Poly pair vie for city’s mayor position

BY RALPH THOMAS
Staff Writer

Two Cal Poly graduates have devised a "scheme" to run as partners for the mayorship of San Luis Obispo. James Patton, 22, and Victor Churchill, 24, both former officers of the United Black Student Awareness Council, said they are confident they can win the municipal election March 3, even though they are write-in candidates.

"I think the chances are real, real good that we will win by a landslide," said Patton.

Patton called their effort a "very well thought out scheme." If they were to win the election, according to City Attorney George Thacher, they would not be able to take office as co-mayors.

But there is one way the two might win the mayorship. As stated in the Telegram Tribune:

"If they managed to win the election the legally certified winner could decide that it would be politically impossible to take office. The successful candidate could then swear in, resign, and ask the council to elect a replacement—either Churchill or Patton."

Patton said the idea was conceived last October. He said they plan to use mostly the media in their campaign to "take the city by force." He called it a "grass-roots campaign."

Patton said he would like to see more involvement in local government and this was one of the main purposes of their effort.

"I think people should be more concerned," he said.

He said another factor the two have considered is their opposition in the race. He said many people do not want to vote for Melanie Billig because she is a woman and Floyd Hitchcock entered the race just so Billig would have an opponent.

On major issues Patton said the two differ from the other candidates. Of the development issue, he said house building permits should be given for sites below the 400-foot level. He said they will present their stands on such issues to the media throughout their campaign.

Patton freely expressed his confidence, despite his being young and black. He added they are going to try hardest to appeal to Cal Poly students.

"We're going with the basic assumption that in human existence we feel more and more that collective decisions that influence others and those that are influenced by others—we feel we are the former type," Patton said.
Republican to resign after arrest

JACKSON, Miss. (AP) — Rep. Jon Hinson, R-Miss., arrested last week in a Washington men's room and charged with attempted oral sodomy, intends to resign, an aide said Monday.

"His intention is to resign," administrative aide Marshall Hanbury told the Jackson Daily News from Washington. "We're in the process of getting the paperwork done now."

Hinson, his top aide, said the 38-year-old congressman had "no option other than resignation" after his arrest in a men's restroom of a congressional office building last Wednesday.

"I'll advise him on the timing and the proper way to go about it ... and the other things involved with terminating a career," Hanbury said.

Hinson originally was charged with oral sodomy, a felony, but the charge was reduced to a misdemeanor during the campaign that he acknowledged during the campaign that he had engaged in oral sex with Harold Moore, 28, of Onox Hill, Md.

Hinson pleaded innocent to the charge on Thursday. His trial in District of Columbia Superior Court was set for May 4. The maximum penalty upon conviction is one year's imprisonment and a $1,000 fine.

He has been in seclusion at a Washington-area hospital since Thursday. Hanbury had said last week that the congressman was hospitalized for mental and physical fatigue.

Hinson had been re-elected to a second term Nov. 4 despite acknowledging during the campaign that he had visited two homosexual hangouts in the Washington area.

On Friday, the two top Republicans in the House—Minority Leader Robert H. Michel of Illinois and the party's whip, Rep. Trent Lott of Mississippi—had said they thought Hinson should resign.

Hanbury said Hinson did not know when the resignation would be submitted. "I don't know if it will be tomorrow or next week," Hanbury said.

Former singer Bill Haley dies

HARLINGTON, Texas (AP) — Bill Haley, famous for his 1950s hit "Rock Around the Clock," recorded by his group The Comets, died at his home Monday at the age of 56.

Little was known about Haley's last years. He had lived in Rio Grande Valley about six years, leading a semi-reclusive life and refusing interview requests.

Prisoner to leave Iran Tuesday

By The Associated Press

American writer Cynthia B. Dwyer's release from Iran was delayed Monday by lack of a travel document, but the State Department said the problem apparently was resolved and she might leave Tuesday.

Mrs. Dwyer was detained at the last minute Monday by Iranian authorities and the plane that was to carry her to freedom after nine months in prison on espionage charges left without her.

Swiss Ambassador Erik Lang in Tehran described the problem as "lack of a travel document." He said the problem was not serious, "just bad luck. It was lost or disappeared. We hope to find a solution in time for tomorrow. If not, the next day.

Lang said Iranian is flying Tuesday to Kuwait or Dubai in the Persian Gulf and Mrs. Dwyer could be on that flight. Airline sources in Tehran said the flights to the Persian Gulf are not regularly scheduled.

The next scheduled flight by the Iranian airline is Wednesday to Istanbul, Turkey and Frankfurt, West Germany.

Meantime, the 49-year-old freelance writer was under Swiss care in Tehran.

Murder sentence being decided

OAKLAND, Calif. (AP) — Attorneys prepared to give final arguments Monday in the penalty phase of the trial of Darlun June Cromer, who could go to the gas chamber following her conviction in the racially motivated murder of a 5-year-old black boy.

The jury that convicted the 34-year-old Pinole woman last month began hearing testimony Friday in the penalty phase of the trial, and will decide whether to give her the death sentence or life imprisonment without the possibility of parole.

Witnesses were interrupted Monday when defense witness Marian Koullasch, Ms. Cromer's aunt, broke down on the stand and screamed to the jury, "You killed her. You killed her. What more do you want? This is a farce."

Superior Court Judge Willmut Sweeney immediately recessed the jury of seven men and five women and warned Mrs. Koullasch not to "cannibalize the jury."

That same jury has also found that Ms. Cromer was sane when she kidnapped and strangled 5-year-old Reginald Williams of Alameda on Feb. 5, 1980.

Polish workers occupy factories

WARSAW, Poland (AP) — Workers in the southwestern Polish province of Jelenia Gora occupied factories and offices in a general strike Monday and a top Communist Party leader lashed out at leading dissidents during a meeting of the policy-making Central Committee.

In Bonn, the West German government's chief spokesman, Kurt Becker, described a threat of Soviet military intervention in Poland as "undiminished." U.S. intelligence officials in Washington have reported Soviet, and East bloc troops massed near Poland's borders.

In Moscow, the Soviet news agency Tass charged that Solidarity recently has stepped up "subversive political agitation" to undermine the role of the Polish Communist Party. The dispatch from Warsaw said Solidarity leaders had incited strikes before a meeting of the Central Committee "under the pretext of increasing pressure on the authorities."

East Germany's official news agency ADN, in Berlin, described the latest Polish strike as a "counter-revolutionary action" and accused labor leader Lech Walesa of orchestrating it.

The workers in Jelenia Gora called their strike when talks with the government broke down over their demand for access to a local resort and clinic reserved for party and government officials only.

A spokesman for the independent union Solidarity said Walesa had come to Warsaw where government officials and union leaders were discussing the protest. Reports from the city of Jelenia Gora said the strike affected most enterprises in the surrounding province and one Solidarity source said as many as 100,000 workers could be involved.

Hayakawa flip-flops on tax bill

SACRAMENTO (AP) — Apparently misinterpreting his own tax cut proposals, U.S. Sen. S.I. Hayakawa Monday made a new tax measure which he later said he opposed.

The issue was whether wages and other earned income should be taxed at a higher or lower rate than capital gains, corporate dividends, interest income and other so-called unearned income.

"There's a large number of tax shelters that are questionable," the 76-year-old Republican told a news conference. "Earned income should be taxed at a lower rate than unearned income, if it is taxed at all."

Challenged by reporters who noted that that proposal put him at odds with President Reagan and most Republicans, Hayakawa defended his position at length, and implied he may oppose it two more times.

San Luis Obispo
**Director, coaches view Poly athletic department**

**Inflation a bigger hurdle than Title IX for athletics**

**BY CYNTHIA BARAKATT**

Staff Writer

Despite the attention focused on the recent investigation by U.S. Department of Education for compliance with Title IX, Cal Poly's director of athletics said he feels other problems in both the men's and women's sports programs present a more immediate concern.

According to Dr. Vic Buccola, progress is being made toward compliance of Title IX, especially in the area of scholarships, where women have gone from receiving no funding to $65,000 in scholarship aid. "We're not talking about gender, we're talking about athletics," he said. "Title IX applies to men and women both."

While Buccola said that inadequate staffing and facilities are major concerns facing athletics, the lack of financing is the root of these problems, and that it is possible some sports may be eliminated if additional funds are not available to keep up with inflation.

"I believe in a broad-based athletic program, but it is not realistic to maintain the number of intercollegiate sports we now have unless additional funds and staff are available," said Buccola.

He declined to state which specific sports he would recommend be eliminated if no additional funds are allocated.

But, said Buccola, the athletic program is getting into fund raising more than ever and he hopes enough money can be raised to compensate for additional money not received from the state, AlI and Instructionally Related Activities.

In terms of facilities, Buccola said that his biggest concern is the main gym, which was originally built for 6,000 male students. He said there is not enough classroom space or shower space, and that the inadequacy of the women's locker room is a major problem, because it involves the whole campus.

According to Buccola, there is only one main facility that causes some problems in scheduling, but the coaches and associate athletic directors all try to compromise and come up with the best use of time.

"All coaches feel they are not looked at highly enough," he said. "We try to accommodate all the teams to the best of our ability."

Buccola said he feels progress has been made in terms of staffing and that if additional money is allocated, this will be given top priority.

According to the director of athletics, the men's and women's volleyball coach, the assistant women's basketball coach, an assistant football coach and an assistant women's volleyball coach were given time increase raises for the rest of the year with part of the money generated by the Division II football championship. He said one goal he hopes to accomplish by June is raising enough money to keep those coaches at the same time base next year.

"I would like to have all my coaching personnel at full time," he said.

One staffing change which has received a positive reaction, according to Buccola, is the addition of a part-time sports information director for women. He said that at one time there was a single SID for both men's and women's sports.

**Coaches: lack of funds discourages winning**

**BY CYNTHIA BARAKATT**

Staff Writer

While the entire Cal Poly athletic program is suffering from financial strain, some coaches are feeling the frustrations of a number of factors which seem counterproductive to the job they were hired to do—produce winning teams.

From the time-consuming task of fund raising to a perceived lack of support by the university, coaches are expressing concern over their ability to do their jobs effectively in a climate of uncertainty.

Women's basketball coach Marylin McNeil expressed frustration in that coaches are expected to help in raising money, yet cannot go out in the local community because the Cal Poly Booster Organization goes to the immediate community for financial support. Thus, coaches must go out of town to raise money, which cuts into their coaching time.

Hayward fails to comply with agriculture rule

SAN FRANCISCO (AP)—In its first ruling on compliance with an act designed to preserve agricultural land, the state Supreme Court ruled Monday that the city of Hayward failed to comply when it authorized a subdivision development.

The city had approved a plan to build 153 homes on a 90-acre tract. The Sierra Club and others objected, saying the acreage was part of 600 acres covered in a previous agreement under the 1965 California Conservation Act.

The Alameda County Superior Court upheld the city, but the high court, in a 4-3 decision by Justice Stanley Mosk, disagreed.

The Williamson Act, as it is known, authorizes local governments to create agricultural preserves and enter into contracts with owners restricting use of the land. Owners in return get the land taxed on an agricultural basis rather than at prospective building lot values.

This year 25 people have qualified for the national championships in track and field, but they must raise $10,000 in order to do so.

"Everybody wants an opportunity to strive to be better," said Harter, "but when hindered, (it) causes frustration."

Harter also said he is frustrated by the uncertainty of the budget. According to Harter, colleges may begin to sign athletes for scholarships in three weeks, and at Cal Poly it. He also said the inability of athletes to pre-register adds difficulty in scheduling practices and allowing athletes to carry a normal load of 12 units per quarter.

McNeil said she feels the administration could ease the frustration by putting more money into athletics.

The Alameda County Superior Court upheld the city, but the high court, in a 4-3 decision by Justice Stanley Mosk, disagreed.

The same frustration was expressed by women's track coach Lance Harter. According to Harter, so far this year 25 people have qualified for the national championships in track and field, but they must raise $10,000 in order to do so.

Ursula Cianiulli has lived on two continents and has worked at various times as a governess, au pair, girl, cook, cocktail waitress and a buyer for a stationary store.

Ursula was born in 1940 in Leer, a small town on the north coast of Germany. Her parents both worked in business, which inspired Ursula to go to a vocational school and receive a degree in business.

From there, "My life seemed to fall one part into the other," said Ursula. While looking for a job, Ursula decided she would like to work in a town where people spend their vacations. In 1963 she found a job in a small resort town in Germany, called Freudenstadt, where she was a buyer for a stationary store. She left Freudenstadt in December 1963 and found a job with a German family in London. For $2 to $3 a week, she took care of the family's little girl, and she learned what a hamburger was. After asking someone to show her how to make one, she was told to cook hamburgers. She wrote down everything on paper, and that thing just fell into her voice. As usual Ursula simply smiled and said, "It seemed to fall one part into the other." She went on to say that it was "... a chance of a lifetime" to work for Post in Palm Beach.

Ursula felt that she needed to see more of the world, so in January of 1968 she found a job with a German family in London again. For $2 to $3 a week, she worked as a cook's assistant, and was paid $9 a day for a three-day week. She worked as a cook's assistant, and was paid $9 a day for a three-day week. As usual Ursula simply smiled and said, "It seemed to fall one part into the other." She went on to say that it was "... a chance of a lifetime" to work for Post in Palm Beach.

In February 1965 Ursula received a job as a governess in Palm Beach, Florida. Her job was to take the family's little girl to and from school and play with her in the afternoons. She also cooked dinner each night for the family. She could not yet speak a word of English. The family would write everything down on paper, and that thing just fell into her voice. As usual Ursula simply smiled and said, "It seemed to fall one part into the other." She went on to say that it was "... a chance of a lifetime" to work for Post in Palm Beach.

Ursula explained that in Germany everyone ate with a fork and knife. "I almost got sick," she recalled, when she learned that she had to pick up the hamburger to eat it. While walking on the beach one day, Ursula met a young woman who worked for Majorie Merriweather Post—owner of General Foods. The woman said she would be leaving her job soon, and asked Ursula if she would like to work for Post in Palm Beach.

Ursula explained that she had a year contract, but the woman said that she would be making $350 a month with Post instead of $25 and that it would be better. She then spoke to the family, and to Ursula's surprise they said that it was "... a chance of a lifetime" to work for Post. Ursula worked as a cook's assistant, and was paid $9 a day for a three-day week. She worked as a cook's assistant, and was paid $9 a day for a three-day week. As usual Ursula simply smiled and said, "It seemed to fall one part into the other." She went on to say that it was "... a chance of a lifetime" to work for Post.

In September of 1968, Ursula came out to Los Angeles, a city she had always heard a lot about. Ursula found a job at the Los Angeles Sheraton, a large hotel where people spend their vacations. For $2 to $3 a week, she worked as a cocktail waitress for two years, before deciding to move on.

Cal Poly's Kathy Ferguson (right) scored 26 points and added six assists as the women's basketball team weathered a rough weekend losing two games to conference leaders Cal Poly Pomona in overtime, 74-71, and to Cal State Los Angeles, 88-85.

**Poly faces three-week dogfight for the lead**

The California Collegiate Athletic Association basketball conference season is five-weeks old and the only thing that has been accomplished during that time has been the elimination of four teams from the running. That is it.

Cal Poly Pomona has won six straight games to claw its way into a money four-way tie for the CCAA conference leadership with Cal State Dominguez Hills, Chapman and the Mustangs of Cal Poly San Luis Obispo. All four schools boast 7-2 league records.

The conference has now boiled down to a three-week scramble for the lead. The Mustangs had a two-point lead in the final minutes Friday night against Cal State Los Angeles before bowing in an 88-85 decision. The Mustangs lost the lead with two minutes left Friday night against Cal State Los Angeles before bowing in an 88-85 decision. The Mustangs lost the league-leading and unbeaten Cal Poly Pomona Broncos all they could handle and had a one-point lead in the final minutes of regulation and in overtime before succumbing, 74-71.

The close games do count in the long run. I guess for a young team," said McNeil. "We still are doing some dumb things out on the court though."

The weekend was a try­ing one for the second-year coach from Canada. The Mustangs could have put the SCAA standing into a turmoil with a weekend sweep. Cal Poly was locked into a three-way tie for second place, two games in back of Pomona, with San Barbara and Cal State Los Angeles.

Cal Poly was unable to take advantage of its potential spoiler role as it now drops four games off of the pace and in a tie for fourth place.

The Mustangs had their chances and then some over the weekend. The Golden Eagles of Los Angeles branded the first ten minutes of the game to be a blow-out as they soared out to a command­ing 16-point, 35-19, lead.

Foul trouble plagued Pol­y in the first half. Laura Buehning was tagged with her third personal foul at the 11:10 mark. The Mustangs trailed by only six points at the time but Los Angeles outscored Po­ly 15-5 in the next five minutes to take its big lead.

The Mustangs somehow regrouped for revenge as they ran up a string of 21 unanswered points, spark­ed by eight points from Buehning and six from Col­leen Finney to carry the Mustangs into the first half, 42-41 edge into halftime.

Two baskets from Carolyn Crandall gave Po­ly in a 71-67 edge with four minutes left. Poly sustain­ed that lead until an­thoprome center Cheryl McNeil led Poly to the middle three straight times down the floor to give Los Angeles an 85-81 lead with 1:30 showing.

Campbell, Johanna Rhodes and Jana Martin combined for 16 points to lead Los Angeles. Bueh­ning finished the game with four fouls and Poly with 19 points. Crandall scored 12 points in the second half to lead with 16. Kathy Ferguson muscled in 16 points also.

Los Angeles was credited with the win at the foul line. The Mustangs outscored Poly, 18-9, at the charity stripe.

In a carbon copy Sat­urday night, Pomona outscored the Mustangs, 18-9, for the thrilling over­time win.

Coach McNeil lamented that Lisa Ulmer figured heavily in both losses to Pomona this season. The Mustangs handed the left-handed offensive sparkplug for 40 minutes Saturday night but they couldn’t copy that perfor­mance in the five minute overtime period.

In the first meeting between the two sister schools, Ulmer got hot in the second half to power Pomona to a 66-55 win.

The Mustangs corralled Ulmer in regulation as she hit only one field goal in nine attempts but when the cards were on the table in the overtime, she buried three straight 20-foot jump shots in three tries.

Buehning anchored the Mustangs in the final minutes of regulation as she scored 10 points in four minutes to force the over­time. Crandall’s 15-footer with 48 seconds left in regulation knotted the game at 69-all. The Mustangs had a chance to ice the win in regulation but they lost control of the ball underneath their own basket as time ran out.

Two field goals from Ferguson and one each from Crandall and Sherri Rose lifted the Mustangs to a one-point, 71-70 lead in the overtime but four straight clutchesown by Pomona’s Carol Welch in the final twenty seconds secured the win. Buehning was the game’s leading scorer with 24 points and Crandall kept pace with 20 markers.

The Mustangs 8-15 overall, hope to claw back within one game of .500 mark in the SCAA as it battles Northridge on the road Saturday.
It's Time For Your Latest Clinique Bonus: “Best Of The Best”

Your's at no charge whatever with any Clinique purchase of $6.50 or more.

CLINIQUE

All Clinique products are considered Best of their kind. But this collection of five is even more special. One bonus to a customer. Allergy Tested. 100% Fragrance Free.

Keyes runs to Millrose first place

Cal Poly senior Maggie Keyes has distinguished herself as one of the top women’s distance runners in the nation.

Keyes had a profitable weekend in New York as she finished first in the Avon 1,500 meter Invitational race at the Millrose Games.

She clocked a 4:14.9 for the fourth fastest recorded indoor 1,500-meter timing.

The timing distinguishes her as the fastest miler in the nation.

Keyes earned three All-American awards while running at Cal Poly. She earned her last award by finishing 12th at the AIAW Division I National cross country meet last November.

The San Rafael native earned one of her other All-American honors in track last season when she was crowned national champion in the 1,500 meters.

She won back-to-back Southern California Athletic Association crowns in cross country in 1979 and 1980. She qualified for the trip to the Nationals by winning the regional race in a record breaking time.

Keyes placed sixth in the Nationals a year ago and was named by California Track News as the outstanding collegiate runner in 1979.

Knicks seek playoff berth

Northridge vaults past Cal Poly

BY JIM MALONE
Staff Writer

Strong performances on the uneven bars and vaulting horse pushed the Cal State Northridge Matadors to a 129.4-123.8 win over the Cal Poly women's gymnastics team in a Southern California Athletic Association meet Saturday night in Crandall Gym.

It was the second meeting of the season for these teams, and the Matadors relied on their strengths and a Mustang lapse on the bars to grab first place in each event. Northridge's Kim Gardner was the individual all-around winner with 38.9 points, repeating her first place in each event.

Matador Dally-Martin Sanders took third and fourth in the previous meeting. The Mustangs' Carol Smalley and Donna Haas finished fourth and fifth respectively.

After falling behind by three points on the uneven bars, coach Andy Proctor's Mustangs regrouped to score well on the balance beam, with Susan King taking second place with 8.15 points to Gardner's 8.45. One-tenth of a point separated the teams' beam scores.

"We were good to be so close to them on the beam," Proctor said later. "Their best event is the beam, but they had a few wobbles up there tonight."

In the floor exercises that followed, the Mustangs again tallied well, as Smalley and Haas took third and fourth places in this crowd-pleasing event. Again, the versatile Gardner was first and teammate Susie Freeman earned second place. And again, the Matadors were one-tenth of a point up on the Mustangs in the event, with a three-point bulge overall.

With only the vaulting competition left however, Northridge found themselves in the catbird's seat against a weak vaulting Poly team. The Matadors finished one-two-three in the vault, scoring up the win for coach Donna Stuart. Poly's Smalley and Haas teamed again for a strong fourth and sixth place finish in the event.

"We had the opportunity to score well on the bars," Proctor said, "but we just blew it." He explained that some women were trying out new routines on the bars and that may have been part of the reason for the Mustangs' disappointing showing.

Matador mentor Stuart was happy with her charges' performance, but added, "There's always room for improvement. We're a young team, with four freshmen and two first-timers. Our strength was the individual all-around that may have separated the teams'."

The Cal Poly gymnastics team was upended by an outstanding Northridge team Saturday night. Dana Filippioni scored 7.15 on the beam.

Knicks seek playoff berth

From page 8

National Basketball Association playoffs for only the second time in the last six years.

After a five-week slump which saw them win just seven of 18 starts, the Knicks feel they have regained the form they had at the start of the season, when they won 11 of their first 14 outings and twice beat the powerful Philadelphia 76ers.

‘Early in the year we won with emotion,’ said second-year center Bill Cartwright. ‘Now we do it on intensity. We’re smarter and reading situations better. We’re more aware and more confident.’

DETROIT, Mich. (AP) — Leslie Allen calmly cast aside the label of “just an average player.”

“Generally speaking, I don’t want to be considered just another player,” said Allen, 34, speaking tenuously in a经过语。“I’m another player to beat out there ready to play the tough ‘D.’ ”

From page 8

By walking to left fielder Paul Desjardins. The scoring was completed when the catcher Ken Peters doubled scoring Harr and Trout.

Overall, the first game was a pitcher’s duel. The starting pitcher for the Oldtimers Dave Pencille lasted only two thirds of the inning allowing all nine earned runs. Mike Young, Bill Harr, and Bruce Freeberg then held the Mustangs to eight hits for the remainder of the game.

Cal Poly starting pitcher Mark Bersono allowed four earned runs in four innings. Ken Eriksen and Scott Neese then held the Mustangs to seven hits and one run. In the second game, the Oldtimers scored four quick runs in the first inning. Steve McFarland and Dave Marpall led the inning off with singles, and Erik Butler reached base by an error. Tom Leathine singled home one run and the scoring finale occurred when Gary Wilburn doubled in three runs. Three more insurance runs were added in the second inning and one in the seventh inning.

The Mustangs bata came to life in the second inning, when they batted around. Two runs scored due to walks to Kevin Taylor and Bruce Carrell. Paul Hertler ripped a single to drive in two runs. However, the Mustangs were unable to unseat the Oldtimers’ lead.

In the draw.

BY MARIA CASAS

Morgan agreed to terms to play with SF Giants.

By identical scores of 8-0, the Cal Poly Mustangs split a doubleheader with the UC Irvine Anteaters on Saturday.

The second game was completed when hitter Allen doubled scoring Harr and Trout.

Scoring in the first game was ignited when center fielder Dave Kirby led off the inning with a single. When the dust had finally settled the Mustangs had batted around and held a commanding eight-run lead.

The one offensive spurt for the Oldtimers occurred in the second inning. First baseman Joe Zagarino doubled and was cashed in on Bob Harr’s single. Erik Butler, the curly-haired left-

ing 6-4, 6-4 triumph over two heavily favored top seeds Hana Mandlikova in the finals of the $25,000 Women’s Tennis Tournament.

“I’ve seen the ups and downs of it,” said Allen, 34, speaking tenuously in a经过语。“Suddenly, I’m another player to beat and not just another player in the game.”

Morgan entered the tournament ranked 45th in the Women’s Tennis Association. The Mustangs’ fifth rank was.

But she was poised throughout the match, breaking the 18-year-old Czech’s service four times while losing only twice.

Mandlikova’s usually powerful serve was faltering, as she faulted on more than one-third of her first serves.

During the 75-minute match.

The key to the match was the fifth game of the second set, in which Allen broke Mandlikova’s serve after the Czech had broken Allen’s serve the game before. The two exchanged service breaks later in the set, but Allen proved too consistent and took the final set 6-4.

Gibson won the U.S. Open and Wimbledon first in 1957 and again in 1958.

In the second game, the Mustangs scored four quick runs in the first inning. Steve McFarland and Dave Marpall led the inning off with singles, and Erik Butler reached base by an error. Tom Leathine singled home one run and the scoring finale occurred when Gary Wilburn doubled in three runs. Three more insurance runs were added in the second inning and one in the seventh inning.

**SCARAB will give University Union mural a fresh coat of paint**

**BY LORI ANDERSON**

The eight-year-old mural in the University Union plaza is getting a fresh coat of paint.

Jeff Gee, president of the University Union Board of Governors, said the board wanted the faded mural redone and offered to supply the SCARAB club with the paint if it would do the job.

Gee said the picture will remain the same, but the colors will be changed and brightened.

"We tried to come up with a new design a few years ago and we came up with a couple of problems," said Gee.

He said a new theme couldn't be agreed upon and there was opposition to changing the present theme of California education.

Vera Swanson, member of the architecture faculty and designer of the mural, said, "The second design didn't seem to be appropriate for the place." He said his "cubistic version" of the present theme of California education and Cal Poly would be kept.

The mural depicts the California coastline, the lamp of guidance, the book of perfect knowledge and a starburst representing each of the seven schools of the university.

Doug Ely, president of SCARAB, said the club plans to repaint the mural the weekend of February 19-21.

Doug Ely, president of SCARAB, said the club plans to repaint the mural the weekend of February 19-21.

Ely said sun, rain and wind have led to the delapidation of the mural and with a fresh coat of brighter paint, the mural will take on a new look.

**TAKE CHARGE AT 22.**

In most jobs, at 22 you're at the bottom of the ladder. In the Navy, at 22 you can be a leader. After just 16 weeks of leadership training, you're commissioned an officer, part of the management team. And you're given the immediate decision-making authority your responsibilities demand.

On your first sea tour, you'll be responsible for the work of up to 30 men and the care of literally millions of dollars worth of highly sophisticated equipment. You're a Division Officer, so you're in charge. It's a lot more responsibility than most corporations give a man of 22. As a Navy Officer, you encounter new challenges, new tests of your skills, new opportunities to advance your education. You grow.

Don't just take a job. Become a Navy Officer and take charge, even at 22.

---

**Dr. Karl A. Menninger to speak at Cal Poly March 6**

Dr. Karl A. Menninger, the distinguished psychiatrist, author and humanitarian, will speak at 11 a.m. on Friday, March 6, at Cal Poly.

The public program will take place in Chumash Auditorium of the Julian A. McPhee University Union. Admission will be free.

The presentation will be part of a two-day conference for psychologists, counselors, educators, corrections officers, and personnel specialists to be held in San Luis Obispo on Thursday and Friday, March 5 and 6.

Menninger will speak on "Mental Health in America: Past, Present and Future." He was recently recognized by President Carter when he was awarded the Medal of Freedom, the nation's highest civilian honor. At that presentation the president noted that "all who are interested in improving the mental health of the nation know Karl Menninger."

"The 87-year-old psychiatrist entered medical practice in Topeka, Kan., with his father in 1919. A brother joined them in 1925, forming a psychiatric trio that became world famous and resulted in the establishment of the Menninger Clinic and later the Menninger Foundation.

"He is credited with popularizing psychiatry as the author of such books as "Man Against Himself," "The Vital Balance," "The Human Mind," and "Love Against Hate," co-authored with his wife, Jean.

Menninger is known as a man who puts his life of study and research into practice. He has helped upgrade treatment conditions in state mental hospitals across the country and is regarded as a leading crusader for prison reform through such controversial writings as his book, "The Crime of Punishment."

A political science senior and supporter of the anti-handgun issue, is assisting a real estate financier under the California gun law, any individual who is not a drug addict, felon, or mentally ill and is 21 years old, may buy a handgun. If approval of the measure is granted by the attorney general of California, there is a five-month time limit in which to get 346,000 signatures on a petition.

The muscle against handgun controls principally has come from outdoorsmen, who fear that such measures would be the first step in a drive to control and possibly confiscate all firearms, including sporting guns. According to FBI statistics, in the past five years two-thirds of all murders in the United States were committed with firearms, and about 50 percent of these deaths involved handguns.

A continual point brought up in the definition of the Second Amendment of the U.S. Constitution, which says that every individual is guaranteed the right to keep and bear arms for the purpose of a well-equipped militia. "Arms" is not defined.

Many individuals on this basis feel the need to own a pistol to defend themselves. FBI studies show that a person is six to seven times more likely to use a person is six to seven times more likely to use a pistol to defend themselves. FBI studies show that a person is six to seven times more likely to use a pistol to defend themselves.

According to the 1980 Gallup poll index, almost two-thirds of the country wants stricter gun control. Congress has failed to tighten up on gun laws. According to the 1980 Gallup poll index, almost two-thirds of the country wants stricter gun control. Congress has failed to tighten up on gun laws.

The most obvious reason lies in one of the most powerful and well-financed lobbies, the National Rifle Association and its effect on Congress, said Cal Poly political science professor Dr. John Syer.

"The NRA's success is credited to their highly skilled political techniques. Their computerized mass mail and telemarketing campaigns have been so successful that they have managed to keep their senators and representatives with letters of opposition and defeat of candidates based on their gun control position."

Despite the fact that for more than 40 years the national majority has been overwhelmingly in favor of handgun control, Congress has failed to tighten up on gun laws. According to the 1980 Gallup poll index, almost two-thirds of the country wants stricter gun control. Congress has failed to tighten up on gun laws.

The most obvious reason lies in one of the most powerful and well-financed lobbies, the National Rifle Association, and its effect on Congress, said Cal Poly political science professor Dr. John Syer.

"The NRA's success is credited to their highly skilled political techniques. Their computerized mass mail and telemarketing campaigns have been so successful that they have managed to keep their senators and representatives with letters of opposition and defeat of candidates based on their gun control position."

Another powerful tactic used by the NRA, according to Syer, is its assistance in the election or defeat of candidates based on their gun control position.
Democrats searching for a middle ground platform

WASHINGTON (AP) — After their 1980 election defeats, Democrats are searching for a political middle ground in which building a party record of opposition to the Reagan administration and majority of Republican leaders in the Senate. So far, they haven’t found one.

The search is hindered by the lack of specific plans as yet from President Reagan on his economic policy and by the traditional honeymoon period to give a new president a chance to make his case and debate among Democrats about which direction the party should take.

Political hunches are applied most strongly to the people a new president chooses for the top jobs in his administration. No matter how much individual senators might disagree with particular nominees, they are reluctant to vote against them on ideological grounds.

LeFever, an outspoken opponent of the Carter administration’s human rights policies and of the 1979 Iran hostage crisis, is one of just a few outspoken opponents of the administration and majority of Republican leaders in the Senate who agree on a strong human rights policy.

The ideological search is likely to prove more significant in the long run than human rights policies and of 10 Democratic senators, to a point where the party will be forced to make a choice.

Meanwhile, liberal democrats and conservatives alike are jockeying for a decisive role in deciding the future direction of the party.

The ideological search is likely to prove more significant in the long run than human rights policies and of 10 Democratic senators, to a point where the party will be forced to make a choice.

CLEVELAND (AP) — Stalked around the globe for a decade by kidnappers, bombings and assassinations, U.S. businesses are steadily increasing their commitment to erase the red ink of terrorism.

While seldom mentioned in the battle in annual reports, major American corporations with executives and subsidiaries abroad are fighting back with a small army of counter-terrorism experts, former law enforcement officers, insurance underwriters and political analysts.

"If you went down the Fortune 1,000 list of largest U.S. companies to pay, it would be very rare to find a company that did not have some type of ongoing program related to terrorism," said Thomas Nagle, a Levi-Strauss Co. executive who currently heads the terrorist acts committee of the American Society of Industrial Security, a trade organization.

Ten years ago, most multinational corporations were primarily concerned with protecting their plants and their executives. Nagle said in an interview:

"Now it's spilled over to business opportunities as well. 'Should we set up an operation in country X if there is a high level of terrorism? Companies are asking themselves," he said.

According to an informal Associated press survey, corporate officials are gathering with increasing frequency to discuss the problem. In the last five years, membership in ASIS has grown from 5,000 to 15,000. Last year's ASIS committee on terrorist acts included representatives from Exxon, Chase Manhattan, Coca-Cola, Owens-Illinois, IT&T, B.F. Goodrich and other companies that have experienced terrorist assaults—and sometimes paid huge ransoms—in the past decade.

The degree of corporate anxiety has heightened, agreed Ambassador Anthony Quinnion, director of the U.S. State Department's Office on Combating Terrorism.

"Any major corporation with resident executives in Latin America or the Middle East is likely to have given him security briefings—in some cases special vehicles—and exposure on how to survive if kidnapped. Some of the consulting companies are very good. It's growth of a very significant kind," he said.

The Office for Combating Terrorism listed more than 70 major terrorist attacks against U.S. government or private installations in 1980.
Birth Control
The Health Center is sponsoring a birth control workshop at 7:30 p.m. Feb. 12 in Serra Madre dor·
mitory.

Sex Communication
The Health Center is presenting a sexual commu­

Jock snaps over Valentine gift.

Dear Anna:
Athletically I'm an All·American. Romantically I'm a nerd. I'm in love with a fox. But our persis­
tion is rough. What'll I give her for Valentine's Day? Nervously Yours, Chicken Hunk

Dear Chicken:
Don't panic Send her flowers. It's probably the best way to ever say it. And the easiest. Just go to your favorite FTD Florist. He has the perfect Valentine gift. A beautiful bouquet that comes in a special bud vase. Even better, you deliver it. Remember, when in doubt, rely on the magic of flowers. It's the only way a chicken can say it. Good hunting.

SP Communications
TELECOMMUNICATIONS TRAINEES

Southern Pacific Communications, a leader in the fast growing telecommunications indus­
try, is seeking career-oriented graduates to enter a specialized program at our headquarters location in Buringame, California.

You should possess a B.S. or M.S. degree in Engineering, Physics, Electronics, Telecommu­
nications or Business and have a desire to advance to senior or management positions.

During your initial orientation period, you will be assigned to a variety of positions in our core engineering, construction, and administrative areas. You will become familiar with the principles of wave transmission, plant engineering, switch system engineering, network operations and customer applications. At the program's conclusion you will move into an available permanent assignment based on your training interest, abilities and career aspirations.

TERMS OF EMPLOYMENT

The FT1 Training Program at Southern Pacific is designed to provide full-time employment at the completion of the training period. Upon successful completion of the program, you will have the opportunity to be accepted into a full-time position at Southern Pacific.

The training program is provided at no cost to you. Southern Pacific will provide room and board, travel expenses, and all instructional costs.

The training program is designed to last approximately 9 months.

TERMS OF EMPLOYMENT

Communications offers you an excellent starting salary, superior company-paid benefits, and exceptional promotional opportunities due to our rapid expansion and growth.

Our representative will be on campus February 25, 1981. Contact the Career Planning & Placement Center to set up your interview appointment, and to obtain an informational packet on the company and its benefits. Or send your resume to the Manager of Standards, Procedures & Training; SP Communications; P. O. Box 974; Buringame, CA 94010.
BY CARLA SIMI

Cal Poly’s ornamental horticulture department is currently testing an infrared heating system in one of its greenhouses in an effort to develop energy-saving methods that may benefit the horticulture industry.

The infrared system, which supplies radiant heat directly to plants, is being compared to a unit-heated greenhouse employing a traditional convective system.

The system has a theoretically high potential for saving energy, and OH department faculty member Virginia Walter hopes to accurately determine how economical and efficient infrared heating is in actual use.

Informal studies last year indicated the system used 50 percent less natural gas than the unit-heated greenhouse, but Walter, who proposed the project, is seeking more precise data.

Monitoring equipment to measure the systems’ effectiveness and gas usage was recently installed in the greenhouses. Walter said data collection began near the end of January.

Enough information to compare the two systems is not yet available, but she explained the study will be conducted through the winter heating season.

“...And the whole thing will be repeated on a greater scale next year,” Walter added.

The idea behind the project is to discover how well the system performs and how that relates to energy conservation, the greenhouse specialist said.

“We must know what the system is doing before we can use it to its best advantage,” Walter stated.

Infrared heating systems have not been widely accepted by growers yet, as "nothing is presently known about the system," Walter noted.

If the results of the test comparisons help the horticulture industry, she feels the study "will have provided a valuable service.”

The system involves a vacuum tube in which natural gas combustion takes place, creating radiant heat. Walter contributed the system’s efficiency to the fact that combustion occurs in a vacuum and that the radiant energy directly heats the plants in the building with no air movement.

The unit-heated system operates indirectly, heating the air first, then transferring that heat to the plants by circulating air with a fan.

As an energy user, the infrared system rates 90 percent efficient, while typical unit-heaters have a 70 percent efficiency rating.

Walter noted that the infrared heating system is more expensive initially than traditional systems, but added that it pays for itself eventually.

The system in the OH greenhouse was installed about a year ago, according to Walter. She became involved with the project when a faculty member formerly in charge of the system left Cal Poly last year.

Her desire to obtain more accurate comparisons prompted her to propose the study now in progress, which required additional equipment to make the more precise measurements.

With a $7,000 grant jointly funded by the Agriculture Education Foundation and the School of Agriculture Research Committee, the necessary thermocoupling wires and data collection boards were purchased and subsequently installed.

Once the equipment was in operation, Walter began to collect comparison data with the help of a lot of curious volunteer students. Three students are receiving credit for their participation in the study, Walter said, through senior projects and special problems courses.

Walter’s compensation is the knowledge, as she said that the results of the test will be “directly applicable to what I teach.”

Ornamental horticulture instructor Virginia Walter checks results from greenhouse infrared heating system. The vacuum tube can be seen running the length of the greenhouse roof in background.

Elephant's tale

It might be hard for us to relate to an elephant. They're not cutely-cuddly like seals, or mysterious and mystic like whales. When we do see an elephant they're usually not in a natural habitat; rather we come across the huge animals as objects to throw peanuts at in the zoo, or as a performer in the side act of a three-ring circus.

But the time has come to protect the elephant. In Africa the huge, lumbering beast—which, because of its size, has never fully learned to protect itself—is becoming one of the most, viciously hunted animals on earth. And what for? Ivory, one of the most sought after, highly prized and well paid for substances on the face of this planet.

The World Wildlife Foundation estimates there are only 1.3 million elephants left in Africa today. The magnificent animals are being killed off at the astonishing rate of 50,000 to 100,000 per year. And there's no problems finding buyers. It's a big business for Hong Kong—$24 million U.S. dollars each year. A mere two-inch carving of Buddha bought at the airport when leaving China cost $40. A pair of three-foot tusks goes for about $4,000.

The United States has been considering banning ivory imports. In California you can bring home hand-carved ivory, but stores can't import or sell it.

The time has come for the United States to act on this lawless killing by refusing to buy any more ivory at all. At the rate elephants are being killed off in Africa, in a few years we will face a world without elephants, and that will be a tragedy.

Ivory piano keys can easily be replaced with plastic substitutes. The figurines which collect dust on antique dressers can easily be replaced by other objects of art. Is it worth it to kill an elephant and leave him bleeding in the dust for his tusks? For a knicknack or matching piano keys?

No. Let's stop perpetuating the agony of the elephant. It's not worth it, and laws must be passed to prove we can live without ivory imports.

Editor: The editorial of Feb. 4 (“I’M Offen­sive”) is yet another example of bankrupt liberal thought.

True, U.S. Geological surveys indicate a very limited supply of oil reserves, and have been doing so since 1905. You accuse President Reagan of assuming we have “vast pools” of reserves. His beliefs may be better understood by looking at the same geological surveys, which indicate that 50 percent of the land favorable to oil discovery is owned by the U.S. government, and is thus undeveloped. There is also the matter of shale oil reserves four times that of OPEC in three states surveyed so far, not to mention coal.

Since less expensive, environmentally sound alternatives are desirable, why do you suggest gas rationing in your editorial? If the price of gasoline and the amount sold are controlled, will the new capital come from to develop alternative sources of energy (e.g. coal gasification, geothermal power)? Profits now generated by successful businesses, oil companies included, provide the capital necessary for exploration of new energy sources. Gas rationing and price controls would only cut profits and reinvestment.

You fear the ill-effects of rising free­market prices on the poor (as if they were a fixed class). The solution proposed was to “slap a tax” on inefficient autos and homes. The editorial cited a decent control of gas prices as a “regressive tax against the poor.” Your proposed taxes would not only be regressive, but they would also drain the possible profits available for reinvestment from the free-market system.

You regard the demand for gasoline as inelastic, and cite the Rand Corporation studies which show consumption rose from 1973-79, despite rising prices. You only revealed part of the facts (those that weakly support your contentions). Why did you not include figures for 1979-81, when consumption decreased? I contend that the demand for gas is not as inelastic as some people would have us believe. The number of small cars on the road is increasing all the time. As gas prices rise, so will our own desires to conserve, as well as our awareness of the need for alternatives. You suggest “for­cing Americans to conserve” as a solu­tion, using taxes and rationing. I offer the unsuccessful 55 m.p.h. speed limit as a typical governmental solution to a conservation problem.

No, the solution to our energy prob­lems is not to punish the oil companies and the citizens through increased taxes and regulations. What we need to do is face up to the economic reality that energy will cost more, and that everyone will benefit if we learn a little, perhaps some more than others. But everyone will benefit if we leave individuals free to find their own ways of adapting, and after all, this country was founded upon the prin­ciples of personal liberty and freedom.

We must leave American business free to work out the solutions to the technological problems facing us.
