At left, fuel alcohol enthusiast David Blume of San Francisco points out modifications on his alcohol-powered pickup. Blume will teach a one-day class on Oct. 18 in Avila Beach.

Use for old stills: energy plants

BY JIM MALONE

All you moonshiners can dust off those old stills. A San Francisco entrepreneur is ready to teach you how to use that contraption to produce fuel alcohol from plant wastes—for about 48 cents per gallon.

David Blume, head of American Homegrown Fuel Company, was in San Luis Obispo recently to spread the word about inexpensive fuel alcohol, a mixture of 80 percent ethanol and 20 percent water.

He is planning to publicize his upcoming class on the subject, scheduled for Oct. 18 at the San Luis Bay Inn in Avila Beach. Fee is for the 10 a.m. to 6 p.m. class is $85. Blume said.

Poly officials eye minorities for entry

BY CYNTHIA BARAKAT

A student affirmative action program has received funding and is underway at Cal Poly, according to interim affirmative action coordinator Dr. Linda Atwood.

The plan, drawn up by a group of administrators, faculty and counselors, is aimed at reaching "under-represented groups, who are regularly admissible, but don’t consider attending Cal Poly," said Atwood.

The groups specifically mentioned as targets for this program are ethnic minorities in California, with 30 percent women, 30 percent blacks, 20 percent Hispanics and 20 percent Asians.

A "retention" plan, for students already attending Cal Poly and understand the support they will receive through the other aspects of the program.

A "restitution" plan. The types of students who qualify for affirmative action have a statistically higher dropout rate than others, said Atwood.

Ann Clendenen, right, tries to convince electrical engineering major Drury Jimenez to go GOP. Clendenen, a former Pol student, spent a year in Washington, D.C. where she worked for the Republican Party.
US economist wins Nobel prize

STOCKHOLM, Sweden (AP) - U.S. economist Lawrence R. Klein, whose models for forecasting economic trends revolutionized the field, capped a strong American showing in the 1980 Nobel Prize series Wednesday by winning the economics award.

The 60-year-old University of Pennsylvania professor won the Memorial Prize in Economics and became the eighth American Economi among 21 Nobel laureates this year. He was selected for his "creation of econometric models used in analyzing economic fluctuations and policies."

"Econometrics" is the use of mathematics and statistics to verify and develop economic theories, Klein, an economics professor at Pennsylvania since 1958, served as an adviser to Jimmy Carter during the 1976 presidential campaign and has remained an unofficial consultant to the administration.

The economist declared an official position to avoid raising the issue of his previous affiliation with the American Communist Party, sources said. They said he also cited his desire to continue his research.

The native of Omaha, Neb., was a Communist Party member during 1946 and 1947, while doing research at the University of Chicago. He left the United States for Britain during the 1950s, when Sen. Joseph R. McCarthy's congressional committee was investigating the alleged communist connections of a number of prominent Americans.

Bill hindered newsroom searches

WASHINGTON (AP) - President Carter signed a bill Tuesday designed to prevent surprise searches of newsrooms.

The legislation requires police to request voluntary cooperation when seeking information from news-gathering organizations or use a subpoena when contested in court, rather than arriving unannounced with a search warrant.

The exceptions are when: (a) there is reason to believe that the person who has in his possession or control materials relevant to an investigation is about to destroy them; (b) there is a direct threat to the safety of officers or others; or (c) there is a reasonable belief that alteration of the materials is being contemplated.

The legislation was introduced by Sen. Joseph R. McCarthy's Senate Subcommittee on Internal Security with the support of Sen. Edward M. Kennedy and Rep. John W. Hatfield of Pennsylvania, who was the only Democrat to vote against the bill.

McCarthy said the bill would protect the rights of news organizations, but would not interfere with the duties of law enforcement officials.

The bill also includes provisions for the release of classified information to the public under certain circumstances.

The legislation was introduced by Sen. Joseph R. McCarthy's Senate Subcommittee on Internal Security with the support of Sen. Edward M. Kennedy and Rep. John W. Hatfield of Pennsylvania, who was the only Democrat to vote against the bill.

Cyclists charge Foothill is dangerous

BY MIKE TRACHTIONS

Cal Poly students don't have to appear on That's Funny, they say, because they're dandies on two wheels. Despite the dangers, they continue to ride bikes to school along Foothill Boulevard.

"Riding bikes can be dangerous," said John Wootton, a 20-year-old junior animal science major. "The roads aren't wide enough."

"As we widen the roads, they should be done. A divider lane and a bike path would probably solve the problem," he added.

"I support the cause," said Dave Murray, Caltrans assistant traffic engineer and ridershare coordinator. "It's just a couple of options for getting money to help finance a project on the Foothill and Foothill Boulevard.

"The transportation development act, Senate bill 225, allocates money to counties, of which two per cent goes to pedestrian and bicycle projects," Murray said. "If the need for a project arises, then the organization must submit a bid," commented Murray.

Steve Macelvaine, district supervisor for Los Osos Valley Road and Foothill Boulevard, was not available for comment, but Jeff Jorgensen, supervisor for district five and a member of the San Luis Obispo Council of Government, did make a statement.

"I support the cause completely," he said. "It's a dangerous situation. Something should be done," but, he added, "it's very difficult to break funds for something like this.

Vic Kami, a staff member of SLO-COG, said there is federal money available for bike paths.

"The Federal Bike Grant Program is national money available for any city, county, and state project," he said.

"Institutions must compete on a national level for the funds, which are allocated in January."

Paso Robles was one of the 15 projects funded in California and received $17,200. Robnort Park was awarded the most, $46,500, and San Diego City received the least, $3,130.

Page 3
National Fire Prevention week ended Saturday with a junior fire inspector day. Ventriloquist Steve Kay, a former Cal Poly student, was there to entertain and hand out certificates awarded to the kids who returned their home fire inspection checklist. The day's events included rides on the fire engine, films on fire safety, and demonstrations of fire equipment.

(Above)—Firemen Chris Slate and Tom Zeulner demonstrate "Jaws of life," which is a device used to disassemble cars quickly to save trapped victims. (Left)—Child watches intently as the firemen demonstrate.

Equal rights movement of '70s not as fruitful as in '60s, report says

NEW YORK (AP) - The women's movement in the 1970s shared the courtroom strategy but not the success of the civil rights cases of the 1950s and 1960s, according to a new judicial study.

Perhaps the main reason, the Ford Foundation report said, is that most judges are upper middle class males who view equal rights for women as more drastic changes for American society than equal rights for blacks.

"The effects of racial discrimination are far more obvious: judges can see ghetto, race riots and segregated schools," said Margaret Berger.

Vuarnet shades
the cool eyes

BY SUE BOYLAN
Special to the Daily
"When you wake up in the morning and the light has just hit your head, the first thing you do when you get up out of bed is...Get yourself some Cheap Sunglasses..."

If you wake up on a particularly bright Saturday morning with a particularly nasty hangover it doesn't matter if the sunglasses you reach for don't block out infrared or ultraviolet light—your eyes are probably halfway closed anyway. But if you're skiing, climbing, hiking or driving you should reach for eye protection in the form of good sunglasses, which, according to the managers of Granite Stairway Moun-
neering in the area, aren't cheap.

Outdoorsmen who go to Granite Stairway should expect to pay at least $30 a pair for sunglasses, said manager Ray Bini. Granite Stairway carries Ray Ban and Vuarnet sunglasses which he claims are some of the best.

Bini said there are four criteria that the shopper can use to determine a good pair of sunglasses:

1. The quality of the lens
2. Whether it's polarized or not
3. Fit and frame construction
4. Whether and how lenses are double gradient.

Most people have to rely on the sales clerk's advice on lens quality and lenses that are designed to meet the needs of specific sports, Bini said. Customers should keep in mind that plastic lenses are lighter than glass lenses but they are more susceptible to scratches. The types of lens tints will also vary in how well shadows are blocked.

The sunglasses should be able to withstand some abuse without breaking so that they don't shatter if dropped. Sunglasses should rest against your face and the frame was still intact," Bini claimed.

"The lenses broke, but the frame was still intact," Bini said he had a pair of Sunglasses block out 100 percent of the ultraviolet light and 90 percent of the infrared light. Bini said.

Vuarnet frames are made from nylon that allows the ear wires to be flexible enough to be twisted into a circle without breaking.

A Vuarnet advocate, Bini said he had a pair of Vuarnet sunglasses that were run over by a car. "The lenses broke, but the frame was still intact," Bini claimed.

The old adage that one loses things, Bini said.

Vuarnet frames are made from nylon that allows the ear wires to be flexible enough to be twisted into a circle without breaking.

Vuarnet shades are more susceptible to scratches. The types of lens tints will also vary in how well shadows are blocked.

The sunglasses should be able to withstand some abuse without breaking so that they don't shatter if dropped. Sunglasses should rest against your face.

Left to right—Bill Nash, Jill Urquhart and Randy Ratto. As these three will attest, the comfort and style of the sunglasses named for Jean Vuamet looks down on the bridge of the nose, Bini advised. Make sure that the frame is comfortable so that they don't give you a headache while wearing them.

Vuarnet recognized that most people buy sunglasses for the style. The increasing popularity of Vuarnet sunglasses is an example of fashion conscious shoppers. "But," he said, "it's a Functional Pala, Vuarnet are the best."

Whether the fashion following consumer knows it or not, Vuarnet sunglasses block out 100 percent of the ultraviolet light and 90 percent of the infrared rays. Bini stated.

Vuarnet shades are made from plastic lenses that are also more susceptible to scratches. The types of lens tints will also vary in how well shadows are blocked.

Most people have to rely on the sales clerk's advice on lens quality and lenses that are designed to meet the needs of specific sports, Bini said. Travel Center gives tips

BY BOB BERGER  
Outdoors Editor

With only four weeks of the quarter gone, already the University Union Travel Center is making travel plans and booking trips for winter break:

"We send people to all corners of the earth," said UUTC founder Rod Neubert.  

This December Recreation Administration Major Steve Arechiga and Bob De Luca will lead ten people on a trip to Mexico. Both work in the UUTC and have travelled in Mexico. De Luca and Arechiga hope to keep the itinerary flexible, but the plan, as it stands now, is to travel by train from Mexicali to Tepic and the beaches of Mazatlan. The group will rest in Mazatlan for a few days before traveling to Tepic and the beaches of San Blas.

"We hope to be in Puerto Vallarta for Christmas, but Bob (De Luca) might take a group inland," said Arechiga.

For those interested, there are sign-up sheets in the Travel Center and the Escape route. Later this quarter there will be a general meeting and interviews.

"We want to take a diverse group with common interests. We'd like to cater to the needs of the group so we want to take people who can be flexible," said De Luca.

The most extensive guided trip by the UUTC was led by De Luca last summer to Peru. The trip took almost six weeks and consisted of six people including De Luca. Next quarter there will be a show on the Peru trip. There will be exhibits on pottery, photography and the recordings of an Indian wedding ceremony.

The group traveling to Mexico will be staying in motels, camping and generally kicking back. The cost for two weeks (Dec. 14-29) of traveling and lodging will be $250. Food is not included. The transportation costs include roundtrip travel from San Luis Obispo.

The primary concern, however, of the UUTC isn't guided trips, but low cost excursions for students.

"In the future we'd like to offer more guided tours like the Peru trip," said Neubert, "but basically we're here to help students with low cost travel."

The UUTC can only book trips to Mexico, but in the future on-campus travel will be available. The UUTC can only book flights on cross-country or foreign flights, but they have a plethora of information on domestic airfares. From May through March 31 one can take advantage of low, off-season airfares to Europe.

"We're booking now for the winter and spring," said Neubert, "but we won't have the summer itineraries until February or March."

Neubert is the founder of the UUTC. He was working as the advisor to the ASJ Outings Club when a person came into the Escape Route with materials for the Travel Center.

"We didn't have a travel center then 1976 so I started working on it," said Neubert. The UUTC has been in operation since 1978 and has sent people to places like New Zealand, Australia, Japan and Johannesburg, South Africa. Europe is the norm.

"We have people asking us millions of questions," said Arechiga. To answer many of those questions the UUTC has printed 12 leaflets on travel around the country and the world. One can find the leaflets either in front of the Travel Center or at the main desk in the Student Union.

Next quarter the UUTC will offer eight travel classes to various places around the world in Science North, rm. 302 at 11 am on Thursdays. Before you leave town, check with the UUTC. They've got the best tips in town.

SYMPOSIUM

ENERGY: THE EIGHTIES AND BEYOND

A forum of distinguished scientists and engineers will discuss issues and answer questions about alternative energy systems.

Featured Speaker

Dr. Arno A. Penzias  
Nobel Laureate, and Executive Director, Research,  
Communications Sciences Division, Bell Laboratories

Speakers and Panelists

Dr. James L. Sweeney  
Director, Energy Modeling Forum, Stanford University

Dr. Edwin Zebroski  
Director, Nuclear Safety Analysis Center,  
Electric Power Research Institute

Dr. Vladimir Haensel  
Professor, Department of Chemical Engineering  
University of Massachusetts

Dr. E. S. Davis  
Assistant Manager, Planning, Assessment and Integration  
Jet Propulsion Laboratory

Dr. Alexander J. Glass  
Assistant Associate Director for Lasers,  
Lawrence Livermore Laboratory

Professor Miro M. Todorovich  
Department of Physics, City University of New York

On-Campus Interviews:

THURSDAY, OCTOBER 30

If you welcome the stimulation inherent in creating a new generation of medium and large-scale mainframe computer systems, consider NCR Engineering & Manufacturing/San Diego.

We are an organization that's generated new NCR facilities and produced an engineering staff that's showing the way in systems architecture, Virtual systems, Multiprocessing, Data Base Management, Firmware emulation, PASCAL-based OS, VLSI technology, Upward path engineering, and short, everything that creates Total System capabilities for business needs of the 80's and 90's.

Something else you'll like: Although our products and California hilltop facilities are large-scale, you'll work in Small, highly visible project teams that offer uncommon program diversity. There are many multidiscipline communication, movement between projects, and wide career path options. In a word, you will find exposure. And a unique learning environment.

And you'll be working within a few miles of the ocean and minutes from downtown San Diego. Learn more by scheduling an on campus interview through your Placement office, or by writing: Mr. Hal Ostrander, NCR Corporation, Dept. CN, 16550 W. Bernardo Drive, San Diego, CA 92127.
team of Cal Poly is looking for a team manager to assist coaches and help out in the locker room. Interested persons can contact basketball coach Ernie Wheeler or call 546-5354.

Basketball team manager

The men’s basketball team of Cal Poly is looking for a team manager to assist coaches and help out in the locker room. Interested persons can contact basketball coach Ernie Wheeler or call 546-5354.

Poly Phase

Poly Phase Book Exchange final payoff will be at 11 a.m. Thursday, Oct. 16 in Room 102 of the Engineering East Building.

SK1 Club

The Cal Poly ski club will meet at 7:30 p.m. in Room E-29 of the Science Building.

UBSAC

The United Black Students Awareness Council is sponsoring a dance from 9 p.m. to 6 a.m. Oct. 17 in Montana Lounge. Admission will be $3.

Gay Student Union

A business meeting of the Gay Student Union will be at 7:30 p.m., Oct. 20 in Room E-28 of the Science Building.

Mothers for Peace

David Fleischaker, Washington D.C. attorney for Mothers For Peace, will speak at 7:30 p.m., Oct. 17 in the Veterans Memorial Building of San Luis Obispo. He will describe the unique nuclear disarmament movement in a modern university setting, which offers top working conditions.

Teacher's Society

Cal Poly’s Teacher’s Society will meet at 6 p.m., Oct. 16 in Room 215 of the Business Administration and Education Building. All members and new members are welcome.

Pre-Law Club

A de-briefing seminar for students who took the Law Schools Admission Test Oct. 11 will be the topic at the Pre-Law Club meeting at 11 a.m., Oct. 16 in Room 226 of the Agriculture Building. Everyone is invited.

CSUC International Programs

Slides and information on opportunities for studying abroad will be discussed at the CSUC International Programs meeting at 11 a.m., Oct. 23 in Chumash Auditorium. Admission is free.

Tax breaks make fuel alcohol practical alternative

From page 1

Fuel, or ethyl alcohol burns 19 percent hotter than the best coal, and with 40 percent less pollution, said Ruben Blume, a professor of Chemistry at UC Davis.

"Germany used ethyl alcohol made from potatoes as a fuel for 30 years before World War II," Blume said. "Farmers in this country are no strangers to the advantages of fuel alcohol, especially in the mid-Western corn belt."

Generous tax breaks and a simple permit process make "homegrown" fuel especially attractive to do-it-yourselfers and larger cooperatives alike, the 24-year-old San Francisco native said.

"Between tax write-offs and cash incentives, a person can produce their own fuel alcohol for about 43 cents per gallon," Blume said. Questions about the November ballot. 30 signatures from 39 of the 58 counties indicated that 69,466 valid signatures had been collected from those counties.

The referendum needed 116,119 valid signatures to make the ballot. Since the projection is more than 10 percent above that total, no more signatures need to be counted, sponsors submitted more than 79,000 signatures on petitions.

The referendum is on a bill, SB200, by Sen. Ruben Ayala, D-Chino, that was passed by the Legislature this session, and signed by Gov. Edmund Brown Jr. The bill authorizes the $400 million canal, subject of a 20-year, north-south battle, among 58 billion in water projects. Financing would come from bonds to be paid for by water users. The canal would carry Sacramento River water around the Delta to existing canals which carry Delta water to its destination.

Opponents, including Delta farmers, and environmental groups, say the canal would so reduce fresh water flow, through the Delta into San Francisco Bay that salty sea water would intrude, wreck Delta farm land and endanger fish and wildlife.

Supporters of the canal contend it would actually improve the Delta's fresh water supply by ending the present reverse flow caused by pumping, drawing water from the lower channel of the Delta.

Qualifications of the referendum for the ballot block the effect of the bill...

Bill to block
canal qualifies for ballot

Sacramento (AP)—A referendum seeking to block construction of the Peripheral Canal, which would ship Northern California water south, has qualified for the state ballot, Secretary of State March Fong Eu's office said Wednesday.

The referendum will let voters decide the fate of the long-delayed 43-mile canal around the Sacramento-San Joaquin Delta. It will go on the June 1982 ballot unless a special election is called earlier.

This will be the first referendum on a California ballot since 1952. Carr Daniels, a spokeswoman for Ms. Eu, said 116,119 valid signatures were collected to make the ballot. Since the projection is more than 10 percent above that total, no more signatures need to be counted, sponsors submitted more than 79,000 signatures on petitions.

The referendum is on a bill, SB200, by Sen. Ruben Ayala, D-Chino, that was passed by the Legislature this session, and signed by Gov. Cal Poly chases conference hopes

This weekend is the beginning of the rest of the season for the Cal Poly women's volleyball team. Two of the top three teams in the Southern California Athletic Association collide head on Friday night in the Cal Poly Main gym as the Mustangs and the Northridge Matadors vie for the conference lead. The Mustangs and the Matadors sport unbeaten 1-0-1 match marks and 4-0 conference records.

For the Mustangs, this weekend could be the stepping stone to the national tournament. The season does not get any easier for the Mustangs after the Northridge battle, as national power Stanford University pays a call and SCAA defending champion and conference No. 1 ranked Santa Barbara visits Wednesday night. All three games begin at 7:30 p.m.

The next three home games will be awesome and will be unbelievably important for us," said Mustang coach Mike Wilton.

The Mustangs, who are ranked No. 16 in the nation and who are 18-4 overall, face a stiff challenge to get into the national volleyball tournament.

Winners of the SCAA and Northern California Athletic Association receive automatic berths to the tournament. An at-large team from one of the conferences will most likely receive an invitation.

Wilton is hoping that a large turnout will aid the Mustang effort at home. "We are hoping that we have a good turnout this weekend because the girls respond to the crowd," he said. "We have good fans but it just seems that they need an atomic bomb to get them fired up."

Cal Poly has to take advantage of this three game home stand because its quest for the conference crown does not get any easier after next Wednesday. Five of the following six conference games after Wednesday are on the road.

American Hospital Supply Corporation cordially invites you to our Career Opportunities Evening on October 16, 1980 from 7:00 to 10:00 in the Monterey Room of the Discovery Inn, 1800 Monterey Street. Refreshments will be served.

The Cal Poly Mustang water polo team hopes to improve its overall record to 9-6 as it hosts its own invitational tournament.

The tournament will run all day Saturday at the Cal Poly outdoor pool. The teams included in the tournament are Loyola-Marymount, the Cal Maritime Academy and the U.C. Santa Barbara JV team.

The tournament will begin at 9 a.m. with Loyola

facing the Maritime Academy. Cal Poly battles the Santa Barbara JV at 10:30 a.m. and then comes back at noon to tangle with Loyola. The Maritime Academy and Santa Barbara swim at 3 p.m. and Cal Poly closes the tournament with the Maritime Academy at 4:30 p.m.

The water polo team is in the middle of a transition from a good team to a great team, according to coach Russell Hafframp.

The Mustangs after the 11-0 match marks and 4-0 conference records.

Cal Poly hosts waterpolo meet

Mustangs host
In a time when libraries must be closed and police forces slashed because not enough tax revenues are generated to fully fund such services, it would seem logical that the government would search every nook and cranny for additional money. Yet the government has turned its back on a $10 billion industry which has all but escaped taxation.

That industry is prostitution.

The "world's oldest profession" is becoming one of the most profitable. A busy prostitute can earn $70,000 a year. Yet only in the state of Nevada are prostitutes legally required to pay taxes and only in seven counties and two cities in Nevada is prostitution legal. Nevada's Storey County has managed to fund many of its services through the $8,000 the Mustang Ranch brothel owner, Joe Comforite, must pay in taxes each month. Therefore California can help shed light on the specter of Proposition 13 which has chopped off the flow of tax dollars to essential services by simply decriminalizing prostitution.

But money is not the only factor which should convince the state to decriminalize prostitution. As there are also compelling health, aesthetic, and moral reasons why the laws against prostitution should be stricken from the books.

At present, there is nothing to insure that prostitutes will take proper health precautions, allowing venereal and other related diseases to run rampant. If prostitution was legalized, regular physical examinations could become mandatory to check the spread of venereal and other "social" diseases.

Crime rates would fall if prostitution were decriminalized. Crime rates are exceedingly high—about 30 to 40 percent higher in areas where prostitution is common. The higher rate is at least partly caused because criminals know those who solicit call girls and the prostitutes themselves will be less likely to report a crime when they have been victimized because they themselves were involved in illegal activities. If the crime rate were to drop, police officers could be diverted into other areas where they are needed more.

Aesthetically, the prostitution industry is admittedly a blight upon any city. Seeing hordes of prostitutes standing around streetcorners waiting for customers who pass by is not an appealing sight. Prostitution was originally restricted to certain "red light" districts which most citizens could avoid if they chose. But streetwalkers, lured by the scent of money, have moved to the more affluent neighborhoods, impinging on the rights of those who live there. If prostitution were legalized and treated as a small business, cities could zone a certain area for prostitution trade and ban it from residential areas.

But the most important reason which demands prostitution be decriminalized is a moral one. What right does the government have to impose its collective morality upon its citizens? An adult's sex life should be his or her own business and not be regulated by government.

The Mustang editorial board doesn't advocate prostitution, it simply realizes that just because a government declares something illegal, the problem will not go away. As long as there are poor men and women who can only support themselves through selling their bodies, prostitution will exist.

Only by raising the standard of living of the poor through decentralization, the spectre of Proposition 13 which has choked off the flow of tax dollars to essential services by simply decriminalizing prostitution, officers can be diverted into other areas where they are needed more.

Making the prostitution industry a crime not only deprives those who solicit call girls and the prostitutes themselves will be caught less likely to report a crime when they have been victimized because they themselves were involved in illegal activities. If the crime rate were to drop, police officers could be diverted into other areas where they are needed more.
