Poly's 'no alcohol' rule allows a few exceptions

BY MICHAEL WRISLEY
Staff Writer

Possession or consumption of alcoholic beverages on the campus is prohibited. "A well known fact, but a lesser known fact is that exceptions to this rule are now possible and would still be in accordance with the guidelines spelled out in the recent publication of the Campus Administrative Manual. Section 260.1 of CAM on Alcohol policy states: "Exceptions may be granted by the President or his designee (Executive Vice President Dale Andrews) to allow the sale or consumption of alcoholic beverages under established guidelines. Exceptions will not be granted for events open to the public."

The section goes on to say that beer or wine can not be sold on or served at Poly Royal in public events, that no event under 21 will be served, and the beer or wine will be served with food and handled by the Cal Poly foundation. Section 260.2 further states the foundation "may grant exceptions to this privilege as appropriate." This means that if beer or wine is served it is served in the price of the ticket, or by invitation where there is no charge.

Prior to this change, alcohol could only be served in the Alumni House, which maintains a full bar--at functions which the president dictates. This includes pre and post-game receptions, and development (fund raising) activities explained Steven Riddell coordinator, Alumni Services.

A campus group that is officially recognized by the ASI is eligible to submit complaints for review to the President. As outlined in section 260.1 "Factors to be considered in granting exceptions include the nature of the event, the sponsoring organization, the age of participants, the adequacy of supervision and the benefit to the university.

City growth debated

BY BOB GRIFFITH
Staff Writer

The two candidates on the ballot for mayor of San Luis Obispo met Tuesday night on KCPR's weekly news program "Open Channel" to discuss their views and qualifications and to answer questions from listeners calling in.

Councilwoman Melanie Billig said she is "the best qualified for the job in terms of who is running," and is well experienced with the city's processes and planning procedures. Local businessman Floyd Hitchcock said he felt his views more aptly represented those of the majority in San Luis Obispo, and criticized Billig for voting too much "positive" than "negative" and not being accessible to the public.

Hitchcock said that he has had five years of city council experience, and has served on the city's planning commission for the last three years. She estimated that it would take an outsider six months to become acquainted with the procedures of city government.

Hitchcock said that he attended council meetings for four months, "listening to people at city hall." Both pledged to bring harmony to city government.

KCPR received the majority of its calls from listeners questioning the candidate's stand on the establishment of a Greek row in town and the stabilization of rent in mobile home parks.

"The Greeks provide a very positive angle in the city council," Billig said. She added that the possibility of fraternity and sorority activities would bring "more life to Poly."

"Many people feel the state for a row should be considered," Hitchcock said. Hitchcock said the establishment of a Greek row in town is "inevitable." Both stressed that under no circumstances should fraternities or sororities be forced out of existing homes to live on a row.

Curb rates poorly but leads polls

SAN FRANCISCO (AP) — Though his image shines less than those of other leading Republicans, Lt. Gov. Mike Curb leads the GOP's pack of possible contenders for the party's 1982 gubernatorial nomination, according to a California Poll released Wednesday.

Curb was better known than San Diego Mayor Pete Wilson, Attorney General George Deukmejian, state Sen. Ken Maddy and state Sen. William Campbell among those polled in mid-January by the Field Institute.

Among the Republicans, 31 percent favored Curb for the nomination, 30 percent each backed Wilson and 18 percent wanted Deukmejian. Maddy and Campbell were each named by 6 percent and 19 Republicans had no opinion.

But Curb, a former record industry executive, also had the weakest image rating. On a scale where 100 indicates a neutral rating, Curb scored 430 among Republicans and 90 among Democrats — meaning most Democrats have an unfavorable impression of him.

Brown approves ag funding

TULARE (AP) — The state will invest $125 million in agricultural research to make "California stronger and richer in the next decade," Gov. Jerry Brown announced here today.

Brown, here for the 14th annual California Farm Equipment Show, signed an executive order to create the Agricultural Resources Investment Fund, which will require legislative approval.

Rising energy costs, salt buildup in soils, erosion and side effects from pesticides should be studied, Brown said.

If you're really in love... nothing's going to stand in your way.

"One of the best films of the year."
— Andrew Sarre, VILLAGE VOICE

"One of the most enjoyable movies of the year."
— Phil Colyar, GOOD MORNING AMERICA

"Richard Dreyfuss is first rate. Amy Irving is equally good."
— Charles Champlin, LOS ANGELES TIMES

"An out-and-out crowd pleaser that should captivate audiences on a grand scale. In Richard Dreyfuss and Amy Irving it has the most appealing of romantic teams ... the chemistry between them is exceptional. Lee Remick is outstanding."
— Kenneth Turan, NEW YORK TIMES

"Exciting, authentic, and a great deal of fun ... an honest love story."
— David Denby, NEW YORK MAGAZINE

"Richard Dreyfuss, Amy Irving and Lee Remick give wonderful performances."
— Joel Siegel, WABC-TV
Bill aims to nix body

SACRAMENTO (AP) — A Republican lawmaker on Wednesday introduced a bill which would abolish the California Coastal Commission because the panel "has regularly overstepped its authori­ty," he said.

State Sen. Jim Ellis of San Diego said the com­mission "has engaged itself in programming what is good for the public from an elitist's point of view." Doing away with the panel, he added, would save nearly $7 million in state funds.

Distinguished Architecture Lecture Series

Structures exert strong environmental influence

BY LISA CHEVES

Staff Writer

Placing architecture in the context of urban design and the land is what Mar­vin Malecha, architecture department head at Cal Poly Pomona, meant when he spoke to a small crowd about "Fabric in Architecture," Tuesday even­ing in the Architecture gallery.

Malecha, dressed in a suit and pepper jacket, jeans and cashmere sweater, said, "Taste and style are not enough. Every structure exercises in influence on its environment. It can't be designed as a single unit.

An extensive traveler, the Harvard graduate said that as we grow older, we try to conquer the environment and then reach a point where we withdraw.

We have to begin to look at buildings the way lawyers look at briefs," said Malecha, meaning that all aspects of the environment, the structure in totally, must be examined.

"The fabric must be woven starting with the smallest and largest elements of the problem at the same time."

Considering all of the labs architect­ure students are required to take, they may be interested to know Malecha believes design labs are the proper way to learn about architecture.

Students and teachers should work as a team, he said, so people who have something to add will not be forgotten. It's not just talented designers who should have a voice in the learning pro­cess, and he said people are unceremoniously drummed out of ar­chitecture because this fact is overlook­ed. "We must become aware that we don't have a corner on creative think­ing," he said.

Describing this theory of education, Malecha said it is not what he provides the student, but the interest and excite­ment the student provides him that allows him to impart knowledge. A stu­dent's intentions to learn and see are the vital components of architecture educa­tion, he said.

Malecha emphasized the human ele­ment in architecture, saying, "There must be a place in our environment for everyone. We cannot ignore people in the cities. We have to become socially aware.

A building is given special qualities, Malecha said, when it is given the touch of human concern. "People in our en­vironment should not be neglected. Peo­ple, like buildings, are players and give us special qualities in a city."

Malecha said people are so important to our society that when a space is emp­ty, we place statues there, whether or not they're outside scale, to fill our need for contact with others.

Buildings themselves often fill needs for security, he said. "There should be places in a city that give you a hug." He said the fabric of environment is constantly changing and that multi-use structures have become inevitable.

History, Malecha said, in a con­tinuum, and the history that is present right now has to do with future history as we make new fabrics. Honoring history is important, and according to Malecha, "How can we expect people to respect our buildings if we don't respect architects of the past?"

The majority of Malecha's lecture, the third lecture in Cal Poly's Distinguished Architects Lecture Series, was taken up with a slide presentation of obvious ex­amples of scale and definition.

Slides of Florence showed a city with very little open space. "The fabric is closely woven."

Buildings as role-players in the en­vironment were discussed at length by Malecha. He discussed buildings as towers, connecting spaces, walls, cover, visual pivot points, and art. He added that many buildings do their part in the environment although they may not be aesthetically wonderful.

Paying attention to the natural en­vironment and the definition it gives is something Californians have been aware of for a long time, said Malecha. Interest rates have put a damper on Malecha's private practice, resulting in what he calls "paper projects." projects that get drawn up, but never seem to get built. Most of his designs have been built in Minnesota and Boston, where he worked before becoming a teacher at Cal Poly Pomona. He was made head of the department there after three years of teaching.

Remembering
Candidates for mayor air views on growth, rents

From page 1

On the subject of rent stabilization, Billig said she supports the examining of ordinances of other cities and how they could best be implemented in San Luis Obispo.

"If there is a democratic way to implement rent stabilization, then I'm all for it," Hitchcock said. When pressured for a more definitive answer, he said the constitutionality of rent stabilization is uncertain and he could not support something illegal. He added that he was unaware that other cities have enacted rent stabilization ordinances.

The two disagreed most strongly on the role of city government in limiting growth, preserving scenic land, and encouraging energy conservation.

Both said they support the planning commission's General Plan in limiting growth to 2 percent annually. But Hitchcock said the city's growth has been less than 1 percent over the last five years, and "city hall has contributed to housing costs by controlling the supply."

Billig said everyone realizes the city must grow, but it must be a "controlled and managed growth." She asked, "are we going to sacrifice quality of quantity?" Unlimited growth will lead to excessive traffic and pollution, increased demands on city services, and a strain on the city's water supply, she said.

Billig said the city's growth has been less than 1 percent over the last five years, and "city hall has contributed to housing costs by controlling the supply."

Billig supports the preservation of the city's scenic areas, and said she does not want San Luis Obispo to become another San Fernando Valley.

Hitchcock was involved in a study for the planning commission to devise ways in which the city could provide incentives for businesses and homes. The study concluded that other cities have enacted rent stabilization that other cities have. Billig added that he was unaware of the constitutionality of rent stabilization and he could not support anything illegal. He said he realized the city must grow, but it must be a "controlled and managed growth."

Morro Bay museum schedules seven nature treks

BY JIM MALONE
Outdoors Editor

Get to know a little bit of the Central Coast this upcoming three-day weekend. The docents at the Morro Bay Museum of Natural History will lead seven informative nature walks this weekend:

Feb. 13, 9 a.m. — Plants and birds will be the subjects for discussion on this walk up Black Hill. Meet at the Morro Bay State Park campground entrance station. Two miles, two and a half hours.

Feb. 14, 1:30 p.m. — On this salt marsh and mudflat walk, Yolanda Waddell and Rosalie Valvo will talk about various ecosystems and bird identification. Be prepared for muddy feet, and meet at the Museum. Four miles, four hours.

Feb. 15, 10 a.m. — Katherine Bell will lead a walk from Hazard Canyon to Spooner's cove, with forays along the beach to take advantage of a minus tide on the return trip. Meet at the Los Osos William's Brothers Market parking lot and carpool to Hazard Canyon. Bring lunch and water. Four miles, four hours.

Feb. 15, 12:30 p.m. — Steve Schubert will present a 40-minute slide show at the Museum of Natural History, Morro Bay State Park, on the conservation of endangered species — the peregrine falcon — and the history of the falcons' nesting on Morro Rock.

Feb. 16, 10 a.m. — Bring binoculars for a close-up view of the great blue herons and their nesting activities. Sharon Lovejoy will lead the quarter-mile walk to the rookery. Meet at the museum.

Mother Jones publisher Jacques Marchand got an angry response when he plotted out ways to get more social involvement in corporate decisions.

Mother Jones publisher Jacques Marchand got an angry response when he plotted out ways to get more social involvement in corporate decisions.

The heated exchange, one of many the Mother Jones publisher encountered as a featured seminar speaker, Marchand called for more social involvement in the investment decisions of corporations, but the negative response from the student was what he had come to Cal Poly to hear.

Marchand expressed the hope of making an impact upon the university's business students, and to find out the thinking of people who represent an altogether different perspective on business from his own.

“At a place like Berkeley, we’re speaking to the already converted, which is important to do,” said Marchand. “But at a place like Cal Poly, I’m representing the magazine to an audience that is fundamentally not sympathetic, that doesn’t share our point of view.”

Mother Jones, an investigative, socially-oriented magazine, is published by the San Francisco-based Foundation for National Progress.

A article titled “Pinto Madness,” by Mark Dowie that was featured in the magazine’s Spring 1978 issue, was cited by some as an example of the best kept secrets in audio — Onkyo.

At Audio Ecstasy, we value the musical experience more than the technology that creates it. That’s why we stand behind Onkyo. Their products have the unique ability to take you beyond pure technology. Onkyo is dedicated to creating that “illusion of reality.” As a result, you’ll experience depth, spaciousness & detail from your music. That’s why we sell secret

We said we’d never do it. Carry an all-in-one unit. That was before we saw the CX-70. This is a “20w/CH” receiver with cassette deck. Yeah, we laughed too. But after checking the CX-70 out, we were amazed that a compact unit could sound so good. You’ve got to hear it to believe it.

ONKYO TX-3000 $349.95

We’re always astounded when Onkyo brings a new product out at how fast they incorporate state of the art design. The CP-1130F direct drive turntable is a case example. Straight, line-mass tonearm incorporating carbon fiber, high-grade touch controls & a special record coupling turntable mat. These aren’t gimmicks for just looks and all them. They make a difference in sound quality and that’s no secret.

ONKYO CP-1130F $239.95

Most slim line components are designed with one thing in mind, looks. That’s a lie. If you’re into 101 decorating ideas, it’s one more. Though, built so with the T-15 tuner & A 15 integrated amp (250W/CH RMS, 20-20,000 Hz at 8 ohms) these units exhibit a remarkable degree of musicality far beyond their knock-out looks.

ONKYO T-15 $113.95

ONKYO A-15 $179.95

Hallmark Valentines for Saturday, Feb 14, are more special as the love you share.

c. 1980 Hallmark Cards, Inc.
WASHINGTON (AP) — Nearly 15 years ago, MAD magazine satirically suggested that advertisements be sold on postage stamps. Now, a congressman is proposing the same thing — seriously this time — to raise money for the U.S. Postal Service and thereby delay or reduce future increases in the price of stamps.

Rep. Barry Goldwater Jr.'s proposal, called the Free Enterprise Postage Stamp Act, would allow domestic corporations to promote their logos on stamps. Through a competitive bidding process, corporations would be allowed to buy space on the face of a postage stamp. The government would then sell the stamps to the public for the same prices as its other stamps.

Under the bill, there would be a one-year test program with 100 million stamps going on sale to 2,000 corporations at a minimum bid of $10,000. The Postal Service produces 6 billion stamps each year.

"If, upon the success of this idea, we expanded the program to all 6 billion stamps produced annually, a minimum of $1.2 billion could be raised," Goldwater, a California Republican, said.

A somewhat less serious concept was put forth in July 1966 by Alfred E. Neuman, the freckle-faced, "What Me Worry?" kid who is the star of MAD magazine. A three-page spread in the humor magazine showed stamps advertising rental cars and Burma Shave cream, as well as soap opera stamps with stories unfolding monthly.

Goldwater's aide, Stan Reid, said the congressman didn't know of the MAD article when he first introduced the stamp ads legislation last November. Al Feldstein, MAD's editor, said this week the article created by All Jaffee "was an idea we proposed tongue-in-cheek. Many of the satirical ideas we propose become a reality. It was an amusing article," he said. "It was the kind of article our readers have come to expect. They are used to the absurd."

Asked if he thought the Goldwater proposal is absurd, Feldstein chuckled and said, "Yes, I think it is absurd."
Love Is...
The Baptists Student Union will present Len Sebested as guest speaker at Muir Hall tonight at 7. Sebested’s speech, “Love Is...”, will deal with love and relationships.

Cutting and Reining
The general meeting of the Cutting and Reining Club will be held in Ag 221 at 7 p.m. tonight.

Poly Pyrotechnics
At the general meeting of Poly Pyrotechnics, the group will discuss plans for Poly Royal, smoke alarm sales and CPR classes. The Pyrotechnics will meet in Science A12 Friday at 4 p.m.

Sweetheart Ball
There will be a Sweetheart Ball for the developmentally disabled in the San Luis Obispo Recreation Center Friday from 6-8 p.m. All are invited to attend, and cost is 50 cents.

OH Club
The Ornamental Hor­
tonight at 7:30 in Ag

Mustang Dance Team
Mustang Dance Team Today in the UU Plaza, the Mustang Dance Team will perform to Devo’s “Whip It” and “Cold War” at 11 a.m. The team will also perform at halftime during the men’s basketball game on Feb. 28.

GSU Dinner Party
The Gay Students Union will host a dinner party to give its members the chance to meet with members of the Metropolitan Community Church. Those who attend should bring a dish. The event will be at 2117 B Broad Street on Feb. 21 at 7:30 p.m.

Pre-Law Club
Scott Radovich of the San Luis Obispo Legal Clinic will speak Feb. 19 on legal opportunities, law school, and bar exam, and will answer questions about law in general. The free speech will be in Ag 227 at 7 p.m.

Love Carefully
As part of “Love Carefully Week,” the Health Center will provide information tables in the UU Plaza on Tuesday, Wednesday and Thursday next week, as well as a sex­uality workshop from 11:­12:30 p.m. in UU 219, and birth control workshops, Tuesday from 11:12-30 p.m. and 2:30-3:30 p.m. in the Health Center conference room.

Triathlon
Start training now for the CAHPERD Triathlon set for March 1 at 9 a.m. at Sinsheimer Park. Included will be a half-mile swim, a 17.5 mile ride and a 4.6 mile run. The first 120 entries will be accepted. En­try forms are available at the Union, the PE office and local sports stores. For more information, call Carmen at 543-2876.

Poly alcohol rule stretched for some

From page 1

Larry Voss, executive assistant to the president, defines "benefit to the university" as public relations, and development functions. He added that each request will be reviewed on an individual basis by the president or Dean Andrews.

This means that campus clubs and fraternal organizations can submit requests, but according to Voss it will not be easy to get them approved. "Unless organization members were 21 or older, chances are it wouldn't be approved," said Voss.

Voss explained that the approval of advancement and development functions lies in the hands of Executive Vice President Dale Andrews. This means that deans and others who wish to entertain, and serve alcoholic beverages in the alumni house for the functions mentioned above must receive Andrews' "OK" first. When asked if any activity in which alcohol was served, outside of the ones the president hosted, had occurred, Andrews replied, "So far as I know there hasn't been an activity which the president didn't host."

There are dissenting views, however. Professor of agricultural engineering, Joe Glass stated his opinion on the recent CAM change. "I don't agree with it. The university should provide a challenge to bring out the very best in a person, putting alcohol on campus hurts this."

Audience assails publisher's opinions

From page 6

automobile, said Marchand, "shaped the market" for suburban ex-pansion. The market, Marchand claims, is not something to be filled, but something that is created by the policies of corporations and their investment decisions. "In other words, it's not as though the market is something in an empireholm out there in the sky. It isn't really the heavens God," he said.

Greater public voice in corporate decisions Marchand said can be achieved through federal manipulation of favorable tax structures and the use of federal spending. "Federal spend­ing," explained Marchand, "is the single major source of allocating capital in our economy."

The public should demand consideration from business, because "what gets made, Exxon is not necessarily good for the rest of us."

Mansard called "free enterprise" one of "the great cliches that mangle phrases in the American economy" when defending present practices. Marchand added that despite what economist Milton Friedman may think, "we have never had a laissez-faire economy in American history."

The most recent issue of Mother Jones mentioned the possible return of internal security committees in the Senate, and the fact that Mother Jones had been named as a possible target for senate investigations.

"I think that we at Mother Jones agree with a lot of other people that the well-being of our country requires a continual, high level of criticism, of self-criticism. That's called the critical posture on major national questions is perhaps one of great patriotic duties that private citizens ought to be fulfilling," Marchand said debate concerning new social issues should be encouraged. Therefore, I think the genuinely scur­rious intention to label some points of view as "un­American" is a way of scar­ing off critics of the people who hold power."

He said that "at least some of the people associated with Reagan are prepared, or have indicated they are prepared, to use that kind of strategy."

Marchand said Mother Jones has been named in "several quarters" as an organization that should be investigated by the revived House Un-American Activities Committee; or that the "hegemony and bornagain McCarthy committee," now called the Senate Sub-Committee on Internal Security and Ter­rorism.

About Your Future!

We do both your and ours. Ford Aerospace & Communications Corporation, located in Palo Alto, California, has a broad capability in space and terrestrial communications systems and services and in the development of systems and equipment to transmit information and data. We are involved in spacecraft propulsion, composite materials, product design, electronic mechanical packaging, mass properties, lightweight aerospace structures. BS, MS, PhD - ME

Computer Science

- Software Engineer, or Engineering and Science.
- BS or MS: Areas of specialization include computer networking, data base manage­ment, microprocessor design and automation aides, image processing, operating systems, systems architecture, test and diagnostic software. Languages employed are structured FORTRAN, C, ALGOL, PASCAL. Work on large-scale computers, minis and minis in HICK's assembly language. BS, MS, PhD - EE

Mechanical Engineering

- Mechanical Engineer - Integration and test, special purpose computer software products, solid state design, electronic mechanical packaging, mass properties, lightweight aerospace structures. BS, MS, PhD - ME

Sunday. Poly will play a set to take on a team of trip, Poly has been scheduled in a noon double header at San Luis Obispo Stadium. If the wet weather continues, the game might be moved to Poly Field on campus.

Cal Poly opened the scoring in the third inning as Ricki picked up a RBH ground out and Gerber beat out a run-scoring infield single. Tim Traynham and Dennis Ferdig opened the inning with walks off of Fresno ace Tony Hernandez who finished last season with a 12-2 record and a 2.74 ERA.

Pots sacrificed the two runners back to third and Kirby followed with their run-scoring efforts. Gerber moved to second on a wild pitch and then to third on a throwing error by the Fresno catcher on the same play. With two out, Kirby gutted out ending the Mustang threat.

The Fresno Bulldogs came right back in the top of the fourth to score two runs off of Poly starter Pete Delena. Silva hung in there before giving up a two out run-scoring single to Compagno. The Mustangs scored two runs in the top of the fifth inning giving the Cal Poly club a 3-3 tie. Catcher Peyton hit a 2-run HR off of Poly reliever Steve Compagno.

Binnie, who posted a 6-2 mark last season and a 3.47 ERA, felt good about his performance but he would love to have his fourth inning pitching back.

"We were working hard for today's game," he said. "I pitched all right except for the one home run. I wish I had the pitch back." Kirby's big hit in the Fresno game was a pleasant surprise for both Kirby and coach Harr. Last season, Kirby carried a 240 batting average with no home runs and only 12 RBH.

"Coach Harr has everybody on the team lifting weights," Kirby said. "We have been working hard since September and the coach has convinced us that weight training is an asset." Kirby's big hit in the Fresno game was a pleasant surprise for both Kirby and coach Harr. Last season, Kirby carried a 240 batting average with no home runs and only 12 RBH.

"Coach Harr has everybody on the team lifting weights," Kirby said. "We have been working hard since September and the coach has convinced us that weight training is an asset." "I am glad that he (Kirby) hit that home run," coach Harr said. "He has been pumping the weights hard and it looks like he has paid off.

"We played good defense," said Kirby. "Holding Fresno to three runs on this field is good."

Shugart Associates

Will be on campus
Wednesday, February 18

Electronic Engineers
Analog/Digital, Microprocessors
Mechanical Engineers
Small Mechanism Design/Development

Quality Control Engineers

The company is dynamic, the growth opportunities are simply great. That's the only way to describe Shugart Associates in Sunnyvale, the phenomenal leader in Rotating Memory Systems. If you're ready to kick off your career in this type of environment, then sign up now in the Career Planning and Placement Center. We are proud to be an affirmative action employer m/f.

Poly plays first league net match

Coach Mike Wilton's Cal Poly SLO men's volleyball team starts play in its new conference - the Western Collegiate Volleyball Conference - with a road game against UC Riverside.

The Mustangs are coming off a win over Fresno State, 15-6, 15-2 and 15-5 to run their record to 8-3. Cal Poly visits UC Riverside, the Highlanders, who have a 2-0 dual record coming into the WCVVC opener. UC R has won over Pacific Christian College and San Bernadino Valley College in its early season matches, The Highlanders are coached by Sue Gozansky, who always does a good job," said Wilton. "Riverside always has a real scrappy club.”

Wilton said he figures the WCVVC race to be a battle between the Mustangs and Cal State Northridge, which has split with Cal Poly during two tourname­ ment meetings. The two teams will play for the first time in conference play March 13 in San Luis Obispo.

After travelling to River­ side, the Mustangs return home Feb. 25 to host UC Santa Barbara, one of the nation's top teams, in the Main Gym at 7:30 p.m.
Blevins, Macedo lead rodeo effort

Field Blevins and Karen Macedo were the only team point earners as the Cal Poly men's and women's rodeo teams finished back in the pack at the first Western Region rodeo of the 1981 intercollegiate season.

Central Arizona College won the men's crown with 365 points, edging defending regional champion Hartnell College of Salinas with 361 points. Cal Poly finished sixth with 80 points.

In women's action, Cochise College with 160 points nudged University of Arizona with 125 points. Cal Poly finished fifth with 100 points.

Blevins, a senior from Los Angeles, was the only Cal Poly winner at the rodeo taking the 1980-81 season with a winning effort of 10.2 seconds.

Macedo, a junior from Tulare, finished second in the second running event, behind Michelle Bergard of Cal Poly Pomona.

In the first go, Blevins turned in a fine 17.97 clock during the women's standings advance to the national finals in June.

Poly wrestlers compete at Biola Tournament

The Cal Poly wrestlers will be among nine teams competing this Saturday in the Biola College Invitational tournament at La Mirada.

Cal Poly will enter two wrestlers in each of the 10 weight classes. At 118 pounds, the Mustangs will have freshman Larry Nicholson (3-0) and sophomore Alfred Gutierrez (0-0), a sophomore transfer from College of the Sequoias; at 125 pounds, junior Mike Baffurs (12-4) and sophomore Benji Gutierrez (0-0); at 133 pounds, Chris Delong (6-6-1) will pair with junior Lee Goldsmith (10-0); 142 pounds will have sophomores Jeff Barksdale (11-3) and junior Chris Cain (4-1-1), Louis Montano (13-4) will team with Russ Miyoshi (2-1) at 150; at 158 pounds, the Mustangs will have a strong contender.

Cal Poly's best event will be the 1981 intercollegiate season.

Sports

Cal Poly football wide receiver Bob Martin has been listed as an alternate to appear in the "You've Got to be a Football Hero 60-Yard Dash" this Friday night in the Los Angeles Times Indoor Track Meet at the Forum in Inglewood.

Martin will compete in the race if one of the four scheduled participants should decide not to. Currently scheduled to compete in the ‘Football Hero’ dash are Nebraska's Jarvis Redwine, the nation's fifth leading rusher in 1980; Stanford's Ken Margerum, USC's Kevin Williams and Kansas' Kerwin Bell, the 13th leading rusher in the nation in 90.

Martin led Coach Joe Harper's Mustangs to its first NCAA Division II football national championship, scoring three touchdowns which included a 42-yard punt return as well as pass receptions of 58 and 33 yards. The senior from Orange was ranked fifth in the nation among Division II punt returners and kickoff returners.

During the 1980 season, Martin became Cal Poly's single-season and career receiving leader, with 43 catches for 857 yards in the regular season for a total of 117 catches and 2,649 yards. His nine receiving touchdowns in 1980 gave him a total of 19 for his career. He returned 22 points last season for 292 yards (13.3 average) and two touchdowns, and carried back 21 kickoffs for 844 yards (23.9 average) with no scores.

He tied with tailback Louis Jackson for the team lead in scoring during the regular season with 72 points, but scored a whopping five touchdowns during the three-game Division II playoffs for 30 points.

Eastman Kodak Co. and the American Football Coaches Association named Martin to their All-America team for 1980 in the college division.

Electrical and Mechanical Engineers

Business Graduates:

Follow the DataProducts path...

...to success, to professional growth, and to career contentment.

DataProducts is the largest independent printer manufacturer in the world. Our divisions in SANGIJOE and WOODLAND HILLS offer excellent career opportunities in:

- Product Design & Development
- Component Engineering
- Advanced Development
- Business

We are a company with a history of solid growth and offer you the opportunity of growing with us. And, with our broad range of sophisticated products, you'll be assured of continual technical challenges.

If you're an engineering or business student who is interested in a bright future with a company that's #1 in its field, please sign up for an interview at some nearby office. Company representatives will be on campus Tuesday, March 10th Wednesday, March 11th or send your resume:

- Susan Chamberlain
- Corporate College Relations
- DataProducts Corporation
- 6200 Canoga Avenue
- Woodland Hills, CA 91353

So far so good.

Ronald Reagan seems to be making a lot of new friends in Washington these days. Democrats and Republicans alike say they like him, and in all they can do against his administration. Even House Speaker Tip O'Neill says he'll do everything he can to help Reagan succeed in Washington. Solving the nation's problems should be Congress' top concern, O'Neill says.

But there's a catch — O'Neill has also announced he will not retire from Congress until another Democrat is elected to the White House. It makes one wonder: If O'Neill is so committed to putting a Democrat back in the White House, how much do we expect him to really cooperate with Reagan in the coming four years?

O'Neill's statements illustrate a basic flaw in the American political system:

The two-term presidency. At present, of course, a president can be elected to two four-year terms of office. This current system, however, creates many problems. The president acts like a monarch, and Congress and the American people as a whole lose interest. Consider O'Neill. How can we expect him to help Reagan pass any legislation or get along with Congress if it might help him win re-election? O'Neill, as well as anyone else, that it will be hard to elect a Democrat in 1984 if inflation and unemployment are under control and Americans are proud of their president.

Why, then, should he do anything to seek these? The situation was similar in 1976 when then-House Speaker Carl Albert announced he would do whatever he could to prevent Gerald Ford's election.

However, no candidates were elected to one-term office of say, six years, they could be more effective in their job. Democrats in the House and Senate would be much more likely to cooperate with Reagan and for America's best interests.

President Carter's wishy-washiness on issues such as the economy, defense spending and the neutron bomb show further evidence of political game-playing.

We must also ask ourselves: What do we expect a president to do, lead the nation or run for re-election? Think about it. What would President Reagan be doing by the time the election, kicking around in Seattle or working to free our hostages in Iran?

Dave Brackney is a junior journalism major and Mustang Daily staff writer.
