Solar power debated, questioned at CSUC meeting

By Cynthia Barakatt

The feasibility of solar energy in campus facilities as a possible means of cutting costs and conserving energy was thrown into doubt by a committee of the CSUC Board of Trustees when it met Wednesday at Cal Poly.

As part of a regular schedule in which the trustees' committees meet at different campuses, the Committee on Campus Planning, Buildings and Grounds met in Room 220 of the University Union yesterday morning.

A luncheon at Vista Grande Restaurant and a tour of the campus was conducted for the committee members in the after-
noon.

At the meeting, the committee members listened to a report about the operation of solar water heating systems in two residence halls at Humboldt and three residence halls on the San Jose campus.

The committee questioned the economics of the two operating solar facilities and six others planned for other campuses. Trustee Michael Peevey voiced concern that the solar heating installation may not achieve the expected savings estimated in the report.

According to the report, the facilities at Humboldt are estimated to save $397,391 over 15 years, allowing for a 15 percent annual fuel escalation cost. The report estimates that it will take 14 years of using the solar system to make up this cost.

However, in the first year, the actual avoidance cost by using solar energy at Humboldt amounted to $7,451, roughly one third of what it should have been to achieve the total savings expected over 15 years, said Peevey.

The other plans for solar heating are scheduled for heating of water at three residence halls, the dining hall and the indoor swimming pool at San Francisco State and solar heating of water in the physical education complex at Cal Poly Pomona.

All are expected to be operating by 1982.

The report contained no plans for solar facilities at Cal Poly.

Taking action on business items, the committee approved a resolution to remove architectural barriers to the physically handicapped at Cal Poly and four other campuses. At Cal Poly, this will include the provision of two new elevators suited for the handicapped.

The committee also appointed the architectural firm of Arnedi/Mosher-Grant/Pedersen/Phillips of Santa Barbara to design two elevators for the San Luis Obispo campus.

Computer checkout coming to library

By Maria Casas

Remember the last time you went to a supermarket or department store and the cashier scanned over the price of the item, with what resembled a pen, automatically registering information into a machine? Well, no longer will individuals checking out books from the library have a long wait while a member of the staff manually imprints your identification card on each book's card. This is computer checkout, as is driving at Cal Poly.

The pilot project for the check-out system was at Sacramento, but it is being implemented at 19 UC and state campuses. Currently, Los Angeles, San Jose, San Diego, Long Beach, and San Francisco are using the system.

Here at Cal Poly the installation of the new system will entail that bar stickers be attached to the back of student faculty identification cards. This sticker will be placed on the card by a member of the library staff when an individual goes to check-out a book for the first time through the new system.

The librarian will scan the student's sticker with a light pen which then feeds the identification name and number of the student on to a micro processor disc which stores the information.

Cal Poly to stay in student lobbying organization

By Mary McAlister

Tension has eased between the ASI and California State Students' Association, and Cal Poly will stay in the lobbying organization which is currently working on problems on both the state and national level, according to Dennis Hawk, CSSA representative.

Hawk said that the issues which sparked movements to leave the organization have essentially been resolved, and the ASI will surely stay in the organization.

He explained that the group passed a resolution which allows by discussion of social and cultural issues of student concern and announced that legislative advocate Steve Glazer will resign in June.

The third issue, more in-house communication, is being dealt with as Hawk and others are designing a resolution which will stress working with campus presidents and Chancellor before addressing the state legislature.

Hawk was pleased that Cal Poly will remain in the organization.

"It is a good organization because it keeps us abreast of national and state issues that can affect students," he explained.

Most of the state and national issues currently being dealt with in the group revolve around budget cuts by Governor Brown and President Reagan.

On the state level, the Trustees requested $1.1 billion for the CSUC system and received only $965.2 million in the governor's budget.

Hawk noted that this is only a 0.7 percent increase over last year and would not be sufficient to cover inflation.

The CSSA has addressed the issue by setting lobbying priorities and proposing budget adjustments.

The highest priority item for the CSSA, Hawk noted, is the Student Affirmative Action Program which was given only $500,000 and reduced from the budget.

He said the CSSA is lobbying intensely to keep the program active even at a reduced rate.

Another suggestion for easing the budget strain is a $600 increase in nonresident tuition fees which would most affect foreign students who must pay the fees throughout their college career.

The CSSA is attempting to soften the shock of this plan by proposing a "grandfather" clause which would exempt currently enrolled students from the increase.

Most importantly, Hawk noted, the CSSA is working to avoid tuition for California residents.

The CSSA is also dealing with collective bargaining on the state level as they were given $29,000 from the state to study the effects of faculty collective bargaining on students.

Nationally, the organization is sending nine members to Washington, D.C. Feb. 28-29 to lobby legislators on issues relating to Reagan's proposed budget cuts.

The Reagan Administration has proposed an $800 million cut in federal loans which will affect over 150,000 students nationwide.

Additionally, Hawk explained, the Administration is pushing to eliminate all food stamp benefits for students. Currently, students who work twenty hours a week or more may receive food stamps.

Hawk added that the CSSA is also concerned about a bill by Senator Hatch of the Senate Labor and Human Resources Committee which proposes a subminimum wage of 75 percent of the standard minimum wage for those twenty and younger.

SLO council-Filling void at city hall

By Dave Brackney

If elected to San Luis Obispo's city council March 3, Sylvia Drucker said she would fill an important void at city hall.

"I see a need in the community that I think I can fill by reason of experience and commitment," the 42-year-old city planning commissioner said recently.

"The need people on the city council who can take a balanced and in-depth approach to solving problems and who have the ability to solve them rather than just talk about them."
Two more disappear in Atlanta

ATLANTA (AP)—The disappearances of two more black boys prompted police searches in Atlanta neighborhoods Wednesday, as prospects dimmed for the recovery of all the missing youngsters.

About 1,700 people are reported missing in Atlanta each year, Brown said, and 80 percent are found in 24 hours. Reports of missing children—even habitual runaways—have lately been received with wide attention because of the continued unsolved killings of children.

Dempster D. Williams, 10, of southwest Atlanta, was last seen at his home at 8 p.m. and was reported missing within hours, police said.

Thermal Heard, 14, of northwest Atlanta, was last seen at 3:30 p.m. at a downtown park trying to catch a bus to suburban College Park. He was reported missing Wednesday.

City to file suit against landlords

BERKELEY (AP)—The city of Berkeley on Thursday planned to file a lawsuit against landlords who are financially crippling the rent control board by refusing to register their rental units.

Landlords claim increase ceiling is not adequate and also have protested fees imposed on them if they want tested in court.

Richard Illgen, rent board chairman, said the city will fail to register their rental units.

He said the city's 5 percent maximum rent increase "was voted by referendum, and it can only be ceiling "was voted by referendum, and it can only be increased above the ceiling.

Public Safety Commissioner Lee Brown said the cases of the two black boys who disappeared Tuesday were being handled by the missing persons division and had not been turned over to the special unit set up in the other cases.

Inflation slows to 9.1 percent

WASHINGTON (AP)—Inflation slowed to a 9.1 percent annual rate in January, the lowest level since last summer, as rare declines in food and house prices helped offset new bursts in energy costs, the government reported Wednesday.

The most unusual development was a 0.4 percent drop in house prices, the first decline in five years and the largest since 1987.

However, the Reagan administration, in its latest pitch for the president's economic program, said a reliance on double-digit inflation would be short-lived and consumers can expect steeper price increases in the months ahead—even for food and housing.

President Reagan's budget director, David A. Stockman, said the report "indicates that we're still in a dangerous double-digit inflation environment in this country" and underscores the need for "deep budget cuts" the administration is proposing.

Eagle's member fined for drugs

SANTA MONICA, Calif. (AP)—Rock star Don Henley of the Eagles has been fined $2,500 and put on two years' probation after pleading no contest to a charge alleging he gave drugs to a 16-year-old girl found nude in his home last fall.

Superior Court Judge Edward Rafeedie sentenced Henley Tuesday on the misdemeanor charge of conspiracy to distribute drugs.

Henley Tuesday on the misdemeanor charge of conspiracy to distribute drugs.

"We haven't found a fly since Jan. 22 and no larvae since mid-January," said Hans Van Nees, deputy director of the California Department of Food and Agriculture.

Job freeze ruled constitutional

WASHINGTON (AP)—U.S. District Judge Charles R. Richey ruled Wednesday that President Reagan's federal hiring freeze is "neither unconstitutional nor contrary to law," meaning that even those promised employment before the ban was invoked on inauguration Day are out of luck.

Richey said that the "20,000-odd" persons who received acceptance letters from federal agencies between the election and Jan. 20 were not legally hired, since Reagan's executive order was retroactive to Nov. 5.

He and others argued that people quit jobs, sold homes and moved families after receiving con­ tract offer good Feb. 20-28, 1981

State to sue over quarantine

SAN FRANCISCO (AP) — Faced with a Texas quarantine of California's fly-threatened produce, state officials are threatening court action to discourage other states from following Texas' action.

California's eight-month battle to wipe out the Mediterranean fruit fly in the Santa Clara Valley triggered a quarantine order this week by Texas Agriculture Commissioner Reagan Brown.

"The Mediterranean fruit fly is a serious threat to the Texas fresh produce industry. I couldn't live with myself if we didn't do something and lost the Rio Grande Valley," Brown said Wednesday.

"We haven't found a fly since Jan. 22 and no larvae since mid-January," said Hans Van Nees, deputy director of the California Department of Food and Agriculture.

Newsline
Vice President Nick Forestiere. Jensen, Campus Liberation tonight at 6 will feature a debate on the theme "Experiencing New- of April celebrating the festive weekend at the end dy Eckert was crowned by the Campus Planning their ideas. After approval, any plan must be approved by the Campus Planning Commission whose members include President, Warren Baker and the campus architect. All pro- jects must coincide with the master plan, an overview of development to oc- cur in the next 20 years.

The master plan is revis- ed every five years, and is approved by the campus. The current plan calls for a development of California Boulevard into campus and the conversion of Drex- ter library into a unified art department and more architecture labs and classrooms. The plans for this conversion have already been drawn up and the project may be com- pleted by August 1981 if the over two and a half million dollars in funds are appropriated.

The money used for stu- dent projects comes from campus clubs. Clubs use the campus, Drake said, so they pay to improve it by giving 10 percent of their profits to the campus improvement fund. Current- ly, there is $2,000 in the fund.

Next week, a proposal to build a bridge from the se- cond floor of the agriculture building to the sidewalk will come up for approval. Any individual or group who feel they may have a useful project is invited to bring it to the Student Planning Commission. The Commission is made up of Drake, ASI President, Willis Huff, a senator representative, and a representative from each school council.

Another improvement being made is the con- struction of a west campus plaza between the architec- ture and business buildings. When buildings are needed, Drake said, it is hard to get money from the state to improve areas around the buildings.

Drake said having a representative from each school is important, because, although they don't know much about ar- chitecture, they can get in- volved and see where the money is going. Drake is student representative to the Planning Commission.

Drake said calling a representative from each school is important, because, although they don't know much about ar- chitecture, they can get in- volved and see where the money is going. Drake is student representative to the Planning Commission.

Prof to speak on U.S. liberties By Cynthia Barakatt A crowd of approximate- ly 600 cheered Tuesday night as former Cal Poly president Can- dy Eckert was crowned queen of Poly Royal 1981. Eckert, a junior com- puter science major, spon- sored by the Interface Club, will preside over the festival at the end of April celebrating the theme "Experiencing New Frontiers."

Four princesses were selected to assist Eckert in her royal duties. First runner-up was Ida Runn, a senior in agricultural business management, sponsored by Alpha Zeta, the agricultural honor fraterni- ty. Second runner-up, sponsored by the Farm Management Club, was senior biological science major Jane Dresselhaus. The third member chosen as royalty was Linda Leolum, a business major sponsored by the Society for the Advancement of Management.

Master of ceremonies of the event was Christopher Nance, a comedian who has worked with Frank Sinatra and other prominent enter- tainers. His constant wit- icisms kept the audience laughing.

Judges for the pageant were Ron Braam, publicity chairman for Poly Royal, Jeffrey Whitehead, special events co- ordinator, Paul Johnson, from the music board of control, Don McFabe, retired unit. ing child development and home economics, and Sandy Schultz, representing the residence halls. Honored judges were former Cal Poly president Dr. Robert E. Kennedy and his wife, Dr. Lorraine Kennedy, and Poly Royal President Don McFabe, public infor- mation officer for Cal Poly and Beth Riley, Poly Royal princess from 1979.

The spring portion of the program's series, which is sponsored by Cal Poly's School of Communicative Arts and Humanities, will begin in early April with the theme "Happiness" as its unifying theme.

By Lisa Cheves Staff writer Because the Student Planning Commission's role on campus is relatively unknown by students, a show and tell show depicting some of the spots on campus needing attention was developed by last year's commission. This year, though, groups know what's happen- ing.

Harry Drake, vice presi- dent of Scarab and member of the Planning Commission, said they are trying to let people know there is money available to make changes on campus.

The commission's goal is to motivate people to do little projects that need do. Drake said, that for groups looking for things to do, the commission is the place to come with their ideas. After approval, any plan must be approved by the Campus Planning Commission.

Mike Ecker, former Cal Poly president, is a former Army ar- tillery officer. "Happiness" as its unify-uner will be the speaker for the Advancement of Arts and Humanities series lecture on Thursday March 5. With "Liberty in America" as his theme, Dr. Gooden will present his remarks at 11 a.m. in Room 220 of the Julian A. McFabe University Union. Admission will be free and the public is invited to join members of the university campus community in at- tending.

Dr. Gooden, who holds degrees from University of California and Santa Bara, is a former Army ar- my officer. He is expected to focus his presentation on the balance between the in- dividual and society with particular attention to the contributions of Puritan, Enlightenment, Jackson- ian, and Transcendental- ist thought. He is also expected to discuss how a clearer ap- preciation of these fields of thought can help to untangle the present conflicts in America that have been described by other speakers in the winter por- tion of the campus lecture series.

The spring portion of the program's series, which is sponsored by Cal Poly's School of Communicative Arts and Humanities, will begin in early April with the theme "Happiness" as its unifying theme.
NEW DIRECT FORMULA ENTRY SCIENTIFIC

Safe Guard™ memory. Edit, correct or test your formula without using a pencil. Recall at the touch of a key.

Our Price $4195

The 5101.
The practically advanced calculator that speaks the language of science. With direct formula entry and roll over display for entering up to 40 steps. 64-character dot matrix alphanumeric LCD displays in three modes: M.R. COMP & STD. Can compute up to ten variables. Safe Guard™ memory. Edit, correct or test your formula without using a pencil. Recall at the touch of a key.

Our Price $2995

One-act-play
Cal Poly's Studio Theatre and honorary dramatics society Alpha Psi Omega will present a one-act farce by Anton Chekhov, "The Brute," on Friday, March 6 at 8 p.m. Cost is $1, and seating is limited, so those interested in watching the performance are urged to arrive early. The play will be in Room 212 of the H.P. Davidson Music Center.

Student senate
Anyone interested in filling an opening for student senator from the School of Science and Math for the rest of the year can call Paul at 544-1209 or leave a note in box 36 in the Activities Planning Center.

Job seeking
The Recreation Administration Club will sponsor a job-seeking skills seminar for rec majors and members of CFIRS and CAPHERD on March 4 from 8 to 10 p.m. in Science North, 215. Cost is $2 and includes food provided at the seminar. For details call 543-0516.

ASI senator
The council for the School of Architecture and Environmental Design is now taking applications for those interested in becoming a senator for the school. For details, call 544-2421.

Curing and reining
The Cutting and Feeding club will meet at the horse unit barns at 7 p.m. on Tuesday.

AMA meeting
The Poly chapter of the American Marketing Association urges its members to attend the next few meetings, since nominations will be taken for officer elections. Nominations and elections will be March 10. There will also be guest speakers and elections will be March 10.

Parks & recreation
The California Parks and Recreation Society will meet today at 11 a.m. in Science E-47. Guest speaker will be County Parks and Beaches Director Duane Leh.

Ag forum
"Minimum Tillage For Dryland Grain Production" will be the topic of an agriculture forum to be given twice on March 3 — at 11 a.m. and again at 7 p.m.

Women's soccer
The Women's Soccer Club of Cal Poly will play Long Beach State on Saturday at 1 p.m. at Cuesta College field. Admission is free.

Nuclear debate
Speakers Forum and the PAC will sponsor a debate on the safety of Diablo Canyon nuclear power plant in Chumash Auditorium on March 7 at 8 p.m. Price is $2 for students and $3 for the public in advance, and $1 Poly Wheelmen
The Wheelmen will sponsor a ride to Lopez Lake on Saturday. The group will meet at 7 a.m. at the Poly swimming pool. Admission is free.

It wasn't your usual basketball road trip.
It must have made tourists on the Pacific Coast Highway rub their eyes and look twice or three times last week. Sixteen members of Cal State Fullerton's Lambda Chi Alpha Fraternity dribbled basketballs up the highway in a 500-mile dribble marathon to help raise money for the American Cancer Society.
The dribblers began at noon Tuesday in Orange County, dribbled alongside Highway 1, and made their only rest stop in San Luis Obispo at the local Lambda Chi Alpha house for two hours.
From San Luis Obispo they headed north on Highway 1 to arrive at San Jose State University. On schedule, their arrival was just in time for the Fullerton State San Jose basketball game, to present the game ball to Fullerton's coach.

Three newsworthy events:

1. "The dribbling marathon was our own idea," said Dengler. "We did it for the fun, challenge and as something constructive to help people. It's better than partying and it pulls our fraternity closer together. It was a great experience."

2. "The Poly chapter of the American Marketing Association urges its members to attend the next meeting, since nominations will be taken for officer elections. Nominations and elections will be March 10. There will also be guest speakers and elections will be March 10.

3. "The Poly chapter of the American Marketing Association urges its members to attend the next meeting, since nominations will be taken for officer elections. Nominations and elections will be March 10. There will also be guest speakers and elections will be March 10.

Birth control should be men's responsibility, too

BY THERESA LIKENAS
Staff Writer

It takes two to tango, and two to prevent an unwanted pregnancy, according to several members of the Cal Poly Health Center staff.

Traditionally, birth control has been left up to the woman. However, health educator Jeanette Reese said that part of the reason men have not taken responsibility for contraception is firmly rooted in society and in the methods themselves.

"Socially men have been kept out of birth control, pregnancy, and child-rearing, and technologically, the techniques are made for women for the most part," Reese said. "It's a real myth that we have this perception that men don't care and that it's the woman's problem."

She said studies have shown that a majority of men do care about birth control and do actually share many of the same concerns women have regarding the methods. According to Reese males accounted for 60 percent of those attending a sponsored birth control talk.

Reese also cited a study that when a man is in favor of a particular method but his female partner is not, the method is more effective than when the woman is in favor of the method and the man is not.

"But when both are sold on a particular method," said Reese, "it's effectiveness rate has its greatest potential."

She said it is important for both partners to be responsible, but added that a man can play "an instrumental role in the birth control process, whether it be by reminding his partner to take her pill, or to use her diaphragm, or by supporting her financially in terms of the cost of birth control."

"The most important thing men can do is to be supportive of the birth control process," said Reese. "Men have to realize that by not being supportive, they can undermine its effectiveness."

She said that birth control is a learned, not a natural process and adding that by being supportive, men can enhance this learning.

According to Reese, "contraceptive vigilence" is essential to prevent unwanted pregnancies and this means recognizing the possibility and implications of pregnancy, obtaining birth control, keeping it available, and using it consistently and regularly. Ron Brannen, the first male peer educator at the Health Center, said that it's important for men to take the initiative in the birth control process.

"The main thing the man can do," he added, "is to be prepared and to be the one to bring up the subject of birth control."

Brannen said many of the barriers to effective use of birth control arise due to poor communication.

"It's funny," he said, "people won't talk to each other about birth control, but they will have sex."

Reese agreed, stating that communication is an important part of any relationship and added that this means discussing feelings on sex as well as birth control, and doing so before things get "hot and heavy."

"Don't go into the bedroom before you've talked about birth control in the living room," she added.

According to Brannen, many men are really interested in learning about birth control.

"A lot of it is they've never been told," he said. "Many don't even know what a pap smear is."

Dr. Andrea Brauninger of the La Femme Clinic said she believes it is important for men to be supportive and that it can definitely help if the male is in favor of the chosen method, but added that she felt that "the ultimate decision in the woman's -- "After all, it is her body," she added.

"I think that the man should be open-minded about whichever method Please see page 6

UBSAC sponsors relations seminar

BY VICKY WIGGINGTON
Staff Writer

The building of relations between black faculty and black students at Cal Poly was the theme for a seminar held Saturday in the Mustang Lounge.

The seminar, sponsored by the United Black Students Awareness Council, was part of the ongoing Black Heritage Month activities.

A small turnout of approximately 25 people turned the planned symposium into more of an informal "rap session," said Donna Brown, Brown, advisor to UBSAC and recruiting coordinator for the on-campus interview programs. She said though the turnout was small, the seminar was not a disappointment.

Brown was pleased with discussion on how to make UBSAC more helpful to incoming black students. She said UBSAC members would be working to help these new students with any cultural shock they may face on entering Cal Poly. UBSAC members also discussed ways in which the group could reach out more effectively to faculty, and made plans to encourage more faculty participation in UBSAC activities.

Speakers at the seminar included Charles Hick from the Career Development Center, who spoke on finding a career and a poetry reading by George Carter, UBSAC president, said Brown.

Also present at the seminar were James Patton and Victor Churchill candidates for mayor of San Luis Obispo in the upcoming election. Patton and Churchill spoke informally on a one-on-one basis with students and faculty, discussing their platforms and answering questions, Brown said.

The leadership qualities essential for professional success in home economics-related careers was the focus of a weekend workshop Feb. 20, 21 and 22 sponsored by the Cal Poly chapter of Phi Upsilon Omicron.

Phi U is a national home economics professional honor society. The Cal Poly club belongs to District X, a regional division which includes eight college and seven alumni chapters in California, Arizona and Hawaii.

Approximately 20 Phi U representatives from other clubs in the district attended the biennial workshop, along with nearly 40 Cal Poly Phi U members, said chapter President Terry Asman.

Students came from San Jose, Fresno, Los Angeles, along with nearly 40 Cal Poly Phi U members, said chapter President Terry Asman.

Students came from San Jose, Fresno, Los Angeles, and San Diego, and one even journeyed from Hawaii to share ideas and experiences during the three-day event.

Alumni members also participated in the workshops, Asman said. National Finance Chairman for Phi U Jean Baxter and Sharon McKenzie, District X Counselor, were among the guests, as was keynote speaker Em Rigs.

Rigs is national President for the American Home Economics Association and works as a public health administrator for the State Department of Education, according to Phi U Vice President and workshop coordinator Laura Nichols.

The theme of the weekend, "Outreach for Excellence," was the creation of Phi U Corresponding Secretary Lynell Dalphin, who "had a lot of input" into the program, Nichols said.

Workshop activities consisted primarily of social gatherings together Friday evening, speakers and a campus tour Saturday, and initiation and Founder's Day ceremonies Sunday.

Cal Poly faculty and staff members presented the Saturday workshops, which centered on various aspects of leadership, Asman said. Discussion topics ranged from communication and motivation to assertiveness and helping.

Saturday's luncheon in the faculty dining room featured Rigs as the guest speaker. She talked of careers and her humorous and colorful experiences in the field of home economics, according to Nichols.

Among Rigs' previous occupations were dress design in Chicago, teaching in Indiana and costume designing in New York, Nichols said.

Asman fielded the main point Rigs tried to communicate was that a background in home economics is food for various kinds of work. The health administrator stressed that one should not stay "boxed into home economics, Nichold said. Rigs encouraged the members to take risks, or what she called "delicious uncertainties," Nichols added.

The initiation of two members highlighted Sunday's program, which also included a Founder's Day ceremony honoring the original Phi U members. The organization dates back to 1909, Asman said.

Torming the weekend "successful," Asman noted the unifying effect the activities seemed to develop among the club's members. The workshop was the yearly "professional workshops project" for Phi U.

The home economics honor society is open to students who are second quarter sophomores or higher and are in the upper 36 percent of their class.

Home Ec workshop focuses on leadership

Preparation is the key to success in home economics, according to Home Economics Director for the American Home Economics Association Barbara Childress.

"People who are involved in the home economics department are in a position to teach young people about the importance of food," she said in the faculty dining room Thursday night. "They can show them how to improve their lives through care and colorful experiences in the field of home economics and child development.

"The organization dates back to 1909, Asman said. Nicholds said. Students who meet the requirements are invited to join Phi U after applying and being selected by the club members.

Cal Poly's chapter has about 60 members, Asman said. She added that the philosophy of Phi U is "to promote professionalism" in all aspects of home economics and child development.

Birth control workshop

From page 5

The woman chooses," said Brauninger. "And that a man should support effective use of whatever birth control method his partner chooses and should encourage her to go and have her regular medical exam."

She also said that "If a pregnancy does occur and the couple wants to terminate it, it is important that he (the male partner) be supportive both psychologically and financially."

Brauninger added that men have to be more accepting of condoms, presently the only method of birth control designed for men which is available in the United States, stating that this would be "the last break through in terms of male responsibility in birth control."

The leadership qualities essential for professional success in home economics-related careers was the focus of a weekend workshop Feb. 20, 21 and 22 sponsored by the Cal Poly chapter of Phi Upsilon Omicron.

Phi U is a national home economics professional honor society. The Cal Poly club belongs to District X, a regional division which includes eight college and seven alumni chapters in California, Arizona and Hawaii.

Approximately 20 Phi U representatives from other clubs in the district attended the biennial workshop, along with nearly 40 Cal Poly Phi U members, said chapter President Terry Asman.

Students came from San Jose, Fresno, Los Angeles, and San Diego, and one even journeyed from Hawaii to share ideas and experiences during the three-day event.

Alumni members also participated in the workshops, Asman said. National Finance Chairman for Phi U Jean Baxter and Sharon McKenzie, District X Counselor, were among the guests, as was keynote speaker Em Rigs.

Rigs is national President for the American Home Economics Association and works as a public health administrator for the State Department of Education, according to Phi U Vice President and workshop coordinator Laura Nichols.

Stress levels measured for coach’s master’s thesis

Darla Wilson’s physiograph machine monitors the heartbeats of coaches during their team’s games, to help discover the amount of stress involved in coaching college sports.

BY CYNTHIA BARAKATT

Past research has indicated there is stress associated with coaching athletics, and Cal Poly assistance women’s basketball coach Darla Wilson is trying to find out just how much.

For her master’s thesis in physical education, Wilson is measuring the psychological and physical stress levels of the four women and two men coaches in the Division II women’s basketball Southern California Athletic Association. By administering the Spielberger State Inventory, a 20-item questionnaire in which the coaches analyze their stress levels in different situations, and during games, Wilson hopes to measure how much anxiety coaches experience in competitive situations.

“It’s an educative step for coaches to understand levels of stress they are exposed to,” she said.

“Frequently we are oblivious to what is happening to us when we get in a situation that is stressful,” Wilson said.

She cited the occasion when former Ohio State football coach Woody Hayes struck a player in the last few minutes of a heated bowl game. Haye’s violent outburst is one example of a coach not being aware enough of his stress level to channel it constructively.

Wilson said her study consists of a self-analysis written by the coaches in a relaxed atmosphere. Then at the Cal Poly women’s home basketball games, she has the coaches’ heartbeats monitored by electrode transmitters which send signals to receivers in a physiograph in the gym to record the number heartbeats per minute.

The assistant coach said the situation corresponding to each period of heartbeats is monitored, so she can tell which situations produce more physical stress and under what circumstances a coach seems more relaxed.

She said that outside of the immediate situation, stress levels in each individual coach depends on other factors, such as general fitness level and previous relaxation training.

According to Wilson, she is also doing a mini-longitudinal study on Cal Poly women’s basketball coach Marilyn McNeil, to observe the reaction of a coach in all situations throughout the season.

McNeil said she thinks Wilson’s project is great and has no difficulties with being monitored at the games. She said that anything that leads to new information in the area of coaching is helpful.

Wilson said she is interested in comparing the various stress levels of the coaches with their team’s standing in the conference at the end of the season, to see if a relationship exists.

“In our society, winning is so ingrained that stress has suddenly become inherent in sport. I don’t know whether it’s really necessary,” she said.

The assistant coach called her work a “groundline” for future studies and said she would like to see a stress scale developed to coaches for competency.

“It’s sad that we don’t look more closely at coaches, especially those who work with kids and young adults,” Wilson said.

She said she would like to see such a stress scale become part of the criteria for hiring coaches in the future.

Cal Poly student Maggie Keyes (left) is bound for New York to compete in the Indoor Nationals this weekend. She was given the Broderick Award by Poly president Warren Baker for athletic and scholastic excellence.

### Poly women netters host Anteaters

First-year coach Bill Brown’s team opened the season with a loss to a strong University of San Diego team, 0-9, but then whitewashed Cal State Los Angeles, 9-0.

#### Last season the Anteaters of Irvine and Poly, 0-9, on the Mustang's home courts.

The women’s tennis team will try to raise its overall and league record above the .500 mark this weekend as it hosts UC Irvine on Saturday.

The match is scheduled to begin at 9:30 a.m. on the courts behind the main gym.

The probable ladder for Brown’s Mustangs includes singles Reese Weigandt, Nancy Edwards, Sheila Foley, Kristen Jakobsen, Page Wilkins and Liz Kobara. The doubles will be Weigandt-Edwards, Foley-Michelle Archuleta and Wilkins-Jakobsen.

#### Keyes bound for New York and Indoor Nationals meet

BY LISA CHEVES

Staff Writer

The challenge of improving herself as a runner and a competitor has kept Maggie Keyes a forerunner in women’s collegiate track for the last four years.

When will she stop running? “I want to run until my improvement stops,” she said.

To improve each year has been encouraging, she said, and she wants to continue until she reaches her full potential as a runner. She credits her successful career to very few injuries, and said she has been very fortunate.

Maggie is currently doing graduate work at Poly in liberal studies. She has three more quarters, at which time she will be a certified reading specialist. She said she would like to teach elementary school, but would take a job with a sports equipment producer because of the opportunities to travel and meet people.

Travel has been a main attraction to competing, said Maggie. She has competed in Colorado, New Mexico, Michigan, Tennessee, Ohio, Canada, Oregon, Washington, California, Europe, and will go to New York for the fifth time this week to compete in the TAC Indoor Nationals.

Maggie will be the only runner from Cal Poly competing in New York this Friday at the national event sponsored by the Athletic Congress. Since her eligibility to run track and field for Cal Poly expired, Maggie runs for Athletics West, a national club.

She said she knows a lot of people on the running circuit, so she has friends she can talk to at events like the nationals this week. She has reached the point in her career where she can pick the races she wants to compete in, she said.

When Maggie came to Poly from Tamalpais High School in Mill Valley, things were different. She said that four years ago, unless you were a state champion, you had to fend for yourself.

Despite a sometimes frustrating college track career, Maggie said she’s found she came to Cal Poly rather than UCLA or some other big school where she would have more competitors of her caliber. She said the atmosphere at Poly is low-key: “There’s not a lot of pressure to do really well,” she said, and she feels Poly has been a good building block for her growth as an athlete.

With special coaching, support from friends and the small community, and special attention, San Luis Oshio has been ideal for training, said Maggie.

When she was a freshman she faced many frustrations, such as a stress fracture and coaching and equipment difficulties. Women’s track uniforms consisted of shorts and shorts you can buy at El Corral, she said. Despite these setbacks, she placed ninth at the nationals that year.

By the time she reached her sophomore year, there was still no serious interest in women’s track, said Maggie. When she started working with Coach Steve Miller, Maggie said she began to get the support she needed to excel.

“She’s made me what I am,” said Maggie, and explained he promoted, supported, and believed in her in addition to knowing when she was tired.

Maggie said this year’s track team is much improved. Her success has attracted talented runners to Poly.

Just how successful she has been can be explained by her best time in the mile: 4:36.1. She will be running in the 1500 meter race at the nationals this week.

With only a little bit of financial help from Poly, Maggie finished her Poly career this fall running cross country. Her friends and the regimented routine have kept her actively competing.

Four seniors bid farewell in final home basketball tilt

BY VERN AHRENDES

Four seniors will bid farewell to Cal Poly tonight as the Mustangs host Cal State Bakersfield in the Main Gym at 8 p.m. Senior starters Rob McKone, Jim Schultz, Ernie Wheeler and Pete Neumann will wrap their collegiate careers at home in the final game of the California Collegiate Athletic Association.

The Mustangs, 20-6 overall and 10-3 in the CCAA, are currently locked in a dogfight for the conference championship. Cal Poly Pomona, 11-2 in the conference, has a one-game lead over both the Mustangs and Cal State Dominguez Hills.

The Roadrunners of Bakersfield will be a tough test for Cal Poly but the Mustangs hope to get a lot of help from down south. While Bakersfield, with a 1-12 conference mark, occupies the Mustangs, Dominguez Hills must travel to Chapman and Pomona visit "the pit" in Riverside.

Bakersfield game will bring an end to an era of Central Coast basketball, as four graduating seniors have formed a mild dynasty in their short tenure in the green and gold of Poly.

Four have been the nucleus of two outstanding seasons of success for coach Ernie Wheeler. The double-duo have been in- last year and averaged 6.4 assists last season set a single season mark and he surpassed the career mark earlier this season. He had added 235 more this season.

McKone was heavily recruited out of Del Campo High School by Wheeler but the 6-6 forward opted instead for Weber State (Utah). He averaged 17.6 points and 12 rebounds as a high school senior and led his team to a 27-2 record and a CIF championship.

He was a part of the Division I playoffs in 1978 when Weber State lost to Arkansas on national television.

Last season he averaged 10.6 points and this season he has been touting in 12.4 points and hauling in five rebounds a game.

Wheeler, a San Luis Obispo product, played one year at Idaho State before returning home. As a freshman, he played a big part in Idaho State’s West Regional semi-final win over UCLA, 76-75, as he hit 4-4 from the free throw line in the final minutes.

He has been a three-year starter for Poly. He led the team in scoring two years ago with a 10.7 average.

He averaged eight points a game last season and 13.1 this season.

The women's softball team will make its 1981 debut this Friday when the Mustangs entertain Fresno State for a double header. The first game is scheduled for 2 p.m. on the softball field adjacent to the main gym.

The Mustangs ended the 1980 season with a 21-5 overall record, and placed second in the Southern California Athletic Association conference title. Poly racked their second straight conference dual action this season, lost to Northridge, 67-64, and Northridge and Santa Barbara tied, 3-2 in conference dual meet. Thompson is a member of the national champion 200-yard medley relay team. Thompson has broken a finger in her left hand, and it is questionable if she will be able to swim in the conference meet and women's league title.

The Mustangs should be able to collect the points inference title. Second-class Citizens

For 21 years a state university with 15,000 students has bordered a men's prison with 2,400 inmates. Cal Poly and the California Men's Colony enjoy a "working relationship" with each other; both are there to perform a state service, even though their services are completely different.

The city of San Luis Obispo, with a population of about 35,000, is picturesque, the university coexist with a minimum of violence.

It's logical then, to assume that the seacoast city of Cambria would have easily been able to get along with the California Conservation Corps, a young, highly training group of young adults who had no criminal record—traveling around the state of California working with victims of floods, earthquakes and other natural disasters—has recently become "against the law."

B.T. Collins, the head of the CCC, came to Cambria a few weeks ago to see what the townspeople thought of moving his organization to the outskirts of their city. The reaction of the citizenry was shocking and appalling.

"We don't want these second-class citizens in our county," was the summation of the group's attitude at a town meeting with Collins.

At the Mustang Daily, we think that kind of an attitude stinks.

It's true that we here in San Luis Obispo have suffered from the crimes committed by inmates of the various "lockups" around the county. But the CCC isn't a lockup.

The kids in the CCC are there because they want to be, for a chance to work with nature and see the golden state of California. There isn't a better training ground than the Cambria Air Force station for young adults who have volunteered to help save lives and the environment.

Worse yet, in all probability, the Cambria Air Force station will become what it was before, a military training ground, equipped to destroy lives and the environment, instead of saving those aspects of life which are so important to us.

The Mustang Daily joins in the chorus of citizens disgusted by the lack of respect some Cambrians have for their fellow human beings.

We're shelling out $20,000 a year to keep the CCC based in southern California. The Cambria Air Force station could be had for less than that a year. Plus, what better location could there be for the CCC other than Cambria—right in between the two largest population centers of California—coupled with the CCC's close proximity to large agricultural areas which often meet with natural disasters.

It's too bad Cambria turned down the CCC, and we at the Mustang Daily appeal to the people of that town to reconsider.

Credit where credit's due

Editor: I wish to thank you for the well-written and informative article about our infrared heating system. It is the most accurate and descriptive article I have read about this industry in our department.

Unfortunately, well-deserved credit to the Agriculture Engineering Department was not given. Ed Carnegie, in the Agriculture Engineering Department, has given much-needed time, advice and equipment to the project, and we could not have brought it to fruition without his help. Interdepartment work in the School of Agriculture and Natural Resources is a vital part of our success at Cal Poly and should be given proper credit whenever possible.

Mustang Daily

Letters

Faculty members are people, too

Editor: A recent letter written by Stanley A. Pryga (Wed. Feb. 19) was filled with many accusations, both to the Mustang Daily and to the Concerned Cal Poly Faculty.

I am wondering whether Stanley really thinks there are any "convincing arguments" against nuclear power. If not, what is the point of his letter? But if it, as it seems from his letter, he thinks this way, that is no reason to doctrinate others concerning their expression of their opposition to nuclear power.

I am not surprised by his lack of logic. "Demonstrations . . . can only lead to anarchy, etc." is pure bull! Our First Amendment guarantees our right to free speech and our right to peaceful demonstrations. I'm proud to be a citizen of a country that is based on that and other guaranteed rights. Unfortunately there are people who refuse to accept this right for everyone and others who are trying to change this fundamental part of our Constitution.

Should instructors speak and act according to their beliefs? Is that really "unprofessional and unworthy" of them? Remember that faculty members are people too. Anyone interested in the best possible future (as I'm sure the Concerned Cal Poly Faculty and should make every effort to avoid a nuclear-poisoned future.

The Mustang Daily is in a difficult business. There is no doubt about that, but they haven't shied away from controversy in their paper. The ad hoc apathy is a natural one in this case. The seriousness of the situation leads me to think that if it other instructors cared about the possibility of nuclear-power, nuclear-waste and poisoning of them and many generations to come, they would act.

By saying that students should now be learning about "the difference between truth and propaganda" you are implying that demonstrators are liars. Were Blacks in the '60s liars for marching for equality? Were the people protesting the war in Vietnam on many peace-marches liars? I think that a good place to learn about "the difference between truth and propaganda" is at a speech by Mike Curb.

His views about the use of the taxpayer's institution is selfish at best and stupid at worst. Waa't Mr. Curb (and S.A.M.) using Chumash Auditorium "as a sounding board for a particular point of view?" But his omission of this fact is within his right to free expression.

Jon Linton

Cheap shot off target

Editor: I was very pleased to receive the endorsement of the Mustang Daily on February 24, for one of the two City Council positions in next Tuesday's election. I must take exception, however, to a cartoon drawn by a fellow person the following day which suggest my position changes with the wind. This is what is known as a cheap shot. I would ask the cartoonist for a single example of a position I've changed while serving as a member of the Planning Commission during the last year and a half as a concerned citizen since then.

I have consistently taken the following positions:
(1) I support housing on and off campus as part of the city circulation element in the General Plan.
(2) I support a hillside development plan to protect areas such as San Luis Obispo Mountain from unwise construction on steep and unstable slopes.
(3) I support a growth management plan making sure that development projects pay their own way, benefiting the entire community, and not burden the city's ability to provide services. Also developers must be encouraged to provide moderately priced housing as part of their projects.
(4) I support the bus system and bike lanes on major roads around Cal Poly campus as part of the city circulation element in the General Plan.
(5) I support a citywide development plan to protect areas such as San Luis Obispo Mountain from unwise construction on steep and unstable slopes.

I was very pleased to receive the endorsement of the Mustang Daily on February 24, for one of the two City Council positions in next Tuesday's election. I must take exception, however, to a cartoon drawn by a fellow person the following day which suggest my position changes with the wind. This is what is known as a cheap shot. I would ask the cartoonist for a single example of a position I've changed while serving as a member of the Planning Commission during the last year and a half as a concerned citizen since then.

I have consistently taken the following positions:
(1) I support housing on and off campus particularly for married students.
(2) I supported efforts of fraternities and sororities to build their buildings and use permit efforts while on the planning commission.
(3) I support condominium restrictions that cut down on condominium conversions that cut the supply of rental units and force higher rents.

I am not committed in any way to speciﬁc interests, development interests in particular. I am an independent and while always in favor of open, fair and equitable government.

Thank you for giving me the opportunity to reply. Also thank you for your paper's endorsement.

Allen Settle
