Global 2000: trying to avoid doom

BY MARY McALISTER
Staff Writer

A world view that stresses coopera-
tion among all people must be realized
through education if the world hopes to
avoid the spiraling deterioration of the
environment by the year 2000, accor-
ding to Tuesday night’s Cal Poly
Theatre lecture.

Rick Roney, executive director of
Global 2000: The Challenges For Change,
explained the need for new perspectives
on the findings and implications of the
Global 2000 Report To The President
in a two-hour presentation to a capacity
crowd.

The three-volume report represents
the culmination of a three-year study
conducted by the Council on En-
vironmental Quality, the State Depart-
ment, and 11 other government agen-
cies.

President Carter ordered the study on
May 23, 1977 to project what the world
would look like in the year 2000, assum-
ing that current trends continue.

Roney noted that the report’s primary
message is that unless the public
understands the problems and solutions
the study outlines, it will be unable to
instigate necessary action.

Roney said that education is the main
tool for increased understanding and
added that this education must pre-
vent a new world view that dispels the
old notions of infinite resources and
materialistic fulfillment and replaces
them with a spirit of cooperation and
oneness with nature.

He added that recent scientific
discoveries have substantiated the belief
that everything in the universe is
interrelated and the new view must
stress a willingness to do whatever is
necessary for the good of the whole.

Roney noted that the report itself is
an example of the cooperation needed to
accomplish the goal, as it is “the first
time any government has taken ini-
tiative to look beyond its own con-
tingency,” and represents one of the first
integrative efforts by several inter-
government agencies which had previously
communicated only on occa-
sion.

Roney dismissed criticisms that the
study represents a doomsday report of
the future, calling it instead a projection
of current trends into the future—an
early warning alert of what could hap-
pen.

Roney explained that the report con-
centrated on the areas of resources,
population and life support systems.

In the area of resources, the report
warns that oil production will peak in
1990, water scarcity will increase, forest
resources will be reduced 40 percent in
Third World nations by 2000 and soil
degradation will continue to escalate.

The study also indicated that world
population will increase from the pre-
sent 4.5 billion to an estimated 8.3
billion in 2000. Ninety percent of the in-
crease will occur in Third World coun-
tries.

This increase means that for every
two houses and jobs in today’s world, a
third will have to be created to compen-
sate for the added population.

Life support systems will be affected
as 20 percent of the existing plant and
animal life will be extinct by the year
2000.

The added population and diminished
resources will increase the threat of war.
Roney added, as water scarcities will
alternate neighboring countries which
threaten to go to war over water. The
weaponry potential will be available to
more countries.

Club gets $1,500 to study minority cost effects

BY KATHLEEN McALISTER
Staff Writer

The Economics Club has received a $1,518 grant from
the Small Grants Fund to study the cost-effectiveness of
Cal Poly and the effect of tuition on the under-
represented students.

The study, authorized by the California State Univer-
sity and College’s chancellor, will take place during winter
and spring quarters.

It will be compiled using library, computer and inter-
view sources, by an administrative staff and students.

According to Phil Parker, Economics Club president,
about 25 students assistants are needed for the project.

Because of a scarcity of funds, only the top assistants
will be paid, while others will receive academic credit and ex-
erience.

The major thrust of the 100-200 page report will be to
find alternatives to tuition and research their feasibility.

The completed study will be presented to the Cal Poly ad-
ministration and the other CSUC campuses.

An organizational meeting will be at 7 p.m. Jan. 13 in
Room 133A of the Business Administration

and Economics Building. The meeting will explain the
grant, define the project and place those interested into specific
areas of the study.

The under-represented students the study will examine
are women in engineering, men in home economics,
minority, handicapped, poor, and minority students, said
Parker.

Speakers from different departments will be invited to
answer questions for the group, and in the next four to six
weeks each department will be interviewed in depth.

“Projects is important because tuition will effect all
students,” said Parker. He encourages students of all ma-
jors and concentrations to become involved in the pro-
ject.

For more information, contact Phil Parker at 541-6292.
Hostage decision draws closer

The Iranian Parliament passed an emergency bill Wednesday designed to remove one obstacle to release of the 52 American hostages, and the chief Iranian negotiator said "we are going to release the hostages in the coming two or three days or try them.''

With the Carter administration's deadline for agree­ment only two days away, the Iranian Parliament ap­proved a measure to authorize third country arbitration of conflicting U.S.-Iranian financial claims. The action to set­tle neutral arbitration was seen as an Iranian move to open the way for an accord to exchange the hostages for frozen Iranian assets.

But despite the government's urging, Parliament delayed until Sunday consideration of another measure to formally "nationalize" the wealth of the late Shah and the royal family.

Behdad Nabavi, Iran's chief negotiator in the 14-month hostage crisis, told Parliament members their failure to act would delay return of the Shah's wealth to Iran. But he gave no indication that approval of that bill was necessary before an agreement with the United States could be reached.

Nabavi forecast a decision in two or three days on release of the hostages, but said that without an agree­ment there might be new demands in Iran for trials of American hostages or that Americans will come to us with a reply."

A spokesperson for the Majlis Parliament told The Associated Press in a telephone interview that the government "will decide on the future of the American hostages Thursday or Friday."

A U.S. negotiating team remained in Algiers, working through Algerian intermediaries in an attempt to get Iran­ian agreement to American terms for unfreezing about $8.9 billion in Iranian assets and placing them in an escrow account.

In Washington there were expectations that an Iranian reply would be received soon, but State Department spokesman John H. Trutman said some "fundamental questions" remain unresolved.

A senior Carter administration official, who asked not to be identified, said the Iranian Parliament's action "doesn't give us a clear sense of what their final position would be. What we expect is that, in a day or so, sooner rather than later, they will come to us with a reply."

The official said: "Let's hope it is something close to what we can accept, and we'll get a deal." He said the bill on arbitration enacted by the Parliament removed an obstacle the Iranians had placed in the path of an agree­ment.

"We shall inform you."

Poles strike near Soviet border

WARSAW, Poland (AP) — Demands for an indepen­dent farmers' union, set off by Saturdays fueled by Polish labor's unrest Wednesday as workers struck near the Soviet border and draped Warsaw buses with placards and Polish flags.

Communist Party chief Stanislaw Kania and Premier Jozef Pilsudski, who arrived in Warsaw with Soviet commander of East Bloc military forces.

In Rzeszow, the southeast corner of Poland about 40 miles from the Soviet border, workers laid down their tools in a two-hour warning strike to support private farmers' demands for a union independent of Communist Party control.

A Solidarity spokesman said the job action went peacefull without interface by police. Asked whether further action was planned, he said, "I cannot discuss it. We shall inform you."

When you go to a job it's built around your skills and interests, it hardly felt like work. That's the way it is at HP. Here we put independence of individual, finding out what you want to do rather than simply telling you what we need. And you get to participate in a significant project right off the bat, rather than waiting years to reach a "responsible" position.

Quality people equal quality products.

This makes sense. And it has certainly proved itself at HP for we have more than 200 offices and plants around the world. That means we need a lot of excellent people to fill diverse, challenging jobs in our various divisions, making computers, components, and instruments for engineering, testing, production, and service.

But even with our size and steady growth, the impor­tance of the individual has not diminished in the least. The personal concern is summed up in a simple term: HP May cover everything from flexible work hours (HP was one of the first companies to let you pick your own schedule) to our Management by Objective. This basically involves setting a goal and giving you the freedom to get there, or to the way you think is best.

To keep HP a human scale, we decentralize every­thing we can. Whether you're in R&D, field sales, manufactur­ing, marketing, administration, or service, you'll be working in a small group.

You get all the other benefits, too.

Petitioners dream of a day to honor King

BY RALPH THOMAS
Staff Writer

Today is the birthday of the late Dr. Martin Luther King, Jr. and several student organizations here are pushing to make it more than just another day.

The United Black Students Awareness Council and four Greek organizations have been gathering signatures on petitions since Tuesday. The petitions call for making King's birthday a national holiday to recognize his efforts toward worldwide peace and unity.

"We feel that Dr. King strived to achieve a lot of unity... because of this we feel that he should be recognized for the deeds he has done," said David Tucker, corresponding secretary for Alphi Phi Alpha.

Tucker's fraternity along with the Alpha Kappa Alpha sorority will be gathering signatures throughout the community today. Tucker said volunteers will be on foot on Higuera and Monterey Streets and at stations in Mission Plaza and University Square.

Tucker said the group collecting signatures in the UU Plaza was Delta Sigma Theta sorority. He said things went well on Tuesday as about 200 signatures were gathered.

He said the petition drive is part of a national effort to make this day a holiday.

"We don't have a set number we would like to reach—we would like to reach everyone," said Tucker.

He said if it couldn't be made a holiday it should at least be a day of recognition. He urges students not to sign the petitions just to get an extra holiday.

UBSAC is sponsoring festivities this morning at 11 in the UU plaza. Included will be prayers, music and speeches to celebrate King's birthday.

The ASI student senate recently passed a resolution encouraging King's birthday to be "recognized as a day to celebrate the life of a man who helped us all." The resolution called for the ASI president to write letters to California's senators and representatives urging them to support actions to make King's birthday a holiday.

Lack of acceptance by American doctors for the 5,000-year-old practice of acupuncture, and a general absence of training facilities in the field has led a Cal Poly student to apply for admission to China to study the ancient art. Besides obtaining an intensive education in a non- typical medical practice, animal science senior and former ASI Internal Affairs director Jeff Shapiro plans to satisfy his growing curiosity in the Chinese culture.

Shapiro hopes to be one of 20 people chosen from Washington, Oregon, and California by the Ministry of Education for entrance in their foreign student program. Although he has not studied the Chinese language, Shapiro said his background in agriculture should help in his acceptance at a Chinese university, because China is currently attempting to increase its agricultural production.

This is Shapiro's last quarter at Poly, and after receiving his bachelor's degree he plans to tour the Spring in China. It is then that he will enroll in the Monterey Language Institute of Foreign Studies to get a good start in learning the complicated Chinese language.

Shapiro first became interested in acupuncture while working for a veterinarian during summer breaks near his home in San Jose. The veterinarian used acupuncture as his main form of treatment for a variety of ailments. Shapiro was planning on getting his doctorate in veterinary medicine, but he found the field very competitive and decided he would rather work with people.

He will not know until after he is making the trip, scheduled for September. If he is chosen, it will leave him little time to prepare for a five-year stay in a country he doesn't know much about.

"I think my biggest problem will be learning the language—being able to read and write it well," Shapiro said. A lanky 6'2", Shapiro is also concerned that his height and full head of brown curly hair will attract unavoidable attention from small natives. "I guess I'll be quite a sight for some people," he said.

Money should not be a significant problem, he said. "The university is planning $1,500 a year and housing and light as opposed to coolness and darkness.

Mustang Daily - Dan Steinus
Two professors ponder life after Carter

Reagan presidency may bring tuition, wage cuts

BY KATHLEEN RILEY
Staff Writer

Tuition is inevitable at Cal Poly in the near future, according to two political science professors.

Dr. Allen K. Settle and David George both feel that because of the current state of the U.S. economy and the election of Ronald Reagan, colleges and universities will have to seek new ways of generating revenue — namely, tuition.

George speculated that tuition will be introduced to the California State University and Colleges system in the near future to pick up the slack from the dwindling federal budget.

"The impact of the new administration on Cal Poly students depends on how reliant they are on federal monies," said George.

George explained that most federal and state aid received by students at Poly is in the form of loans, so the Poly budget will be relatively unaffected by the budget cuts planned by the Reagan administration.

In comparison to universities in the UC system, Cal Poly gets little federal assistance, especially in the area of research. Based on his track record as governor, Ronald Reagan was not supportive of higher education or students during his term. The closure of colleges and especially the freezing of faculty salaries by two years indicated Reagan's lack of sympathy for the academic community, said George.

Both Settle and George believe Carter was ineffective as president. "The choice of Reagan as president does not mean that the country is shifting to the right," said George. "Rather, it reflects only 25 percent of the country's eligible voters' opinion." Reagan is a "traditional conservative," said Settle. He sees the Reagan administration as different from Carter's in both leadership and management style.

Reagan will focus his attention on the economy and his term will restore extensive delegation of authority. "During the first six months of the Reagan administration," Settle predicted, "there will be little dramatic change compared to the last four years."

Poly shut down to save cash

BY CREOLA MILLER
Staff Writer

During the Christmas and New Years holiday weekends, University President Warren J. Baker ordered the entire school to be closed down in order to save on utility expenses.

Some students complained that they were not allowed to get back into the dorms until the day before school started and El Corral Bookstore did not open early to allow those on campus to buy books before classes began, but Housing Director Robert Bosstrom believed the move would save worth the inconvenience to the students.

"By saving on expenses, I save the university money," said Bosstrom. By Corral Bookstore, the expenses down, keeps the dorms' students' rent down. This is the purpose of closing the dorms. "The dorms opened Sunday, January 4 at noon." Bosstrom added that on all of the dorms' publicity it stated when the dorms open and close during the quarter breaks. Bosstrom said the only time the dorms are open a week before the quarter starts is in the fall during Week of Welcome.

El Corral's Bookstore's manager Ivan Sanderson said he did not know why Dr. Baker made the decision to close down the campus during the holidays. El Corral as well as the other campus offices and departments excluding the dorms were open during the quarter break.

Sanderson said because C.A.R. has changed the University's registration procedure, in the next El Corral staff meeting, he will suggest the bookstore experiments in opening the bookstore before the first day of classes. This will enable all returning or new students to buy their books early and cut down on the jammed-packed lines in the bookstore during the first week of classes. If there are a sufficient amount of students taking advantage of this opportunity, then the system will be used on a regular basis.

The amount of students using the facilities on campus during the break seems to be the main reason why facilities are closed. According to Bosstrom money is lost when the facilities are open to serve only a few students.

Correction

In the Jan. 9 editorial "Between the lines" was incorrectly reported that the Cal Poly admissions office received 6,000 applications during the last academic year. The figure was 15,000.

_Also in the Jan. 14 story "Should King's birthday be a national holiday?" the byline was omitted. Junior journalism major and Mustang Daily staff writer Mary McAlister wrote the article.

Look! Up in the sky! It's a flying advertisement

BY LORI ANDERSON

Look up in the sky—It's a bird! It's a plane! No, it's a flying billboard!!

At football games and fairs, the lighted sign that flashes messages across the sky is a familiar sight to many.

The flying billboard is actually a grid of 300 lights under the wing of the two-meter airplane which represents Adverskies, the business venture of Jerry and Jean Bowser and Tom and Char Roback.

The Bowsers and the Robacks bought the plane, complete with light grid and computer controls for the light system, from Skycaster of Nashville, Tennessee.

The plane cost $25,000 and the couples had to borrow money to start their business, said Jean Bowser, who is husband Terry's wife, and Tom Roback, is a Poly graduate.

"We all like to fly and it seemed like a fun thing to do," said Jean.

Once the Bowsers returned to San Luis Obispo with the plane, they found they could not legally fly it. Although both the Bowsers and Tom Roback are pilots, flying regulations require the plane be flown by commercial pilot.

For this reason, the Bowsers and the Robacks hire pilots, many of whom are Cal Poly students.

The Adverskies plane is a red and white Cessna 152, which would normally seat two persons. But because of the computer, which occupies the co-pilot seat, the plane now carries only one, Jean said.

"The computer tells the light what to do," said Jean. The messages are recorded on tape and run through the computer to instruct the light grid to display the message.

The computer can be programmed for anything, so people can say whatever they want within reason, she said. Although most of the Adverskies' accounts are with commercial businesses, the Bowsers and the Robacks do encounter birthday and anniversary wishes and even proposals of marriage.

Jean said Adverskies recently delivered a message in Morro Bay which flashed, "Dear Evelyn, thanks for finding my heart, Tim Man.

She also remembers a marriage proposal flown over Laguna Lake that was successful, despite foggy weather.

The Adverskies plane is a red and white Cessna 152, partially employer-funded life and health insurance program.

All the Adverskies partners have other jobs, except Jean, who answers the Adverskies phone in the Bowser home.

The business has made a little money. Jean said, "It's been paying for itself."

At present, this Cessna 152 sits quietly in its space in the San Luis Obispo Airport. But when the call comes, the plane will be airborne, flashing a restaurant advertisement or an anniversary greeting over its 300-light sign.

At first, Jean said the company had to go out and look for accounts, but now people call Adverskies independently.

The most popular time for messages is during summer and autumn evening events. During the winter months, the company relies more on personal messages.

Adverskies rates are $40-50 for personal messages in the San Luis Obispo area. For commercial messages, like over football games, the rate is $60 for 20 minutes.

All the Adverskies partners have other jobs, except Jean, who answers the Adverskies' phone in the Bowser home.

Trinity Hall Resident Director Dave Ashby's days are filled by all the administrative work necessary to keep a dorm functioning properly. But though he has little free time, he says he enjoys the interacting with students his job requires.

Live life like a work of art, says CD prof

BY MIGUEL ORTIZ Staff Writer

If art imitates life, life imitates art. Or so Trinity Hall Resident Director Dave Ashby's days are filled by all the administrative work necessary to keep a dorm functioning properly. But though he has little free time, he says he enjoys the interacting with students his job requires.

We will be interviewing on Campus TUESDAY, JANUARY 20th.

Though he said faculty members themselves were in the best position to evaluate each other's contributions to student education, Kersten said that student representatives were often left out of the tenure review process. It was Kersten's "best guess" that student input, including student participation in the tenure review process would be more effective.

Kersten even expressed concern about how student representatives in the post-tenure review process were represented in their departments or the use of student evaluations of faculty. It was Kersten's "best guess" that student evaluations would provide the most objective input.

Huff, however, contended student participation should involve more than just written evaluations. The ASI president said the student representative approach would be more effective.

Kersten also expressed concern about how student representatives in the post-tenure review process would be selected and whether only full-time students should be able to participate. The extent of student participation in the process is "flat-out difficult" to determine, Kersten said.

Kersten also expressed concern about how student representatives in the post-tenure review process were represented in their departments or the use of student evaluations of faculty. It was Kersten's "best guess" that student evaluations would provide the most objective input.

Huff, however, contended student participation should involve more than just written evaluations. The ASI president said the student representative approach would be more effective.

the Bottom Line is VALUE
The Cal Poly women's swim team takes its first big step towards the NCAA Western Region Championships this afternoon as it hosts San Diego State in the outdoor pool at 2 p.m.

Coach Katherine Barthels says she and her team have been working hard to prepare for this meet.

"We're not looking for us right now, but they are morale building," coach Barthels said. "We are just trying to improve upon national qualifying times."

The Mustangs are fresh off a strong third place finish at the Irvine Invitational second place San Diego State. The dual meet should be an excellent test for Barthels' team, as both teams are strong in the distance strokes, according to Barthels.

Val Young will lead the distance stroke. The sophomore from Glendora earned All-American honors last year in the 500 free, and 400 individual medley and the 200 fly.

Barthels feels confident with her third straight Southern California Athletic Association (SCAA) All-American squad which makes today's meet so important.

"These strong dual meets are important to us in terms of competition and time improvement," she said. "We will not have a strong team in our conference until the league championships in late February."

Four team members have already qualified for the national meet and Barthels is hoping that several more will meet the qualification standards.

Heather Davis and Lori Berti, both co-captains, have already qualified for the national meet in the 200 breast and 50 fly respectively. Sally Baldwin, a sprinter, will meet the standard in the 50 free and Young in the 1,650 free.

**New Giant manager expected soon**

SAN FRANCISCO (AP) — The San Francisco Giants held a news conference Wednesday afternoon and were expected to announce the hiring of former All-Star outfielder Frank Robinson as their manager.

Reports in Bay Area newspapers said Giants owner Bob Lurie had decided on Robinson, and that he was discussing the possibility of the former major league managers considered for the job.

Robinson, 45, was major league player in both the National and American leagues, winning the award with the Reds in 1961 and the Baltimore Orioles in 1966.

The Giants' managing job became vacant when Lurie fired Dave Bristol, the manager since late in the 1979 season, at baseball's winter meetings last month.

Other candidates for the job included Dick Howser, Bob Lemon, Del Crandall and Gene Mauch. Howser took his name out of the running Monday.

Robinson managed Baltimore's Class AAA farm team in Rochester, N.Y., for part of the 1978 season before joining the Orioles as a coach.

Baltimore manager Earl Weaver said he is Robinson for a reason, saying that Robinson has managed in the big leagues.

"I think he has acquired a little more patience than he had in that first go-around," said Weaver. "Naturally, the older you get, the more mature you get and the better off you are going to be."

**JC tourney planned**

Approximately 25 teams will compete this Saturday in the 26th Annual Cal Poly Community College Invitational Wrestling Tournament at the university's main gym.

The competition will start at 9:30 a.m. with preliminary rounds continuing until 5 p.m. Consolation and championship finals, as well as the presentation of awards start at 7 p.m.

Claremont College of Hayward, the junior state champion, will participate in the tournament.

Chabot finished second in the Cal Poly tournament last year to College of the Sequoias. COS scored 97½ points to Chabot's 92.

Arizona Western was third with 93½ points, followed by Ventura College (69½) and Rio Hondo (64½).

The college's 118-pound winner, Al Gutierrez of Sequoias, will return this year, as well as COS's Swedish Markyv Marini and Chabot.

Two runners-up, Mike Saucedo (120) of College of the Sequoias and Kerry Hiatt (158) of Palomar College compete again in Saturday's tournament.

Palomar, COS and Chabot should be the top three contenders for the championship of the tourney, which is the largest JC tournament west of the Mississippi River.

Team registration and workshops are scheduled for Friday from 3 to 5 p.m.

**Harris team plans opener with stars**

Coach Berdy Harri's Cal Poly hockey team will play a team of Major League All-stars to start off the 1981 season, Saturday, Jan. 31, at 11 a.m. at San Jose State hockey Stadium.

The team of all-stars is being organized by San Francisco Giants outfielder Jim Wohlford.

The teams will be played the day after World Series champion San Francisco Giants season resident—hosts a golf tournament at San Luis Bay Golf Course which will also feature many Major league baseball players.

The golf tournament will benefit Ella de Rio, a school for the handicapped, in Atascadero.

Tickets for the baseball game are priced at $2 and will be available at the University Union Ticket Office and at other locations later this month.

**Mustang foes climb in rankings**

The Cal Poly men's basketball team has received national recognition as it climbs in the poll. The team is currently ranked 13th in the second week in the NCAA Division II basketball poll.

California Collegiate Athletic Association (CCAA) foes Chapman and Cal State Dominguez Hills are ranked ninth and tenth respectively.

All the teams are off to 2-0 starts in CCAA action.

NCAA Division II Poll

1. Wright State
2. Mt. St. Mary's
3. New Hampshire
4. Puget Sound
5. Indiana St.-Evans
6. Central Florida
7. Central Missouri
8. West Georgia
9. Chapman
10. Cal Poly Pomona
11. Texas A&M-Corpus Christi
12. Jacksonville State
13. Western Illinois
14. Randolph-Macon
15. Winc-Green Bay

Honorable mention: Alabama A&M, Benedict, Bloomsburg State, Bridgeport, Cal Poly Pomona, Colorado School of Mines, Humboldt State, Mansfield State, Missouri-Rolla, Missouri-St. Louis, Monmouth, Montana, Northwest Missouri, Northern Michigan, St. Joseph's, St. Michael's, Valdosta State, Virginia Union.

**Israel minister faces charges**

JERUSALEM (AP) — The Knesset stripped religious Affairs Minister Abarin Abu-Hatzeira of parliamentary immunity Tuesday, exposing him to trial on bribery charges.

The action in Israel's Parliament makes Abu-Hatzeira, a member of parliament for the Islamic Movement in Israel, the first member of parliament in the country to lose his immunity since 1952.

The vote was 63-33 with 5 abstentions and one null ballot. Eighteen members of the 120-seat Knesset did not vote, including Abu-Hatzeira himself.

The Abu-Hatzeira affair has not implicated prime minister Menachem Begin, who faces a no-confidence vote from opposition Labour members of parliament. Begin has called an early election.

The resignation of Finance Minister Yigael Hurvitz last Sunday over a teachers' pay dispute has left Begin without a majority in the 120-seat Knesset.

The Knesset was already in a stormy mood over the Cabinet crisis and the assassination Monday night of Bedouin member of parliament Sherif Hashem Abu Rahiya.

As the session on Abu-Hatzeira's immunity opened, a state radio commentator observed, "This is a day of great historic importance."

Abu-Hatzeira is accused of accepting $15,000 worth of bribes in return for funneling public funds to Jewish religious institutions.

The religious affairs minister says the charges are a political witch hunt and has called on Prime Minister Begin to resign.

The scandal has weakened the influence of Begin's senior coalition partner, the National Religious Party, of which Abu-Hatzeira is a member.

**Cal Poly swimmers set sights on national qualifying standard**

The Cal Poly men's swimming team has its first big step towards the NCAA Western Region Championships this afternoon as it hosts San Diego State in the outdoor pool at 2 p.m.

Coach Katherin Barthels is hoping for some fast times today to help the team out in an ongoing rebuilding process.

"Wins are not necessary for us right now, but they are morale building," coach Barthels said. "We are just trying to improve upon national qualifying times."

**Today in San Diego**

NCR means new large-scale computer systems and concepts.

If you welcome the stimulation inherent in creating and manipulating medium and large-scale computer systems, consider NCR Engineering & Manufacturing/San Diego.

We are an organization that generated new NCR facilities and products and then ran the marketing staff that's shipping the product way in systems and large-scale computer systems.

Multiprocessing. Data base management. Firmware engineering. Language processing. VLSI technology. Upward path engineering. In short, everywhere that creates Total System capability to meet the business needs of the 80's and 90's.

Something else you'll like. Although our products and California foothills facilities are large-scale, you'll work in small, highly visible project teams that offer uncommon program diversity. There is easy multidisciplinary team participation between projects, and wide career path options. In a word, a healthy blend of technology and a unique learning environment.

And, you'll be working in a few miles of the ocean and minutes from downtown San Diego. Learn more by scheduling an on campus interview through your Placement Office, or by writing: Mr. Hat Ostrander, NCR Corporation, Dept.CN, 16550 W. Bernardo Drive, San Diego, CA 92127.

**On-Campus Interviews: Thursday, January 29**

On-campus interviews will be held beginning at 9 a.m. at the spring campus career fair. Please let us know if you plan to attend.

Poly chases league crown on road

The Cal Poly men’s basketball team has a tough weekend to look forward to but coach Ernie Wheeler feels that his team is ready.

The Mustangs continue California Collegiate Athletic Association (CCAA) conference play on the road against Northridge and Cal State Los Angeles. The Mustangs are tied for first place in the CCAA with Chapman and Dominguez Hills with identical 2-0 conference records. Friday and Saturday’s games both begin at 8 p.m.

All three teams are listed in the NCAA Division II basketball poll with Chapman and Cal Poly both ranked No. 10 and Pomona, 78-58 at 13.7 and Northridge at 12.5 points per game. Rob McKone follows at 11.6 points per game.

Northridge is led in scoring by forward Nate Bellamy at 13.7 points per game and Mike Moses at 12.6. Los Angeles lost to Chapman, 87-69, and Dominguez Hills, 78-69. Southland is led in scoring by forward Eric Marquez at 14.1 points per game and guard Greg Hawkins at 10.4. Los Angeles is 4-0 overall and is led by forward Nate Bellamy at 13.7 points per game and Mike Moses at 12.6. Los Angeles lost to Chapman, 87-69, and Dominguez Hills, 78-69.

Coach Wheeler feels confident heading into the two contests.

“I feel that we are starting to get that solid edge back,” he said. “It will be a tough weekend for us but we could pack this gym next week if we could win these next two games and that would be exciting.”

The two games will be tough ones for the Mustangs but the season will not get any easier and coach Wheeler knows it.

“The teams in this conference are so evenly matched that the team that makes the least amount of mental mistakes will win the conference,” he said.

The Mustangs held together last weekend in wins over Riverside, 64-55, and Pomona, 73-58. Cal Poly continues to apply the pressure as it leads the Division II in defense, allowing only 54.2 points per game.

Ernie Wheeler leads the Mustangs in scoring at 12.5 points per game. Rob McLane follows at 11.6 and Kevin Lucas is at 10.8.

Senior guard Jim Schultz continues to spark the offense as he leads the team in assists with 133 for an average of 10.2 per game.

Schultz, who set last year at 257. Schultz, with 10.2 assists per game, will lead the Mustangs in a crucial conference road trip to Northridge and Cal State Los Angeles. Schultz has 133 assists this season.

Corralled Mustang Jim Schultz (center) has been inching closer to a new school assist record which he set last year at 257. Schultz, with 10.2 assists per game, will lead the Mustangs in a crucial conference road trip to Northridge and Cal State Los Angeles. Schultz has 133 assists this season.

Global 2000

Two nights ago a capacity crowd in Cal Poly's Little Theatre was served a one-dish: a vision of the world in the frighteningly near future, an estimate of the state of our planet in 20 years — when most Poly students will be just 40 — based on present levels of non-renewable resource, water and natural resource consumption.

It looks grim. The population will increase from 4 billion to 6.35 billion; oil production will be past its peak; as many as 20 percent of all plant and animal species will be extinct; vast areas of arable land will become barren wastes every year because of over-irrigation and fertilization; pollution will dramatically worsen; and starvation will be rampant.

But Global 2000, as presented by Rick Roney, executive director of the three-year project by the State Department and the Council for Environmental Quality, is no doomsday book. It's an early warning, a no-frills glimpse of what disaster we'll have made of the world and its life support system if we do nothing to alter present trends — and therein lies its optimism. We can do something.

Global 2000 offers no solutions, but Roney suggested a few basic changes in outlook that must adopted:

— A view of the world as a whole of interrelated parts; no more looking at the other guy in the same boat and telling him his end has a leak.

— A realization that the world has finite resources and that fulfillment doesn't come from accumulation of wealth.

Both, of course, express an opposite philosophy to that held by President-elect Ronald Reagan. (When asked if he knew of the report, he said he'd investigate it.) Reagan was elected because he appealed to greed — to the imaginative notion that we can have all the good we'll ever want as long as we keep up production — and because he met our fears of weakness with promises of increased defense spending.

The earth can not support such a self-centered populace. According to Roney, we must realize it's not the fittest who survive, but those who contribute most to the good of the whole. Right now, the United States contributes greatly to the destruction of that whole.

And as for national security & Roney says we must redefine the term. Right now there is the equivalent of 30,000 tons of TNT for every person on earth; a billion dollars a day and the careers of half the world's scientists are spent on increasing this ratio. But little is spent on preventing disasters as devastating as war and much more certain. Such a disaster is the destruction of the food chain. Roney pictured it a pyramid with man at its zenith. If 20 percent of the species continue our materialistic life-styles, or we can develop alternatives that will allow us to survive, but those who contribute most to the good of the whole. Right now, the United States contributes greatly to the destruction of that whole.

The escalating concern about this country's energy problem has lost sight of the basic perspective concerning our survival and growth. It's time that the energy related clubs on campus stopped slamming mud at each other and concentrated their energy on the problem at hand.

The cycle of existence is rather simple. We begin in the stone ages with sticks and stones for tools. Through the need for more efficient means of transportation, food, shelter, and other needs, we have developed better ways to accomplish these goals.

Without the great entrepreneurs that have built this country to its present state, we would still be back without the wheel! They have developed this country with a common goal, to use the energy available or create a means to produce the energy that is required. The members of the Students for Adequate Energy Club are aware of this basic philosophy. This club promotes all types of energy sources without discounting any particular one. On the other hand, students such as Steve Jones will devote their lives to the philosophy that no energy is good energy. He supports putting this country into reverse and stop all progress. Steve, the article of Dec. 3 is filled with more degrading verbs than facts. It's clear that Steve is one of the few who is not looking down another's attempt to solve our energy deficiency and run an around finding places that energy is being wasted. The Alternate Energy Club has not proposed any alternatives to oil or nuclear power. All they have feebly agreed on is that energy is being wasted. The members should quit pointing fingers and realize that the answer to the source of wasting fuel lies in the mirror.

Maybe all of the anti-nuclear chickens quit peeking and scratching in the dirt and laid a better egg, we could hatch a superior solution to this crisis and end the frowning of others for their ideas, the scrabbling of the facts, the poaching of nuclear engineers, and only then could we get to the yolk of the problem.

Lennon reviews 'awful

Over the last month, since the tragic death of John Lennon, I have heard numerous eulogies and statements made about the man. Some were well said, a few were "right on" and many sentimental as they were said because something had to be said out of social pressure. However, reading both the record review of the Lennon album "Double Fantasy" and the "Tribute to John Lennon," I felt compelled to make some kind of comment.

First of all, the record review was awful. It was nothing but a naive personal opinion of a record which did not satisfy Jim Mayer. Not one word of support for any of his statements was made in the article, not one reference to any lyric in the song except by Yoko's "Kiss, Kiss, Kiss," in which he implies that Japanese organic sounds are not very pleasing to him, and less pleasing in "Blire Japanese." Without getting involved in a critique of the record here, I must say Jim Mayer's attitude as expressed in his review sounds extremely eulogistic. He spent more space on periphery information such as mentioning Goffen Records than he did on the actual content of the music.

The opinion piece "Tribute to John Lennon" was much better, perhaps because it was at least not so negative. Yet, both of the pieces seemed to miss the point. John Lennon was an artist. Although academia tends to exist partially through its exercise of criticism and analysis, art stands above, alone and beyond the confines of a man's work. Was John Lennon an artist whether or not anyone particularly liked or dis liked what he produced. I believe "Double Fantasy" sold so well because fans longed to hear Lennon's beautiful voice—a voice perfect for the medium of rock 'n roll which he used. They longed for the feeling, sensitivity and openness for which Lennon was known. This is just as present, if not more so, in "Double Fantasy" as Magical Tour." And, to Yoko and her songs and her influence out the window is to completely misunderstand John Lennon as a person and artist.

John Lennon was much more than an ex-Beatle and a rock 'n roll star. He was a dedicated, sensitive, talented person. Too bad this was completely missed in the many articles and eulogies about the man, and too bad the Mustang Daily pieces simply followed the poor understanding. That is sad because if he was not understood, how can what he was saying be appreciated. I wonder.
