

## Construction of a House in Tijuana, Mexico

There is a major need for solid, structurally sound houses throughout the world, and there are many non-profit organizations who go and build such a house for people in need. For this project I will be going to Mexico with a non-profit called MI6:8 when they go and build three houses in the outskirts of Tijuana, Mexico. My job with them will be to use the skills I have learned to lead a group of people in the construction of one of the three houses.

**Key Words:** : Construction, Mexico, Non-profit, Management, Schedule
