New students to get more GE units

BY KAREN GRAVES

The new general education requirements to be instituted next fall will add 12 units to the general education curriculum. These new requirements—more restrictive than at present—may increase student loads in some majors by up to 23 units, according to various department reports.

As increase in units may occur because the new G.E. requirements define in more specific terms what classes can or cannot be taken for general education. These new requirements will not affect students now enrolled at Cal Poly.

The schools and departments on campus are working on proposals dealing with changes that can be made in their curriculums to incorporate the new G.E. requirements. These proposals are due back in Jones' office by November 26.

All departments have received copies of the new general education requirements from the State Task Force in the CSUC Chancellor's Office and a Cal Poly interim policy on general education and breadth.

The interim policy was developed to meet the mandate issued by the Chancellor's Office that all 19 universities in the California State University and College system have new general education requirements beginning with the 1981-82 academic year, said Hazel Jones, vice president of academic affairs.

The purpose of the Cal Poly interim policy was to propose a starting point for discussion, said Lindon Nelson, a psychology professor and member of the new disbanded academic senate Task force which developed the G.E. requirements over the summer. He emphasized Jones has informed the departments on campus that the current interim requirements are merely guidelines and that departments and schools can develop a new policy from scratch if they feel it is needed.

Courses accepted for general education in the new requirements would be more restrictive than the current requirements. For example, the policy states all students take one unit of sociology selected from the following: ANT 201, 202, 203, 210, 215, 234, 341, 360 and SOC 105, 106, 201, 202, 203, 206, 305, 310, 313, 322, 330.

The new G.E. requirements add 12 units to the 60 units of general education requirements making the new requirement 72 quarter units. According to the report issued by the chancellor's office, the units are divided as follows: 15 units in communication in the English language; 18 units which include inquiry into the physical universe and its life forms; 18 units dealing among the arts, literature, philosophy and foreign languages; 18 units dealing with human, social, political, and economic institutions; and 5 units designed to equip students for lifelong understanding and development of themselves.

One problem the new G.E. requirements have uncovered is that many majors, especially architecture, agriculture and engineering may need to cut courses from their curriculums or face an increase in units.

"We will shape those goals more precisely with the Cal Poly flavor," said Jones. "Cal Poly has something special to offer students and we need to recognize that."

The vice president said the task at hand now is how to not diminish the quality of the programs but at the same time develop a meaningful general education program.

Jones noted that exceptions may be granted to the new requirements in some professional degree programs but only if there is strong evidence of need. As a result, the number of students eligible for financial aid packages may be reduced.

"More and more students are becoming eligible for a program that is less than adequate," the financial aid director said.

Another factor in the aid cut was an initiative begun this year by Wolf to get notification letters out to students earlier than before. The financial aid notices were sent out in April and May.

Financial aid cuts defended

BY MIKE CARROLL

Amid controversy about the way financial aid allocations to 553 students were cut this fall, Cal Poly's financial aid director defended cancellations as the only fair response to an emergency situation.

The cancellations, amounting to about $400,000, were announced in July as a response to reductions in expected federal funds, Lawrance J. Wolf said Wednesday. The students affected were those receiving financial aid offers of $1,600 or less.

Meanwhile, the financial aid director explained that cuts were necessary to those who received awards of $1,700 or more—retained their aid packages.

Wolf said several factors came together earlier this year to make the aid cancellation necessary. This summer was the first time in Cal Poly's history that such cuts were made, he said.

As reason behind the cancellations, Wolf cited an overestimation of funding that resulted in an increasing number of students eligible for the program, the 30 percent increase of students applying for aid during summer quarter and a keypunch error.

Wolf said a keypunch error occurred in January of this year that made it appear that Cal Poly had $170,000 more in financial aid than was available.

More significantly, he said, the formula for determining parent contributions to dependent students was changed last year. As a result, the number of students eligible for financial aid dropped.

"More and more students are becoming eligible for a program that is less than adequate," the director said.

Industrial technology major Jim Miller is one of the students who wrote a letter to the chancellor's office about the cuts.

"I think it's very unfair that students had to suffer because of a bad accounting system," he said.

The aid cut was an initiative begun this year by Wolf to get notification letters out to students earlier than before. The financial aid notices were sent out in April and May.

Poly stab victim is OK

BY KARYN HOUTON

A Cal Poly student was stabbed once in the abdomen at about 2:30 a.m. Wednesday morning in Santa Rosa Park by a man with a hunting knife, according to city police.

Michael J. Begley, 24, an electronics major, was released last night from Sierra Vista Hospital, a nursing supervisor said.

Begley was unconscious in the park until about 4 a.m. when he stumbled to a friend's apartment and was taken to the hospital, according to a police spokesman.

Begley's friend, who refused to be identified, said Begley left his house after a 10:30 p.m. visit to the student's house, The friend said Begley had approached him in Santa Rosa Park and asked for a cigarette. Begley gave him one. The man then asked for money and when Begley said he didn't have any, the man stabbed him with his knife and ran away. Begley told his friend he passed out and was awakened two hours later when the sprinklers came on.

Begley's friend said Begley will be off campus for a few months. Begley's friend said Begley was cut in the abdomen and lost a lot of blood.

According to Begley's friend, the knife entered Begley's body right below the rib cage and slit blood vessels into the muscle. He said the injury was not too serious.

The suspect was wearing blue jeans and a dark T-shirt, according to the police report. He was described as a white male, 25 to 30 years old, 6-foot-1, about 180 pounds, with dark hair.

Begley's friend said Begley, a native of Madera, will return home sometime this month.
Rep. Myers expelled from House

WASHINGTON (AP) — Michael "Ozzie" Myers, convicted of accepting a bribe in the FBI's Abscam undercover operation, was expelled from the House of Representatives on Thursday, the first congressman ousted by his colleagues since the outbreak of the Civil War.

The vote to remove Myers was 376-30, easily more than the two-thirds majority required.

Myers, the first congressman convicted in the Abscam case, protested the action to the end, telling House colleagues their action was tantamount to execution.

"I know now what it feels like to sit on death row. As you go to the voting machine, keep in mind when you hit that button, that it will have the same effect of hitting the button if I were strapped into an electric chair."

"My colleagues are calling the assembled House members "a lynch mob," also rank in the top half of their graduating class;"

"Myers, whose appeal on his conviction is pending, said the action was tantamount to the firing squad as Myers called the House ethics committee's recommendation censure in the Digg's case. Myers said, "My timetable goes back to Aug. 30 and by Sept. 4 the committee opened its preliminary inquiry and soon after called for my expulsion.""

"The Philadelphia Democrat, addressing the entire House for the first time in his two terms, said before the vote that he didn't have a Chinaman's chance."

"How can any member justify this severe action without any consideration for the due process argument?" said Myers, whose appeal on his bribery and conspiracy conviction is pending.

"an environmentalist and nuclear group, Friends of the Earth, claims a major fault lies five miles offshore from the plant with a potential for generating earthquakes measuring up to 7.5 on the Richter scale.

"The report of his investigation is being sent to the Nuclear Regulatory Commission, which is now deciding whether to issue operating licenses for two new reactors being built at the plant.

"Dr. Gary Greene of the U.S. Geological Survey in San Francisco, Ca. 94104"

Cranston attacks Reagan vow

WASHINGTON (AP) — The Senate's No. 2 Democratic leader Thursday that Ronald Reagan's vow to withdraw the SALT II treaty and confront the Soviet Union with an arms race to obtain significant new arms reductions, is "counter-productive and highly dangerous."

"SALT II treaty and confront the Soviet Union with an arms race to obtain significant new arms reductions, is "counter-productive and highly dangerous,"

"A member of the pro-Iranian Lebanese group called the Christian New World said he thought the attack was the first of a series of "terrorist acts" against the United States embassy in Beirut.

"Iranian charge d'affaires Mohamed Mokhtari told reporters he believed the attackers were members of the Iranian government."

"He compared his case to the Philadelphia Democrat, addressing the entire House for the first time in his two terms, said before the vote that he didn't have a Chinaman's chance."

Poly cruises on new one-speeds

BY CYNTHIA BARAKAT

If you had the choice between a brand new 10-speed bike or a one-speed with balloon tires and coaster brakes, which would you choose?

Among Cal Poly students, the answer to that question is increasing: the latter.

"I ride mine more for fitness—it takes more calories to ride than a 10-speed," said junior Robin Kall, who owns a Schwinn Spitfire. It's more work to ride hills, she said, adding, "Grand Av [a killer]."

She said she also likes her black one-speed with whitewall tires and coaster brakes because it is really sturdy and simple and rarely breaks down.

The durability of the "cruiser" is what inspired Eric Polk to build one of his own.

Polk, who lives in San Diego, where he estimates, one of every three bicycle owners rides this type of bike, built his from scratch in three months. He bought the frame and some basic parts from a friend and got the rest from bike shops. He said it cost him about $100 to build—about half the price of a store-bought cycle.

A Cal Poly student shows off his new cruiser bicycle. The one-speed cruiser bike, with its balloon tires and coaster brakes has caught fire at the Cal Poly campus.

Bike shops in San Luis Obispo report an increasing demand for such bikes in recent months.

Mountain Air Bicycle Shop says that since last spring, requests for such cruisers have jumped dramatically.

Dorothy McLaughlin, co-owner of Ken's Bicycle Shop, says that, following a trend that began in southern California, sales on one-speed cruisers have definitely gone up in the past year.

And the price people are willing to pay for these machines has gone up, too. Local bike shops reported prices start at $110, but some people spend up to $1,500 for antique models.

The average price of new cruisers among college age buyers is $200, according to McLaughlin.

Although the one-speed models are the most popular, some people prefer bikes of the same type with a few additions.

Junior transfer student Leslie Stephens owns a five-speed "Landcruiser" with balloon whitewall tires and a hand-operated back brake.

Stephens said she likes her bright red bike because it is easier to ride for long periods of time.

Electric car surpasses U.S. rules, backers say

SAN FRANCISCO (AP) — The EXAR-I electric car, which backers call "the beginning of a revolution in American industry," exceeds test criteria provided by the federal government, its backers say.

The city of Berkeley is seeking $8 million in backers to work in exchange for lessons.

The tests were conducted by Dr. Richard Jenner, an economist on the staff of the Private Industry Council, which advises the city on the use of federal unemployment funds.

The city hopes to provide 400 jobs in the manufacture of the car, according to Sean Gordon, an aide to Mayor Gus Newport. The court would receive 12.5 percent of pretax profits.

Dr. Clark's standards required that the car reach 20 mph in 8 seconds, reach a maximum speed of at least 55 mph and have a range of at least 15 miles at 55 mph.

Ramirez said the car exceeded "by up to 300 percent" all those standards.

The car tested is a prototype which weighs about 4,000 pounds; the expected weight of the production version and did not contain technological changes which would improve its performance in all areas, Ramirez said.

Executive Council gains 11 members

BY TERESA HAMILTON

To help increase communication between Cal Poly students and the ASI, 11 new committees are being added to the President's Executive Council on a trial basis.

According to Internal Administrative Affairs Assistant Hindu Iverson, the groups will serve as an advisory council to the ASI to help express the ideas of more students.

"The committee will help us to get a wider prospective of what's going on around campus," said Iverson.

The committees, ranging from the Women's Athletic Board to the Children's Center, were chosen from several other campus organizations because of their large memberships and wide diversity of subjects.

"We wanted to get a good cross-section of groups across campus to represent the students," said Iverson. "Overall, please see page 5.

MB bus schedule and routes changed

Bus routes and schedules between Morro Bay and Cambria have been changed to help commuters get to school and work on time. The county bus will now leave Shamel Park at 6:34 a.m. and Main and Burton streets in Cambria at 6:39 a.m. Mondays through Fridays, and will connect with the North Coastal bus in Morro Bay. The rider must then transfer to the North Coastal bus to Cal Poly, Cuesta College or downtown San Luis Obispo. One-way fare is 75 cents between Morro Bay and Cambria and 50 cents between Morro Bay and Cayucos. Evening departure from San Luis Obispo City Hall will be at 6:55 p.m. on the North Coastal bus and transfer to the Morro Bay-Cambria bus will be at 6:50 p.m. Arrival in downtown Cambria is at 6:26 p.m.

A $20 monthly pass for the Morro Bay-Cambria route is available. For more information call 772-4611.

Two's a crowd in 'Party of One';
Weisberg at best without vocals

BY JIM MAYER

The serenading duo of Tim Weisberg and his flute have never relied on lyrics. 'Party of One,' Weisberg's newest album on MCA leaves little doubt on this score.

The rock instrumentalist has always enjoyed an aura of mystery. Listeners wondered if there were words somewhere, often swearing they heard the flute speak on occasion.

So after a score of instrumental efforts, it seems quite natural that a high-pitched voice should spring up from behind Weisberg's famous flute in "Party of One."

The voice of Bill Champlin does come as a surprise—especially since there is no mention of him on the cover or flap. He also comes as a dispointment. The same disappointment felt when vandals tamper with a work of art.

The album's first two songs are pure flute supported by a heavy orchestra, another new addition to Weisberg's style. The instrumental support is delightful, a complimentary punctuation to Weisberg's arrangements.

But the third song, "I'm the Lucky One," could be off a different album. It was if someone turned the selector to AM. Weisberg's dominating flute nearly battles Champlin for the spotlight. His flute, for so long the center of attention, refuses to become subordinate to the increases but the volume doesn't. As a result, the climax of "I'm the Lucky One" resembles a three-way love affair and the irony of the album's title is very clear.

But don't throw the album away yet; the next four songs are all Weisberg. The title cut, the first song on the second side, is perhaps the best. It's music to wake up by, or do anything for that matter.

Then, like a bad dream, the vocals return. In a rendition of Marvin Gaye's 'What's Going On' (a question often being asked by the listener) the vocals are used sparingly. The song resembles Gladys Knight and the Pips, without Gladys—a doctor's office version of the Motown hit.

The Weisberg/Champlin team returns for the last time on the next cut, "Don't Keep Me Waiting Girl." This cut alone answers the question Weisberg listened to have been asking since he recorded "We're the Sons of Different Mothers with Dan Fogelberg. No, Weisberg doesn't need vocals. Yes, his songs have lyrics.

The instruments on "Party of One" are fresh, creative and totally Weisberg. These songs provide a spectrum of musical sounds that reveal shapes of George Benson and Chuck Mangione, but always planted firmly in the musical identity that has matured through his previous albums.

If simple arithmetic can be applied, the instruments outweigh the experiments seven to three. "Party of One" is a good investment, if the needle can be trained to skip properly.

It will be interesting to see how much Weisberg will incorporate this new style in his concert performances Saturday night in Chumash.

Cal Poly radio log

Program highlights for the week of Saturday through Friday, Oct. 10, on campus radio station KCPR-FM, 94.9.

Saturday, Oct. 4
— "Yahweh Music," contemporary Christian music, 6-9 a.m.

Prof. adds insight to Auschwitz drama

BY TOM KINSOLVING
Staff Writer
"Death to Vanessa!" screamed the young Jewish man, who was among a group of other Jews demonstrating last Sunday outside of CBS studios in Los Angeles.

This had been part of the month-long Prelude to Playing for Time, Tuesday night's three-hour television drama that portrayed the horror of life in World War II's infamous extermination camp, Auschwitz.

"It's unacceptable for the Jewish people to have one of the enemy play the heroine," Riedlsperger has a clear perspective on the real Fania Fenelon.

She discovers that Auschwitz has its own orchestra, which performs every time thousands are lead off, parade fashion, to be gassed.

Fania goes through a traumatic audition of "Madame Butterfly" and becomes a member of the ensemble—which ultimately saves her from being murdered.

Though he has not seen the film, Riedlsperger has a clear perspective on why the furor erupted over having a PLO supporter play Fania Fenelon.

"It's an artistic question as to whether you blackball someone for political reasons," he said.

Politics aside, it's safe to say this will be remembered as not only a masterful performance, but a jarring testament to a horrendous chapter in history.

Night of jazz

Plug into an evening of high voltage jazz on October 7, when alto saxophonist Richie Cole and his band Alto Madness come to San Luis Obispo's Goldroom.

Elmer titles bestowed

Twenty-eight men and women who retired from university service within the last two years were honored as emeritus members during a general session of the Cal Poly 1980 Fall Conference Sept. 15.

The emeritus title is bestowed on university employees who have worked 15 or more years for Cal Poly. The title carries with it privileges to use certain university services and participate in activities as a member of the campus community.
MacLeish's "J.B." Malkin, a Cal Poly speech instructor, is producing a play in the chapel of a mental institution rather than in a circus ring as the play was originally done. The set of the original two-act play was a torn and tattered circus used as a metaphor for the world. But Malkin said he feels the image of the mental institution is more provocative and significant.

"J.B." has never been produced this way before. But Malkin said, "the world is so much an insane asylum as it is a circus."

Malkin said he chose to produce J.B., which is a modern-day drama of the Biblical story of Job, because he liked what it had to say. "I found the issues, the characters and the drama really worth producing," he said.

The idea of the insane asylum is a new approach that Malkin hopes will make the change of audience taste.

Malkin said his adaptation is more "expressionistic." He said he hopes the audience will be able to relate to the characters and not be "like a bored observer."

"The characters in the play are complex. They are patients of a mental institution, who break into the chapel at the outset of the play and there they act out the story of Job. "J.B." is essentially a play within a play," Malkin said.

All the characters will remain on stage at all times during the performance.

There will be much activity and "great group physical action," he said.

Malkin said J.B. is a difficult play that should provide a challenge for himself and the cast.

The cast consists of thirteen members, including ten Cal Poly students.

Some of the cast has had no previous experience and others are seasoned actors and actresses. One member of the play, Missy Murray, is 12 years old and others have never seen a play before.

Malkin said he has worked with four of the thirteen cast members in previous plays.

The four leading roles are held by: Jeffrey Baird, Julie Harders, Janie Hickok, and Greg McConnell.

Baird, a social worker in San Luis Obispo, will play the lead role of J.B., and Harders, who has appeared in previous Cal Poly plays, will portray his wife, Sarah.

Janie Hickok will play the unkind role of Dr. Zues—God as a woman. Greg McConnell, who may be remembered for his performance in "The Fantasticks," will play the part of Nickles, the devil.

The remaining cast members are: Brady Bessey, Phil Hardison, Diana Wolf, Missy Murray, Charmaine Price, Kristin Johnson, and Caroline Johnson.

After three rehearsals, Malkin refers to his cast as "alert." He knows there is much to be done and looks forward to the challenge.

"J.B." will be scheduled for November 13, 14 and 15 in the Cal Poly Theater. The play is a production of the Speech Communications Department and the School of Communicative Arts and Humanities.

**Actor's cancer 'incurable'**

(API)—Steve McQueen, star of such films as "Bullitt" and "The Cincinnati Kid," was diagnosed as terminally ill with cancer several months ago, but recently has shown signs of recovery, a spokesman said Thursday.

McQueen, 50, is suffering from mesothelioma, a rare form of lung cancer regarded as incurable, said spokesman Warren Cowan.

Cowan said McQueen's doctors report his condition has improved during the last few weeks. He is a patient at a degenerative disease treatment center at an undisclosed location.

McQueen had recently declined to return rumors and newspaper reports that he was suffering from incurable cancer.

In a statement released in Los Angeles, McQueen said, "The reason I denied that I had cancer was to save my family and friends from personal hurt and to retain my sense of dignity, as, for sure, I thought I was going to die."

He said he was responding to treatment which "has given me an extraor dinary improved quality of life." He said he had a sincere belief in his own chances for recovery.

"Hopefully," he said, "the cheap scandal sheets and curiosity seekers will not try to seek me out so I can remain in that treatment. I say to all my fans and all my friends, keep your fingers crossed and keep the good thoughts coming. All my love and God bless you."

Cowan said McQueen had for several months been consulting with metabolic re-searcher Dr. William Kelley, whose programs at the International Health Institute in Dallas and other areas are directed at stimulating the body's immune response.
Surfing film to play

Free Ride, a full length documentary on the life of two professional surfers, will be showing at the San Luis Obispo Veterans Memorial Building on October 8 at 7 and 9 p.m.

Directed by Shaun Tomson and Mark Richards, the Delaney film production incorporates elaborate photographic techniques and the music of Pablo Cruise.

Tickets for the show are available at Surf 'n' Wear for $2.50 in advance and $3.50 at the door.

Six months out of school and I'm working on a circuit that will help heart patients live longer.

"Name another company where you can be promoted to test engineering supervisor after only one year on the job."

"My first job after college and I helped develop a new CMOS technology for AMI's advanced PCM code."

Contact your placement office for the league crown.
Cal Poly, fresh off of a convincing 5-0 shutout over Bakersfield, views Northridge as a roadblock to the league championship.

"All of the players are looking forward to this game," said assistant coach Terry Magg. "We look at Northridge as the biggest obstacle to overcome if we want to become league champions."

As an incentive to draw out the area fans, the soccer team will provide free ice cream for the Saturday crowd.

Jaime Saucedo anchored the Cal Poly triumph with three goals. Doug Shaw, who has had terrible luck finding the net during the first five games, scored his first goal of the season and Brett Rosenthal added one more.

Rich ten Bosch collected three assists in the game.
The Mustangs were under the leadership of coach Wolfgang Gartner, who will try and improve its 2-1-1 league mark in Saturday’s 7:30 p.m. contest.

Poly declared ineligible

Cal Poly SLO and the University of Santa Clara are two of 19 schools which have declared temporarily ineligible for the NCAA Division II football rankings due to the failure to certain required forms to reach the NCAA office by the designated dates.

Cal Poly's Certification of Compliance Form did not reach the NCAA by the prescribed deadline nor did Santa Clara's Office of Institutional Information at Sports Sponsorship Form arrive at the NCAA office at the specified time.

The compliance form had to be signed by the entire Cal Poly coaching staff which showed that none of the NCAA eligibility rules had been broken, according to Athletic Director Vic Buccola.

"We got the forms in a two days late, but ours was postmarked three days before the Sept. 11 deadline," said Buccola. "We have already applied for an appeal but we will have to wait another week or two for a decision."

Cal Poly (2-1) and Santa Clara (3-1), which play each other Oct. 11 at Santa Clara's Buck Shaw Stadium, are among 19 colleges that have failed to turn in certain forms. There are 92 institutions that play Division II football. Pending appeal, most teams should be back in consideration in one or two weeks.

Meanwhile, this week’s Division II rankings show Northern Michigan still rated No. 1 with a 6-0 record, while Nebraska-Omaha (4-0) is only two points behind in the No. 2 spot. Troy State is third with a 3-0 mark. Puget Sound, a Cal Poly opponent ranked no. 9 last week, is unranked this week following a convincing 5-0 shutout against UC Davis, which Cal Poly beat last Saturday.

Northern Michigan has been declared temporarily ineligible due to the failure to certain required forms for the NCAA institution has been decided by an average of less than four points. Cal Poly, after nipping Northern Colorado in its first four games, is 2-2 and ranked 16th.

"We need a win at home this week very badly and so they'll have no problem buying up for this game," said Buccola. "They've had no problems with injuries early in the season and I think they were overmatched against a tough Utah team last week."

Another reason for cautiousness this week is the fact that the Mustangs have somewhat "Pacifici dadic kids" type of unit. In their first three games, victory has been decided by an average of less than four points. Cal Poly, after nipping Northern Colorado in its first two games, is 2-2 and ranked 16th.

"We'll have no problem beating them this week. They've had no problems with injuries early in the season and I think they were overmatched against a tough Utah team last week."

Poly has also had somewhat of a problem in scoring, averaging 7.1 points per game for the first half. The Mustangs did strike first against UC Davis with a 31-yard touchdown pass from Craig Johnson to Robbie Martin with 4:58 left in the first quarter. But Cal Poly has scored only 17 of its 68 total points in the first half. Puget Sound's two second-half points have come in the last two weeks.

The Bulldogs don't have much to brag about in the first half, either. Cal State has scored only 18 points in the first two quarters. The Mustangs have been outscored by their opponents in the first half, while Cal Poly's foes hold a 71-68 lead.

San Francisco State's quarterback is Sergio Tovarcano, who has comparable statistics to Polyt. Johnston, Tovarcano has completed 29 of 52 passes for 560 yards, Tovarcano missed the UNL game leaving backup Gary Kaiser to throw for 265 yards, completing 10 of 35 passes while allowing eight interceptions.

The Mustangs will be taking on a dangerous Fresno State team with game time Saturday in Fresno's Batson Field at 7:30 p.m.
Poly chases running title

BY ANDY BERGER
Special to the Daily

The old cliche "A champion never rests" is evident this weekend as Cal Poly's cross country team travels to San Diego for the Aztec Invitational at Balboa Park.

According to head coach Steve Miller, the meet will feature a tremendous field, with such Division I schools as UCLA, Arizona, Arizona State and San Diego entered. Steve Olson, the long distance running machine for the Bruins, is favored to win.

More importantly, several key Division II teams will toe the starting line, including UC Riverside, which Miller says "potentially the best team in the country" and an obvious fork in Poly's road to their third national championship.

Other possible Mustangs at the meet be Cal Poly Pomona, Cal State Northridge, and Chapman College, but they may have a few good runners.

An interesting fact about the team competitions at the University of Texas-El Paso won't be competing. Last year's NCAA division I champions were racing against San Diego State in a meet last track season, the result being one of UT's only losses during the year.

However, five individual winners from UTEP were disqualified in the meet held in San Diego, causing UTEP to be on the shorter side of the final score. Back to Texas they went, vowilll to return to San Diego. Miller doesn't think the competition will be hampered and would have liked UTEP to be there.

For Poly, which has its top runners nearly set, the team has had a "real good week" in training, both physically and psychologically, according to Miller. Ivan Huff, Tony Gibson, Carmelino Rios, Paul Medvin, and Andy Young. Arizona, San Diego State, should be there.

The Mustangs host championships

Cal Poly SLO has been selected by the Western Regional Cross Country Champions, slated for Saturday, Nov. 1.

The meet will take place at Morro Bay State Park two weeks after the Mustangs host their annual invitational meet, Oct. 18.

The Western Regionals are two weeks prior to the NCAA Division II National Championships, Nov. 15, at the University of Wisconsin-Parkside.

For entry form information, call the Telegram-Tribune at 543-1901.

Fun run slated

A five- and ten-kilometer fun run has been scheduled for Oct. 25 by the San Luis Obispo Telegraph-Tribune. The run will start at Cal Poly's Poly Grove and will cover the perimeter of the Cal Poly campus. The registration fee of $1 will benefit the Cal Poly men's and women's track and cross-country programs.

Mustangs open in Irvine

BY BRIAN MILLER
Special to the Daily

The Southern California Athletic Association (SCAA) begins conference play in women's volleyball tonight, and the Mustangs plan to be in the thick of it, if not on top.

Coach Mike Wilton will take his Mustangs, 12-4 so far, to face UC Irvine and the University of San Diego, a new one to the conference.

Wilton expects the conference to be tight this year, with possibly four teams scrapping for the top spot. The Mustangs being one of them. The conference shapes up like this:

UC Santa Barbara—Big recruiting year for the Gauchos. They're currently ranked 5th nationally and are the favorite to repeat as conference champs. Very big and powerful, but beatable.

UC Irvine—Tony Vaia's team has shown they are a force to be reckoned with. He plans on competing this year, with possibly four teams scrapping for the title. The Gauchos being one of them. The conference shapes up like this:

UC Santa Barbara—Big recruiting year for the Gauchos. They're currently ranked 5th nationally and are the favorite to repeat as conference champs. Very big and powerful, but beatable.

UC Irvine—Irvine finished second last year. A well balanced club that's quit together all the way. The Maradans compiled 10-7-1 record under Paul Hover who took over for last year's coach.

Cal Poly Northridge—Finished second last year. A well balanced club that's quit together all the way. The Maradans compiled 10-7-1 record under Paul Hover who took over for last year's coach.

Cal Poly Irvine—Irvine finished 3rd last year in the SCAA. They tend to be a hot and cold team. When they're on, they're among the best, but they can be inconsistent. There should be a rival between Irvine and the Mustangs.

Cal Poly SLO—The Mustangs are a small team. They finished 4th in conference last year. Could be as good on serving and ball handling as anyone in the league. The key to suc-
cess is playing together with aggressive play.

Cal Poly Pomona—Vastly improved over last year. Played very well in preseason. The Mustangs' best Pomona twice last year.

Cal State LA—They have a new coach this year, but that shouldn't change the outcome. They lost to the Mustangs twice last year.

University of San Diego—No one really knows what to expect here. The Mustangs should know a few sights around the area.

Both matches this weekend are vital to the Mustangs, not only would they be nice to jump out to a 20 record in the conference, but a sweep this weekend may give them a lift in the national rankings, and possibly put them in the top 20 by mid-October. They've already beaten No. 10-ranked Pepperdine, and humiliated No. 12-ranked Purdue.

A sweep this weekend would also give them the needed momentum for their first home match Wednesday night, a match conference dual with Fresno State.

Raiders take on Chiefs

OAKLAND (AP)—During the Oakland Raiders' first home game, the fans were cheering the defense and boosing Dan Pastorini, the team's new starting quarterback.

"I didn't hear any of our players booing," said Pastorini shrugging off the fan reaction to his play in the 24-21 victory over Washington two weeks ago.

The Raiders return home Sunday, standing 2-2 so far in the National Football League season, to face the Kansas City Chiefs, 0-4. The teams met to open the season, with the Raiders winning 27-14.

Philkett, the veteran wide receiver, has thrown only one pass this season. It was an 18-yard touchdown toss which sent the second game of the season, at San Diego, into overtime.

Kansas City was home last Sunday and was no match for the Chargers, who led the American Conference West. Kansas City showed only 198 tries on offense, suffering five quarterback sacks and allowing five turnovers in the 24-10 loss.

Chiefs Coach Merl Levy hopes to have offensive line Charlie Getty and John Budney, who have been injured, back in the lineup for this weekend's game.

The Kansas city offense is one of the lowest ranked in the NFL, but the Chiefs have allowed only 77 points, compared to 89 by San Diego.

The Western Regionals, Oct. 10, will be held at Morro Bay late Park, the site of many regional and NCAA championships.

The meet will take place at Morro Bay State Park two weeks after the Mustangs host their annual invitational meet, Oct. 18.

The Western Regionals are two weeks prior to the NCAA Division II National Championships, Nov. 15, at the University of Wisconsin-Parkside.

For entry form information, call the Telegram-Tribune at 543-1901.
Proper registration

The most important computer to Cal Poly students—the one which registers all of us for classes—was reprogrammed in September to eliminate unfair preregistration privileges.

It's about time.

It's great that the random grouping system used now does not favor the football player because he has to practice every afternoon, or an ASI senator because she has a committee meeting Thursday mornings or the dairy science major who milks cows at midnight.

In September, for the first time in Cal Poly history, students were registered in a fair, alphabetical order. Previously, students entered the computer first, followed by new, senior and graduating students, then the remaining student body by the alphabetical system.

Thanks to a vocal and concerned student body last year, injustice does not now appear on our preprinted CAR forms. While it's true we may not get all the classes we want at the times we'd like, the situation would have been worse if preregistration had been allowed.

New students on campus may not be familiar with the problems we used to have. In preceding years, during a three day registration melee, students were herded into the gym only to face closed sections in hard-to-get classes such as photography or physical education. These sections were often closed before registration had ever begun, since so many students were allowed to preregister.

The old system gave preferential treatment to nearly 1,400 students, including Tropicana bus drivers, student firefighters, Mustang Daily editors, maintenance personnel and teachers.

The obviously unfair system was a major issue last year—discussed at the ASI round table and the offices of President Baker, Vice President Jones and the Dean of Students. A student initiative appeared on the ballot last May and preregistration was soundly rejected by a vote of almost two to one.

"I don't know how long this is going to hold up, but we aren't going to mess around with registration now," said Associate Dean Bob Timone, who is partly in charge of handling student affairs.

He has received a few complaints. Athletic Director Vic Buccola went to see Timone last week and commented that only 27 football players out of 70 received their full course load at the times they specified. Student firefighters also told Timone they were unhappy, and a student from the Dairy Unit found it hard to schedule classes around milking times—noon and midnight.

Timone denied their requests.

We hope it stays that way. We congratulate the good judgement of ASI members, staff and students who brought about the revamping of registration.

We all have responsibilities—to our jobs, families, sports activities, newspapers, horses and cows—but one person's activities, newspapers, horses and cows—but one person's responsibilities are no more important than the next person's.

After all, we're here for only one reason, to get an education, and to get it without unfair special privileges.

Sacred borders

Editor

While the things mankind holds in common will prevail over differences, nevertheless, as our shrinking globe draws the nations together, greater friction between them.

To ease this friction, and smooth the diplomatic ways, greater mutual respect is needed among the peoples of the Earth for the absolute integrity and security of their territory and borders. Every person has the inviolable planetary right to live freely, safe and secure, in his own national home without fear of intimidation or invasion of boundaries.

The essential rule today should be this: every country's borders are absolutely inviolable under any circumstance whatsoever. If opposition or violation of human rights exist in any country, then it is the responsibility of the world community to use means, other than military, to rectify the tyranny no matter what the provocation...Inference of any kind in the internal affairs of another state should be outlawed by world law. Wars could not be fought unless land, sea or air borders are crossed. Borders are therefore crucial in matters of war and peace because that is usually where friction between nations is focused.

Free enterprise and communism, Japan and Israel, China and Vietnam, black and white Africa—all have but one home: our own beautiful Earth. Our earth, the precious woe of life and mankind, the equally precious life seed, are both unique in the solar system and in the farther reaches of the heavens. Their preservation supersedes the quarrels of nations which are petty and childish in comparison.

Humanity has no other home, no other place. This is it, and we all need to learn the skills and the art of living in peace together.

George T. Chalden

Letters

To the editor:

It has occurred to us on more than one occasion that there must be mysterious gremlins who make decisions on this campus without reasoning things out ahead of time. In this case we are telling specifically about the road barrier which during the summer was placed at the Crandall Way entrance to the school and which now has been quietly removed. This barrier is just another example of poor planning, lack of foresight, and a waste of our taxpayer's money.

It should have been obvious to those who first came up with the idea of the barrier that it would cause problems for emergency vehicles, alter traffic patterns, cause more congestion at other entrances and result in bicycle mishap at the narrow remaining opening.

In addition, when the barrier was installed, there was also a change of street zoning on city property; this change allows parking at the curving in intersection of Football and Crandall. This is most alarming to anyone familiar with the interaction because byzantinely and moped riders must now make the fast downhill curve with the added hazards of parked cars. There will undoubtedly be accidents. Accidents are something that we can do without and so is the near-fatalism of planners who spend money to put up barriers which they must later spend money to remove.

We hope that in the future those in charge will investigate more thoroughly, with proper planning we can avoid many of the problems, mishaps, and expenses that affect us all.
