Directory

The Directory Section is a continuing feature of E&A. It is a source of information on groups and periodicals concerned with ethical questions about treatment of non-humans. The groups and periodicals themselves provide the information, subject to space limitations and minor editing by the E&A staff. The policy of the Directory is one of maximum inclusiveness, i.e., a submitted listing for a group or periodical will be included unless it is wholly irrelevant, manifestly libelious, or clearly pornographic. It is hoped that local, state, provincial, regional, national and international groups of all sorts will submit listings. To obtain a listing form for your organization, or to recommend that another group be listed, contact the SSEA office.

Organizations

Canadian Federation of Humane Societies
101 Champagne Avenue
Ottawa, Ontario K1S 4P3
CANADA

The Canadian Federation of Humane Societies (CFHS) represents, at the national level, the concerns of its 36 member societies across Canada. The Federation concerns itself with the entire ranges of animal issues, including whaling, factory farming, transportation, pets, hunting, trapping, sealing, animals in research, the exploitation of animals in entertainment, humane education, the legal status of non-humans, animals in therapy, the protection of exotic species, and animal euthanasia. Membership is limited to societies, but individuals may contribute to the CFHS. Any donation over $5 will entitle the donor to a year's subscription (4 issues) to ANIMALS CANADA, published to inform readers of the work of the CFHS and to present animal welfare problems. The CFHS is a non-profit organization and all contributions are tax-deductible.
Living Ocean Society
P.O. Box 855
Sausalito, CA 94966

The Living Ocean Society (formerly the Breach Foundation) was founded in 1979 by Hardy Jones, co-maker of the film DOLPHIN, and producer of the films ISLAND AT THE EDGE and A YEAR WITH THE DOLPHINS.

The purpose of the society is to protect marine mammals and the ocean environment. We are also exploring the possibilities of communication between humans, whales and dolphins, and other intelligent species.

We believe the long-term solution to environmental problems lies in a change of human awareness about our world. We primarily work through mass media to expose these problems, and through scientific research to propose their solutions.

Our current projects include the ongoing effort to end Japanese slaughter of dolphins at Iki Island. More happily, we are also working with a school of spotted dolphins in the Bahamas—studying their social structure, and beginning a relationship.

Membership dues include a one-year subscription to our quarterly newsletter, to keep you up to date on our actions, and environmental issues around the world.

Individual membership—$15; Family—$25.
As a member, you are informed of, and invited on our unique research expeditions.

Rare Animal Relief Effort, Inc.
c/o National Audubon Society
950 Third Avenue
New York, NY 10022

RARE is a non-profit, volunteer organization devoted to maintaining the Earth's ecological diversity, upon which man's very survival depends. It serves as a vehicle through which individuals of diverse backgrounds cooperate to bring about major advances in protecting rare flora and fauna.

RARE concentrates technical and financial assistance on developing countries, principally in Latin America, where small expenditures yield great benefits. It functions through a network of international conservation organizations, and cooperates with national wildlife services and concerned individuals, to establish projects for environmental education, organize programs for safeguarding endangered species and aid in implementing sound management practices for their threatened habitats.

RARE receives logistic support from the National Audubon Society, and is able to carry out its programs with generous contributions from individuals, corporations and private foundations.

Sea Shepherd Conservation Society
1926 West 4th Avenue
Vancouver, B.C. V6J 1M5
CANADA

The Sea Shepherd Conservation Society is a non-profit society set up for the purpose of supporting the operations of the marine mammal protection and conservation ship, "Sea Shepherd."

In March, 1979, the "Sea Shepherd" sailed to the Gulf of St. Lawrence on Canada's eastern coast to interfere with the slaughter of seals, the expedition succeeded in saving over 1000 seals before our crew was arrested. In July, 1979, the "Sea Shepherd" hunted down the pirate whaler "Sierra" and rammed her off the coast of Portugal. We later succeeded in sinking the "Sierra" in Lisbon harbour in February, 1980. We sank two Spanish outlaw whalers in Spain in April, 1980, and pressured three more pirate whaling operations out of business, two in South Africa and one in the Canary Islands.

In 1981, we will once again interfere with the Canadian seal hunt. In the summer we will be sailing to the Bering Sea to interfere with the killing of Alaskan fur seals and the Russian killing of California Grey whales.

The Society maintains no administrative overhead and has no employees. All crew members are volunteers. We have agents representing us in Canada, the U.S., Great Britain and Australia.

Memberships are $15 a year. Members receive a monthly copy of the "Sea Shepherd Log."

All correspondence should be addressed c/o Captain Paul Watson at the address listed above.
Sea Turtle Rescue Fund
Center for Environmental Education, Inc.
1925 K Street, NW
Washington, DC 20006

The Center for Environmental Education was established in 1972 to inform people about environmental issues and encourage citizen involvement in improving environmental quality. Seeing a need to form bridges among competing interests, the Center uses environmental education in its broadest sense by gathering information from many existing sources and developing specific strategies to achieve environmental/quality of life objectives through citizen involvement and commitment.

The Sea Turtle Rescue Fund (STRF) is a program developed by the Center. The goal of STRF is the recovery or maintenance of sea turtle populations at their optimal level within the marine ecosystem. Long term objectives include:

- the elimination of threats to sea turtle populations arising from international trade;
- increasing scientific and management understandings of sea turtle biology and population dynamics;
- increasing public and governmental awareness of those threats confronting sea turtles around the world;
- protection of sea turtle habitat from ill-considered coastal development, pollution, and fishery conflicts.

Research, education, and citizen action are the means which the STRF uses in attaining its objectives.

Vegetarian Information Service, Inc.
Box 5888
Washington, DC 20014

The Vegetarian Information Service, Inc., is a non-profit educational organization formed in 1976 to advise the American public on the various merits of a vegetarian way of life. The educational programs focus on government agencies, mass media, and vegetarian activists and encompass personal contacts, expert testimony, review of pending legislation and administrative actions, dissemination of news releases and letters to the editor, booking of appearances on radio and television interview shows, public service announcements, annual conferences, topical articles for Vegetarian Times, assistance for authors and scholars of vegetarianism, and guidance for vegetarian activists. VIS is funded entirely by personal contributions from individuals who feel that vegetarian ideals deserve to be aired. All contributions of $20 or more receive periodic mailings and the satisfaction of promoting vegetarian interests in the nation's capital.
