

Oceanside Angler's Club David Pine

Memorial Weight Board

Tanner Pine

The David Pine Memorial Weight Board was built for the Oceanside Anglers Club. David Pine was a founding member of the original club and recently passed away. In order to commemorate him, I was contracted to design and build a display board. The Oceanside Anglers Club is a nonprofit organization that organizes beach clean-up, teaches water safety sessions, provides equipment for harbor purification, and gives back in many other ways to their local community. The board is made from marine grade pine. The trees were hand picked, felled, and milled. The board was built in such a way to ensure it's longevity. The display board was built and installed in the Oceanside Harbor. This board was created and designed based on the requests of the Club. David Pine was a marlin fisherman. Thus, in his honor, they decided to memorialize him on the board with a marlin. The marlin depicted on the board was his trophy winning marlin that hung in his garage.
