Statewide graduate tuition explored

BY CYNTHIA BARAKATT
Staff Writer

A proposal by a legislative analyst to begin charging tuition for students in the CSUC system faces opposition from two faculty unions and a statewide student organization.

The proposal, drawn up by William Hamm of the state legislative analysts' office, which reviews the governor's proposed budget and makes recommendations concerning the budget, recommends that graduate students be implemented beginning in 1982-83.

Currently, graduate students pay the same fees as undergraduate students.

The proposal also calls upon the legislature to draw a five-year plan to phase in tuition, which would equal 40 percent of the state marginal cost per graduate student.

Although figures are not yet available for 1982-83, tuition set at this level would have charged graduate students $531 in 1981-82.

The trustees' plan should also examine the financial aid needs related to graduate tuition, the recommendation said.

The proposal calls for tuition for graduate students for four main reasons, said Ray Reinhard, analyst with the legislative analysts' office.

First, the cost of educating a graduate student is higher than that of educating an undergraduate, he said. While the cost of an instructor per full-time equivalent student on the undergraduate level is $3,766, instruction per full-time graduate student is $7,587, said Reinhard.

The second reason for imposing tuition on graduate students is—depending on the discipline—graduate students receive greater private benefits from their education than undergraduates, said Reinhard. They are paid 'higher dividends,' he said.

The current low cost of graduate education leads society to over-invest in graduate education, resulting in over-educated people on the job market and the loss of money for other student subsidies, Reinhard said.

Faculty bargain split suggested

BY MIKE CARROLL
Staff Writer

A Public Employment Relations Board officer recommended last Friday that PERB require CSUC employees to be separated into four collective bargaining units.

According to a news release from the Congress of Faculty Associations, Hearing Officer Stuart Wilson called on PERB to make each of the four units subject to a separate election and separate contract negotiations.

Stuart's recommendation, handed down in Sacramento, is a determination on how the 20,000 California State University and Colleges faculty will be represented during an upcoming collective bargaining election.

United Professors of California President Warren Kesseler said Tuesday that the hearing officer made a serious error in "fact and precedent." UPC will appeal the action, he said.

UPC had favored a single "wall to wall" bargaining unit for all CSUC professional employees. CFA favored separating the faculty into three units.

"This is really good news for us," said George Chucos, president Cal Poly's

Board of Trustees to meet for annual meeting

BY ROBIN LEWIS
Staff Writer

Thirty-six state and national leaders in public service and private enterprise were named by Cal Poly President Warren Baker to his newly formed president's cabinet this week.

The "blue ribbon panel," which includes Deputy Secretary of State William P. Clark and newspaper magnate William Randolph Hearst Jr., will meet once a year in full session, but perform the dominant part of its role "on a one-to-one basis," said Baker.

Baker said he personally visited many of the cabinet members so Cal Poly can do to better prepare its students to meet those trends.

Baker also hopes to use the cabinet as a societal support group for the aims of polytechnic education like Cal Poly's.

"We want these people to become advocates of what we are attempting to do," Baker explained. "This is not intended as a development group from which to acquire funds," he added. "It's a group to seek advice and counsel from" and also to "open some doors for faculty and students."

Baker hopes to develop exchange programs with many of the cabinet members' companies so Cal Poly faculty can gain professional experience by working in the company or agency on sabbatical. Members might also accept one quarter lectureships to bring their expertise directly into the classroom, he said.

Baker said he personally visited many of the cabinet choices, and, after talking to them, asked them to join.

The members were nominated by Cal Poly faculty and staff as people who supported and/or are experts in their fields. Baker said in order to acquire a well-informed representative, he often went to "key people in the state" for recommendations as to a suitable cabinet choice from that area or company.

The president's cabinet will get a "feeling and flavor" of Cal Poly, said Baker, when it holds its first plenary meeting March 29 and 30.

Vigil for slain children

A silent vigil in response to the mounting number of black children recently murdered in Atlanta, Georgia, will take place today at 11 a.m. in the University Union Plaza and is open to all.

The purpose of the vigil, which is sponsored by the United Black Students Awareness Council, is to show nationwide support for the police department in Atlanta in its investigation of the mysterious search for the killer.

Assumptions have been made that the search is not being conducted as avowedly as it should be due to the race of the children.

In addition, the vigil is meant to show support for the parents of the children and to draw attention to the problem.
$17 million to combat fruit fly

SACRAMENTO (AP) — The Assembly's money committee quickly approved three bills Wednesday that would spend about $17 million to combat the Mediterranean fruit fly.

The three bills were all sent to the Assembly floor by votes of 21-0 in the Ways and Means Committee. The fly, which destroys fruit by laying eggs under the skin, has been infesting the urban area of Santa Clara County since last summer. The state Department of Food and Agriculture has been combating the pest by spraying pesticides around fruit trees, stripping fruit from backyard trees and releasing sterile male flies.

The department expects to know this month if its battle has succeeded or if it needs to spray the pesticide Malathion from the air. Local governments have opposed an aerial spray.

One of the bills, AB624 by Assemblyman John Vasconcellos, D-San Jose, would pay the state's $15 million cost of combating the Medfly, as it is called.

San Salvador rejects OAS plan

SAN SALVADOR, EL SALVADOR (AP) — The government on Wednesday rejected an offer by the Organizations of American States to mediate a political settlement between El Salvador's civilian-military junta and the leftist-dominated opposition, Foreign Ministry sources said.

In the capital and the countryside the guerrilla war continued.

The Reagan administration has vowed to help prevent the spread of communism influence in Central America and has increased military aid to this nation of 4.5 million people. Fifty U.S. advisers are here helping train Salvadoran troops. Washington has charged the Soviet Union, Cuba and Nicaragua with supporting Marxist insurrection here.

One of the diplomatic sources here showed reporters an official message to the OAS that said "the revolutionary government of El Salvador does not desire the intervention of the Organization of American States in the search for a solution to the internal problems in El Salvador."

The message called OAS mediation here "completely unacceptable."

The 28-member organization officially offered to mediate last week at the suggestion of Costa Rican President Rodrigo Carazo. Junta President Jose Napoleon Duarte has said he is willing to meet with members of Socialist International to discuss a political solution, but there has been no indication where or when such a meeting would be held.

The U.N. commission called for the appointment of a special representative by a 29-1 vote. Eleven countries, including the United States, abstained.

American technicians and air force personnel, in civilian clothes, would be assigned to Saudi Arabia to help maintain, support and operate the complicated high-tech command planes at a cost of about $400 million apiece, could give the Arab monarchies the ability to strike Iran, Iraq or South Yemen. Washington has charged the Soviet Union, Cuba and Nicaragua with supporting Marxist insurrection here. The sale of the sophisticated jets to Saudi Arabia, at a cost of about $400 million apiece, could give the Arab monarchies the ability to strike Iran, Iraq or South Yemen.

American technicians and air force personnel, in civilian clothes, would be assigned to Saudi Arabia to help maintain, support and operate the complicated radar planes, called AWACS — for airborne warning and control.

State illegal search ruling eyed

SACRAMENTO (AP) — A drive by prosecutors to weaken California court rules on excluding evidence from illegal searches and confessions has stalled temporarily but appears to have its best chance of success in years.

The Senate Judiciary Committee put off a vote Tuesday night on a state constitutional amendment, sponsored by district attorneys, to prevent California courts from going beyond the U.S. Supreme Court in applying the so-called exclusionary rule.

The U.S. Supreme Court says the purpose of the rule is to deter illegal conduct by police and give meaning to the constitutional right to be free from an illegal search or coerced confession. The state Supreme Court has declared other purposes, to protect the courts' integrity and keep government from profiting from its own misconduct. The court has applied the rule somewhat more broadly, citing the state constitution.

Despite the delay, the measure, SCA3 by Sen. Robert Presley, D-Riverside, seemed assured of a majority vote in the Senate committee. Sponsors think they have a good chance to qualify the proposal for the 1982 state ballot.

"Hypertechnical" rulings by state courts are "in some instances, releasing very serious criminals," Los Angeles County District Attorney John Van de Kamp told the committee.

U.S. planes to Saudi Arabia

WASHINGTON (AP) — The Reagan administration, trying to discourage Soviet expansion in the oil-rich Persian Gulf, has decided to sell Saudi Arabia four highly advanced radar command planes and to build up an Egyptian airfield near the Red Sea, sources said Wednesday.

The sale of the sophisticated jets to Saudi Arabia, at a cost of about $200 million apiece, could give the Arab monarchies the ability to strike Iran, Iraq or South Yemen.

The U.N. commission called for the appointment of a special representative by a 29-1 vote. Eleven countries, including the United States, abstained.

American technicians and air force personnel, in civilian clothes, would be assigned to Saudi Arabia to help maintain, support and operate the complicated radar planes, called AWACS — for airborne warning and control.
Learn-by-doing method instilled in fire dept.

BY MICHAEL WRISLEY
Staff Writer

The Cal Poly Fire Department, a quiet but vital cog in the administrative gears, helps maintain an atmosphere of learning that has made the university one of the most popular campuses in the state. Integral elements of this cog are the 17 students who help man the fire station.

"With over 3,000 people in the dorms and over 400 calls last year, including 16 elevator rescues, these students are putting their lives on the line constantly," said Captain Carmen Johnson. These 17 students are no different than others who work for the university, whether grading papers or working on a maintenance crew, except that "these young men are responsible for life-saving equipment—their own and others," he said.

All 17 are on call 24 hours a day, and two are always on duty at the station. During the day there are four full-time engineers and one captain, and in the evening there is at least one engineer on duty, said Johnson. Come quarter break, when most students will be off skiing or relaxing in other ways, those 17 students will be going through a week of intensive training at Cal Poly.

"Keep your mouth shut and ears open, do what I say and nothing more or less," says Training Officer Chuck Branco to his students. Branco, who has a reputation among his students that would make most Marine Corps sergeants look like pushovers, explained, "An average student fire fighter has an opportunity to learn more here than working for a city fire department."

Most students work about 20 hours a week, in one of three shifts: 8 a.m. to 12 p.m., 12 to 5 p.m. and 5 to 8 a.m. Students start out at minimum wage, with a 5 percent pay increase in the next six months contingent on good performance. There is no prior experience work under the supervision of another fire fighters play an important part in training the new recruits, said Branco.

Rob Hund, a sophomore physical education major and student fire fighter for the past month, feels the department is well organized. "It's a good learning experience," he said explaining that 14 hours a week on day shift doesn't interfere with his school work. Hund plans on a career in fire fighting, while using his degree in physical education to fall back on.

That year architecture major Colin Campbell: "Being a student fire fighter provides an outlet, it gets me away from my major," Colin explained. "My grades might improve if I put the time I do here at the station into school work—the question is, would it?" One day while looking for work in the Placement Center, Campbell came across an application for a student fire fighter. He applied and was hired. Speaking about his job, Campbell explained, "It has opened up new horizons to me."

"I challenge anyone to watch a fire truck go by with sirens and lights going, and not to be curious," said Campbell.

Campbell related one fire call he answered recently: "It was a hot Friday afternoon about 4. Paul Johnson (a work mate) and I were doing routine maintenance and checking out the ladies. Four o'clock is a good time. You know, all the ladies are getting on the Trop buses."

"We got a call for a vehicle fire by Yosemite Dorms. When we reached the top of the hill, we could see the smoke. The engineer was discussing the procedure with Paul in the cab, and I was riding on back. A Volkswagen bus' engine had caught fire. You want to avoid pulling open the hood or engine compartment, because air will rush in and the fire will flare up, possibly injuring you: We broke out the rear tail light and put the hose in and flushed the engine compartment with water."

Married agricultural business major Tom Hinrichs explained that he took the job on to supplement his income while going to school. Little did he know at the time he joined the department that it would change his direction in life. "Working here has changed my outlook," he said. After graduation I would like to go on to paramedic school.

Vitamin ‘benefits’ are often myths, research says

BY MARY KIRWAN

Once a day, “just to be sure,” Bob swallow's a vitamin E capsule to protect and preserve his healthy and active sex life. Betty (Bob's girlfriend) reaches for a vitamin B tablet to prevent that “pooped out” feeling.

Timmy eagerly chews an orange-flavored Spiderman multi-vitamin. Mom told him he'll grow to be big and strong. And besides, they taste good.

Although the names are fictitious, Bob, Betty and Timmy are typical of Americans who swear by the benefits of the vitamin E supplements. But according to the FDA, vitamin E supplements are merely myths. Claims that vitamin E supplements provide physical endurance, enhance sexual potency, retard aging, prevent heart attacks and protect against air pollution, have, according to the FDA, more than doubled the sales of the vitamin in the last half a decade.

The FDA states that vitamin E supplements are essential for only two conditions—rare intestinal disorders in which fats are poorly absorbed and in premature babies who are deprived of the vitamin before birth due to poor placental transfer.

Little is known about the benefits of vitamin E supplements or the hazards of a deficiency. The FDA points out that it is nearly impossible to produce vitamin E deficiencies in humans.

“A sure way of getting a daily balance of nutrients, according to the FDA, is through selection of foods from each of the four food groups—milk, meat, vegetable fruit and bread/ grain. "Food can and do supply adequate nutrients and minerals thought to be safe for the body. Foods which are known to be toxic affects in large doses, according to the FDA, are not recommended for the population.”

CONTEST TO BE FILMED

SAN LUIS OBISPO HAS BEEN SELECTED FOR THE WEST COAST PREMIERE!

AN EXOTIC COMBINATION OF HAWAIIAN LEGEND AND TODAYS SURFING LIFESTYLE

Deadline March 12, 1981
**Language classes**

Classes in beginning Arabic, conversational French and Russian are being offered by Adult Education. Cost for each is $22.50 and all begin the fourth week of March. For more information, call 544-9090.

**Car servicing**

Four free seminars on "How To Service Your Car" will be offered by Toyota of San Luis Obispo starting March 14. You can sign up for all four or just one at the Dean Of Students Office or at Sprin Toyota. Class capacity is limited.

**Whale watching**

The Natural Resources Club is taking signups for its whale-watching trip at their meeting today at 11 a.m. in Science 8-5. There will also be refreshments.

**Teachers' Society**

The Cal Poly Teachers' Society will have its last meeting of the quarter tonight at 6 in BA & E 215. Student teachers will have a panel discussion.

**Arizona trip**

ASI Outings will sponsor a backpacking trip to Havasu Canyon in Arizona from March 21 to 28. Cost is $85 and signups are being taken in the Escape Route.

**Alpha Kappa Alpha**

Alpha Kappa Alpha will have a meeting tonight for all interested in pledging the sorority. The meeting will be in UU 217 at 7.

---

**Newscope**

**Graphic design**

The Graphic Design Club will meet on Friday at Fred Gibson's, 1025 Foothill No. 17. The meeting will be at 6 p.m. and members should park in the bank parking lot. For more information, call 541-6219.

**Quintessence**

Pianist Anna Teng will perform in the Cal Poly Theatre on April 10 at 8:15 p.m. as the last in the 1981 Quintessence series. For information, call the Activities Planning Center at 546-2476.

CSUC will explore graduate tuition systemwide

From page 1

He said comparable institutions in California charge higher tuitions for graduate programs than undergraduate programs, and that these charges are higher than those imposed by the CSUC.

Charging tuition in the CSUC system is a viable source of revenue which has been overlooked in the past, added Reinhardt.

But opposition to the proposal is working to see that the analyst's recommendation does not win approval in the legislature.

"The CSSA is deeply concerned with the California State Students Association's position," said Glazer.

"The UPC is flatly opposed to tuition proposals," said Kessler.

"The Colorado Supreme Court said tuition historically drives students away and limits educational opportunities," said Kessler. He said President Reagan's proposed cut in student aid is also implemented, student access to the CSUC would become extremely limited, he said.

Faculty bargaining

Choces said the recommendation would allow each unit to have its own agenda on what priorities are needed for them.

CFA President William Crast said the CFA will also oppose the tuition proposal.

If the tuition proposal is approved and President Reagan's proposed cut in student aid is also implemented, student access to the CSUC would become extremely limited, he said.
Biggest game in history faces basketball team
Sellout crowd expected for NCAA quarterfinal game at Poly

BY VERN AHERNDES

If you would have told coach Ernie Wheeler at the beginning of the season that he had to go to New Jersey to be one of the final eight in the NCAA Division II basketball tournament, he probably would have been visionary in his dreams of seeing the Mustangs in the all-tournament of all three.

No matter what he might have done, his Cal Poly Mustang basketball is one of the final eight teams left in the national tournament and his team faces one of the biggest basketball games ever scheduled on the Cal Poly campus this Saturday night.

The Mustangs, winners of the Eastern Regional, plays host to New England Regional champion New Hampshire College with the tip set to be tossed at 8 p.m. in the main gym.

"This is the quarterfinals of the NCAA which makes this the biggest game ever played on campus," said Wheeler. "The excitement of it is the big thing. It is something that a coach hopes happens to him and now it is happening." Cal Poly, 22-6 overall, has been the Cinderella team of the tournament. The Mustangs were sent east by the tournament committee as an at-large team, which translated means to be the doormat for the other teams in the region. The Mustangs were anything but that. Anchored by the top-ranked defense in the nation, Poly in the regional. The Mustangs were anything but that.

"The final Penman starter is Curtis Miller; a 6-3 senior guard. The Penmen have a pair of outstanding reserves who drive and the basketball team's attempt. Both teams were upset in their final regular season home game, the defense spearheaded the first round wins and the second round of brackets featured an outstanding offense vs. a tough defense.

Anyone who will be lucky enough to get a seat in the main gym will be treated to a classic struggle. The New Hampshire College Penmen come into San Luis Obispo as the No. 3-ranked team in the nation in scoring with 88.4 points per game. The Penmen are big and quick according to Wheeler.

New Hampshire qualified for the quarterfinal berth by slipping by Sacred Heart in the regional final, 91-80, and by edging Springfield, 76-75. The Penmen were ranked No. 10 in the final NCAA poll with Mustangs listed at No. 14.

The Penmen, 22-6 overall, have size along the front wall led by 6-8 junior center Bill Dunn. He has led the team in rebounding in its last 12 games and was named to the New England Regional all-tourney team. He has been averaging 13.4 points a game along with 10.2 rebounds. The Penmen scoring leader is 5-8 senior guard Chris Deliguide. He finished third in the nation in free throw percentage at 90.8 as well as leading the team with 16.8 points a game.

The final Penman starter is Curtis Miller, a 6-3 senior guard, who averages 16.5 points a game. The Penmen have a pair of outstanding reserves who have played in all 28 games this season. Sophomore guards John Cummings and Jay Circo, both checking in at 6-0, are important cogs to the team. Roche scores 11.4 points a game and Lee adds 7.5 points a 5.2 rebounds. Much has been said, but evidently not enough, at the local, state and national levels about Secretary of Interior Watt's proposal to put up the four huge areas off the Northern California Coast for oil and gas drilling—areas his predecessor Cecil Andrus deleted from Lease Sale 53 after weighing our need for resources, the devastating damage such drilling would cause, and "the preference and well-being of the (affected) people."

Governor Brown, every local government involved, California congressmen, numerous environmental groups, and thousands of private citizens have told Watt repeatedly that the destruction of four basins—Eel River, Bodega Bay, Point Arena and Santa Cruz—is just not worth the predicted 10-day national supply of oil the drilling would produce.

Little of the protest seems to have penetrated Watt's skull. Indeed, he considers his treatment by protesting congressmen in Washington "intolerable." Perhaps his hypocrisy and arrogance in brushing aside the wishes of California, his willingness to destroy some of the most delicate and beautiful habitats on earth, and his blind devotion to a president who is incapable of seeing a United States is not worth going for it than national security and a rising GNP, are equally intolerable.

So, much more needs to be said. Saturday, March 21, has been designated a statewide day of protest against Watt's decision. Let's rally, loud enough to be heard in Washington, take place throughout the state. One is needed here, but it won't happen without you.

Suggestions for the protest have ranged from a peaceful march to the burning of a Watt effigy on the steps of city hall—our feeling is to do whatever it takes. An organizational meeting is planned for tonight at 7 at the E COSLO office, 985 Palm St. (544-8027). Be there.

**Library books long overdue**

Editor:

Since some faculty members do research on their free time, the library has granted them the privilege to check out books for a whole quarter. Most instructors check out a limited number of books and return them on time, which is very much appreciated. But unfortunately, a few of them are abusing that privilege. They have a student who has 320 books checked out and is having difficulty returning them to the library and consider their policy for such people who have no concern for others.

**Pizza place loses a customer**

Editor:

I am writing in response to an ad printed in your newspaper on Tuesday, March 10th. The ad I am referring to is the one for the "average female Armadillo pizza eater" as a sensual, cloyingly-clad female.

In the first place I question the authenticity of the representation. I sincerely doubt that statistical analysis of data yields the result claimed. Besides from this obvious inaccuracy I take offense to the exploitation of females evident in the ad. It is too much a shame and a disgrace that a professional has to reduce himself to this level to sell his product. It is too bad that he doesn't have enough confidence in his own product to let it sell on its own merits. I thought selling cars by picturing them with beautiful women was bad enough but to use them to sell pizza has to be the lowest! The only logical conclusion that I could arrive at was that this tasteless ad is a representation of his tasteless pizza. Chalk up one for his competitor, who also offers free delivery.

I realize competition is tough, but in my opinion you've just made it tougher. I make little distinction between the pizzas as far as quality and speed of delivery is concerned, but thank you this ad will not have to think twice about who to order from anymore. Thank-you Armadillo for making my life a little easier and hopefully your job a little more difficult.

**Double standard of sensitivity?**

Editor:

Recently a Cal Poly professor accused the Mustang Daily of lacking sensitivity in the case of another professor, who collapsed on campus. She thought it should not have appeared as news. This same accusing professor showed identical sensibility when she shouted long-face-lashing of a disabled student, at an off-campus anti-war rally, at an attack of the disabling symptoms which are extremely painful. She can not see that she is responsible for the student's suffering. Does she have a double standard, one for students and one for staff? Mary Mesasy
