Toxic wastes pile up on Poly campus

BY MIKE CARROLL

Efforts are under way to streamline the way Cal Poly disposes of its toxic wastes—including the half-ton of chemicals accumulated annually by the chemistry department—through the establishment of a single waste storage site on campus.

Cal Poly environmental health and occupational safety officer Donald Van Acker called toxic waste disposal a problem of "great magnitude." He said his office is conducting a campus-wide survey of hazardous chemicals to determine the type of disposal site into the university requires.

Another toxic waste disposal problem that affects Cal Poly is polychlorinated biphenyls, or PCBs. Van Acker said, he indicated the substance was contained in many of the electrical transformers on campus.

"It took an incredible amount of work to reach the best interests of the student body," Wilson said. "They wanted to meet the spirit and letter of the law."

Wilson is also convinced the new Academic senate chair fears

New general ed won't be fully implemented til '83

BY DAVE BRACKNEY

Cal Poly's new General Education and Breadth requirements will not be permanently implemented until 1983, Malcolm Wilson, associate dean of undergraduate and graduate studies, said.

Economics professor Dr. Tim Kersten asked for $153,405,900 to finance faculty raises, because salaries have not kept up with inflation.

Brown's proposal cut involves faculty salaries and fringe benefits. The trustees originally asked for $153,405,900 to finance faculty raises, because salaries have not kept up with inflation.

Reagan claims anger Kremlin

MOSCOW (AP) — The Soviet Union has been severe­ly stung by Reagan administration claims that the Kremlin is in league with international terrorists and has struck back angrily at what it calls an "anti-Soviet campaign" in the United States.

Senior Western diplomats here said Monday that Soviet officials have dispensed with any idea they might have had about extending a "honeymoon period" to the new foreign policy team in Washington. The diplomats predicted virtually every American charge against Moscow will be rebutted.

A special statement issued Monday by the Soviet state news agency Tass said "any allegations about the Soviet Union's involvement in terrorist activities represent a gross and malicious deception. They cannot but cause feelings of indignation and legitimate protest in the Soviet people."

The statement began, "Soviet leading circles have taken note of a new anti-Soviet hostile campaign being unfolded in the United States." This indicated the statement was approved at the highest official levels.

A senior Western European envoy said the Tass com­ment "goes beyond the level of ordinary propaganda, and is a very serious thing."

The news agency statement was a partial response to last Wednesday's allegation by Secretary of State George Shultz that the Kremlin is engineering a reduction in the media's inordinate obsession with him.

"Nothing in the law or the Constitution authorizes the Department of Education to be National School Teacher, National School Superintendent or National School Board," Bell said in announcing that the propos­ed rules would be thrown out.

Bilingual education plans axed

WASHINGTON (AP) — Education Secretary T.H. Bell on Monday scrambled the Carter administration's controversial bilingual education proposals that would have required the nation's schools to teach youngsters their native language along with instruction in English.

He said the rules proposed by his predecessor, Shirley C. Hufstedler, were "harsh, inflexible, burdensome, un­workable and incredibly costly."

The rules Mrs. Hufstedler proposed last Aug. 5 never took effect because Congress blocked her from making them final.

The rules would have mandated that children with limited or no ability to speak English be taught basic courses — such as reading, math and science — in their native language along with instruction in English.

Press controls recommended

SAN FRANCISCO (AP) — President Reagan should restrict press coverage of the White House and manipulate the media for his own benefit, according to a report by a conservative "think tank" group which links two of Reagan's top associates.

In a soon-to-be published manuscript titled "Politics and the Oval Office," the Institute for Contemporary Studies calls on the president to "use different media for the purposes they can best accomplish" and says that "... a chief executive would probably profit from engineering a reduction in the media's inordinate obsession with him."

"Then he should work to reshape the character of the coverage remaining," the institute was founded in 1972 by members of then California Gov. Ronald Reagan's associates, including Edwin Meese III, now one of the president's top advisors. Also on the institute's board of directors is Secretary of Defense Caspar Weinberger.

The new manuscript deals with presidential relation­ships with congress, the federal bureaucracy and the media. The chapter on the press, titled "The Imperial Media," was written by Robert M. Entman, assistant professor of Public Policy Studies at Duke University in North Carolina, writing under the pen name William Meese.

The chapter, according to a copy released to the press, states that media "respond to incentives" and that the president "can't afford to ignore the media or even to underestimate their power."

Correction

WASHINGTON (AP) — William P. Clark, nominated for the No. 2 position at the State Department, was questioned sharply by Senate Democrats on Monday because of his acknowledged lack of foreign policy training.

Sen. Clinse Bell, D-Del., said at the Senate Foreign Relations Committee confirmation hearing that Clark is "being put in a position for which he is not qualified.

"This is the president's wish apparently," Pell said. "I'm puzzled by it. I just wish you well."

Other Democrats pressed Clark to name various foreign leaders, outline developments in Brazil and the British Labor Party, and state the basic purpose of U.S. foreign policy.

Clark, nominated to be deputy secretary of state, regaled to most of the questions that he simply did not know the answers but gave the basic purpose of U.S. foreign policy in three words: "peace through strength.

Editor's note:

Recently Mustang Daily reporter Rose Ann Wentz met with former university president Dr. Robert E. Kennedy at his Avila Beach home. Cal Poly's new library is named after Kennedy, who retired in 1979 after 40 years at the school.

Daily: The new Robert E. Kennedy Library is open for business on the Cal Poly campus. How do you feel about having the library named after you?

Kennedy: I feel highly honored, of course.

Daily: Is it unusual to name such an important new state building in honor of someone who is still living?

Kennedy: Unusual, yes, but not without precedent. The library at San Diego State University—my alma mater—is named in honor of Dr. Malcolm Love, retired president, who is also still alive.

Daily: Why did the trustees name the library in your honor?

Kennedy: I'm probably not the best authority in attempting to answer that question. In fact, I was probably the last person to learn of the trustees' action. I didn't hear even a rumor about it until it was announced by the Chairman of the Board of Trustees, Roy Brophy, at the ground-breaking ceremony held on the campus at the site of the new library on St. Patrick's Day, March 17, 1978.

Daily: When you must have heard subsequently what prompted the board of trustees to take the action, or maybe you just have some theories about the reason.

Kennedy: Yes. I learned at the ground-breaking ceremony after Mr. Brophy's announcement that one of the key factors was the recommendation of certain faculty, staff, and student groups. I was most impressed to learn, for example, that the academic senate had been the reason to the trustees requesting that the library be named in my honor as a result of the leadership I had provided in obtaining the state appropriation from the legislature and the governor at a time when the state had practically stopped all appropriations for further buildings on state college and university campuses, because of the general down-turn in enrollment at campus throughout the state.

Daily: Can you tell me what is meant by "leadership" in the context of getting financing from the legislature and the governor?

Kennedy: I doubt that the Mustang Daily has enough space in one edition to cover all the planning, strategies, campaign organization, and coordination of actions taken to influence both the governor and the legislature. From my very earliest days on the Cal Poly campus I have been involved in the process of providing information to members of the state legislature, the Department of Finance, and the governor's office. The experience of working with such state agencies gave me a first-hand knowledge of what kinds of information, presented by what individuals or groups, would have the most telling effect in presenting our very great need for a new library. Our campaign involved the student body, the faculty, the alumni and other key groups, such as organized labor. The assistance of important state leaders of organized labor on our behalf was, without question, helpful in changing Governor Brown's prior state position of being against any capital outlay for any campus in the CSUC or UC system.

Daily: What was the purpose of your receiving office space in the new library?

Kennedy: It is a privilege which comes with being named president emeritus. One of the board of trustee's policies is to provide office space for those with such honorary titles.

Daily: What will you use the office for?

Kennedy: I plan to organize the papers I have accumulated in 40 years at Cal Poly into some type of classification. There are a large number of file folders, and I am sorting through them for archives (department of the library).

I do not plan on acting as an editor. I will give all the material to archives and I assume they will keep that (which is of historical value). I am adding small notes in the publications and such to let them know what to look for in relation to Cal Poly.

Daily: Will you be spending much time in your office?

Kennedy: Well, I have mixed feelings about having an office. I knew some faculty members would object. I don't think I could get anything done due to the location and visibility of the office. With "President Emeritus" written in black on the wall, and with the windows, anyone will be able to see me. Since I have many friends and acquaintances on the campus, I expect they would be often dropping in to shoot the breeze. What they told me I would have an office. I said, find me a hole in the wall where no one will know where I am. I can just see people standing outside off the office, looking in. (He laughs.) I want to emphasize that I have made no commitment to write a history of Cal Poly, as rumor has it. If I were to, I would be writing disparagingly. It would be a record of 40 years of experiences mixed with history.

Daily: I understand you were recently selected as the "honored guest" for this year's Poly Royal. Have you accepted?

Kennedy: Yes, I have, and I am very honored. I know better than most people that the honor doesn't come to everyone.

Daily: Have you been asked to speak at Poly Royal?

Kennedy: (Laughing) I don't know if there is a place to speak (for the honored guest) but if I am asked I'll surely give a presentation.

Black History Month programs slated

BY RUSSELL SPENCER

Staff Writer

In an effort to heighten student awareness of the struggle blacks have faced in the past 300 years, the United Black Student Awareness Council will present Black History Month Feb. 3-28. "It's an opportunity for the entire campus to come and learn, and for blacks to take pride in themselves and their history," says George Carter, president of USBAC.

The program will begin Feb. 3 with a bake sale in the U.U. Plaza, continuing Feb. 9-14, when art pieces from the 18th Dynasty of Egypt will be displayed in the U.U. Art Gallery. Carter says the exhibition's main purpose is to show how a black pharaoh took power in Egypt and spread "peace, love, and the belief in one God throughout Northeast Africa." A gospel program featuring local choirs will be held next in Chumash Auditorium on Feb. 19. Followed by Cultural Awareness Seminar Feb. 21 in the Mustang Lounge. The program will end Feb. 28 with a fashion show in Mustang Lounge.

Carter hopes the program will bring more unity to Cal Poly's black community. "Without communication, there is nothing," he says, "and with a common goal and a mutual effort, we can bring the benefits of communication and unity." We are migrating back to Africa spiritually and emotionally, to hold on in America to our African past," Carter says.

By Mark Lawler

OH MAN, I THOUGHT IT LOOKED FAMILIAR.

Former president talks on new library, new office
...school, 3 percent were seeking jobs and 5 percent were involved in other activities like the military or working part-time. Equinoa said Cal Poly has one of the highest job placement records for graduates in the state system. "The school commands a lot of attention from employers." Employers have recruiting programs at Cal Poly to enable them to better view future employees. Even if money is short for recruiting purposes, employers will always come to Cal Poly, he said. Graduates in the technical fields like science and computer science are the most sought after by employers; however, graduates in the humanities are also successful.

Equinoa believes that in the future there will still be emphasis on college degrees because of intense competition for jobs. Employers will always want the best qualified. Some students also agree with the opinions of Equinoa and employers. Cheryl Bricker, a sophomore majoring in industrial technology said, "With a bachelor's degree, there is a wide open field for women."

Diane Estep, a junior in home economics said, "A college degree will help because I want to be a dietician and it is a very competitive field.

Phil Danko, an industrial engineering major, said, "I really think it will help. It will get me a better-paying job and help me move up in my field. And a degree from Cal Poly will especially help."

**Oversea forms due**

**BY CREOLA MILLER Staff Writer**

Applications are due Feb. 9 for students interested in studying abroad with the California State Universities and Colleges International Program. CSUC-founded the International Program in 1963. Currently there are 53 students studying abroad in Denmark, Taiwan, Germany, Italy, Sweden, France and Spain. Last year, the largest number of students abroad were from Cal Poly.

Students who apply must have 2.5 or better grade point average to be eligible. Some countries have other requirements. Applicants for Spain must speak fluent Spanish. Germany and France require that students have two years of their languages on the college level, said Dr. Glaser.

Those applying must be juniors, seniors or graduate students, and are expected to live in the country for one year. A wide variety of majors are offered with special programs. New Zealand offers special programs in agriculture. In Denmark and Italy, programs in architecture are taught and international business is offered in Denmark, Taiwan, Mexico, Brazil and the United Kingdom.

Glaser said the higher one's grade point average, the better the chances are for being accepted into the program. However, the students are responsible for their own financial affairs.

"It's just like when you are in high school at Cal Poly," said Dr. Glaser. "If you have financial aid or loans here, then it will be provided for you when you are over in one of the foreign countries. It is the student's responsibility."

Generally, 50 percent of the students are on financial aid to make the best out of their year. Annual costs range from $3,525 for Mexico to $8,475 for Denmark.

Van Acker noted the transformers remain in storage on campus because the Environmental Protection Agency has not yet approved a disposal process for the devices.

Prof authors biomechanics book

A new textbook on biomechanics by a Cal Poly associate professor has been released by a Minnesota-based publishing firm.

Physical Education Department faculty member Dr. Katherine M. Barthels is co-author of the book, Biomechanics: A Qualitative Approach for Studying Human Movement, which was released in early January by Burgess Publishing Co., Minneapolis.

Dr. James H. Nash, director of Cal Poly's Health Center.

BY KATIE SOWLE
Staff Writer

Where could you exchange half a liter of blood for a Big Mac? Chumash Auditorium, for one place.

As donors and gave blood received a receipt which entitled them to a free Big Mac. This was not the only sentiment which put the donors in a giving vein. As Doctor James Nash, head of the Health Center said, "What nicer thing can you do for a person than give the blood of life?"

The Tri-County Blood Bank has been conducting the Cal Poly Blood Drive on a quarterly basis, for the last three years. "We used to only do it once a year," Nash said, "but we get just as many people each quarter now as we did in the whole year before."

The average number of donors is 200, though Nash estimates they could get 1,000 with just a little advertising. However, 200 is enough since the blood must be driven down to Santa Barbara, and whole blood stays fresh for only 30 days.

Nash said that although many people are afraid to give blood the first time, they usually find it easy and painless, and come back again and again. "The idea of blood turns most people off, but after they give they say, 'Why didn't I do this before?'" The procedure used is very simple. After some general questions on the donor's health, blood pressure, pulse and a blood sample were taken.

While the donors rested on padded tables, the nurses conducted their jobs in a light mood, to calm the squeamish who had never given before. Amid the standard vampire jokes, they gently extracted the blood with only slight, initial pain from the needle.

The day passed with a steady trickle of people offering blood, though nurse Myra Howard reported that the accepted donors, numbering 130, were very few. "Colds and this rainy weather must be keeping people in," she said.

Howard dispelled many myths of the dangers of blood donating. "There is a little light-headedness, rarely any fainting," she said. "And what problems there seem to be are 99 percent psychological."

The Blood Drive will not be held again as Cal Poly until next quarter. However, the Tri-County Blood Bank is accepting deposits from 1:00 to 6:00 p.m. Monday thru Friday at 1250 Peach Street.

BSEE's,

MSEE's, Physicists, Materials Scientists, Scientific Generalists, Chemical Engineers and Computer Engineers:

Intersil's a big semiconductor and systems manufacturer that hasn't forgotten how to be small. We're looking for engineering graduates who have big ideas and would like to start in a small team environment. You'll find it at Intersil.

We don't want to hire a pool of engineers and assign them to do routine tasks; we are constantly pushing at the state-of-the-art in semiconductor products and in processes. And we're designing smaller memory systems to do the work of bigger memory systems.

Architecture students elected to national society

BY KATIE SOWLE  
Staff Writer

Enthusiasm and involvement are the keys to success in extracurricular activities, according to architecture students Andy Derr, Dennis Potts and Lane Borges, who have been elected to regional posts in a national architecture society.

Derr, president of the Cal Poly Association of Student Chapters of the American Institute of Architects, said that in a minority of such diversity, students should get more involved.

“We get so secluded here at Cal Poly,” Derr said, “that we don’t even know what’s happening downtown. There’s so much going on out there in the world.”

For Derr, Potts and Borges, getting involved meant taking on responsibility and challenging a regional office in ASC/AIA.

At the annual Architectural Student Convention last Thanksgiving, Potts was a vice president of the local chapter, was elected as regional director for California.

Borges was elected assistant regional director, and Potts, now the secretary, will soon be regional correspondent. They will all take office July 1.

The three students attended the convention in Philadelphia using money raised through the Cal Poly chapter.

The campus ASC/AIA chapter has stayed active for all of its 29 years. It is one of the oldest clubs at Cal Poly and 25 percent of its 110 members are seniors.

Though the main emphasis of the club is to prepare members for professional careers, Derr describes it as “a little more than just a club. It’s not just how to make a buck.”

Three officers elected from the same school is unusual procedure for the ASC, but an exception was made for the Cal Poly group.

“We stressed the importance in communication this would produce,” Borges explained. “SLC is such a large university and when there is more to learn in ASC than any class could cover, the lighter load will be worth it.”

In addition to elections and committee work, there were seven member trips to Philadelphia, and an honorary mention came to the Cal Poly chapter for its participation in an architectural project.

New service helping students

A new service designed to benefit local businesses while assisting university students halfway through their educational goals has been instituted by Cal Poly's Placement Center. Known as the Work Experience Program, it was established last fall to enhance students' development by placing them in selected, career-related work settings.

Nine students are presently participating in the program. They are working as office assistants, computer programmers, and quality control supervisors with such employers as IBM, Perky and Ring Inc. and the California Man's Colony.

Pam Sumner, co-chair of the new Cal Poly program, said the work experiences come at the end of part-time summer jobs that provide students with opportunities to gain valuable experience, learn responsibility in a work setting, and examine their career goals on a daily basis.

Work schedules and length of employment of university students in the Work Experience Program depend on the individual needs of the employing organization and students' availability.

“During the academic year a student's study schedule changes quarterly, so an ideal job arrangement would involve 10 to 20 hours of work per week for approximately 10 weeks,” she continued.

Representatives of local businesses, industries, governments, and service agencies interested in learning more about the program can do so by contacting Pam Sumner at 546-2501 or writing to her at Placement Center, Cal Poly, San Luis Obispo, Calif. 93407.

The new HP-41C has more than any handheld calculator HP has ever offered. More capability, flexibility, ease-of-use features and options. Mustang women claim third straight hoop win

BY VERN AHRENDES
Sports Editor

It has been a year since a Cal Poly women's basketball team has won three games in a row but the Mustangs, under coach Marilyn McNeil, have pieced together a modest three-game winning streak.

The Mustangs, behind a school-record-tying performance by Laura Buchning, improved their overall record to 8-13 and evened their Southern California Athletic Association record to 3-3 with a nonconference win over Pepperdine, 63-55, and SCAA rival Santa Barbara, 64-63. Poly is now in a three-way tie for second in the SCAA with Santa Barbara and Los Angeles.

Both wins avenged early-season losses as Pepperdine had handled the Mustangs, 94-68, and Santa Barbara had claimed a seven-point, 74-67, win over Poly at the Davis Tournament.

“Laura had her finest game that I have ever seen her play,” said coach McNeil. “Santa Barbara was trying to double-team Laura but they were doing a poor job of it. Laura had the run of the floor and she took advantage of it.”

Rose picked up the badly needed slack as both Crandall and Finney were in foul trouble. Rose hauled in 16 rebounds, scored nine points and added five steals.

The Mustangs had to fight an uphill battle to knock off Santa Barbara. The Gauchos jumped all over Poly in the first ten minutes of the first half. Santa Barbara surged out to a 30-18 lead as Poly could not buy a basket.

Buchning took Poly by the reins and buried her 12th three-pointer enroute to a 36-32 halftime lead. Against Santa Barbara, Buchning and Sherri Rose minutes were in the center stage. Buchning drove the lane and pulled up from the perimeter enroute to a 36-point night which tied her one-week-old single-game scoring record.

Virginia grabs number one spot in AP basketball poll

Virginia grabbed sole possession of the No. 1 position in The Associated Press college basketball poll Monday, edging Oregon State by a mere 10 points in a one-week tie between the two teams.

Virginia collected 35 first-place votes and 1,212 of a possible 1,240 points from a nationwide panel of sports writers and broadcasters. Oregon State, which had held the No. 1 slot for two weeks by itself and shared it another, was tabbed No. 1 on 26 ballots last week. All 62 poll members voted this week.

The Cavaliers of Virginia downed then-No. 6 Wake Forest, 85-73 and whipped Duke 68-47 last week in raising their record to 18-0.

The Beavers, 17-0, defeated then-No. 10 UCLA 81-77 and nipped Southern Cal 55-48 last week.

Depaul, Louisiana State and Arizona State retained the Nos. 2 through 5 positions, respectively.

The Blue Demons collected 1,095 points after ekking out a 54-50 victory over Illinois State and bombarding Syracuse 91-60 before a national television audience Sunday. The Tigers, who got the final first-place vote and 1,076 points, defeated Mississippi and Florida last week.

The Sun Devils, with 944 points, crushed Stanford 84-66 in their only game last week.

Kentucky, Utah and Wake Forest waged a close fight for the next three positions. The Wildcats moved up a notch to No. 6 with 830 points following victories over Mississippi State and an overtime triumph over a tough Georgia team.

The Utes, who edged out No. 15 Brigham Young, 69-56 last week, jumped two spots and are seventh this week with 812 points-six more than Wake Forest.

Notre Dame and Tennessee rounded out the Top 10. The Irish, who slipped a notch despite wins over Cornell and South Carolina, got 770 points. The Volunteers, victors over Georgia and Alabama, had 657 points.

North Carolina headed the Second 10. UCLA was 12th followed by Maryland, Michigan, Iowa, Brigham Young, Indiana, Illinois, Wichita State and South Alabama.

Last week the Second 10 were Tennessee, North Carolina, Iowa, Maryland, Brigham Young, South Alabama, Michigan, Kansas, Minnesota and Connecticut.

Indiana and Illinois returned to the Top 20 this week, while Wichita State is making its first ap-
Forward McKone ignites Poly non-conference basketball win

BY VERN AHRENDES
Sports Editor
The missing link of the Cal Poly men's basketball team has reemerged and just in time.

Senior forward Rob McKone exploded out of an extended slump to lead the Mustangs to a non-conference win over visiting Hayward State Saturday night, 85-68.

McKone, a business administration major from Fair Oaks, shot a torrid 10-for-12 from the floor and added a perfect 4-for-4 night from the free throw line for a game-high 24 points.

The offensive outburst was a welcome sight to coach Ernie Wheeler, who said, "We have been working with Rob on getting his shot up with a little more arch. He did that tonight."

The hard work proved beneficial as McKone nailed 5-of-6 on his patented rainbow shots from the perimeter. Three of those bombs came in the first five minutes as Poly jumped out to a 19-7 lead.

Poly took command of the game from the opening gun as the Mustangs came out of the shoot out shooting Hayward State, 9-2, used by senior guard Chris Thomas.

Wheeler finished the night with 18 points in limited action. Wheeler kept a perfect shooting streak alive for 29 minutes against Hayward. Wheeler buried his first five field goal attempts of the game before missing on an 18-foot midrange shot with 10:45 left on the game clock.

The Mustangs, 15-4 overall, return home Feb. 6 and 7 to host CCAA foes Cal State Northridge and Cal State Los Angeles and Cal State Northridge.

Buenhning scores 59 as Poly sweeps two

From page 7

Polled reserves Keith Wheeler and Chris Thomas dropped off, he has been a stabilizing force on the boards and at the free throw line. McKone has been averaging more than five rebounds a game and 84 percent at the charity stripe.

"Rob's knees have been bothering him lately and he just needed a little rest," Wheeler said. "We have been working with Rob on getting his shot up with a little more arch. He did that tonight."

The Mustangs set their sight on Dominguez Hills and Cal State Los Angeles for a showdown for the CCAA conference lead. Coach Wheeler plans on keeping practices short this week before leaving Thursday for Southern California.

The Mustangs, 15-4 overall, return home Feb. 6 and 7 to host CCAA foes Cal State Los Angeles and Cal State Northridge.

The Cal Poly swim team upended Fresno State, 78-35, as Pat O'Mears finished second in the one-meter diving.

Other individual winners for the Mustangs were Peters in the 200 free with a 1:46.7 timing. Glenn Perry in the 200 fly by a margin of 4.1 seconds.

With Scott, the Mustangs have qualified six for the national meet.
The Cal Poly women's swim team opened its 1981 season in high gear Saturday at Poly Field as they outlasted a team of Major League stars by the score of 2-0. The Mustangs broke a scoreless tie in the bottom of the fourth inning as Bill White doubled home Paul Hiertzer who had walked to open up the inning. Tim Traynham then sacrificed Eric Peyton home making the score 2-0.

"Of course we were in better shape than they were," commented Harv, "By that I mean, we were better prepared for the game."

The most notable among the mission for the Major League stars was Jack Clark, who had to return home. "What a disappointment," complained Giant fan Bill Strzelecki, "He's the main attraction for this game."

The seven inning exhibition lift was originally scheduled to be played at San Luis Obispo Stadium, but was moved to Poly Field as a result of poor drainage at the original site.

The Mustangs will be in action next weekend as they take on two alumni teams on Saturday, the Mustangs will play a double header at noon against their baseball alumni. On Sunday at 1 p.m. the Mustangs will entertain a team of Cal Poly pro alumni.

Slated to appear for Sunday's game is Ozzie Smith, record-setting shortstop for the San Diego Padres. Both games will be played at the Luis Obispo Stadium.
Arizona State flexed its muscle in the upper division weight classes to bury the Cal Poly Mustang Wrestling team, 27-14.

Arizona State picked up wins in three of the last four weight classes to hand the Mustangs their fifth straight dual meet loss.

Cal Poly trailed Arizona State, 11-10, after the first three bouts but it battled back to knot the score at 11-11 behind three straight wins by Jeff Barkdale, Louis Montano and Craig Troxler.

Wayne Christian was the lone Mustang to claim a win after the 158-pound bout. Christian, a 190-pounder, decisioned Mike Sevem, 8-3, to earn the win.

Troxler defeated Chris Bollino, 4-3, Monday, and decisioned Bobby Williams, 18-3, and Bryan Oakley, 11-4, before losing to tough Joe Solorio for Poly’s wins.

The Cal Poly men’s swim team upped its dual meet record to 6-0 as it buried Fresno State, 78-35. Sophomore Glenn Perry picked up an individual win in the 200-yard butterfly and finished second in the 200 individual medley by judges’ decision.

"We have the technology, the products, and the resources to maintain our leadership position."

The semiconductor industry is the heart of a technological revolution that promises fundamental changes in the way we work and live. Fairchild is committed to a leadership position in the development of products and processes that will make that promise a reality.

You can help determine the direction. Fairchild offers outstanding career opportunities for Electrical Engineers in the following areas: Integrated Circuit Design; Process—Fabrication of Semiconductor Devices; Product Engineer—Coordination, Design through Manufacturing; Reliability and Quality Assurance; and Product Marketing.

THE SEMICONDUCTOR PRODUCTS GROUP will be conducting campus interviews on the date shown below. Please contact your placement office for an appointment or for further information.

February 10th and 11th

Doug Beubein
Product Engineering Manager, Bipolar LSI
Mountain View, California
B.S.E.E., UC Santa Barbara, 1970
M.S.E.E., UC Santa Barbara, 1972
M.B.A., UCLA, 1974

Fairchild is proud of its record as an affirmative action employer and we encourage women, members of minority groups, and handicapped to apply.
Problem-Solving

The management style of Public Service Company of New Mexico

Providing electrical energy to a growing New Mexico in a climate of changing social priorities and new technologies demands the most of PNM's employees. But providing innovative solutions to complex problems is what we are all about.

To do that, we need:
- BS/MS Engineers: EE, ME, ChE, IE
- BBA: Business Systems Analysis
- BS/MS Computer Science
- Technicians: EE/ME Options

Representatives of Public Service Company of New Mexico will be on campus February 5 and 6.

If you want to become part of a company nationally known as a creative leader in the utility industry, sign up at the placement office.

Staff Writer

The graphic communications department has received more than $1 million in donations of new and used equipment over the past ten years, said the acting department head.

Guy Thomas said the high-cost program receives tremendous support from graphic communication and related industries as well as from its graduates.

He said in the past three months the department has received $200,000-300,000 in donated equipment.

The most recent addition to the department is a two computer typesetting system valued at $89,000. In the past, the graphics department has received such gifts as 2 foil stamping presses and various printing presses.

The department receives donations of equipment, funds and supplies from corporations and companies nationwide.

When an industry is modifying or updating its own equipment, it donates what it can. "Our needs are known," said Thomas, "We make them known and where the people from industry can help us, they do."

"We depend a great deal on support," he said. A new printing press could cost as much as $500,000. "This type of funding is not available in the budget," said Thomas.

"We are one department in 52," he said. By the time the state money is filtered down to the department, it is minimal.

The graphic communications department has about $4 million in equipment and about half of that is donated.

The industry donations allow for continuation of the strong hands-on approach at Cal Poly; and in turn the school provides the industry with well-educated graduates.

"It's donating into a program that is going to enrich education," said Thomas. The industries share in both the expense and the success.

The department maintains contact with various companies through seminars, visits, phone calls and other industry-related activities.

Thomas said, "We are constantly looking for leaders in industry.

I think the department has been active in recruiting and donating," said Thomas. There is a need to develop resources other than the state, he said.

"I think Dr. Baker is alluding to that very strongly," said Thomas.

The Cal Poly graphic communications department is the only one of its type in the California State University and College system. It is the third largest in the United States and the most renowned west of the Mississippi, said Thomas.

If success can be measured by graduate performance and the employment interest of the industry, the graphic communications department has had a 216 percent increase in the number of on-campus interviews in the past five years.

Galáctico

Applications for the University Union Galáctico are now being accepted for the 1981-82 academic year. Amateur and professional, as well as local and international exhibition applications will be accepted through March 6. For more information and application forms contact the Information Desk in the University Union.

Poultry Club

The monthly meeting of the Poultry Club will be at 7 p.m. Feb. 5 at the Poultry Unit. Internships will be discussed.

Student Relations

A new committee to increase communication and awareness between ASI organizations and the student body is being formed. Anyone interested in working on the Student Relations Council can come to the meeting at 5 p.m. Feb. 2 in Room 216 of the University Union.

Energy Conservation

Santa Lucia dormitory is presenting Energy Conservation. Some University dormitories.

All residents are invited to join in the fun Feb. 2-5.

Frawls T-shirts

hit bookstore

Last October an article appeared in the Daily on cartoonist Mark Lawler and the "limited edition" Frawls T-shirts which he was producing at the time. The "limited edition" is no longer, but don't fret, a second wave of T-shirts has hit the bookstore. According to Lawler, the 140 new T-shirts in two colors, tan and light blue, are presently available to the vast shirt-less Cal Poly populous.

The last article came out on Wednesday, and by Friday of the same week the bookstore was sold out. So if you haven't bolted out of class in a hurry for the bookstore after reading this far—you may still have a chance if you RUN after class!

AMA

American Marketing Association of Cal Poly will meet at a Marketing Panel Seminar from noon until 1 p.m. in Chumash Auditorium Feb. 9. AMA members can then meet with the Panel at the a luncheon at Vista Grande from 1-2:30 p.m. Admis­sion is $2.50 and tickets will be on sale in the lobby of the Business Administration and Educa­tion Building this week.

Senators needed

Any Agriculture and Natural Resources students interested in serving as ASI student senator for the remainder of the year can contact Steve McAmbers at 544-2421.

German

Students and faculty interested in practicing conversational German skills are invited to bring German lunch on Tuesdays at noon to the Sandwich Plant to speak German.

Weight Loss

A weight reduction workshop sponsored by the Health Center will be at 7:30 p.m. tonight in Sequoia Hall. Admission is free.

Veggie Potluck

Everyone is welcome to attend a potluck sponsored by the Holistic Health Club at 6:30 p.m. in the Meadow Park Recreation Room in San Luis Obispo. Each person is asked to bring a hot or cold dish for six or fewer and their own place setting.

Sailing Club

The Sailing Club will meet at 8 p.m. Feb. 4 in Room E-47 of the Science Building to discuss the annual cruise, outings and racing.

Racquetball Club

A general meeting of the Racquetball Club will be at 6 p.m. Feb. 3 in Room 216 of the University Union. Everyone is welcome.

Pete Barbotti

Jazz pianos by Pete Bar­botti will be at 8 p.m. Feb. 3 in Chumash Auditorium. Student tickets are $3 in advance, $4 at the door. Admission for the general public is $5 in advance, $6 at the door.
The senate chairman said if Brown’s proposed budget, including the reductions, were approved in the legislature, the CSUC must face the loss of financing for other limiting enrollment to the system, imposing tuition or reducing the quality of education by trying to maintain existing programs and allowing continued growth on less money.

As it is now, said Kersten, every qualified student is placed somewhere within the CSUC system. But if additional money is allowed for faculty and facilities, the criteria for admission might have to be reevaluated and students would be turned away, he said.

Imposing tuition would be one way to make up for the lost revenue, said Kersten, but he believes this would go against the purpose of the CSUC system. Kersten said he hopes the legislature is aware of the problems presented in the CSUC by Brown’s budget. He said if the budget hearings three points would be raised vigorously by administration and faculty representatives.

Lecture on sexual equality scheduled

“The Illusion of Inclusion: The Search for Equality in an Unequal World” will be the theme when Jeffrey Stetson delivers an Arts and Humanities Series lecture on Thursday, Feb. 5.

Scheduled for 11 a.m. in Room 220 of the Julian A. McPhee University Union, the lecture will be second in the series. Admission will be free and the public is invited.

Stetson, who is affirmative action director for the California State University and Colleges system, is expected to review some of the political, social, and organizational assumptions underlying the concepts of liberty and happiness within the context of American society.

He will also analyze the social and human cost associated with maintaining and perpetuating the myth of white male superiority, and the negative effects the myth has on those who are continually forced to respond to it.

Kersten, director of affirmative action and equal opportunity at University of Lowell (Mass.) and coordinator for affirmative action for the Massachusetts State College System, has served on a number of state and national organizations interested in affirmative action and collective bargaining in higher education and has taught at both the graduate and undergraduate levels at Boston University, Boston College, and University of Lowell.

Stetson’s address at Cal Poly is part of a group of speeches from the Winter Quarter programs on the overall theme of liberty that is being offered as part of the 1980-81 Arts and Humanities Series.

The series is sponsored by the School of Communicative Arts and Humanities.}

State budget cuts could hurt quality of education

From page 1

The legislation, he said, would be a way to make up for the loss of state and national organizations interested in affirmative action and collective bargaining in higher education and has taught at both the graduate and undergraduate levels at Boston University, Boston College, and University of Lowell.

Hopefuls prepare for battle

SACRAMENTO (AP) — The race for the 1982 Republican nomination for governor is shaping up as a battle that could shatter the conservative coalition that has dominated the California GOP over the past 17 years.

Three well-known California Republicans—Lt. Gov. Mike Curb, Attorney General George Deukmejian and San Diego Mayor Pete Wilson—are vying for the support of conservatives, who are beginning to divide into two rival camps.

On the Democratic side, incumbent Gov. Edmund Brown Jr. has hinted repeatedly that he will not seek a third term. But until Brown makes that official, most other Democratic hopes are stopping short of openly declaring their intentions.

Among Democrats laying the groundwork for prospective campaigns for governor next year are Los Angeles Mayor Tom Bradley, Controller Ken Cory and Secretary of State March Fong Eu.

The list of politicians floating trial balloons about running for governor or Senate includes the incumbents in all of the other six statewide offices on the ballot next year, increasing the chances of major contests for many of those offices.

But among all of these races, the hardest fought and probably the most expensive is likely to be the race for the Republican nomination for governor.

Curb says he has already raised more than $1 million, and Wilson $870,000. Deukmejian’s first $500-per-plate dinner is scheduled March 5.

Curb, who clearly was posturing himself for a race for governor from his first months in office in 1979, has the early lead in endorsements and fund-raising.

Curb has the strong support of Assembly Republican floor leader Carol Hallett of Alhambra, a conservative who is expected to be especially strong in the congressional support, and state Sen. H.L. Richardson of Arcadia, a potent behind-the-scenes power, particularly among law enforcement groups, because of the fundraising ability of his computer mailing operations and of his gun owners political action committees.

Opinion

Minor madness

It’s no minor issue at Cal Poly that in addition to obtaining a bachelor’s degree, students cannot receive an accompanying degree in an area of lesser study.

It seems unfair that at a highly-rated institution like Cal Poly we are not offered the same opportunity available to others in California State University and College system—there is, to supplement our education with work in a minor program to accompany our bachelor’s degree. The Department of Communications, with the expressed desire of students, summed it up when he said, “We tell the students to do this, do this . . . and in the end we’ve shaped them with a cookie cutter.”

The Mustang Daily editorial board repeats Ericson’s fundamental question, “Should students be allowed to think for themselves?”

Yes. At Cal Poly, like many educational institutions, we are confined to a rigid selection process—what classes to take, when to take them, and who our teachers will be. We’re tied down even more here than at other universities because Pol students must fight for space at one of the most impacted campuses in the CSUC system.

When we roll off the assembly line on Commencement Day, one Cal Poly graduate will be just like another; highly skilled in one area, but severely lacking—at least on paper—in other areas. And what’s written on that piece of paper counts so much in today’s world.

The issue here—from the administration’s point of view—is that Cal Poly students aren’t making a conscientious attempt to include minor study. Yet the departments involved claim that 10 of the minors could be implemented without adding courses, and the rest would have little impact on faculty and equipment.

Malcolm Wilson, associate vice president for academic programs, said the teachers are forgetting the additional impact on the administration—the records and evaluations department, for example, would have increased work loads.

We think the impact of minors will be minor, except to entering students, who will find a major increase in their choice and selection of study. Involved faculty and departments are willing to make sacrifices to offer better quality education; why can’t the administration join in?

At the very least, we ask department heads to appeal the administration’s decision by Feb. 11, the deadline to ask for reconsideration of the remaining 22 minors. And to the administration, will you give us a little thought to, for example, John Doe, an engineering major, who would like to minor in journalism, so someday he can write about his latest invention? Or Jane Doe, the English major, who would like to supplement her education with a speech minor, to better prepare her for the outside world?

To Vice President Hazel Jones, President Warren Baker, Malcolm Wilson, and all of the other administrators involved, we strongly urge you to reconsider and closely evaluate the minor request once again. Give students a chance to supplement and enrich their educations.

Letters and press releases may be submitted to the Mustang Daily by bringing them to the Mustang office in Room 226 of the Graphic Arts Building, or sending them to Editor, Mustang Daily, GRC 226, Cal Poly, San Luis Obispo, CA 93407. Letters must include writers’ signatures and telephone numbers.

The Editor reserves the right to edit letters for length and can’t respond to libelous statements. Letters should be kept as short as possible. Inordinately long letters will not be printed.

The Editor encourages readers’ opinions, criticisms and comments on news stories and editorials. Press releases must be submitted at least a week before they should be run. All releases must include phone numbers and names of the people or organizations involved, in case further information is needed.

The Editor reserves the right to limit, condense, rewrite and edit press releases received.

Mustang Daily policy

The study of humanities is a necessary part of the educational system. It is long past the time that we as students, educators and institutions are becoming detrimental to the quality of education and the educational system.

Students that graduate from college who receive jobs in management are losing them not because they lack specialized or vocational skills, but because they are deficient in the written and speaking communication fundamentals that specialized education ignores.

A poorly educated person reflects the quality of the institution, as well as the educational system itself. Thus, teachers, institutions, and students records become marred in the eyes of employers, who defeat the purpose of education: To graduate a student who can articulate, communicate, analyze and interpret, be open and understand, and comprehend the highly technical world of today.

The current increase in general education requirements starting in Fall 1981 is a step toward the truly educated person. These requirements offset the vocational oriented Cal Poly system and provide the student with a chance to see different aspects of the world and possibly experience in themselves aspects not seen before.

Author Mike Trachotis is a junior English major and Mustang Daily staff writer.

BY MIKE TRACHOTIS

The study of humanities is a necessary part of the educational system. It is long past the time that we as students, educators and institutions are becoming detrimental to the quality of education and the educational system.

Students that graduate from college who receive jobs in management are losing them not because they lack specialized or vocational skills, but because they are deficient in the written and speaking communication fundamentals that specialized education ignores.

A poorly educated person reflects the quality of the institution, as well as the educational system itself. Editor:

I should have known. The hostages have been free for only a couple of days, and the Mustang Daily knows why. Jimmy Carter worked so hard and long on negotiating their release that, of course, his efforts finally bore fruit.

Realistic. How can you honestly believe that there was no same course to take besides the one he Jimmy Carter did follow? It is disappointing to note that the sad fact of eight Americans who died during the aborted rescue mission was completely ignored, for the sole purpose of not allowing any rust on your putrid glorification of Jimmy Carter. I don’t think that there are many people who consider the Presidential order for a rescue attempt part of a same course.

It is also interesting to see that you totally ignored the day on which they were released—President Reagan’s inauguration. It seems more probable that the Iranian’s didn’t want to deal with him, than they just wanted to make a final, humiliating stab at Jimmy Carter. Wouldn’t it have been more humbling to release the hostages

records become marred in the eyes of employers, who defeat the purpose of education: To graduate a student who can articulate, communicate, analyze and interpret, be open and understand, and comprehend the highly technical world of today.

It seems more probable that the Iranian’s didn’t want to deal with him, than they just wanted to make a final, humiliating stab at Jimmy Carter. Wouldn’t it have been more humbling to release the hostages

under a proposal of President Reagan’s?

Don’t get me wrong. I don’t believe President Reagan had anything to do with the negotiations, but I do think he played a major part too pun intended in the release of the hostages. I doubt that the hostages would be free today if Jimmy Carter had been re-elected. January 20 would have been no different than January 19.

I guess the real purpose of writing this letter is to show my dissatisfaction with the Mustang Daily for constantly printing liberal editorials. I do not mean that they should be replaced by conservative ones, but instead, become a responsible newspaper by publishing staff written letters that represent differing view points. A possibility might be to have two people work in conjunction to write an editorial and rebuttal, to appear on the same page, the same day.

However, if you continue to your current editorial practice, may I suggest that you change the heading above these articles to—ONE SHED opinion. I urge anyone else who appreciates an unbiased and fair newspaper to write in and be heard.
