EDITOR'S NOTES

When we pulled into the young vineyard in the Santa Maria foothills we saw grapevines that showed only the hint of a future crop. Slender canes curled lime-green tendrils out the tall ends of protective yellow grow tubes. Yet as the tubes were removed for our photographer, I felt the old promise of fall harvest.

I was swept back to the San Joaquin Valley, where my husband and I lived for several years on a small family ranch south of Fresno. The grapes there were grown for raisins, not wine, and the vines were decades-old, but the covenant of harvest was the same.

We knew the black stumps would leaf out in a spring surprise, grow lush over the summer, and by late August hang heavy with Thompson Seedless grapes. Then the pickers would come with their curved knives, settling the dusty yellow bunches on flimsy paper trays, and we would play the elemental game with Nature all farmers do: in our case, praying for three weeks of dry weather.

For two of our years there we lived in a small house at the edge of a vineyard. Our living room bordered vine rows running west to where they disappeared in the distance, beyond them the geometry of Math 203. We had the singular good fortune to have Dean Whitson for this class. He was a person with the ability and passion for teaching. Each day we showed up during his office hour to ask questions and get guidance on the day’s lessons. He never missed a day during six weeks [and] often stayed long after the hour was up to help us. He

FROM OUR READERS

I just received my spring issue of the magazine and noticed that Dean [Milo E.] Whitson had passed away.

I am a 1965 graduate of the Architecture Dept. and now a practicing architect in Anchorage. In the summer of 1964 [four of us] were going through the agony of taking the dreaded calculus and analytic geometry of Math 203. We had the singular good fortune to have Dean Whitson for this class. He was a person with the ability and passion for teaching. Each day we showed up during his office hour to ask questions and get guidance on the day’s lessons. He never missed a day during six weeks [and] often stayed long after the hour was up to help us. He

ON THE COVER

Crop and fruit science specialist James Ontiveros and Cal Poly senior agribusiness/marketing major Marta Polley examine a young pinot noir grapevine in their Santa Maria vineyard. The hopes they nurture for a first harvest in 1999 mirror the possibilities of a unique proposed wine marketing minor at Cal Poly that would expand current viticulture classes and give future students an edge in the wine industry (see story on page 4).

From Our Readers continued from inside front cover

never gave up on us even when we wanted to.

We’ve never forgotten this man or the class he taught us to master. We all graduated and became architects. We couldn’t have done it without him. This man, and other dedicated teachers, is a major reason why Cal Poly has gone from a very good college to one of the best universities in America.

— Jeffrey S. Wilson (ARCH ’65)

Just got around to reading the latest Cal Poly Magazine (spring ’98) and was wondering why the editor felt it necessary to add “[sic]” to Mr. Kernberger’s letter. I also attended Cal State Poly College in the ’60s . . . and that was the name of the school back then. You can look it up.

— Ray Dees (MATH ’69)

We did, and Mr. Dees is correct. We were confused by the current names of Cal Poly, Pomona (Cal State Poly University) and Cal Poly, San Luis Obispo (California Polytechnic State University). - Editor

Just got the latest Cal Poly Magazine and read Mr. Kernberger’s unhappy letter. In your reply, you missed the perfect opportunity to also tell him that your publication is printed on campus in the Graphic Communication Department by students who are being educated in the process of “the real world.” Cal Poly’s learn-by-doing motto is lived out every day on campus, but especially by the Graphic Communication and Journalism departments, who partner to turn out the Mustang Daily newspaper, among other things.

I’m a proud graduate of Cal Poly and I’m making a good living using the skills and knowledge I learned there. [And while I was] in college, being an employee of University Graphics Systems helped pay my expenses.

Invite Mr. Kernberger for a tour next time he’s in SLO and bring him up to date on the “real education” that goes on at Cal Poly and produces excellent publications like Cal Poly Magazine. Keep up the great work. You make me proud!
