

Cal Poly Rodeo Observation Deck

Timothy Smith

This senior project was designed to help keep the Cal Poly Rodeo program at the top with a new observation deck for the practice arena. The major steps taken to complete this project were design, fundraising and construction. The total area of the deck is approximately 1,100 square feet and includes connections to an ADA approved ramp and multiple staircases. This is a landmark project for the Cal Poly Rodeo program and will assist them in keeping the winning Mustang tradition alive.

Completed Deck at Cal Poly Rodeo arena

Key Words: Observation Deck, Teamwork, Estimate, Schedule, Planning

Original slab at Cal Poly Rodeo arena

Completing joists and blocking at rodeo observation deck

Student Tim Smith cuts blocking for rodeo observation deck

Students Tim Smith and Ryan Fiorio work together to complete decking layout.
