Cal Poly administrator Baker said the first step in the compliance review will be for the university to supply the Department of Education’s San Francisco Office with background information it has requested. He said this information is being gathered now for submission in early December.

Dr. Baker also said the notification indicated that a site visit by a compliance review team is tentatively scheduled for late January 1981.

**Enrollment up 2.8 percent**

Cal Poly administrators weren’t alone in finding an increase in enrollment this fall on their campus. Enrollment in the entire California State University system—35 campuses which include Cal Poly—was up 2.8 percent from 231,390 a year ago to 237,872 this fall. The increase surprised many CSUC administrators because smaller CSUC campuses have fought several successive declines in enrollments at demographic shifts and the denouement of the post-War baby boom have reduced the pool of prospective enrollments. CSUC administrators attribute their good news to California’s depressed economy because more people go to college and tend to stay longer during depressed economic periods.
U.S. responds to Iran

WASHINGTON (AP) — Deputy Secretary of State Warren M. Christopher is flying to Algeria on Monday night with the U.S. request for clarification on terms for freeing the American hostages, the State Department said.

There: Christopher will meet with Algerian Foreign Minister Mohamed Benyahia and Algerian officials who have been serving as intermediaries between the United States and Iran. The Americans will be prepared to answer any question the Iranians may have regarding the U.S. position. David Nal, a department spokesman, said.

Christopher conferred over the weekend with President Carter at Camp David, Md., about the U.S. response to Iran's request for clarification, brought here by Algerian emissaries last Tuesday.

The contents of the U.S. message were not disclosed.

Iran's terms, announced on Nov. 2, call for an American promise not to interfere in the country's internal affairs, cancellation of all American claims against Iran, release of more than $8 billion in impounded Iranian assets, and return of the wealth of the late Shah Mohammad Reza Pahlavi.

Firefighter fifth victim of fires

SAN BERNARDINO, Calif. (AP) — The Southern California brushes claimed a fifth victim Monday when a firefighter who had battled one of the blazes collapsed and died at a nearby hospital. He was trying to return to Corvallis, Ore., after a doctor ordered him off the fire line.

The election of Brown, one of the most liberal members of the Constitution courts would have to use the same "strict scrutiny" to cases of alleged sexual bias as the they now do in cases of alleged racial or religious discrimination.

CSUC enrollment

From page 1

Administrators also say more students are attending CSUC campuses because recruiting efforts have been intensified on those campuses within the last two years and because administrators have tried to attract more business- and profession-oriented students by altering their liberal arts curricula.

The unexpected increase in CSUC enrollment is financially disquieting to CSUC administrators. They now say they'll need $6.4 million more this school year, from state and Department of Finance officials to meet the demand for more teachers.

Enrollment went up at all but three CSUC campuses, recruiting efforts that have been intensified on those campuses within the last two years and because administrators have tried to attract more business- and profession-oriented students by altering their liberal arts curricula.

The unexpected increase in CSUC enrollment is financially disquieting to CSUC administrators. They now say they'll need $6.4 million more this school year, from state and Department of Finance administrators.

Management head appointed

Dr. Robert H. McIntire has been appointed head of Cal Poly's management department and will take over in January, 1981, according to President Warren Baker.

McIntire has been a member of the Cal Poly faculty since 1977. He is succeeding Dr. Ernest C. Miller, who has been acting head of the management department since early this year when he succeeded Dr. Melvin E. McMichael.

McMichael is flying to Algeria on Monday night with the U.S. request for clarification on terms for freeing the American hostages, the State Department said.

Another war in the Middle East?

WASHINGTON (AP) — Fears of a second war in the Middle East heightened Monday on reports that Syria has 50,000 troops and 1,200 tanks on Jordan's border. Jordan moved up tanks and troops and said it would not shoot first but would defend the country against attack.

Tension between the Arab neighbors results from conflicting positions on the Iran-Iraq war and Syrian charges that Jordan supports Islamic fundamentalists trying to overthrow the Syrian government.

Jordan sent lists of arms and spare parts it wants from the United States and a decision may come soon on the requests.

Jordan, whose King Hussein is considered among the most trusted Arab allies of the United States, said it would turn Jordan into a "flaming inferno" to burn every aggressor. Jordan strengthened its forces on the border to counter the Syrian deployment.
Poly professors speculate about NASA’s future

Tax cuts will be only a short-term relief, and the subsequent cuts in funding for research will only make matters worse by making the U.S. less competitive industrially," Poling said. “NASA’s decline is just one facet of America’s total technological decline,” Buffs added. He said other countries are quickly becoming more adept in all phases of scientific research. He cites European gains in nuclear and particle physics as evidence supporting his view.

A matter of concern to both men is a lack of emphasis on mathematics and science in the educational system.

“We are becoming an increasingly complicated technological society and if the general population is not adequately educated in basic sciences they will find they have no function in society,” Poling said.

The deficiency in education produces a populace that will probably make the wrong decisions when it comes to such crucial matters as voting, Poling said.

Laundromat data comes out in the wash

Just as no two snowflakes are exactly the same, though they may appear so to the human eye, no two laundromats in the city of San Luis Obispo are identical, according to a survey of the six San Luis laundromats prepared by the Poly Association of Consumer Economics.

PACE judged that one to be the most tidy, Matag San Luis Dry Cleaners & Laundry and Washport. The laundromats also earned high marks, while Fluff & Fold and Laundrette didn’t fare as well.

While the services, prices and cleanliness differed greatly, there were four advantages found in all the laundromats. They are all open seven days a week, all of the washers have variable temperature settings, all provide clothes and folding clothes on and all have chairs.

The information PACE uncovered about the laundromats came from a eight-week question survey done at each laundromat. PACE plans to tackle a different consumer problem every quarter, a club representative said. PACE may collect data items in the El Corral Bookstore winter quarter.

Poly's Pageant titleholder successfully

BY MICHAEL WHISLEY
Staff Writer

"Let it be known. The Cal Poly Sailing Team is for real!"

This was the lead paragraph of an article in the Mustangs-The Daily Chaff, in January 1978, in which the corresponding editor was discussing the activities of the sailing club at Cal Poly. It was also true that the titleholder of the regatta was for real, in the sense that he was carrying the title, and of course, all of the activities of the sailing club were for real.

The team lost its ASA title last year after a series of heated debates in the student senate. The team lost its ASA title for a number of reasons, including the fact that it couldn’t pull in any ASA title. The team met the requirements of the sailing club, and said Klein.

Schools such as Berkeley, Stanford and UCSB all have a number of boats and each of the classes which race inter-collegiately and almost all are highly competitive, said Klein. Last year Poly’s sailing team competed for four years, said Klein. The team was formed in 1965 by a group of students who included mechanical engineering major Bill Lee who now owns Santa Cruz yachts. Lee is the designer and builder of Merina, a 60-foot schooner which is a revolutionary leader in a new class of ultralight ocean racing sailboats. The sailing club and its activities, which will hopefully include some intercollegiate competition, are open to all Cal Poly students, said Commodore Tim McCallum.

Students who wish to learn to sail are encouraged to participate in the sailboat clinics which the club puts on at Lopez Lake.

The sailing club meetings are held on the first and third Wednesdays of each month, in Science East Room 46, at 8 p.m.

Library hours for finals

The hours Dexter Library will be open during final week were announced today.

The schedule is as follows: Thurs., Dec. 4-7:30 a.m.-midnight; Dec. 5-7:30 a.m.-10 p.m., Dec. 7-1 p.m.-midnight; Dec. 8, 9-10 a.m.-12 Midnight; Dec. 11-7:30 a.m.-10 p.m.; Dec. 12-7:30 p.m.-5 p.m.

Extended hours have been scheduled on Dec. 6, 7 and 11 from 10 a.m. until 12 a.m. Extended hours have also been slated for Dec. 7 from 10 a.m. until 1 p.m. and on Dec. 12 from 5 p.m. to 7 p.m.
An unyielding defense sparked the Cal Poly Mustangs to a NCAA Division II playoff victory. Closing in on Jacksonville State runningback Walter Broughton are (from left) Fred Razo, Tom Perry and an airborne Tom Gilmartin. Poly continues playoff action as it hosts Santa Clara at Mustang Stadium this Saturday at 1:30 p.m.

**Mustangs host second round game**

**Poly earns rematch with Broncos**

BY VERN ARENDES

Sports Editor

Sixty minutes of playing time is all that stands between the Cal Poly Mustang football team and a berth to Albuquerque, N.M., and a shot at the NCAA Division II National Champlainship.

Those sixty minutes will be heard up against Santa Clara in a no holds barred brawl in Mustang Stadium this Saturday afternoon with the kickoff slated at 1:30 p.m.

The slugfest between the two West Coast Division II powers is a result of first round wins in the national playoffs. The Mustangs, ranked No. 4 in the nation, blanked fifth-ranked Jacksonville State, 15-0, and the Santa Clara Bronocs, seeded No. 7 in the nation, upset No. 2-ranked Illinois dropped Northern Michigan, 27-26.

Mustangs seek second basketball win at home

BY VERN ARENDES
Sports Editor

Coach Ernie Wheeler's Mustang basketball team has a tough act to follow this year but it may well possess the personnel needed to equal or better last year's performance.

Last year's team accumulated an impressive list of accomplishments. The team clinched the California Collegiate Athletic Association (CCAA) conference championship, finished with an outstanding 22-7 overall mark, was ranked second in the NCAA Division II in defense at 58.8 points per game, won the most games at home since World War II with a 13-1 mark, and set a new school field goal record at 49.8 per cent. The Mustangs only lost two seniors to graduation but Wheeler still needs a lot of questions answered this year and a lot is riding on the abilities of the new faces in the Cal Poly ramp.

Wheeler will get a good look at his troops under fire as the Mustangs play host to Sonoma State in the Main Gym tonight at 8 p.m.

Cal Poly beat the Sonoma State Cossacks twice last season, 74-68 and 82-46.

The Mustangs head into the contest with one win under their belts as they dropped College of Notre Dame over the weekend, 80-67.

Seniors Ernie Wheeler and Rob McKone led the Mustang scoring with 16 and 13 points respectively. Pete Neumann added nine points and 10 rebounds.

Alongside Shultz, at guard, is Ernie Wheeler. He was the third leading scorer from last year's team at 8.0 points per game and was named as honorable mention in the CCAA.

Neumann, at 6-6, averaged 6.4 points a game in a reserve role last season.

"We have outstanding seniors returning this year and we have a good nucleus to build around," said coach Wheeler. "We only have six players back this year and how we do will depend on how well our new players adjust to our current system and how they play in competition."

Heading Wheeler's list of new recruits is junior transfer Kevin Lucas. The 6-4½ forward from New York has the inside track to one of the starting forward positions.

Other new recruits to watch include Scott Ahlstrom from Idaho, Horwath and Keith Wheeler.

"Our number one goal is to repeat as CCAA conference champions," coach Wheeler said. "Everything that we do this year is aimed at winning the conference title and getting a bid to the regionals. We have a tough act to follow but I am excited about our team."

The Mustangs seek second straight win of the season as it hosts Sonoma State in the Main Gym tonight at 7:30 p.m. Anchoring Poly's frontline will be forward Rob McKone (right). Spikers get tourney berth

The Cal Poly Mustang women's volleyball team is still alive as it earned a wild card berth to the AIAW Division I National Championships.

The Mustangs earned the honor by compiling a 30-7 overall season mark and finishing sixth in the Western Regionals. The top five from each regional automatically qualify for the national championship tournament which begins Dec. 11 at Santa Barbara.

The Mustangs were tested by the best and finished the regionals with a 3-3 mark. Cal Poly upset San Diego State, 16-14, 8-15, 15-8 but suffered losses to UOP, 15-10, 15-0, 15-9, UCLA, 9-15, 15-2, 15-13 and Santa Barbara 15-3, 15-8.

"I left the tournament feeling bittersweet," coach Mike Wilen said. "We gave UCLA all that it could handle and picked up a big win over San Diego but we looked pathetic against UOP and Santa Barbara."

"We all learned a good lesson from the regionals," he said. "The Western Regional is the toughest regional in the nation but we just beat ourselves."

The Mustangs have all of this week and the first part of next week to get ready for the tournament. The team will head down next Wednesday before beginning tournament play on Thursday morning.

The Cal Poly Mustang basketball team seeks its second straight win of the season as it hosts Sonoma State in the Main Gym tonight at 7:30 p.m. Anchoring Poly's frontline will be forward Rob McKone (right).
Conservation—a must

President-elect Ronald Reagan’s feeble-minded grasp of the role that conservation, if properly encouraged and mandated, could play in solving our energy woes is laughable. His intention to “unequivocally reject any program designed to artifically suppress energy consumption” is tragic; geared toward short-term profit and is downright stupid.

Fulfilling expectations that he would become the darling, if not the plaything, of the energy industry, Reagan recently stated his agreement to the conclusions reached by his Energy Policy Task Force, a group whose ranks swell with Big Oil moguls and suffer a total absence of conservationists and environmenalists. The conclusions of such a group, whose members seemed hand-picked so as to reach a pre-determined result, come as no surprise: the removal of all price controls on oil and natural gas, the exploitation of public lands, reduction of environmental restrictions, a speed-up in the licensing of nuclear power plants and a consensus that conservation is “no answer” to our energy shortage.

In fact, it is the only short-term answer, and is a solution that can be quickly implemented. Right now, the United States accounts for a third of the world’s energy consumption while satisfying the urges of a mere twelfth of its population. But Reagan insists that growth of our domestic energy industry, and hence energy consumption, is the key to our energy future. This is foolishness—energy consumption increases exponentially, not arithmetically. This means that if we maintain our present 3 percent annual increase in energy use, we will, in 23 years, double the energy we use now; in 46 years, four times as much. There are no non-removable resources capable of supporting this.

So growth is not the answer; big is not beautiful.

The arguments for a strong conservation program are impressive: it would save resources; it would save money because it costs less to conserve a unit of energy is barrel of oil, say) than to produce one through the development of a new technology, and has lower capital costs; it would be beneficial to the environment; and it would buy us time for the development of renewable resource technologies.

And the areas in which conservation could be practiced are many. The household and commercial sector of the country consumes about 30 percent of our energy, 70 percent of which goes for space and water heating. Tighter building envelopes, lower thermostat settings, and passive solar designs are but a few solutions.

The industrial sector eats the biggest slice—40 percent—of the energy pie. Stricter building codes, thermal management programs and cogeneration systems could reduce that.

If these solutions are integrated into a strong mandatory conservation program by an administration that cares more for our earth and society than for big bucks and a misguided sense of individual freedom, then experts estimate we could save 20 to 50 percent of our current energy usage.

Reagan’s proposed rape of the land, according to energy industry geologists, is unlikely to uncover the massive new reserves of non-renewable resources necessary to sustain reliance on the Middle East. What we need is a firm federal conservation policy, one that is positive and active. Sitting back and saying conservation means we will all have to be too hot in the summer and too cold in the winter,” as Reagan is doing, while letting the marketplace determine the extent of conservation practiced, as Reagan proposes to do, shows lack of foresight and a disregard for the public welfare.

Letters

Editor: Whirp it, whip it good; not with your hand on the valve and the tube in your mouth. If the valve is open too far, it is like inhaling a CO₂ fire extinguisher and your lungs will freeze. Vaulling your own has other drawbacks; you waste gas when you pass out and sometimes waste you. A frat at Tufts University in Boston had a Dr. NO party a few years ago and the guy who filled the tank whipped a few alone in his room before the party. After the party started his brothers finally broke down his door and found his bare, baby blue body curled up on the bed and the now empty tank between his legs and the tube in his mouth. He’d passed out with the valve on and died from lack of oxygen. I heard about the accident when I got the group of the party and found a heart outside the frat.

If you’re gonna whip it use a balloon; or installment toy that can be passed around like a joint and refrashed.

Editor:

Editor: This letter is in reference to Vern Ahrens’ recent article concerning the Cal Poly football team. First of all I would like to congratulate the team on the excellent game this past Saturday. The defense played as well as any team I have ever seen (just ask Jacksonville State’s quarterback, he saw more of Mr. Gilmartin last weekend than his receivers.)

It is sad to have such a fine football team, and a sports editor that does not know enough about football to realize this fact. I am sure Mr. Ahrens is writing what he feels would best serve the students, but he fails to do any research before volunteering to us his opinions of our team. Perhaps he should deal with facts and not poor logic.

First of all when Cal Poly defeated a highly ranked Boise St. team, that was proof enough of the caliber of the team we have here. Second, the Sacramento St. game was almost a meaningless contest; the team had already been given an invitation to the playoffs. Why risk further injury to our front line players in a game in which the only thing being fought for were the final records? Finally, there is always complaining when it comes to who should be in the playoffs—remember the UCLA basketball team from last year? The polls can not be perfect, but I suppose that just might be why we have the playoffs.

When all things are considered, the Sac St. game had no real meaning, and it would be to our disadvantage to kill ourselves trying to win. Ha, sort of like coach Joe Harper knew what he was doing. In fact Mr. Ahrens your writing of that article “was a move that defied logic.”
