

Design of Amphitheatre Seating at the San Luis Obispo Botanical Garden

Sydnee Greer
California Polytechnic State University
San Luis Obispo, CA

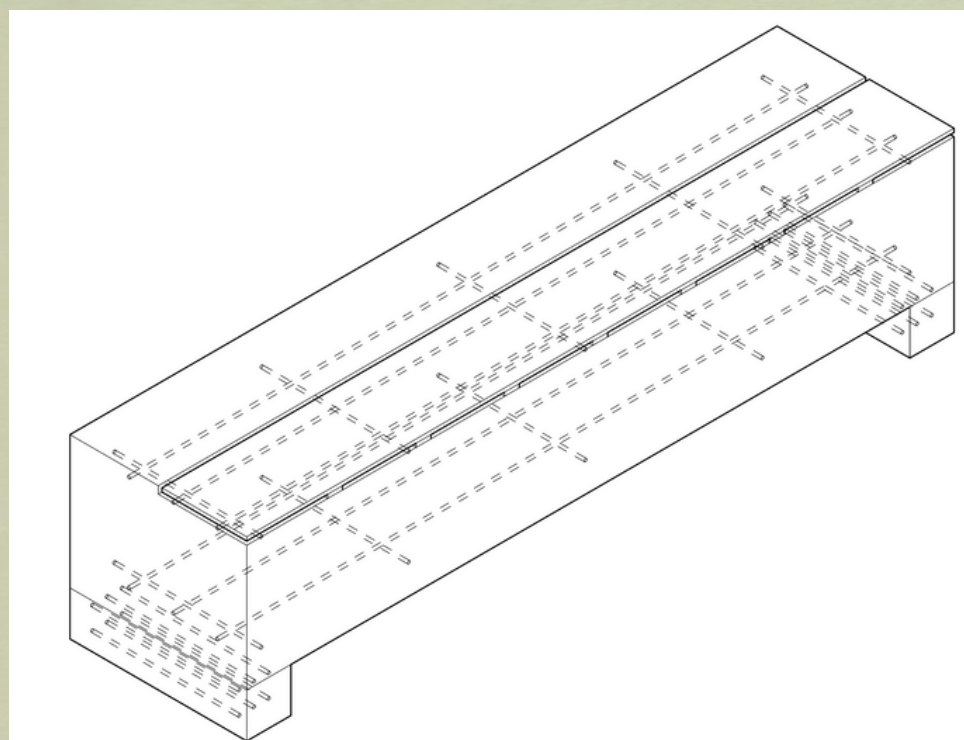

This senior project was designed to provide a gathering space for the San Luis Obispo community. With the San Luis Obispo Botanical Garden providing an outdoor space for nature education, wedding ceremonies, and several other types of gatherings, they wanted amphitheater seating for forty guests. This project required design and construction of ten-eight-foot concrete benches with wood Trex added on top for comfort. This amphitheater will help the Botanical Gardens further their reach and impact into the San Luis Obispo community as a local nonprofit.
