Senate questions report

BY MIKE CARROLL

Questions and criticism concerning a controversial document designed to expand research opportunities at Cal Poly dominated discussion at Tuesday’s academic senate meeting.

The senate debated a resolution to accept a report from the university research committee that outlines a “guiding philosophy” for research. The resolution also recommends the research report be forwarded to President Warren Baker.

According to Academic Senate Chairman Tim Kersten, Baker will address the senate during its April meeting concerning his views on the research document. Following the address, a vote will be taken on whether to approve the document.

Del Dingus, chairman of the university research committee, introduced the resolution. He said Baker had recommended the research committee draw up a report on the role of research at Cal Poly in fall 1979.

"Over 20 black people have come up missing," he said, and it took 12 deaths for the

Senate debate centered on whether to approve the document designed to expand research opportunities at Cal Poly.

Students in the UU Plaza yesterday bow their heads in silent remembrance of the 20 black children in Atlanta.

IRA: sports insurance to come out of its income

BY ROBIN LEWIS

Insurance for post-season athletic events will be paid for out of the income from those events, the Instructionally Related Activities Board ruled this week.

At its second meeting of the quarter and almost without a quorum, the IRA board initiated a new general policy to require any income over expenses for playoff events go toward the share of increased insurance costs caused by those events. Board member and Dean of Students Russell Brown said the new policy will be "to bill for insurance as an expense of that event," such as is done with ASI coconuts.

ASI Finance Committee Chairman Pete Shoater told the board he has set aside $20,000 in the upcoming ASI budget for possible donation to the IRA board. He said the finance commit

Huff will reprimand Poly band

BY MARY McALISTER

Inability to finance uniform cleaning has cost the marching band $553 in uniform reserves, said Baker, even though the student senate has approved the fund transfer. ASI President Willie Huff has said he will formally reprimand the band’s director, William V. Johnson.

The result of an old business problem. Roy Gersten explained at the final senate meeting of winter quarter that the uniforms, sitting in the music department since December, are in desperate need of cleaning and packing for storage. He asked the senate to appropriate funds to go toward the problem.

The Cal Poly marching band was given money for uniform cleaning in the 1980-81 budget, but this fund was apparently used for other expenditures.

"Remedies for this problem are better explored, Rathbun said.

Faculty member should do research. Research is just one method of professional development, he said, and other methods should be judged equally.

In other business, the senate discussed a resolution to approve $533 from contingency funds to cover cleaning costs, but the motion was amended by Senator John DeAngelis to designate

that the funds come from the band’s uniform reserve fund.

Huff said he would ask the band’s director and band members to confront the student senate with their financial problems.

The board also approved a resolution designating polling places for the fee increase special election on April 8 and 9.

Two high priority places will be the University Union and the corner near the student union area and other areas will be established near the library, intramurals office, and Dexter building lawn if there is sufficient staff to run them.

The senate heard from Harry Drake, chairman of the Student Planning Commission and member of the campus planning commission, who presented slides depicting possible student project areas and two current student proposals to create a landscaped path to the Ornamental Horticulture unit, and a bridge from the sidewalk to the second floor of the agriculture building.

The board also approved codes for the Rose Float Committee and Student Planning Commission.

Related Activities Board ruled this...

Senators expressed concern about where funds for an facilities used for instruction could eventually be turned over for research.

"Twenty black people have come up missing," he said, and it took 12 deaths for the government to react.

Americans spared in hijacking

DAMASCUS, Syria (AP) — Only three minutes before the threatened executions of three American hostages, Pakistani officials announced agreement with heavily armed hijackers Thursday to free political prisoners in exchange for the safe release of more than 100 captives held aboard a jetliner for 11 days.

"The crisis point has passed," declared a senior American diplomat on the scene.

"It is over," the Pakistani ambassador to Syria, Safrez Khan, told reporters at the airport. "There is no longer any deadline. If it is a matter of time now and I don't anticipate any difficulties at all in the process." He said the details of the exchange might take several days to arrange.

The hijackers had labeled the Americans "CIA agents," said they would shoot them and then blow up the plane with all aboard unless Pakistan's military regime bowed, by 11 a.m. EST, to their demand to free 55 political prisoners. Pakistan's ambassador to Syria said his nation had agreed.

For the first time since the Pakistan International Airlines Boeing 720 arrived at Damascus airport early Monday morning, the three hijackers allowed its cabin lights to be turned on. Seeing this, about 50 Syrian soldiers in foxholes around the plane were heard to cheer.

The hijackers had already shot and killed one hostage, a Pakistani diplomat, last Friday when the plane was in Kabul, Afghanistan. The hijacking began over Pakistan March 2, and has since become the longest in history. The longest, lasting 39 days, was in 1970 when Palestinian terrorists held 12 Israelis aboard an Israeli plane in the desert of Egypt.

Khan, a major general, said it could take several days to work out the details for releasing the prisoners jailed aboard an Israeli plane in Algiers.

"As we say in Pakistan, the camel has come through the hole, but the tail is still left. So we had better get the tail out too," he told reporters.

Newsline

Reagan cuts cause controversy

WASHINGTON (AP) — The nation's three largest economic forecasting firms told Congress Thursday that President Reagan's program contains seeds that could spurt higher inflation. Reagan's budget director urged lawmakers to cut spending even more if they wanted to be safe.

Economists from Wharton Econometric Forecasting Associates, Chase Econometrics and Data Resources Inc. told the White House Budget Committee that Reagan's proposed budget and tax cuts would lower inflation only modestly, at best, and at worst could result in higher inflation and interest rates.

At the same time, Budget Director David A. Stockman urged the Senate Budget Committee to go beyond the proposed $46.6 billion in the 1982 spending cuts if Congress believes the administration's economic forecasts are too optimistic.

"One cannot escape the conclusion, if one believes in the relationships that have governed our economy in the past, that the net effect of the president's program ... is to make the inflation rate worse," said Robert A. Gough Jr. from Data Resources.

In general, the economists endorsed the trend toward restraining federal spending and lowering tax burdens, particularly on businesses. This should lead to a modest lowering of inflation and improved economic growth over the next five years, excluding the effects of Reagan's proposals, said the forecasters.

Correction

Due to a typographical error, Thursday's article concern the misrepresentation of professional California State University and Colleges employees did not include all of the following collective bargaining unit divisions.

-11,000 tenure track faculty, librarians, student affairs officers including department chairs.
-1,200 educational support faculty and coaches including full-time temporary and part-time employees.
-1,200 educational support professional staff members including student affairs assistants, health center professionals and evaluation technicians.
-400 physician.

Senator defends previous action

SACRAMENTO (AP) — State Sen. Alan Robbins, who blocked a vote last week on a bill that might affect his sex crimes case, said Thursday that he wanted the measure applied during his trial.

He denied he was trying to overcome any bad publicity he might have gotten last week, when he was able to delay a vote on a sex crimes bill by Sen. Diane Watson, a frequent Robbins rival.

Robbins, a 38-year-old Van Nuys Democrat charged with illegal sexual conduct with teen-age girls, said he had ordered his attorney to demand that the bill's procedures for challenging an accuser's credibility be used in his case.

"Even if this bill were law today... it would not apply to any case that includes a charge of sexual intercourse with a minor," he said in a statement.

Her bill, SB121, would amend a law sponsored several years ago by Robbins which prevents the defense in a rape case from delving into an accuser's sexual history to try to prove she consented to intercourse.

However, the defense can ask questions about sexual history if it proves to a judge an accuser's sexual background is relevant to her credibility.

Ms. Watson's bill would broaden the statute to cover such charges as sodomy and oral copulation. Robbins is accused of five counts of oral copulation and four of sexual intercourse with two teen-aged girls.

Coley uncovers the pop music world

BY CARLA SIMI

It wasn't the average career seminar—notably absent were the usual corporate executives and company brochures. In their place were recording artists, songs, films and a look at the realities of the entertainment industry, the music business in particular. Some 200 students who attended the Music Career Seminar Wednesday afternoon in Chumash were treated to the refreshingly honest opinions of singer/songwriters John Ford Coley and his two new partners, Leslie and Kelly Bultan, as they took the audience "behind the scenes" of the music business.

Emphasizing the dedication necessary for success in a musical career, the trio demonstrated love for their work through the 1½-hour presentation, which consisted of slide shows, questions and answers, and much advice about breaking into the music industry.

Coley is probably best remembered for his association with England Dan & chip, which was also made of gold, in her performance in the Quintessence series.

With broken cement and crushed glass strewn about and the flashing bright caution road sign, the architecture gallery Wednesday night could have been the scene of a tragic accident. Instead, this door-way display was designed to symbolize the pains of life and once inside a whole new world unfurled.

Architect major Robert Edwards opened the doors of the gallery to a display of his works achieved throughout his four years at Cal Poly.

Edwards’ display, which is also his senior project, contained many expressionistic art forms defining humanity, space and time, as well as architectural drawings and designs.

Pencil drawings layered between two sheets of glass made for an interesting table top. Pencil and pastel drawings proposing mystery decorated the walls.

Glued layer of painted canvas, cut into geometrical shapes, were meant to project a view at inner life.

A touch of eerie music Edwards projects in his gallery is his senior project, design, not accident of his dramatic doorway into a totally different space,” said Edwards. “You pass through the doorway into a totally different space, said Edwards of his dramatic doorway destruction leading to the serene indoor designs.

Edwards said his projects represent what he believes in. “You deal with these kinds of ideas daily,” he said.

The architecture major said most of his projects relate to ideas on humanistic philosophy, existentialism and social behaviorism.

Before putting together his senior project design show, Edwards said he studied ideas and philosophies on life.

“Abstract terms some of these projects talk about these ideas,” he said.

As a mural, at least seven feet square, made of 49 abstract squares, covered a wall near the entrance. An enlarged version of the design was suspended from the ceiling in front of the mural. The caption on the wall read “how can there be in when there is no out?”

A white curtain draped down from the ceiling in the middle of the room and flat floating colored shapes hungin front of it—the caption for this design read “the fabric of space is not flat.”

These are the kinds of questions or ideas Edwards wants to put into the viewer’s mind. “I want them simply to wonder about the many images of self life,” he said.

Edwards said “I want to capture their imaginations. Underneath another drawing of an eerie old house, one reads the caption “consider the space.”

Under second glance, it may be realized that the entire middle section of the house is absent.

According to Edwards, a mound of white paper piled on the floor is a “spatial thing”, representing shadow and light.

An object in the shape of a tree is cut in half to reveal glued layer upon layer of multi-color painted canvas. In this design, Edwards said “Color is the event. I cut it in half and it’s like cutting time in half and looking at these events—it’s a history.”

These designs and ideas are Robert Edwards and he opened them to the public March 4-6 in the architecture building gallery.

The project for the 351 class last quarter was to build a duplex in Poly Canyon.

Ultimate Experience scheduled
The Cuesta Surfing Association is sponsoring "Ultimate Attraction"--an evening with surf media presentations and dancing--Wednesday, March 18 at 7 p.m. in Cuesta's old auditorium.
The movie "Wave Masters" will be shown.

The superb acting of John Hurt (above) and the special effects of "Altered States" wooed the audience, but the plot left the crowd hanging.

"Altered States" is well worth seeing if one is prepared to sit back, suspend all major brain activity for two hours, and enjoy the impassioned acting from both William Hurt and his supporting cast.

Unfortunately, the promise of these early scenes are dashed in the end when unanswered questions still hang in the air. We are catapulted to an incomprehensible climax, whose basic message seems to be the well worn "love conquers all" cliche.

"Altered States" was a satisfying experience. However, the "message", such as it was, and the plot, left something to be desired.

William Hurt, playing the lead, fit his role perfectly. On the surface his character seemed the all-American boy, but after delving into his personality a little deeper, we see he is the all-S.O.B. Willie is a Harvard professor, married and father of three children. He never loved his wife, who is well played by Blair Brown, because she was the only woman capable of loving him.

Eddie's rather sophomoric philosophy towards life is based upon his rejection of God over his own father's death, and his apparent rejection of humanity and love, too. Instead, he centers all his world on himself alone.

It is perhaps because of this self-centeredness that Eddie gets into such trouble. Using an isolation tank he experiences bizarre hallucinations featuring his religious confusion. The well-done special effects of these fantasy-like sections alone are worth going to see the movie for.

Eddie is not satisfied with the isolation tank alone, however, and takes a trip down to Mexico to partake in an ancient Indian "mushroom" ceremony. If one ignores the stereotypical nature, this scene, which has been done a hundred times in countless other sci-fi flicks, this segment of his drug induced imagination comes off fairly convincingly.

The rest of the movie is filled with Eddie's efforts to combine the isolation tank with the mushroom drug to achieve some kind of 'answer' to the cosmic question: is there life after death? Is there a God? Is there any meaning to our existence? It is exactly the failure to answer these questions that causes the movie's downfall.

At least one answer is reached, though its significance is lost in the shuffle. The combination of drug and tank confirms evolution by bringing about some kind of genetic regression of Eddie's body which returns him to what is apparently the "first man". It may be Eddie's essential ego-mania which allows him to reach within himself and extract this primal man when no one else has been able to.

Unfortunately, the promise of these early scenes are dashed in the end when unanswered questions still hang in the air. We are catapulted into an incomprehensible climax whose basic message seems to be the well worn "love conquers all" cliche.

"Altered States" is well worth seeing if one is prepared to sit back, suspend all major brain activity for two hours, and enjoy the impassioned acting from both William Hurt and his supporting cast. However, hard core sci-fi fans may find the movie somewhat of the same old thing in its search for truth, and its basic failure to discover anything new.
Expert says coyotes are answer to deer problem

SAN FRANCISCO (AP)—The author of a plan to introduce coyotes to Angel Island said on Thursday it’s the only natural way to keep the island’s deer herd from overpopulating to the point of, disaster.

University of California wildlife specialist Dale McCullough also said his plan is better than relocating hundreds of deer.

McCullough said his plan to bring back the island’s extirpated coyotes is “not a panacea,” but said “it strikes me as a better solution.”

According to a report by McCullough, the island, lush with laurel, oak and toyon trees and thick brush, can support between 35 and 100 deer which the current population is estimated at 150.

McCullough said he hopes to study the herd for a year before the coyotes are introduced with radio collars so they can be tracked, are brought in.

The coyote plan is not the first attempt to tackle the problem on the 44-acre island in San Francisco Bay. In 1970, when the herd grew to 225, state wildlife officials proposed shooting some of the deer.

“The idea was dropped following a storm of public protest.”

During a tour of the island, reporters were told that if the herd of Columbian black-tailed deer is not reduced, there could be a crisis similar to 1976, when dozens of deer died of disease and starvation.

“There were carcasses all around the island,” said Brian Hunter, regional manager for the Department of Fish and Game. He said the deaths were caused by “a whole series of diseases.”

“Some animals were just covered with flies. Their skin was sloughing off and they had dark brown spots on them that were alive” with insects, he said.

Conditions for deer are at their best now, said Hunter. But in the late summer, after they have stripped the island of grass, the deer will come to Angel Island State Park headquarters and eat the lawns.

They’ll also raid garbage cans by night, eating whatever tourists leave behind. Plastic wrappers and balloons have been found in the stomachs of dead deer.

Fish and Game spokesman Jack White said public reaction to the coyote plan was mostly unfavorable.

“I tell them there are three alternatives,” he said. “Either we can leave the status quo, and let them die...or go in and shoot them, which has been ruled out, or try natural predators. And I ask them which they would choose.”

The proposal will be presented to the Central Coast Wildlife Conservation Council.

The President’s cabinet

Early this week, Cal Poly President Warren Baker announced the selection of his recently formed president’s cabinet. The informal group will advise and counsel the university on future academic directions and promote Cal Poly in the larger social and business worlds.

A list of the thirty-six cabinet choices follows:

Deputy Secretary of State William P. Clark; Stanley Fred Hargrave, president of the California Farm Bureau Federation, Sacramento; and Thomas Corl, regional counselor for the chairman, branch of international sales, Surtex, Berkeley; are three of the cabinet members.

Also, Richard Loomis (’52), president, Leoma Inc., Army General; James M. Luckman (’36); president, The Luckman Partnership Inc., Los Angeles; Douglas Madgall (’53), managing partner; Bob And Darcy; and president, Golden States Inc., Riverside; Gerald H. Hill, vice president, Dew and Co.; Walter H. Wolf, senior vice president, Bank of America, San Francisco; and Maurice B. Mitchell, of Santa Barbara, chairman of National Public Radio’s Board of Directors.

Also, Glenn H. Morris (’50), vice president; Norman L. Howells, Monte Carlo Systems Inc., of Lockheed; James O’Keefe, vice president, Northern Corp.; Paul M. Crowninshield, Benitez A. Stolar & Associates Inc.; Leo H. Thiel, chairman of the board, Financial Corporation of Santa Barbara; and Wac W. Willey (’40), vice president, council agent, ALLY ARCO Petroleum Products Co., Los Angeles.

Coast Chemical Co. Ltd., Irvine; Jean Lane of Portola

Shackelford, president of Pacific Gas & Electric Co., San Francisco Bay. In 1976, when the herd grew to 225, state wildlife officials proposed shooting some of the deer.

Spiders to host
The Cal Poly men's volleyball team hopes to eliminate youthful errors tonight as it searches for its second Western Collegiate Volleyball Conference win against visiting Cal State Northridge in the Main Gym at 7:30 p.m.

The Mustangs, of coach Mike Wilton, have been waiting patiently for this match. The two clubs have met twice this season and two wars resulted. The two teams met in the finals of the UC Davis tournament, with Poly taking a 15-12 win, and at the UC Santa Barbara tournament, where the Matadors won 11-7, 11-9, 11-6.

"I don't think that Northridge matches up against us man for man," said junior setter Eddie Pettit.

"Northridge is the one that we have been gearing for," said assistant coach Lindsay Crow. "It is the one that we need the biggest and rowdiest crowd for." A game like this one is what makes college basketball so much fun," he said. "It is something that the

Junior hitter Scott Terry (right) will lead the Mustangs against visiting conference rival Cal State Northridge tonight in the main gym.

It's being billed as the track meet of the year on the West Coast. California vs. Cal Poly. The Golden Bears are predicting a Mustang win. The Mustangs aren't predicting anything. A confrontation between the possible Division I champion and the possible Division II titlist. Film at 11.

Cal, one of the best dual meet teams in the nation, according to Mustang mentor Steve Miller, will be the dual meet of the season for Poly. Miller, who believes that only the conference meet and the national meet are worth their weight in quarter-inch spikes, says that his team will have to blend vast improvement with some luck into winning the meet. So, when the Mustangs venture to Edwards Stadium in Berkeley for Saturday's meet, it will not be like previous Poly meets where the outcome was decided before the first event.

Miller tried to figure out the meet's results on a homemade dope sheet. Of his three trials, he had Poly winning by eight once, Poly losing by eight once, and a tie score once. You can't get closer than that.

"The matchups are incredibly, incredibly close in nearly each event," says Miller. Among Cal's horses are all-purpose athlete Derek Robinson, the Bears' leading sprinter and long jumper; Dave Porath, a 60-foot shot putter and 200-foot discus thrower; John Sup, a 3:45 1,500 runner; and Hal Schultz, who has a personal best of 14.02 in the 5,000 run. (Poly's seasonal best in the 5,000 is 14:25.)

"They have a well-balanced, and a very good team," said Miller. "Almost every event will be a critical matchup."

Although excited about the prospects of facing a Pacific 10 Conference school, the meet itself doesn't tickle Miller's fancy. "The only thing I am concerned with is that our good people continue to improve. We are usually a team that comes on late. I'm so excited about this team because we have had so many good times early."

The track team has enjoyed a tremendous year so far. The Mustangs have qualified 23 athletes and nine relay teams for nationals and a team from New York. Poly got on the board first early in the first half when Jeff Applegate booted a 38-meter penalty kick to open the game. The rest of the second half was played evenly, as neither team could mount a scoring threat. The Mustangs moved within scoring distance a few times, but penalties and good defense on the part of Columbia prevented any scoring. Saturday, Cal Poly travels to UCSB for an important league match, then will have a few weeks off. The next home game for the ruggers will be during Poly Royal.

BY MIKE TRACHOTIS
Staff Writer

The Mustang ruggers battled their way to a 6-6 tie against a tough Columbia College team Wednesday. The game, which was originally billed as a match between the team from Canada and Cal Poly, turned out to be a contest between the Mustangs and a team from New York.

The Mustangs lost the first half, playing its best rugby of the year. The losing team, however, powered their way through the coverage lines, punishing the smaller Columbia forwards with constant hittings. Columbia's backs never got a chance to run with the ball due to the coverage of the Mustang forwards which stymied Columbia's backs before they could run any plays.

Cal Poly went off the field at half with a 60-lead and plenty of momentum, but Columbia dominated during half-time and came back and scored. The momentum switched as the Mustangs continued to play their best rugby of the year, scoring a few minutes later, Applegate's 38-meter penalty kick through the goal posts for three points. The rest of the second half was played evenly, as neither team could mount a scoring threat. The Mustangs moved within scoring distance a few times, but penalties and good defense on the part of Columbia prevented any scoring.

The Mustangs will send Mark Petersen, John Scott, Steve Wright, David Boya, Loren Gerhardt, Glenn Perry, Greg Shoals, John Ed wards and Andy Peters back east. Poly also has qualified three relay teams.

Now comes Miller time!
From page 9

The one thing he is sure of is that when his team steps on the main gym floor at 8 p.m., the team on the other side of the scorer's table will be a handful of trouble.

"When you get this far, all of the teams are good," he said. "All that we have to remember is that this is a new season and past performances do not matter anymore.

Wheeler has been enjoying the fanfare that accompanies being one of the final eight as it has made his job easier.

"For a game like this, a coach doesn't need to say much. There is not much more that the coach can say that the guys on the team don't already know," he said as he leaned forward to answer another phone call. "When you get this far, the guys know what it is all about and what they have to do. In fact, no one expected us to be in this tournament at this stage. The guys are loose and are having fun.

"Wheeler is hoping to end the season at home on a winning note. The team hopes to give the fans something to yell, scream and holler about. The Mustangs have been given a second chance and hope to make the best of it." It is obvious that so does Ernie Wheeler.

Game notes: The winners of Saturday's quarterfinal game will meet the West quarterfinal champion, the winner of the Puget Sound-Florida Southern game. Both Cal Poly and Puget Sound lost to U.C. Riverside in the West Regionals last season. The semifinal and final rounds of the NCAA tournament will be staged in Springfield, Mass. on March 20-21. Tickets are on sale at the University Union ticket office today and will go on sale tomorrow at the door at 6 p.m.

Cal Poly, led by senior forward Rob McKone (center), will host New Hampshire Saturday night in the quarterfinal round of the NCAA Division II basketball tournament.

Netters to host LA

The Cal Poly men's tennis team seeks its third California Collegiate Athletic Association victory of the season as it hosts Cal State Los Angeles.

Today's net match is set for a 2 p.m. start on the tennis courts behind the main gym. The Mustangs, 2-1 in the CCAA and 4-4 overall, will be trying to bounce back from a 7-2 loss at Santa Barbara on Wednesday.

Poly won two matches and came close in four others. Coach Ken Peet was pleased with his team's performance despite the loss.

"We were not expected to win," Peet said. "Santa Barbara is a very talented Division I tennis team and overall we played quite well."

Andrew Weber and Ken Ueltzen were the lone Mustangs to pick up wins for Poly. The women's team was blanked by Santa Barbara, 9-0.

Santa Barbara 7, Cal Poly 2

Singles: (Santa Barbara first) Larry Barnett d. Robb Chapelle 6-2, 6-2; Dave Siebel d. Martin Dydell 6-1, 6-0; Marsh Riggs d. Tom Morris 7-6, 6-3; Devin Sconyers d. Bill Frink 6-3, 7-5; John Post d. Andrew Weber 6-4, 6-1; Mark Lawson d. Ken Ueltzen 7-5, 6-4.

MUSTANG DAILY—Julie Archer

Mustang Daily—Julie Archer

Page 11
Clean air, dirty profit

Once more, the Reagan administration has chosen to let environmental concerns go by the wayside.

Sunday the Los Angeles Times reported in its lead story that Reagan is seeking to ease clean air standards in California, so that the refining of high-sulfur crude can take place in the state. Right now, only the purer, low-sulfur imported crude is being refined there.

It is incredible that the present administration can consider this, with the state of air pollution today, especially in Southern California. All of us that traveled to the Southland last fall can remember the many smog alerts and the brown-tinged mass of air that stretched from Ventura to the southernmost reaches of San Bernardino.

Besides the basic ugliness of smog, it is a health hazard: it is causing acid rain, which can render readable land infertile and destroy lake habitats; and could, conceivably, change the entire weather system of the earth. It is a problem which needs to be dealt with, yet the present administration is now requesting that it be made worse.

This is not to say that it would be without benefits. Reagan's analysts claim it will save the United States several billion dollars a year in oil import costs. They say. But who's to say that this would really benefit the consumer? Perhaps the profit would just go into the pockets of the oil companies, never to be seen again. Consumers might be glad to receive the benefit of cleaner air.

Also, the oil companies will have to try to convert the refineries to handle the high-sulfur crude, and it's possible that they'll pass this cost on to the consumer, since the companies will have to take a loss on the project in the beginning, before the profits can be gained from the non-import oil.

Above and beyond the money factor, we have to consider the environment. The dirtier we get things, the more it will affect the environment, and ultimately, the human species in this earth.

And it will take longer in the end to clean things up—if we ever do.

Perhaps it looks like a small thing, to trade air quality for cheaper oil. But the oil in a short-term proposition. The earth, and its air, and its other fragile resources, can be the only long-term priority, because it is the lifeline of all its creatures.

So a few more people have respiratory problems. So a few more get emphysema and lung cancer each year. But how much cheaper oil. But the oil is a short-term proposition. The earth, and its air, and its other fragile resources, can be the only long-term priority, because it is the lifeline of all its creatures.

So a few more people have respiratory problems. So a few more get emphysema and lung cancer each year. But how much cheaper oil. But the oil is a short-term proposition. The earth, and its air, and its other fragile resources, can be the only long-term priority, because it is the lifeline of all its creatures.

Still, the greatest treasure I will hoard are all the fine friends I have had the fortune to meet. Friends, faculty members, and associates have all made life a little easier. There are too many to name in this short space—you all know who you are. I would like to take this opportunity to simply thank all of you, for the friendships we've shared. Until later, FAREWELL, MY FRIENDS!!

Julie Archer and Rick Sample

Letters

Editor: Farewell, my friends.
The time has come when I must retire the old backpag Graduation is just around the corner. My time here at Cal Poly has been filled with many happy moments, as well as a few, sad ones.

My studies have been hard, my activities have been fun. However, there are some things I will carry with me as I venture out into the "real" world. Of course, I suppose I'll utilize to some extent the education I have received.

Opinion

Apprently overwhelmed by studies, this student takes cover from the outside world on the library lawn. The sign, seeking donations, reads: "Help Mr. Wizard... I don't want to be an architect!"

Editor: It's about time a little creativity is shown in the often times dull and blase world of advertising.

I am referring to the outrageous "average female Armadillo pizza eater" ad in your paper (March 10th) and to the fact that one female reader feels so insecure about her own femininity that she must condemn the ad as tasteless. Through it's amusing radio spots and newspaper ads Armadillo has managed to capture my attention and whether or not I actually purchase their product, the mind that creates these fascinating promotions should most certainly be commended.

Phil Cocker

Letters

Editor: I do not wish to sound like a cynic, but I feel that the motivation behind Mr. Rule and Mr. Spoer, opening up a Susan C. Lindsey Defense Fund, is more than simple concern for Ms. Lindsey, or for students in general, for that matter. The main reason I say this is because $25 is not much money to start a defense fund with. Once Ms. Lindsey's matter is taken care of, what then? I seriously doubt that the poverty stricken students of this campus will pour out from their wallets hard earned dollars for someone else's savings account—no matter who's name is on it behalf.

Another area of this story that strikes me as being odd is the connection of Mr. Rule and Mr. Spoer with the Universal Life Church, and especially with their concern over screening "students who apply for assistance from the fund." If these are actual representatives of the U.L.C. and are doing this action in its behalf, fine. That would be a much appreciated act. Actually, it would be quite an outstanding idea—sort of like private traffic citation welfare for students who can't be bothered with details. But I kind of doubt that they are doing this in any official church capacity. So then, what are their motives? To meet pretty girls who cry when they get a citation? Or maybe to expose college-age people to a new life through membership in U.L.C.? I don't know. I am not trying to de-nounce the idea behind such a fund. In fact, I think something like a traffic defense fund would be well-received. But, I would urge anyone who would get involved with this project to keep their eyes open and keep the big picture in view.

Eric Overeen

Letters

Editor: I am slightly more than frustrated with the reading material passed across the back page of this paper everyday.
The Mustang Daily has the distinct quality (or disappointment) of giving off the aura that the Cal Poly Campus is a student body made up of Liberal, Anti-Progressive, Anti-Reagan, and Anti-Nuclear radicals.

Contrary to the beliefs of the Editor and/or the authors of Opinion, the Cal Poly student body does have a large population of conservatives who back President Reagan, his views and his head-on attitude. As for nuclear power, by reading the Daily you would believe we are all die-hard nuclear protesters. The nuclear issue is another which has been misconstrued through countless articles on Anti-Nuclear opinions.

My complaint is this, Gentlemen: You as individuals are more than entitled to your opinions and beliefs, but as journalists it is also your duty to represent the entire population of the student body.
