

Preliminary Design of Vests for the VEST Hackathon

Amanda Schrader

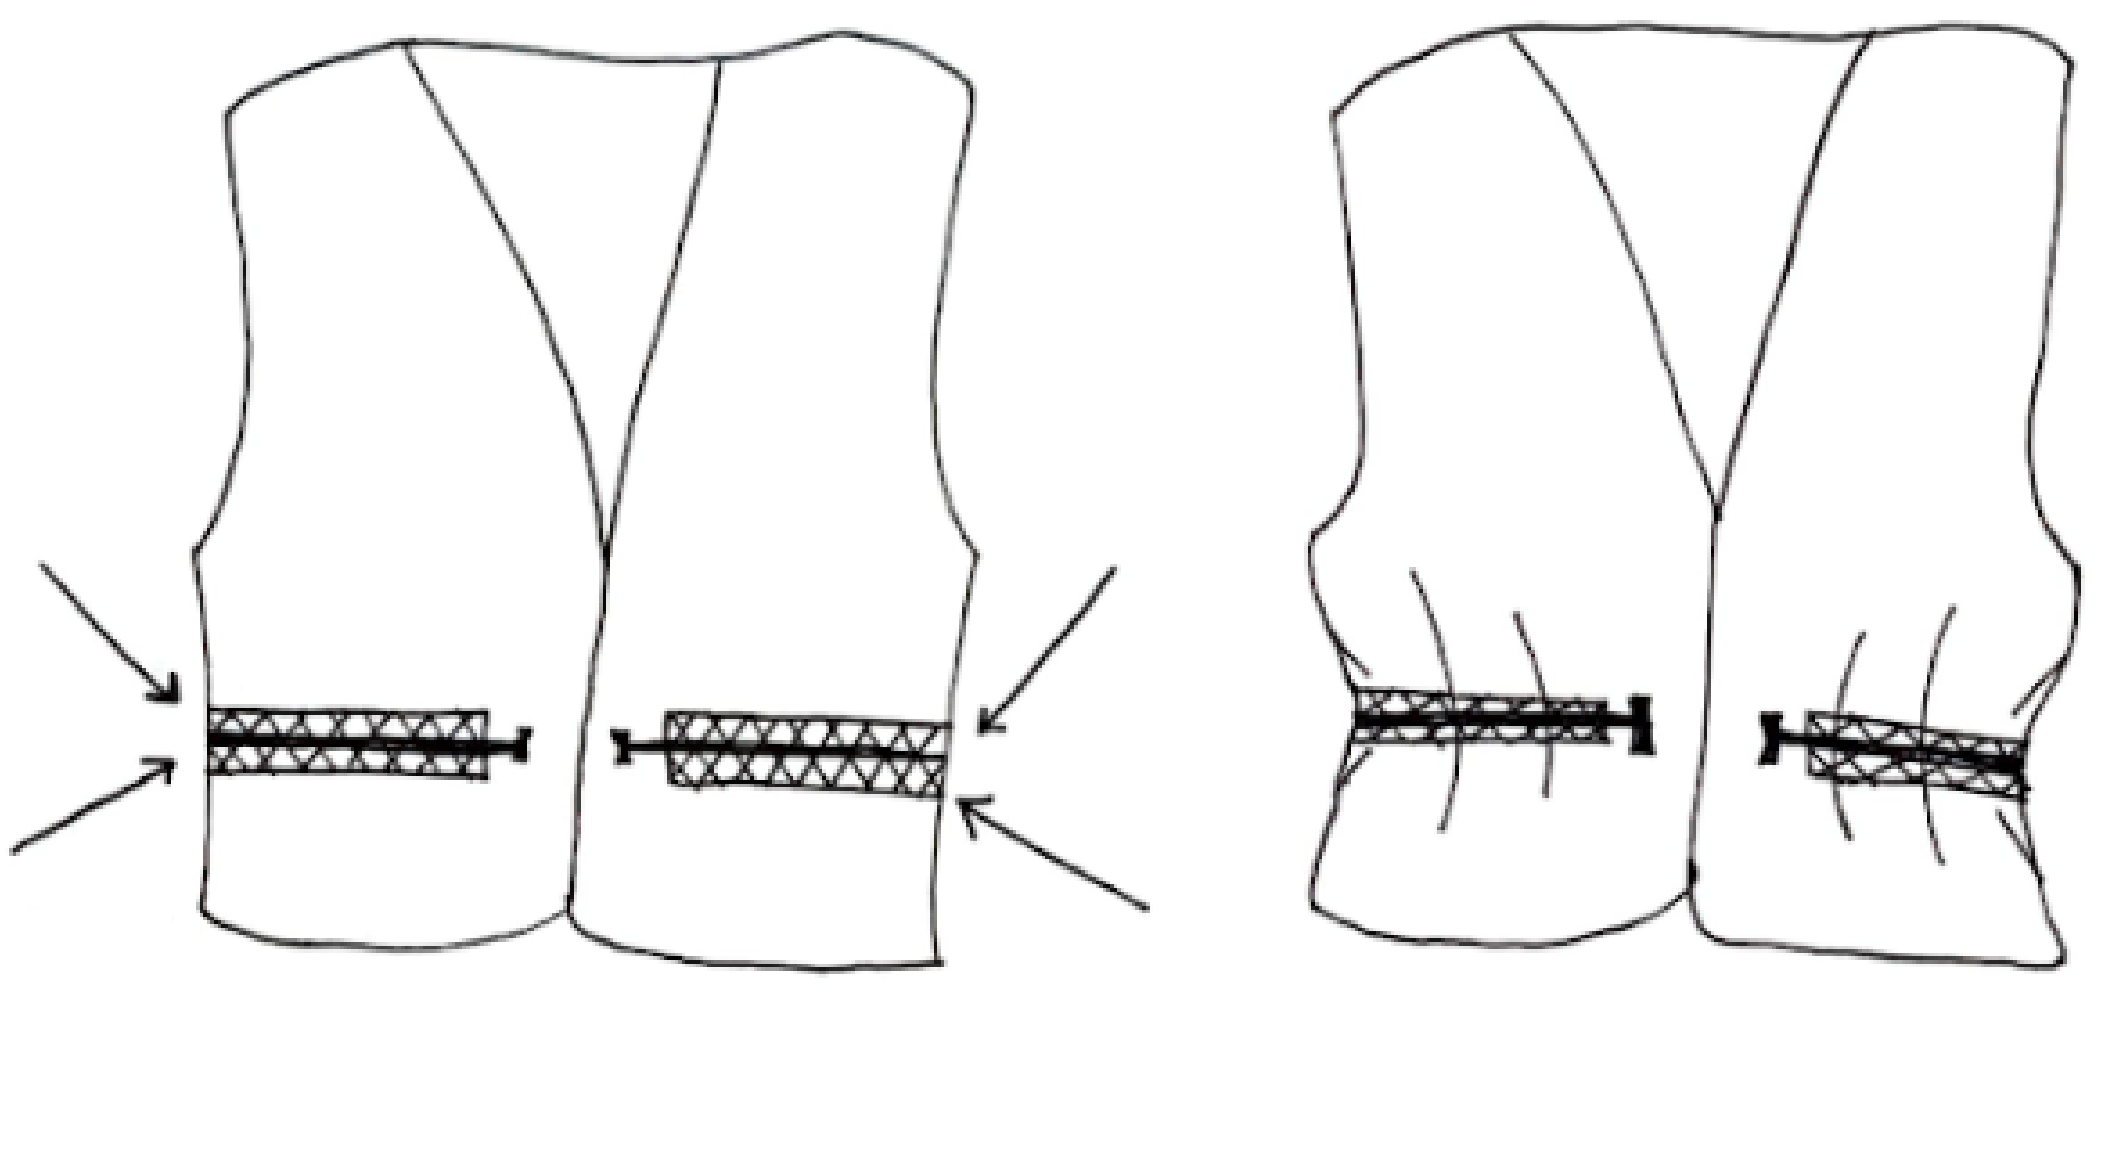

The purpose of this project is to break down and recreate the standard of safety vests in the construction industry due to the increase of females and a wide range of body types. This project was just one stepping stone to support the Verifying Everyone's Safety Together (VEST) Hackathon that promotes a vest that fits all body types for inclusivity and safety purposes. This is the preliminary designs of a reinvented and newly thought out safety vest.
