Dorm students collect sample in vial

By CynthiA Barakatt

An oil-like substance that leaked for approximately six weeks from a light fixture in a Santa Lucia residence hall last spring may have been the carcinogenic chemical PCB, a General Electric Co. spokesman told KCPR Thursday.

Dick Cooper, regional engineer of GE's lamp department, said that if the lamps are more than two years old, he is fairly sure the leakage would contain PCB.

Acc"ording to Jerry Gertliacci, head of Cal Poly maintenance, the residence hall lamps are between 15 and 20 years old.

If the substance is not PCB, then it is probably a tar used to seal a casing in the lamp, Gertliacci said.

Glenn Crepps, a third-year chemistry student and dorm resident collected samples of the leaking substance in a vial-like container.

He said he took several samples and he gave Van Acker one. He then made calls to the county and state health agencies to see if they would analyze the material, but it was repeatedly turned down.

A small sample of the substance was sent to the California Occupational Safety and Health Officer Donald Van Acker. It will take between three and four weeks for the tests to be completed, he said.

Van Acker first sent the sample to the Environmental Protection Agency who said the sample was not large enough to be analyzed accurately.

The sample was disqualified by the FDA in 1977 after it was determined to be a carcinogen. The tar-like substance, which is not soluble, concentrates in the liver, pancreas and body fat.

The students in the hall first noticed the leak in the beginning of January, said Mike Flaherty, who lives across from the restroom on the north side of the second floor. He said he and other residents on the floor became concerned with the leaks when they realized that PCB could be one of the chemicals in the older lamps.

Students said the leak created a constant puddle on the bathroom floor which continually had to be wiped up.

The janitor on the floor placed two emergency calls to maintenance to get PCB out of the lamps replaced. The maintenance repair was not made until a week and a half later, Flaherty said.

Gertliacci said the maintenance department received a call about the leak on January 27 and responded the next day. He said two other calls were received within the next two weeks and a total of three ballasts were replaced in the lamps.

There are no markings on the capacitors in the lamps which indicate they might contain PCB, said Gertliacci. He said that even if there is PCB in the capacitors, it is highly unlikely they could break, releasing the toxic chemical.

Flaherty said the students on the floor are upset because of the time involved in getting the maintenance crew to respond to the leak and the time it takes to get the material analyzed.

After becoming frustrated over the reaction time, Flaherty said he called KOVC television in Santa Maria who contacted the Environmental Protection Agency over the weekend. Flaherty then alerted KCPR and the Mustang Daily.

Staff writer Jim Mayer helped in this report.

SLO council 'City growth is vital'

By Dave Brackney

"Conservative, realistic and honest" is the approach Jerry Munger says he has taken to his job as a San Luis Obispo city councilman.

The appointed successor to former councilman John P. Terhune, Munger said recently he is running for a full term on council to maintain and improve the city's economic health.

"I speak to housing, employment and the fiscal management of our community," he said.

The most important issue facing voters in the March 3 election, Munger acknowledged, will be future growth in San Luis Obispo. Munger believes future growth will be necessary if the city is to hold down the cost of living and provide employment in the future.

Please see page 4
State officials oppose oil leases

San Francisco (AP) - Claiming the rewards of drilling are not worth the risk of spills, officials from eight counties and the state have banded together to fight the opening of Northern California coastal waters to oil exploration.

In a meeting at state Coastal Commission headquarters on Wednesday, the coalition called on Interior Secretary James Watt to abandon his decision to issue oil exploration leases in four areas - the Eel River Basin off Eureka, Point Arena Basin near Mendocino, Bodega Basin off Sonoma and Marin counties and the Santa Cruz Basin off Santa Cruz andSan Mateo counties.

Watt's tentative decision reversed a directive made by former Interior Secretary Cecil Andrus days before the Carter administration left office. The final decision will be made on May 1.

In a letter to California Gov. Edmund G. Brown Jr. earlier this month, Watt reportedly said, "The president has instructed me to take the necessary steps to increase the production of oil and gas, and I firmly intend to take those steps."

Change in pension policy urged

WASHINGTON (AP) - A presidential commission on Thursday called for radical changes in the nation's retirement policies, including taxation of Social Security, raising the eligibility age for full benefits and mandatory pensions for all workers.

"Our nation's retirement programs are dangerous. They are contingent on pay-as-you-go programs such as Social Security," C. Peter McCollough, the commission chairman and chairman of the Xerox Corp., told the House Select Committee on Aging.

Rep. Claude Pepper, D-Fla., the committee's chairman, sharply criticized the commission's call to make Social Security "fully dependent on pay-as-you-go programs" such as mandatory pensions for all workers.

Pepper has instructed me to take the necessary steps to tend to take those steps."}

Newsline

Brezhnev pledges aid to Cuba

MOSCOW (AP) - Soviet President Leonid I. Brezhnev met with President Fidel Castro on Thursday and pledged complete Soviet support in the face of an "anti-Cuban campaign" by Washington.

Brezhnev told Castro, the official Soviet news agency Tass reported, "We have accused Cuba specifically of being a conduit for weapons, and President Reagan's administration has limited possible direct actions against Castro's government unless the flow of arms ceases.

Americans back economic plan

NEW YORK (AP) - Americans overwhelmingly support most of President Reagan's economic proposals, even though they say his planned spending cuts will hurt the poor and help the wealthy, a new Associated Press-NBC News poll says.

The poll, by the University of Michigan, found that 74 percent of those surveyed supported Reagan's proposals to decrease federal spending and raise interest rates high for the time being.

Two major elements of Reagan's plan - a $1 billion cut in federal spending and a 1 percent cut in income tax rates for each of three years - get overwhelming backing.

Reagan vows to stop Soviet expansion

WASHINGTON (AP) - The administration's plan to build up military and economic assistance to Israel next year is to counter "aggressive Soviet expansion policies in the Middle East,"

"If a just peace between Israel and its neighbors is to be achieved, Israel must enjoy a sense of real security and national confidence," said Morris Draper, deputy assistant secretary of state for Near Eastern and South Asian affairs, in testimony to a House Foreign Affairs subcommittee.

Draper and other officials declined to comment about reports that the administration was inclined to approve selling Israel additional F-15 jets to offset Israeli concern over possible sales of the sophisticated craft to Saudi Arabia. They said this issue would be dealt with at a closed briefing later by James F. Buckley, undersecretary of state for security assistance.

The proposal calls for $1.2 billion in military and economic assistance to Israel next year is to counter "aggressive Soviet expansion policies in the Middle East,"

"If a just peace between Israel and its neighbors is to be achieved, Israel must enjoy a sense of real security and national confidence," said Morris Draper, deputy assistant secretary of state for Near Eastern and South Asian affairs, in testimony to a House Foreign Affairs subcommittee.

With Union Jacks and Old Glory fluttering in a mild breeze across the sun-drenched White House South Lawn, Mrs. Thatcher aired a definitive position, except to say that "intelligence is not attempted... by the false perceptions of weakness."

Democrats assail tax cut plan

WASHINGTON (AP) - Democrats on the sharply divided congressional Joint Economic Committee concluded Thursday that President Reagan's group crossed across-the-board tax cut would worsen inflation, and recommended instead a new credit to offset higher Social Security taxes.

Committee Republicans warmly endorsed the Reagan program and called for immediate action by the Federal Reserve Board to tighten further the money supply, even though that would "lead interest rates high for the time being.

The annual report was in stark contrast to those issued unanimously by the panel in 1979 and 1980, which centered on the need for tax and regulatory policies to "get the economy by improving incentives for saving and investment. Those ideas now are at the heart of the Reagan proposal."

But the public is not particularly optimistic the tax cut will have a big impact, an Associated Press poll showed.

Distinguished Architecture lecture series

Good office management is based on feedback

BY LISA CHEVES
Staff Writer

In a good-humored, straightforward style, not unlike that of the T.V. psychologist played by Bob Newhart, architect Alfredo DeVido from New York told students good office management is based on communication and feedback.

He said he doesn't want a plan drawn up "in all its lousiness." He would prefer his associates to at the moment he has threads be honest with him about the feasibility of conceptual and design ideas.

The lecture which took place Tuesday evening in the Student Art Gallery was the last in the Distinguished Architect Lecture Series for winter quarter.

Like the other four lecturers during the series, DeVido showed slides of his work, explaining prominent features he builds into his structures.

A lover of natural materials, such as stone, cedar and brick, DeVido has also made frequent use of passive solar systems. Calling solar power a "master of good sense," he explained that in the front-belt, the Eastern states where he does most of his building, it is necessary to face structures southward with lots of glass to trap heat and hold it. He said that designing solar structures involves more than "letting the sun shine in."

DeVido talked about the use of "the hearth" as a durable, symbolic center of the house. He also said it is an interesting vertical element and is a unifying element inside and outside the structure.

Lighting, especially bringing light in from unsuspected sources was stressed by the widely published architect.

He built a series of black houses on the East Coast which he finds especially interesting due to their tendency to change shades of blackness as the lighting changes. Staining a natural wood makes a house appear anywhere from a warm gray to jet black, depending on the shadows.

Other pet techniques DeVido employs include what he calls the traditional house form, concentrating on what he calls the traditional house form, concentrating on the lighting and on the mother, which he said is "futuristic" and "potent" in its own way, as well as being something he "can't explain or define."

The architect has been named to the faculty of the University of California at Los Angeles and will probably be there for the next year. When there, he will lecture on the theme of historical and architectural planning and design.

The criteria the committee considers for the award are many. The instructor must have degree and breadth of competence; interesting and well-organized lectures; high professional standards and personal integrity, and use teaching to contribute to student enthusiasm and high achievement.

The committee to elect is comprised of seven judges, five past award winners, who only serve a two-year term, and two students appointed by the A.S.I. Committee Co-Chairman. The committee selects eight to 10 top canditates, then recommends two to four of these to President Warren Baker. In September these specially chosen instructors then receive the Distinguished Teaching Award along with a $100 prize.

The committee to be elected is comprised of seven judges, five past award winners, who only serve a two-year term, and two students appointed by the A.S.I. Committee Co-Chairman. The committee selects eight to 10 top candidates, then recommends two to four of these to President Warren Baker. In September these specially chosen instructors then receive the Distinguished Teaching Award along with a $100 prize.

Drunk driving penalty proposed

SACRAMENTO (AP) — A red face and an orange T-shirt might make people think twice about drinking and driving, a Los Angeles County assemblyman said Tuesday.

Assemblyman Dick Floyd, D-Gardena, introduced a bill that would require persons convicted of driving under the influence of alcohol or drugs to do 20 hours of community service in addition to the present fine. The person would have to wear orange and would be known as "Drunk Driver Community Service" while doing the work.

"I realize a key ingredient of this plan is public embarrassment," Floyd said at a news conference.
Munger: failure to grow caused housing shortage

From page 1

Restricted growth in recent years has resulted in a housing shortage so severe that it has driven up real estate prices to the point that middle-income people can no longer afford to move here, he said. Over the last five years, Munger pointed out, the city has grown at an annual rate of about 0.4 percent a year.

No growth, Munger said, could also result in a future economic slowdown here, curtailing employment opportunities for the city's youths. Specifically, Munger said he would like to locate more light industry in the city. At present, Munger explained, government is the city's biggest employer, but does not provide employment for young people. In addition, Munger said he would also like to see a company locate a research and development facility here that would employ "professional caliber people."

Calling himself a "realist" and considering laws, Munger said, could come before council "tend to receive a political decision rather than a decision from true concern."

A native of Apple Valley, Munger has lived in San Luis Obispo with his wife and two children for seven years. He is a 1969 graduate of Cal Poly with a degree in business administration and owns Corcoran's Restaurant on Figueroa Street.

A decorated Vietnam veteran, Munger has been involved in politics everywhere he has lived. "I'm interested and concerned," Munger said. "I like to be part of what's going on, not watching from the sidelines."

Space shuttle rep to speak

The director of Flight Systems Laboratories for the Space Systems Group of Rockwell International, will be the speaker at Cal Poly's annual Engineer's Week Banquet on Friday, Feb. 27, at McLean's Restaurant in Pismo Beach.

John M. Robertson is responsible for the development and development of the flight simulation, avionics development, and flight control hydraulics laboratories.

Robertson joined Rockwell as an aeronautical engineer following graduation from Purdue University, where he received his bachelor of science degree in aeronautical engineering.

Using "Space Shuttle Update" as his topic, he is expected to draw on his experience as senior manager in charge of development testing and flight system certification for the Space Shuttle October to give a report on the current status of the Space Shuttle program.

Thanks

Several employees of the University Graphics System served the final hours of their tenures today. The Mustang Daily's editorial staff and advertising department thank General Manager Andy Miller and Photography Manager Lou Correia, Typographer John Parkinson, Web Manager Mike Tillisch and the outstanding employees for yet another year of daily miracles.
The play opened with Margot Wendice in a frock over recently being the victim of blackmail. In an attempt to conceal her husband that she was having an affair, she complied with the blackmailer's demands. The entire play was set in the living room of the Wendice apartment. Green painted walls with stained wood trim, well-placed furniture, wall bookshelves and a large curtained window proved effective features in establishing a home sophistication rather than elegance for the London flat.

Director Murray Smith and his nine-member cast combined few promising ideas a clever note with a vindicative twist.

In the opening act, Margot is confiding her troubles to Max, the former lover she has since stopped seeing. Max, a mystery writer played by Robert Clayberg, was awkward as his movements on stage. Often he appears abrupt. He clutches Margot's hand at times and looks almost at a loss whenever he is not speaking.

With his dark hair slicked back, attired in a brown pin-striped suit, Clayberg could have provided an appropriate profile for his character. Yet one had to wonder when he was waiting and turned around. Why did he have his hair curled at the neck of his coat? It was a curious, if not annoying, effect perhaps only his hairdresser will know for sure.

The play was a marked contrast to the London flat. Margot, a vindicative twist. It was unfortunate the cast was not more polished. Cohen was one of two characters that showed polish. Cohen was an effective character-emotional, energetic, and yet relaxed in her leading role. She acted out the role of the wealthy English woman.

The broadcast voices worked well when used for the telephone, but over the phone the voices were static and often unclear. Whether purposefully done or not, it was an unfortunate effect on the other end of the line. It was much like the stiff, almost 'mechanical movements of two of the main characters and the static telephone voices were bound to have had some 'disconnecting' or otherwise negative effect.

The empty stage darkened. The second act was a welcome turn of events as the main characters and the static telephone voices were bound to have had some 'disconnecting' or otherwise negative effect.

Eight announcers battled it out for a prize for the biggest娟 milk. In an attempt to conceal her husband that she was having an affair, she complied with the blackmailer's demands. The entire play was set in the living room of the Wendice apartment. Green painted walls with stained wood trim, well-placed furniture, wall bookshelves and a large curtained window proved effective features in establishing a home sophistication rather than elegance for the London flat.

Mardi Gras paraders brave cold

BY MIGUEL ORTIZ

The chilling wind created a few power outages as street lights went off downtown Friday night, but the people who rode balloonized floats dressed as playing cards, pirates, cone heads, mummys, hookers, Carmen Miranda and 400 others didn’t seem to mind as they danced to Dixieland music down Higuera and Monterey streets.

The assembly of people were celebrating the third annual San Luis Obispo Mardi Gras. Spectators along the parade route also braved the cool winds as they caught colored Mardi Gras beads thrown at them by the costumed paraders.

Directing the parade was Don Koberg, a Cal Poly architecture instructor, who along with fellow native Louisianian and social sciences instructor at Poly George Suchand organized the Mardi Gras festivities three years ago.

The first Mardi Gras, under the direction of Koberg and his Mystic Krewe of Karnival, had one float and 200 people parading, said Koberg, but this year about 600 people were expected at the Veterans’ Hall for a masquerade ball after the parade.

“this year we were knocking people away with sticks,” said Koberg. “there were more people, better costumes, better floats and better musicians.”

Mardi Gras or ‘Fat Tuesday” is celebrated in New Orleans the day before Ash Wednesday, thus beginning 40 days of Lent.

On this day “people get the sin out of their systems before 40 days of sack cloth and ashes,” said Koberg.

One-act plays set

Performances are next week for a series of one-act plays produced by Cal Poly’s Studio Theatre. Monday, March 2, marks the performance of Rats, written by Israel Horovitz and directed by Greg McCellan. Wednesday, March 4 is the night for The Celebration, written by Anton Chekhov and directed by Karen Pehreson. Friday, March 6 is set for Chekhov’s The Brute, directed by Diana Burnell. Monday, March 9 is the date for Eugene Ionesco’s The Lesson, directed by Steven Zinman.

All of the performances begin at 8 p.m. in Room 212 of the H. P. Davidson Music Center. seating is limited, so arrive early if you wish to get a good seat. no one will be admitted after the shows begin.

More 'Dial M for Murder'

From page 5

The man came from behind the curtain and wrapped the scarf around her neck. She struggled. She reached to the desk, where she found a pair of scissors, and stabbed the would-be murderer in the back.

How dramatic? True, it was. The emotion-packed scene was handled well and proved to be one of the play's better moments.

Hardison in his role as Toney was not a convincing character. Like Clayberg, he possessed the appropriate profile for his character, yet lacked the emotion to make the character real. Although his role was "short-lived", the proposed murderer LeGalle, played by Louis Raynor, made a distinct impression. One has trouble discerning whether the man was cocky by nature or because the role required it.

Overall, the spotlight of 'Dial for Murder' must be reserved for Inspector Hubbard. George Menne!, who played the detective, deserves an added round of applause and encore.

The inspector may not have had a handle on the murder mystery at all times, but Menne! had a handle on the character. Michael Begullin, who played Thompson, the inspector's off-stage cohort, also raised a few laughs from the audience with his short replies from behind state.

A final fitting phrase for the production comes from the play itself: "In stories, the murder always turns out exactly like the author plans it. In real life, they don't."

Tickets for the ASI Special Event are $3.75 and can be purchased at the UU ticket office. Door tickets are $4 more. The troupe, which performed in repertory, was formed in 1979 by Rhoda Martyn, founders who originated in the dance program at the University of Utah.

Large, full, expansive movements—stemming from a Western sense of open space combined with an emphasis on a wide range of technical ability characterize the dancers' Utah training.

Also, the San Francisco Moving Company possesses a strong sense of professionalism, not only in the quality of the dancing and choreography, but in the details of production lighting, rehearsal and preparation, sound, costuming, timing and make-up.

Singers, orchestra to perform at Cal Poly this weekend

A musical weekend is in store for those students staying in town. Two events scheduled for performances in the Cal Poly Theatre still have tickets available.

First, on Saturday, Feb. 28 at 8 p.m. will be the Music Department's Annual Baroque Concert. The Chamber Orchestra, conducted by Clifton Swanson, will be joined by soloists Louise d'Uffillou on flute and piccolo and Ronald V. Ratcliffe on harpsichord and organ. Tickets are $5 for adults and $1 for students. The concert will include works by such Baroque composers as Bach, Telemann, Vivaldi, Rameau and Quantz.

The second musical event of the weekend is the return of the University Singers from their mission tour. They will present a concert at 8 p.m. Sunday, March 1 in Cal Poly Theatre. Tickets are still available for this show at $4 for adults and $1 for students. They will sing a number of a capella works by Bach, Corelli, Billings, D. Lisso, Vulpian, Kodaly, Copeland and others.

The music department is keeping its students busy this quarter. Still to come are the Student Recital on Thursday, March 5 at 11 a.m., the Symphonic Band's winter concert on Saturday, March 7 at 8 p.m., and the USC Chorale on Thursday, March 12 at 8 p.m. The student recital is in Room 218 of the HP Davidson Music Center. The Winter Concert is in Chumash Auditorium and the USC Chorale Singers will be in the Cal Poly Theatre.

IECE CREAM ITALIANO

Gelato! in the making! Forgiveness and kindness are where ice cream originated. The Montanis were the first to make it all throughout the mid-twentieth century, and to perfect the process in 1935. And now they bring you a hearty ice cream menu with real Italian flair, making a low-calorie content that lacks that heavy, creaminess associated with great ice cream. Truly Italian ice cream is a mixture, but a mixture of all and everything flavors are not cake, or hold the secrets to high cream content and only the finest quality. All natural sugars and ingredients are specially cooked then machine that churns the mix slowly, not turning it into a thick mass. This machines will make everything right here in our store. home, and are a great symbol of our concern for International Gelato!-lined into a cup and combined with other foods if you wish. Believe it or not, Gelato is a more expensive than regular dairy ice creams. If you compare weight - not calorie-wise- you could decide if a pint of Gelato weighs the same as a quart of commercial ice cream and it has about the same nutritional value. And only a few more calories than frozen yogurt! We know you have the newstt development in low ice cream!\n

Sun Dance Ranch
WANT A GREAT SUMMER JOB?

There are many rewards in store for a 100-acre, small
country children's camp in the northern California
mountains: enduring friendships with other staff and
with your children; a chance to work in the beauty
and fun of the out-of-doors; a chance to work and play
hard; and a chance to learn a lot about your abilities
and limits in a challenging and supportive environ-
ment.

We are looking for a staff who is independent, mature,
and likes a challenge. Camp and ranch activities in-
clude horse-riding, small animals, swimming, rock-
climbing, music, art, gardening, back-packing, sports,
cooking, as well as special hobbies and skills
introduced by the staff. Staff members must be
qualified to teach in one or more of these activities.

Due to a high return rate of staff to Sun Dance
Ranch, we have few women staff positions available
and more positions open for men. We hire sophomores
level minimum. If you are interested in interviewing
with Phil and Meredy, they will be on campus Wednes-
day, March 4th in the Placement Center on campus.

There will be a sign-up sheet on the lobby.

More
than
music...

Concerts are more than music and excitement to the members of
Cal Poly's Concert Committee who not only spend
countless hours planning and organizing before a
show, but also put in up to 10 hours of physical work.

Clockwise from top left:
A committee member checks the control board
as he eats his lunch; the
set-up crew puts up the
lights; the stage is set
up... the show is ready to
begin; stacks of chairs
wait to be put up.

Doctors can grow skin for transplants

CAMBRIDGE, Mass. (AP) For the first time, doctors have grown a living replica of human skin in a test tube that they believe will permanently cover the wounds of burn victims.

The first experimental human transplant of the material, called "skin equivalent tissue," was conducted Tuesday at Massachusetts Institute of Technology, where it was developed. A report on earlier animal experiments with the test tube skin was published in Friday's issue of the Science Journal.

Unlike artificial skin, which must eventually be replaced with real skin from the victim's own body, doctors say this material will cover the wound permanently and never have to be removed.

The unique material is grown in a test tube from a tiny sample of the eventual recipient's own skin so it will not be attacked and rejected by the patient's body.

This is the first time that a full-thickness, living skin has been made in the laboratory and transplanted. Eugene Bell, who directed the development, said in an interview Bell, an MIT biologist, conducted the work with doctors from the Shriners Burns Institute in Boston.

Cal Poly swims different pool in volleyball setback

BY VERN AHRENDES
Sport Editor

The Santa Barbara men's volleyball team quickly proved why it is the No. 6-ranked team in the nation.

The Gauchos methodically picked apart the Cal Poly defense Wednesday night for a 15-1, 15-6, 15-8 win.

"I think our guys constructed their own mental obstacles tonight and played with a good case of tunnel vision," said Cal Poly coach Mike Wilton. "When you play a big opponent like Santa Barbara, it can really compound the mental situation. You just had a hard time getting anything going in the blocks.

The Mustangs, now 9-4 overall, were giving up an average of three inches to the Gauchos at every position on the floor and that factor haunted the Santa Barbara front wall and when it did the spikes fell harmlessly out of bounds.

Gaucho southpaw Mike Gorman controlled the tempo of the first game as the No. 6 setter led Santa Barbara to an insurmountable 10-lead. Greg Porter and Joel Jones were both credited with four winning serves in that run. Poly's Kenneth Rowe stopped the run with a block to give Eddie Petrit a winning serve.

Jones sparked the Santa Barbara defense with six blocks in the first game including four straight on Poly's winning serve.

Gorman served out the side in the first game with five unanswered points with the winner coming on a block by Roberts and Yingst.

Gorman picked up right where he left off in the second game as he gave the Gauchos a quick 20-lead.

Freshman Tim Toon snapped Poly out of its dream world with two quick aces and another winning point for its first lead in the match at 3-2. Two quick kills by Gorman and Roberts rallied Santa Barbara back with five unanswered points and a 7-lead.

Point-eating blocks by Petrit and Toon powered the Mustangs back into the match with a 6-2 lead in the third game. John Wise and Russ Bird collected three winning serves each.

The Mustangs then died at the serving line, scoring only two points in their next 14 rotations, as Santa Barbara patiently wrapped up the win. Roberts and Lau were both credited with four winning serves as Richmond Hall earned the game winner.

"We really got dusted out there tonight, but a match like this will make us a better team in our league," Wilton said. "We have learned that just being out there (against a better team) will help us out in the long run."

The Mustangs have a two week respite from Western Collegiate Volleyball Conference action as they travel to Long Beach State this Saturday before hosting the same Long Beach State and the University of Santa Clara on March 6 and 7.

The non-conference games will start a five-match home stand for Poly.

"This was a different kind of game tonight as we are used to swimming in," said Wilton. "Santa Barbara is just a good team and, even though we had some signs of success, we made it very easy for them to win."
Poly hosts regional tourney

The season begins today for the Cal Poly wrestling team as it bids for a berth to the national tournament as it hosts the NCAA West Regionals. The action will be fast and furious in the Poly Main Gym beginning at 1:30 this afternoon.

The Mustangs, under coach Vaughan Hitchcock, has won the tournament six years in a row since they moved up from Division II in 1974-75. Winning title No. 7 will not be easy for Hitchcock's Mustangs.

The main reason for that has been because of the addition of five teams from the Western Athletic Conference—Air Force, Brigham Young, Colorado State, New Mexico and Wyoming.

BYU poses the biggest threat between Poly and the regional champion ship. BYU is anchored by New Mexico will come with only four wrestlers.

Wrestling for Poly will be..."All Gallicerre, Mike Barfuss, Chris Delong, Chris Cain, Louis Mon tano, Craig Troxler, Berk Exera, Dale Ambler, Wayne Christian and individual honors.

Please contact your Placement Office to find out more information and to set up a personal interview. We will be interviewing Monday, March 8th.

Middletown's Louis Montano (left) will lead Cal Poly as it seek's seventh straight NCAA West Regional championship. The two-day event begins this afternoon in the Cal Poly Main Gym.

Baseball opens loop

The Cal Poly baseball team hits the road in search of its first California Collegiate Athletic Association win of the year.

The Mustangs, under coach Berrard Harr, travel to the south land for the first weekend of CCAA action against Cal State Dominguez Hills.

The Mustangs hope to pick up where they left off last season as they won the last five straight CCAA games. Cal Poly finished the CCAA with a 14-16 mark after a dismal 1-14 season in 1974-75. Winning title No. 7 will not be easy for Hitchcock's Mustangs.

The main reason for that has been because of the addition of five teams from the Western Athletic Conference—Air Force, Brigham Young, Colorado State, New Mexico and Wyoming.

BYU poses the biggest threat between Poly and the regional championship. BYU is anchored by New Mexico will come with only four wrestlers.

Wrestling for Poly will be..."All Gallicerre, Mike Barfuss, Chris Delong, Chris Cain, Louis Montano, Craig Troxler, Berk Exera, Dale Ambler, Wayne Christian and individual honors.

FIELD SERVICE ENGINEER

This is a training position which will eventually lead to formation evaluation testing services on oil and gas wells. In addition, we will also train you to conduct a variety of completion workover and secondary recovery services on oil and gas wells. A substantial amount of work time will be required at oil and gas field well locations.

This position promotes career opportunities in management, field services, and technical development after the initial training period has been completed. Job locations include most of the United States and Canada.

If you are aggressive and eager to advance your career, consider joining us.

This position provides an excellent starting salary and outstanding benefits, including company paid insurance and profit sharing among others.

Please contact your Placement Office to find out more information and to set up a personal interview. We will be interviewing Monday, March 8th.

Ethnic barrier

It was reported in Tuesday's Mustang Daily that Cal Poly's minority population is third from the bottom in the whole CSUC system. Eighty-eight percent of our student population is white, though the campus itself is much more diverse. This is an expressed or implied endorsement or verification for college that minorities receive in high schools. (It should be noted that this is a problem that affects all high school students in California, because of slipping educational standards. This is the fault of the public education system, and one not easily remedied.)

But even Cal Poly could help out in this. Perhaps a recruitment program could be organized that would send admissions representatives to high schools that have high concentrations of minority students, and they could talk to them about careers in technical fields.

At the heart of the problem at Cal Poly, there is an underrepresentation of minorities. So it's apparent that lack of technical orientation is not the only thing keeping minority students from this university. Apart from the encouragement of these students in the economic sector, it is important they enroll because society is not made up of Anglo Saxons exclusively but people of all races. A university functions not only to teach technical skills but social skills as well. This cannot be done properly if the university's ethnic makeup does not reflect society.
