

# Journeyman International: Canopy Life School, Housing & Training Complex in Kenya

## Purpose:

*To provide children in Migori County, Kenya with an adequate opportunity to thrive by eliminating existing issues such as education, housing, dining, safety and more.*

## Migori County, Kenya

## Abstract:

The purpose of this project was to provide a master plan for a primary school complex in a rural village in Migori County, Kenya. This facility aims to eliminate any issues for students growing up in the area. The master plan includes a primary school, housing accommodations, a training center, and a dining hall to cultivate success through all stages of these children's lives. The project is headed by a non-profit organization, Journeyman International in conjunction with Canopy Life International and Take Heart Africa. The project was interdisciplinary involving a construction manager, an architect, and two architectural engineers all working together throughout the year. As the construction manager, I was responsible for a conceptual estimate, quantity takeoff, project schedule, site utilities analysis, hazard and risk analysis, a site and safety plan, and a storm water pollution prevention plan (SWPPP).

**Project Duration: 307 days (10 Months)**

**Conceptual Budget: \$2.08 million**

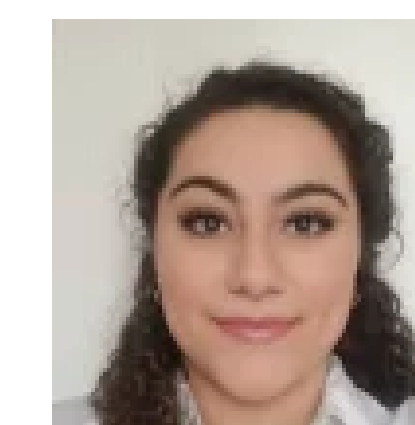

## Who:

**Spencer Mishky**  
Construction Management Student  
Cal Poly, San Luis Obispo

**Quinn Porter**  
Architectural Engineering Student  
Cal Poly, San Luis Obispo

**Janelle Totari**  
Architecture Student  
Cal Poly, San Luis Obispo

**David Corona**  
Architectural Engineering Student
