Poly Welcomes

Light, Inexperienced Football Team Drills

Will Cal Poly have a football team this fall that can match last year's record of seven victories out of nine games played?

This is the question that was running through the minds of Poly students this week after they learned that only six lettermen from last year's squad have returned to form the nucleus of the 1939 team.

Faced by the prospect of a green and inexperienced team, however, the letter winners have expressed confidence that the team can be made to do even better this year.

"The whole forward wall will have great game sense in it, and from the looks of it we should be able to fill in the gaps left through the absence of Student Body President Fred Autry," said Lopez, an All-American tackle.

"We have six men out this year in the line that should do very well, and there are many others on the squad who should be able to make the team." said Brownlee, a three-year varsity man.

The other experienced players expected to make the team are wide open. The names of the players are as follows: Lopez, north Hollywood; L. Lopez, Los Banos; Cavanaugh, Atascadero; Boss, meat animals major, was made first summer yearling Hereford steer champion and grand champion at the State Fair.

"We welcome you as new students to the Poly campus," said President Julian McPhee, "and we hope that you will enjoy your stay here."

The more effort you put into your various responsibilities, the more valuable the entire institution is known all over the United States and even in foreign countries for the type of work that is being carried on.

We welcome you as new students to the Poly campus," said President Julian McPhee, "and we hope that you will enjoy your stay here."

Work Begins On Two New Campus Units

Californians are always in evidence of the neatness of the campus. There is also a $600 wiring job that is being carried on.

"The game against San Francisco Friday will be one of the biggest attendance pullers of the fall," said President McPhee. "The weather is expected to be fine, and the game should be well attended."

High points among registration schedules for incoming freshmen Tuesday afternoon.

Student enrollment at California State Polytechnic for the week ended Sept. 15 is at the highest mark in history. A total of 512 students had been registered at the Poly by Sept. 20, with an enrollment total of 1,400.

"We welcome you as new students to the Poly campus," said President Julian McPhee, "and we hope that you will enjoy your stay here."

WELCOME, FRESH

Again the time has come when the upperclassmen, administrative staff and faculty at California State Polytechnic take real pleasure in welcoming its scores of new freshman students.

There is added satisfaction in extending the greeting because the group of more than 600 freshmen is the largest in the history of the school. The size of the first-year class is a tribute to the increasing prestige of Cal Poly among residents of the state, both young and old.

Why have these 500 men selected Cal Poly for their education and vocational training? One reason the school offers complete facilities for agricultural and vocational training for specific employment after graduation. There is a spirit of friendliness and helpfulness among older students at Cal Poly and instructors that can not be matched in any school in the west.

Cal Mustang adds its welcome of voice to the new students. Upperclassmen wish to welcome the freshmen and faculty urge them to feel free and welcome to consult them in any problems they may face in their first days at Cal Poly.

CAL POLY IMPROVES

No letter better of the forward progress being made by California State Polytechnic could be afforded than the new buildings being constructed on the campus.

To take care of record increases in enrollment, two new dormitory units costing approximately $1,000,000 were completed during the summer. These new structures will house 72 men. Last year the new classroom building was first used.

Construction work has begun on two other buildings, which will cost another $1,000,000. These are the new air conditioning building and a new barn for sheep in the great animal husbandry department. These new buildings should prove a great asset to the faculty in its supervision and student advancement.

NO WAR FOR AMERICANS

Twenty years after the world ended the war that had been supposed to end all wars and make the world safe for democracy, another world war has broken out in Europe.

Five years ago students of international relations were insisting that another major, world-wide conflict would be impossible. The youth of all countries, these observers contended, had become wise to the propaganda and catch-phrases used to entice them into willingly marching to war. Many of these youngsters are among the hundreds of college students who once signed the "Oxford pledge" that they would never fight a war on foreign soil. The fear that continued aggression on the part of one European nation eventually would threaten their own country has led millions of British and French men to volunteer for military service.

American military experts have pointed out that the armed forces of the opposing nations in the European war are vastly imbalanced—that there is a good possibility of a long-drawn out conflict that may result in virtual deadlock. At that time, the experts warned, a determined effort will be made by both sides to propaganda the United States in an effort to win intervention to settle the war.

To American youth is to remain on constant guard against propaganda. Discard all stories on the war that you read in newspapers or hear over the radio. Try to determine if the stories have not been hatched for propaganda purposes by the government-controlled press service of one of the belligerent nations. Test the stories that you hear. They may not be true.

For real neutrality Americans must suppress their prejudices and retain an open mind. America must be kept out of the European war.

Tennis Players Urged to Turn Out for Team

All tennis players at California Polytechnic State College are urged to come out and help form the backbone of the tennis team. The Poly tennis team is expected to be arranged this winter, and for this season the club expects to enter in the Intercollegiate Conference, according to Coach Howie O'Daniel.

Tennis club expected to be arranged this winter, and for this season the club expects to enter in the Intercollegiate Conference, according to Coach Howie O'Daniel.

Ski Club Expects Meets With Clubs of Other Schools

Skiing calls into play the muscles that tennis players will need in coming years, according to George Drumheller, coach of the tennis team. There also will be an opportunity for tennis players to try out for the team next season, according to George Drumheller, coach of the tennis team.
