Neophytes Initiated With Much Ceremonious Hilarity At Reservoir Canyon On Friday Night, May Ninth.

Plenty of Eats! Enough Sleep?

BY JAMES RUMMEL,

The personnel of the Block "P" Club had their annual trip this last Friday at Reservoir Canyon. There had been a short meeting to instruct the neophytes on the rules of behavior, and then we left the gym promptly after thirty-four, after having given the neophytes a liberal dose of a certain stimulant. In the cars we had all the essentials that we would need for our overnight outing. These essentials included several pies and a couple of boxes of apples and oranges. The minute that we left the gym the new members were forbidden to speak among themselves, or to smoke either in or away from camp.

We soon arrived at the site selected, and the initiates were immediately sent out in quest of wood, made to clean camp, help cook, or to assist the old members in any way that they could. A roll call was sounded every few minutes, and all new members were required to give an account of themselves.

They were given special and extremely suggestive names by the great Simmons, and they had to answer accordingly. Any surlyness or impertinence was rewarded by a firm and vigorous messaging from the rear. Being late was also another sure way to collect a few black marks, and this also had a nice penalty. The auger promised of these oval-shaped pieces of wood had an invaluable good effect upon the new members.

The baseball bats were made of corncobs, rolled into thin cylinders, and then embedded in the wood. The new members were then given the task of carrying the bats to the site selected, and there they were to assemble and put the bats together. The bats were made of different materials, such as wood, metal, and even plastic. The new members were then required to give an account of themselves and their bats to the old members. This was done in the presence of the great Simmons, who would then award the new members with their official names.

The meeting was then adjourned, and for a few minutes the camp settled down to a comparative peace and quiet. Several fellows who had so meticulously the fundamentals of music on the basketball trips began to viciously render aour feelings and thoughts into a harmonious melody. The minute that we thought that it was time to get up, and by five o'clock most of the fellows were up and dressed. We then had another bounteous repast, and for one time since we've been at Pol y, we had all that we wanted. The breakfast was very good, and consisted of pancakes, bacon, eggs, rolls and assorted jams. There was also some coffee that would easily float a nail.

After we were through, we all sat down and talking awhile, we finally came home just as the students were preparing to get up for their regular breakfast.

Looking back over the trip, we can think with a great deal of pride and pleasure of the wonderful sporting spirit shown by every member of the association, and of the good time and fun that we had on the trip.

J.C. Dorm Notes

Cell Block Notes, then from the last three letters in Mountain View High School. He is in the first quartet on Cell Poly team next year.

Bill Cheney has won the title of S. A., or otherwise known as "Sexes-Of-Der-Athletic." Bill recently visited the Fruit Products company, which is located in the downtown area of Los Angeles.

Paul Sortino recalls that girls in San Pedro Academy are not very friendly to him, but he gets along well with them. Probably Poly will be his home for next year.

Howard Ellis and Dan Sagner, well known motorcyclists of this school, can be found during their week-end.

A FEW SUGGESTIONS

We have real school spirit here at Poly, but, as dorm is dormant and sluggish sometimes. There are many worthwhile ventures we can work toward giving something.

Some of the new students are more interested in football than basketball, but the purpose of this editorial is to offer suggestions that may aid the student body for next year.

The main aim of every game, with talks and yell, might aid considerably. Really, during the football season would help the morale of the team, and would aid our chances of victory. Establishing and maintaining traditions, such as Hick Day and Senior Ditch Day form a real likeness for the school and this liking is the foundation upon which the success of the student body depends. An active membership in all the organizations possible will invariably cause a greater school interest. The election of a capable activity president will put the club at the head of the active organizations. This can be readily seen and understood by the cooperation that give each other during any school affair.

The above points together we find we are working toward something that in all probability is our greatest desire, that is a greater POLYTECHNIC.

WELCOME NEW MEMBERS

The old members of the Block "P" Club have just finished initiating the new members who have earned the Bill White year. At this time, they wish to extend to them, a hearty welcome and a hope that they will join in the activities sponsored by the Club, and, of all the officers of the campus Poly, Vorheis.

In this issue of the Polygram are published the By-Laws and Constitution of the Club, and it is the hope of the old members that the newcomers will take a look at these rules and laws of the Club, to be of their best advantage.

At the closing of this school year, many of the older members will be leaving, and it is therefore necessary for the newcomers to step in, to fill their places, and to keep the high ideals for which the Club stands.

BLOCK LETTER ASSOCIATION

The membership of the Block Letter Association is limited to those who have earned the official California Polytechnic letter in the fruit major sports, and have been duly elected by a two-thirds majority of the active membership. There are now two official letters, the new Junior College letter in the form of a C, P, and is given to those who have earned the official Polytechnic letter in High School competition.

The Block P, which was the only letter in vogue up until this year, has been given over entirely to those students who earn their letter in High School competition.

The purpose of this organization is to foster athletics, encourage school spirit, promote better fellowship and other school activities and at all times work toward a greater Polytectnix. Giving a little thought to the above ambitions of the club, we find it has always been the duty of each member to encourage both old and new students to take part in these activities. Until last year, it has been found that those who participate not only build themselves up physically and mentally, but also gains for them the very best of associates.

It is the part of each member to live up to the rules of the game, and to do his best to create friends toward something that in all probability is our greatest desire, that is a greater school spirit. It is the part of each member to create a greater enthusiasm in agri­
