

Updating the Cal Poly Construction Management Community Partners List

Abstract

The Cal Poly Construction Management Department currently has a list of community partners that students use to find organizations to contact for classes that involve construction service learning and senior project project-based ideas. There are many project-based class projects that are designed and built every year for organizations in the community. This project was created with the goal of updating the Cal Poly Construction Management Community Partners List with new community partners and an updated sheet layout that includes more information. Students will be given the opportunity to read a detailed description of the organization and find all relevant contact information in one spot. The final deliverable of the project can be distributed to students in construction service learning and project-based learning classes to help them brainstorm ideas for who they want to perform their project for.

Key Words: Community, Partners, Project-based, Non-profit, Organizations

| Name | Description | Website | Phone | Email | Address |
|------------------------|--|---|----------------|---------------------------|--|
| Access Support Network | The Access Support Network, or ASN, serves the San Luis Obispo County and Monterey County communities, assisting those living with HIV/AIDS. | https://www.volunteerslo.org/agency/detail/?agency_id=54275 | (805) 781-3660 | dcummings@asn.org | 1320 Nipomo St San Luis Obispo, CA 93401 |
