

Habitat for Humanity Global Village Trinidad & Tobago

Morghan Heim

For my senior project I chose to help build a home for Habitat for Humanity Global Village in Trinidad and Tobago. Habitat's mission is to provide shelter for those in need, and they do so in many countries around the world. I experienced working in another country with a lack of building codes and equipment. The experience challenged me and taught me many lessons in working with teams and in foreign places. Our team was set out to construct the foundation of the home, but due to weather impacts and lack of tools, we did not completely finish this task. Unfortunately, after we left our project came to a halt. This report outlines my experience, the organization, my recommendations, and lessons learned.

Key Words: Habitat for Humanity, Global Village, foundation, residential, construction

Day 1 - Arrive and start digging!
Start tying rebar cages

Day 2 - Can't digging,
place rebar cages

Day 3 - Mix concrete
for footings

Day 3 - Pour concrete

Day 4 - Lay CMU
blocks

Day 5 - Compact soil
and lay rebar and
waterproofing
