASI President Willie Huff as they addressed the year's first ASI student meeting.

"I have sensed that our (Cal Poly's) relations with the community have improved," said Baker, who added that ground is being broken for the formation of "Greek Row," but made no promises.

Huff, however, said he is not so pleased with student/community relations. He said he feels there is a "bias" toward Cal Poly among the Cal State University and Colleges.

"It's the thing to do—break up the first partiers," said Huff after pointing out he hears of high school student parties which never get busted by the police.

Another issue taken on by Baker was funding for Cal Poly. After looking back at last year's bleak financial situation, he said, "This year I am much more optimistic."

"I find that Cal Poly has tremendous support," said Baker, but added, "we may have to tighten our belt for the next year or two."

The "type" mentioned by Baker comes from two groups he formed for that purpose.

One of those—the President's Corporate Cabinet—is made up of business executives and assists the president's drive for financial support and decision making.

The other group—the President's Round Table—is made up of major donors to Cal Poly.

Baker said the members of this group do not partake in the school's policy making.

After Baker's talk the floor was opened for questions. Students asked about the opening of the new library, the possible mergers of departments, alcohol on campus and rumors of plans for a new stadium.

According to Baker, the new library should open at the beginning of Winter quarter, the delay caused by lack of shelves.

More departmental mergers are possible, according to Baker, where long term plans for Cal Poly are concerned. Baker said, "We should be looking ahead.

Baker said, "It is not appropriate for the public sale of alcohol on campus."

Preses differ on city-college relations

BY HAROLD ATCHISON

Eddie Gains phoned no contest last Friday to the charge of raping a Cal Poly coed June.

Gains, who worked part-time as a peace officer at the California Youth Authority facility at Paso Robles until his arrest and suspension, is scheduled for sentencing next month.

He was arrested June 8 and bail for burglary, his second charge, was set at $10,000. (The bail for rape is $2,500, bail "stacking" is illegal, so the higher bail was chosen.)

Gains paid that bail, but when he failed to show up for his July 30 arraignment a bench warrant was issued for his arrest. He was arrested later that day in Sacramento and bail at his re-arraignment was raised to $100,000, an amount he could not meet.

The circumstances of Gains' arrest and release sparked a small fire of indignation on campus. A petition with 20 signatures, asking that bail standards be raised, was sent to state legislators Carol Halliett and Robert Nimmo by the quickly-formed Cal Poly Residents for Personal Security and Crime Prevention.

Steve Gale, an administrative aide for Halliett, said she has received the petition, but little can be done about the problem.

"California has a very liberal legislature—more concerned with the rights of the criminal than the rights of the victim," he said. A bill which sought to make public safety the measure for bail (the
WASHINGTON (AP) — The League of Women Voters has invited President Carter and Ronald Reagan to participate in a face-to-face debate without independent presidential candidate John B. Anderson, it was learned Thursday.

In a teleogram to the candidates, the league proposed a package of two debates, the first a Reagan-Carter affair the week of Oct. 12, and the second, later in the month, a three-way encounter to include Anderson.

A top official in the Reagan campaign, James Baker III, said Reagan was unlikely to accept the invitation and added that he thought the league was "surrendering to White House pressure.

In the past, Carter has accepted invitations to debate Reagan one-on-one, but he refused to participate in the league's earlier forum which included Anderson.

All along, Reagan has said he would not participate in a debate with Carter which excluded Anderson.

Carter's refusal to debate Reagan and Anderson last Sunday night came after the president said he would not participate in any multi-candidate debate until he has first had a one-on-one match up with Reagan.

Previously, the league had offered alternative debate formats which would include Anderson but Carter declined them all.

Eucalyptus trees may provide energy resources

BY ANGELA VENGELE

Wood as a future supplemental source of energy is the goal of a $50,000 Cal Poly research project.

On an energy farm off Highway 1 across from Cuesta College, Walter Mark and Norman Pillsbury are growing short-stemmed Eucalyptus seedlings. The two are associate vocational professors of natural resource management. Several Cal Poly students also work in the farm.

"In the experiment we hope to find which species give what results for fueling. We're looking at the possibility of fueling with these trees," said Pillsbury.

Eight species of Eucalyptus were chosen to fit the climate and soil of San Luis Obispo for the project.

The experiment should tell which species grow best in the county, which gives the most heat per acre, which fertilizer amount and type is best for the period of growth time, what spacing to use for the trees and the best time to cut the trees.

"When we find these out, people will be coming to us," said Pillsbury.

"We've sent in a new proposal and we anticipate it will be funded. We want to add a second ten acres to the project and this cost is included in the new proposal," Pillsbury said.

"We would like to plant some local growing species: incense, poplars and oaks. Although oaks aren't fast growing."

One problem the project ran into was timing the planting of the seedlings. The ideal time for planting is in November and December. The seedlings were not available at that time, Pillsbury said.

"There hasn't been any rain this summer either. Some of the seedlings have done well, some haven't. But that's the reason for the experiment, to find out which do the best," said Pillsbury.

"The project is going as we expected... quite well."

San Luis Dry Cleaners and Laundromat

offers you 20% off any dry cleaning service with this coupon.

located in the
University Square Shopping center
24 hour
Laundromat open 24 hrs.

"We're conveniently located between California Blvd. and the railroad overpass."

Our experience covers 25 years of supplying Cal Poly students with all their electronic needs. Our stock is the largest of any store between Los Angeles and San Francisco - in fact, our stock is larger than that of most stores in LA or SF!

We have an assortment of telephones, plus connector blocks and wire for extending telephones to the desired point.

Everything you need for your TV. We carry splitters for connecting more than one set to the cable, correct impedance transformers, transmission line...everything you need.

If you want a new stylus or cartridge for your stereo, MID-STATE ELECTRONICS has it. That's not all!!! We have countless accessories and repair parts also. Put your stereo in top shape with a visit to MID-STATE.

If you brought a HAM SET along with your electronics, MID-STATE has the proper filters.

In fact, if you want to build, repair, or re-build anything electronic, get your parts at MID-STATE ELECTRONICS.

We're conveniently located between California Blvd. and the railroad overpass.

Batteries? You Betcha!!! The freshest in town — we order twice monthly, not twice yearly.

COME IN AND GET A SHOCK AT THE SIZE OF OUR STOCK!!!

Rock n roll legend Chuck Berry, convicted last year of attempted tax evasion, didn't play like it was punishment at his Sunday afternoon benefit concert in San Luis Obispo.

He razzled and dazzled over 500 fans into a 45-minute foot-stomping, hand-clapping frenzy, until the master of rock escaped the stage full of dancing devotees with nary an encore.

But the master didn't reap the profits of this gig. Berry, who turns 49 years old next month, was busy working off 1,000 hours of community service, part of the conditions of his four-year probation for the 1979 conviction.

Although Berry was paying his dues for the legal confrontation, he took the stage with an enduring dignity and demanded the attention and respect of a king. The fans were all but begging to grant him just that.

At $3 a head, the concert was a steal, and Chuck Berry followers without the needed entry stub were furiously searching the line outside the Veterans Memorial Building for spare tickets.

When Berry moseyed on the stage inside with a flashy red electric guitar, he was greeted with a roarin' standing ovation that nearly ceased to settle throughout the performance. The opening "Roll Over Beethivens" left the crowd cheering, jumping and dancing in the aisles.

Berry himself worked up such a sweat in that first fast-beat number that he asked stagehands for a towel to wipe his face. What he got was a small red bandana. The incredible look he gave the audience told all: Chuck Berry is still the king. How dare they hand over a mere scarf when The Man himself had quite clearly requested a towel.

Berry finally got his towel, a large green one that he used repeatedly as the show moved faster and the air temperature rose from balmy to boiling.

The performance ranged on at a quick, lively pace. Berry hummed the crowd with his line of hard-hitting rock classics such as "Sweet Little Sixteen," "School Days," and the infamous "Johnny B. Goode." He played nine songs in all, pulling the reins back at one point, even played his guitar upside down.

Before the king left his min, Berry asked for the lights to be turned up so he could see all his "children." "I want three girls and three boys up here on the stage with me," he shouted into the microphone, and within

TEACH IN JAPAN

Persons with majors in Japanese, English or engineering/business administration, finance, economics, Japanese language or Japanese studies who wish to work in Japan for two or more years in 1981 should write to:

Supervised Internships
International Education Board
Student Embassy Building
2102 F Street, N.W.
Washington, D.C. 20037

Japan

The following internship training Japanese business administration and engineering vocabulary and concepts in deployed technical locale.

The training will be provided in the form of classroom instruction, but will also be integrated into the engineering experience on the job. Training experience will be required.

Supervised Internships will be held in firms throughout Japan in the following fields:

- Textile
- Machine tool manufacturing
- Furniture
- Shipbuilding
- Computer equipment manufacturing
- Steel
- Electrical
- Construction
- Communications
- Chemicals
- Government
- Transportation
- Banking

To be eligible for the program, a major in Japanese studies is required. Applicants should also have an interest in engineering.

Application deadlines are January 15 for the fall program and May 15 for the spring program.

Applicants are encouraged to apply early and include a letter from a faculty advisor, specifying their interest in engineering.

Country meets new wave in album

When Tim Weisberg blows life into his jazz-rendering flute during his two scheduled performances in Chumash Auditorium on Saturday, October 4, he will be marking his third Cal Poly performance and the first show sponsored by ASI this year.

The instrumentalist and his band will perform at 7 and 10 p.m. Tickets are $6 in advance and $7 at the door.

Weisberg has recorded several albums on the United Artists, A&M and MCA labels, including one with Dan Fogelberg, "Twins of Different Mothers," and a digital album record in Shell Beach, "Tip of the Wedge." His '80s flavor makes him different, but side two is surprisingly good considering the album is the singer/teacher, Steve Schoenfield, who released third album, "Heavy Influence," in 1980.

The best thing going for the music that got its name in "rockability," a style of music that never really flew, is that it worked. "It was a kick. The Weisberg program is the only show scheduled by the executive board, 30 voting members and several associate members, is reviewing groups that are financially feasible and appealing to the students. A new wave is a blend of country and rock that will probably not be able to gain a following from either side, but it won't hurt a country rock or new wave.

This lack of a strong identity was probably hurt by Carter's record sales as her fans continue to listen but others pass her by. Her mixture of country and new wave is a blend that will probably not be able to gain a following from either side.

"Rockability" is pro-

excellent sound quality. It is highly recommended for fans of Eddie Money and fans of the Dave Edmunds and Nick Lowe kind. The Grad: a weekly fix for new wavers

BY BOB GRIFFITH
Special to the Daily

The San Francisco punk scene is dead. The Los Angeles punks never really had a chance. But New Wave, that bastard child of punk rock and rock 'n' roll is alive and pogo-ing every Wednesday night at the Graduate in San Luis Obispo.

"It's like having Hallo­ween once a week," said Doug Kiley, manager and resident disc-jockey of the Graduate. "People go out on a skinny little tie, grease back their hair. People can break out of their shell."

There were at least 600 New Wave fans on the dance floor, at least half of whom made at least a token attempt to capture that New Wave "look." The pool tables and games area were also well oc­cupied, admittedly by a couple who looked suspiciously like they were just there for the 93 cent pitchers of beer, a gimmick price to remind the patrons of KZOZ's location on the FM band.

The main thing is, this is just high energy rock 'n' roll," said Kiley. "You've got to try to change the new things, the different things. You got to change. You've got to keep up."

"It's very good at spotting trends," said Jim Mouyos, general manager of KZOZ, whose station sponsors New Wave Night. "For a lot of people, this is a way they can play out a fan­tasy, an alter ego," he said.

Indeed. A young woman with blinking electric lights embedded in her hair walked into the club, and cheers and applause rise from the crowd. A couple that entered moments earlier, seated on a couch and pipe cleaners are similarly greeted.

"It's my favorite night of the week," said Kiley. "The main reason I do it is because it's fun."

But the music of Blondie, the B-52's, Pretenders, and the Split Enz was the star of the night, and at 10 p.m., when the several kegs of beer and the 93 cent price expired, couples hit the dance floor faster than the sticks of a power pop drummer.

"The main thing in this, is just high energy rock 'n' roll," said Kiley. "You've got to try to change the new things, the different things. You got to change. You've got to keep up."

"New Wave fans on the dance floor, at least half of whom made at least a token attempt to capture that New Wave "look." The pool tables and games area were also well oc­cupied, admittedly by a couple who looked suspiciously like they were just there for the 93 cent pitchers of beer, a gimmick price to remind the patrons of KZOZ's location on the FM band."
It's the moves that count, and among the sweet, sweaty smell of young, crazed-looking bodies, your animal self takes control. As you and the driving beat achieve a oneness, a real gut feeling of pent-up frustration is released.

The band is not important, the beat is everything. Perhaps it's a sign of our aggressive, outward-reaching Western culture that we need an ear-jarring beat to find a jagged, reckless peace.

"it's like having Halloween once a week."

'Sure-footed' shoes a success for grad

BY LISA ASATO

Upon entering Cool Feet, the aromas of leather is immediately recognized. Rows of hide shoes and thongs of varying colors and sizes line the shelves of the tiny downtown shop. In one corner of the room, Steve Martin sits at a worktable with tools and scraps of leather before him.

Martin, who graduated from Cal Poly in animal science in 1967, claims to have taught himself the art of the cobbler. When asked if it was a difficult skill to learn, he replies, "The way I do it, it's hard. Custom-made shoes-are the hardest to make."

All work is done at the shop at 970 Chorro Street, from taking measurements, to making patterns, to sewing the finished product. Martin has a few part-time workers, but does most of the work alone.

"Thongs shoes are made by machine, in limited standard sizes. Mine are hand-made with the finest quality leather available, and they're made to fit."

Perhaps the main difference, according to Martin, is durability. "The biggest complaint I hear from people is that store-bought shoes are made to burn out fast-planned obsolescence."

Martin's thongs sell for around $85 and his shoes start at $86. Martin sees his shoes as "a wise investment. You get what you pay for." Some of the very first pairs of shoes he made eight years ago are still in good shape, with many more miles on them, he said.

Martin took the university's "learn by doing" motto to heart. Martin, pictured cutting out shoe leather, taught himself the lost art of cobb-ling and set up his own shop, Cool Feet, located on Chorro Street.

Gaines slated to be sentenced

From page 1

likelihood of a "skip" is the current criterion, he said. He died earlier this year in the assembly criminal justice committee. Gale said.

Gaines had originally tried to plead guilty by reason of insanity, but his request for a psychiatric examination and a change of venue was denied.

A defendant that pleads no contest will not put up a defense; he is open to conviction, but his plea cannot be used against him in other proceedings.

Transportation

Transportation for students and faculty with temporary or permanent disabilities is available by Disabled Student Services.

Transportation to and from classes are offered free Monday through Friday from 7:30 a.m. to 4:30 p.m.

For more information contact Stanley Knowles at 546-1936.
Poly physician warns of tampons’ toxic shock

BY TOM KINSELING

Approximately 300 cases of a rare illness known as toxic-shock syndrome, which almost exclusively affects young women, have been reported since January, 1980 by the United States Center for Disease Control.

Toxic-shock syndrome, which is characterized by high fever, vomiting, diarrhea, hypotension and shock, has been associated with the use of tampons, according to Surgeon General Julius B. Richmond.

Current CDC studies show 25 women have died from TSS this year and that 95 percent of those deaths have occurred during a reported cases in women from the Wisconsin and Utah Departments of Health. It has been reported since January, 1980 by the United States Center for Disease Control.

Dr. Eugene Madsen, an official at the Health Center, warns university women about the possible toxic effects of some tampons. Toxic shock from tampons has been suspected in nearly 300 deaths.

While presidential debates in the last two decades involved candidates with similar views, the Sept. 21 square-off between John Anderson and Ronald Reagan proves the American public will be choosing between candidates with diverse political beliefs, a Cal Poly speech communications professor said Wednesday.

Raymond F. Zeuschner, director of forensics on campus, said Anderson scored slightly higher than Reagan because the independent candidate cited more material to back up his statements.

"As a result of the debate, Anderson's standing in public opinion polls should go up," the speech professor said.

Zeuschner, who began teaching at Cal Poly during summer quarter, noted the American electorate is slowly changing for the better. He said the nation is becoming more issue-oriented and will no longer be satisfied with candidates who offer only generalities.

"Candidates in the past, Zeuschner explained, "had the same positions so that you couldn't tell one from the other."

He added that the best part of the Anderson-Reagan debate was that it represented a real clash between genuinely opposing opinions.

Anderson, he said, projected an energetic image and a command of facts and figures, while Reagan was relaxed and easy-going.

"This one was less of a beauty contest," the forensics instructor said.

Zeuschner himself was appointed by the American Forensics Association to a committee that will examine this year's debate following the election. At that time the committee-representing 12 western states-will meet to discuss ways of improving the quality of presidential debates.

Though he termed the presidential debates a positive influence on the American political system, Zeuschner contends they can be improved by changing the format.

The format used in recent years encourages candidates to express superficial views, he said. Rather than simply having newsmen question the candidates, Zeuschner would like to see the presidential contenders question each other and then follow up their answers.

The speech instructor said candidates tend to resist such a format because it is too "risky."

"Many candidates are falling all over themselves not to make a mistake," Zeuschner said.

The speech professor believes the ideal debate schedule this year would be a series of five debates, each dealing with a specific issue. The first and last debate would encompass the three major candidates, while the three others would pit the candidates one-on-one.

Zeuschner said the president's absence affected my impression of Carter very negatively. He said Carter is trying to do anything that will diminish Anderson as a viable alternative.

"It's a sleazy way of getting around the debates," he said. "But sometimes silence is your best defense."

As for the minor party candidates, such as libertarian Ed Clarke and the Citizen's Party's Barry Commoner, Zeuschner said they should not be included unless they have a potential to win electoral votes.

Sympathizing with the candidates, Zeuschner said Americans often ask too much of their prospective presidents. Candidates are asked to cite large numbers of facts and figures about energy, military defense and the economy, he said.

It would be more realistic to have the candidates discuss only their philosophies, the general direction they would take the country and their political approaches, Zeuschner said.

Intramural head recently picked

Dennis M. Byrne was selected as recreation and intramural programs coordinator, it was announced recently.

Byrne, previously served as director of intramurals at State University of New York College at Cortland.

Byrne's position is newly created. The recreation and intramural programs department is currently on the staff of the Activities Planning Center. Intramural activities were transferred to the Student Affairs Division in July after being supervised by the university's physical education department for many years.

Forensics professors gives Anderson debate edge
Create

Express yourself. State your mind. Communicate your feelings. Share an idea.
Creativity is a universal language. You can express yourself in a multitude of ways.
Paint your fantasies. Verbalize your sensations. Dance your emotions. Sing your delight.
Detail your engine. Design an irresistible new dress. Climb a mountain. Cultivate your garden.

The possibilities are endless. Just pick something you like, then do it to the best of your ability.
Let out your feelings. Don’t be shy. Show what you can do. However you choose to express yourself, let the world know you’ve got something to say.
Self expression gives a feeling of accomplishment that’s very rewarding. And it makes the world a nicer place to live.

High-flying antics of Jaime Saucedo, last year's leading scorer, will pace Cal Poly Mustang Soccer team in home opener Friday in Mustang Stadium at 7:30 p.m. Mustangs will face Chapman College.

When you need big favors you ask good friends.

Soccer team faces stiff test

The Cal Poly Mustang soccer team will be looking to break into the win column against the defending league champion, Chapman College tonight in Mustang Stadium at 7:30 p.m.

The Mustangs, under the leadership of coach Wolfgang Gartner, hope to improve on last year's 7-6 mark but its work is cut out for them after an 0-2-1 start.

"We expect to make a run for the league title this year," Gartner said. "We lost 1-0 to Cal State Los Angeles and tied Cal State Dominguez 0-0, which is one of the top 20 teams in the nation."

The Mustangs are aiming for a winning record behind the brilliant play of last year's top scorer Jaime Saucedo and the returning team captain Rich ten Bosch.

Chapman enters Mustang Stadium as the No. 2 ranked team in NCAA Division II. Chapman finished fourth in last year's Division II tournament.

Poly opens title drive in Fresno

Seven slots on the Cal Poly Mustang cross country team have been put up for grabs this weekend at the Fresno State Invitational.

The invitational meet will be the testing ground for coach Steve Miller's bid for his fifth straight national championship. Miller has back-to-back national titles in both cross country and track.

"I think that we have a good group of athletes and that our team can be representative and competitive on the national level," Miller said. "Our objective this year is to win only two meets, the District 8 qualifying meet and the national championship meet in November."

Cal Poly is the defending champion from the last two Fresno State Invitationals. Nevada-Reno and Stanford will make serious bids to upset Miller's winning streak.

"Our talent is our biggest asset," Miller said. "I think that we are a better team, as far as team depth goes, than we have been the last four years."

Athletes battling for the top seven spots include Terry Gibson, Ivan Huff, Deug Avrit, Carmelo Rico, Paul Medvin, Joey Gomez, Joe Fabris, Andy DiConti, Kevin Jones, Jack Marden, Steve Strangio and Tom Trimble.

Poly volleyball enters tourney

Cal Poly women's volleyball coach Mike Wilton expects to be in the winner's bracket of the San Jose State Invitational tournament tomorrow night.

Cal Poly opens tonight against San Jose State at 4 p.m., Purdue University at 6 p.m. and Tennessee University at 8 p.m.

The Mustangs are fresh off of a 3-1 win over Boise State Wednesday night. Other schools entered in the tournament are Stanford, U.C. Irvine, University of the Pacific and the University of Texas at Austin.

When you ask good friends for a favor, you know what they're going to say: So you tell them you're moving again and then wait for the gripe to stop. They may not like the idea, but you know they're going to be there. When you're finished, these people are going to deserve something special. Tonight, let it be Löwenbräu.
Division II title hopes are on the line this weekend for Joe Harper's Cal Poly Mustang football team.

The Mustangs and the Cal Davis Aggies will vie for national title hopes as they square off on Toomey Field in Davis tomorrow night.

"They have one of the best Davis teams that we have ever seen," said Harper. "Ronnie Austin is a super running back but we are especially impressed with the quarterback, Ken O'Brien, which gives Davis an impressive balanced offense."

O'Brien led Davis, 1-0-1, which is no easy task, before even getting a crack at currently No. 9-ranked and undefeated Puget Sound Oct. 25 at home.

Cal-Davis sports a potent offense which has averaged 402.5 yards in total offense in its first two games and 235 yards per game in passing.

The biggest Mustang offensive threat has been quarterback Craig Johnston and wide receiver Robbie Martin. Martin hauled in six catches for 115 yards against Fullerston.

Tailback Louis Jackson has gained 233 yards on 47 carries to lead the Mustang's running game.

Offensive tackle Mike Daum is expected to return to action following knee problems. Linebacker Mel Kaufman and safety Edmund Alarcio both have outside chances of being ready for action against Davis.

Kaufman is nursing an ankle injury and Alarcio has been sidelined with strained ligaments in his right knee.

On the other hand, running back Jim Colvin and defensive tackle Fred Razo are out indefinitely.

The game Saturday night is the first of three key road games that the Mustangs will have to win in order to salvage any national title hopes.

The Mustangs will have to knock off Davis, Fresno State and Santa Clara, which is no easy task, before even getting a crack at currently No. 9-ranked and undefeated Puget Sound Oct. 25 at home.

Highway 1 to Lighthouse Point and back.

For more information, call Joan Ponza, at 541-2758.

A shorter ride for the more inexperienced rider has been planned for Saturday by the Cal Poly Wheelman bicycle club.

The 12 to 15-mile ride will begin in front of the Cal Poly Main Gym at 10 a.m. For more information, call Kary Witt at 541-4477.

The Lighthouse Century, 100-mile, bicycle ride sponsored by the San Luis Obispo Bicycle Club has been scheduled for Saturday.

The ride will begin at 7 a.m. in Mission Plaza with registration beginning at 6 a.m.

A $4 registration fee will cover lunch and water stops along with mechanical aid. The ride is planned to go north on Highway 1 to Lighthouse Point and back.

For more information, call Joan Ponza, at 541-2758.

"Mistakes are basically the reason for the loss last week and in order to play with Davis we will have to play without mistakes," Harper said.

It's war

It's hard to picture Ronald Reagan's ideal America. Equal­ly hard to imagine is why he would want to live in an America systematically devastated by what he considers solutions to the problems of dependence on foreign oil.

In the League of Women Voter's debate with independent candidate John Anderson, Reagan made his opinion of the value of our environment as clear as the waters of Lake Erie once were. He's still of the same shoot-from-the-hip-leave-im­more-they-can inclination that prompted him to tell the Western Wood Products Association in 1966, when California environmentalists wanted to expand Redwood National Park: "A tree is a tree—how many more do you need to look at?"

In the debate Sunday night, he said the United States should strive for energy independence by exploiting our non­resourceful resources to a greater extent than we do already; and by removing pollution regulations and red tape from business so it may more easily supply our increasing need for energy.

He did not, of course, mention industry's frightening in­ability and unwillingness to clean up its own filth. Nor did he mention that much of the uranium, coal, oil and natural gas lies in millions of stunningly beautiful acres of federal preserve land, protected for aesthetic, moral and ecological reasons.

Also, his argument that we are entitled to dig, drill, blast and mine ourselves into a more putrid, suffering environment than we've already created, merely because some have estimated there are more non-renewable resources in the ground than we have yet untimely ripped, follows the same suicidal reasoning of the cigarette smoker who decides to con­tinue his smoking because there are more cookies out there than he has yet puff'd. It also ignores the fact that our resource­consumption rates, as the smoker's cancer cells, increase ex­ponentially.

And from this presidential hopeful, a man who would be king, not a word of conservation; of changing a lifestyle that consumes a third of the world's energy satisfying the urges of a twentieth of the population; of altering our reliance on an organic compound that may so easily push us into war.

Yesterday Reagan said the issue of this presidential race is Carter's record—a record that includes a ruling made on the same day as the debate that bans new oil drilling in areas off Santa Barbara.

Carter has called our energy crisis the "moral equivalent of war," Reagan's solution to this crisis is war—a war against the environment.

Letters

Beneficial merger

It is my opinion that the merger of the aeronautical and mechanical engineer­ing departments mention­ed in your editorial, "Ma­jor Merge Grab Bag," will be the best move for the students and will give them a more industrially related look at what engineering is all about.

Boeing Aircraft, for example, has engineers who work on aircraft, boats, and special systems. Most large companies hire from the engineering department, whatever the designation on their diplomas. I personally have worked in many engineering areas, and have found that a tool is a tool; likewise, many companies feel that an engineer is an engineer.

Ted Nash

Technical Aeronautical & Mechanical Engineering Department

BY HAROLD ATCHISON

To the class of 1964:

Several weeks ago, a minister named Robert Schuller finished a work of devo­tion; his new church, called the crystal cathedral, which cost millions of dollars and took many years to build.

What makes this church special—what makes any offering special—is its consecration. Its spirit has nothing to do with the glass and steel that surrounds it; its spirit is transcendental. It is this transcendence that separates art from graffiti, great ages from good times, and true character from phisog­nomy.

People can transcend themselves. History is filled with examples of people who were better than they should have been. These people built a moral and in­tellectual dynamic—their own crystal cathedral.

What is the crystal cathedral? It is not Augustine's city of God or a ra­tionalist blueprint for society. The for­mer is properly beyond our power to realize, and the latter diminishes the people it was designed to serve. The crystal cathedral is a human spirit push­ed past the expectations made of it. It is invincible, not exclusive, it is progressive, but not perfect. And it brings hope by modeling the good that can be.

Ted Nash

Technical Aeronautical & Mechanical Engineering Department

The crystal cathedral

It is important, especially now, that you look and act beyond yourself. Because soon, sooner than you think, you will leave your parents and mentors to face the world on your own. You will confront an inexplicable fact: what you do can make a difference. If you deny this, you are in collusion with the forces of self-destruction. If you accept this fact, you accept the challenge of growth.

It is important, especially now, that you look and act beyond yourself. Because soon, sooner than you think, you will leave your parents and mentors to face the world on your own. You will confront an inexplicable fact: what you do can make a difference. If you deny this, you are in collusion with the forces of self-destruction. If you accept this fact, you accept the challenge of growth.
