Frosh Announce Plans For Coming Meeting

The froshmen class will call a meeting of the only class in the near future, it was announced yesterday. A definite date has not yet been chosen, and it will be called when the conditions of the froshmen students are satisfactory.

The purpose of the meeting will be to discuss the plans for the year, and to set the boundaries for the froshmen class. Either student body officers who were committee of froshmen will be in attendance. At this meeting.

Egan Named at Faculty Club Meeting

The first Faculty club meeting of the year was held last Tuesday evening at 8 o'clock in the Library of the College. Mr. Egan, chairman of the meeting, expressed the wish of the faculty to express the hearty welcome extended to Professor monks, chairman of the department. Professor monks took the floor and made a few remarks about the work of the faculty.

The meeting was called to order by the chairman, and after a few minutes of discussion, it was voted to adjourn. The meeting was then adjourned.

# Sports Spectators Spark Proposed Construction

By Dick Simpson

It was announced today that the architectural division of the public works department is preparing estimates for many additional projects.

New football bleachers are to be constructed on the east side of the present football field. Construction will begin as soon as the project is completed and the bleachers will be ready for the fall season. The seating capacity will be approximately 5,500 people. Showers, locker rooms, and rest rooms will be provided under the seating area for use by both home and visiting teams. The present bleachers on the west side of the field will also be extended to a field length structure with a seating capacity of approximately 1,500 people. Total seating capacity of the field will be approximately 7,000.

A wooden shaped bleacher is planned for the baseball field with a seating capacity of approximately 800 to 900 people. Rest rooms and storage space will be provided under the seating area.

New Welding Lab Methods, Equipment Modernize Shop

By Dick Simpson

Utilization of present equipment and new equipment soon to be installed will give Poly one of the most modern and best-equipped welding shops in California, recently stated R. C. Wiley, welding instructor. Instruction is given in both day-skills and arc welding as related to the four major engineering courses. “This truly covers the practical and theoretical aspect to the subject and the aim is not to train welding operators but that each student be eligible as a welding technician,” Wiley said.

A production welding shop is in use at the present time, or soon to be installed, includes the following: A production weld positioner and a production spot welder. This is in addition to the gas welding, arc welding and cutting equipment already in use. Two new welding processes are to be introduced, Flux in Atomic Hydrogen Arc welding which is used in the fabrication of stainless steel. This process operates at a flame temperature of approximately 5000 degrees Fahrenheit, and due to the close control possible, may be used to weld materials as thin as .010 to .015.

Another in the inert-gas-shielded welding process which is one of the major innovations in the welding field. It was developed in 1942 in magnesium fabrication and it may also be used for the fabrication of both ferrous and non-ferrous metals.

A very important addition to the welding shop to be completed in the future through a materials lab. Equipment to be installed will include: a sound hardness tester, a metallographic microscope and other related metal testing equipment. This will facilitate testing of materials welded and will enable welding of steel and alloys. It will also enable the welding shop to duplicate welding tests given welding operators in industry.

Also of interest to welding students is an article by R. C. Wiley entitled: “Welding as a Related Engineering Course,” soon to be published in “Welding Engineer,” a welding trade magazine.

Aero and Agriculture Scholarships Open

By Herb Winn

Scholarships are available to students of both the aeronautics and agriculture departments. Freshman and advanced students who meet the financial requirements of each college have been chosen for their unique qualities, according to their chief instructors.

For the aeronautics division, the scholarships range from the $400 to $1200 mark. Those are available to aeronautics students who are interested in theeronautics major.

Mr. Bons is head of the welding department, and Mr. Seaton is head of the agriculture department.

Seaton Seats Reps Inter-Dept. Meet

Don Seaton, student body vice-president, presided over the first meeting of the Inter-Departmental Council, held September 12. The membership of the council is comprised of the president of each departmental club, the vice-president of the Associated Students, the department head, and a faculty member from each division of the college curricula.

Robert Moore, Ag. Engineers, and Stanley Thompson, Mechanical Engineers, were elected to serve as temporary delegates to the Student Affairs Council. These delegates will serve until the clubs form a permanent council.

Present at the first meeting were Jay Tucker, Poultry club; Chuck Bresnahan, Livestock Club; Edward Drols, Poly Phase; Roland Wajert, Delta Chi; Jack O’Connell, Aero; Loren Hillman, Beta Xi; Pete Taylor, Rainbow, and Seaton.

Noggles says he knows of no future plans to enlarge the facilities of the mess halls, but he said he would continue to serve the students to the best of his ability.

Lost and Found—

One of the new agricultural students borrowed a jacket from James F. Marion, Ag. Engineers, department head, last week and did not return it. Since this knife is valued as a gift, Marion would appreciate having it returned to him or left at the information desk.
Collegians, Glee Club, Band Clear for Action

The three major organizations of the music department started the year in a big way last week when all of them had large turnouts. The "Collegians," Poly's own dance band, the Glee club and the Cal Poly marching band make up the music department's main organizations.

The Glee Club reports that the largest turnout with over 100 students applying for membership at the tryouts. Only 43 of these will be chosen, however. Not only do returning members return each year, but many new voices were heard at the tryouts.

The band got off to a flying start with 42 new members reporting plus 27 old men returning. F. P. Davidson, director of the band, reported that a few more clarinet and trumpet men are needed,"Anyone who has played or enjoys playing, regardless of how much, is encouraged to apply," Davidson stated. "If you don't have an instrument, apply anyway, as we have some, and we need men, including a few French horn and a few cornet men.

The band will play for the five home football games and will probably play for the Fresno and Santa Barbara games. The band meets in CR 1 from 4 to 6:30 p.m. on Mondays, Wednesdays and Fridays.

The "Collegians" are looking forward to a crowded but successful fall year with a good number of experienced musicians on band. The "Collegians" will play for all of the student body dances the first of which will be given on Sept. 21, and will play numerous other engagements.

The following men have been picked for the "Collegians" this year. On the sax: Wally Clark, Milton White, Henry Low, Domino Pugliese, Paul Linshager and Wally Young Smith. The trumpet section boasts Fred "Bucket" Waterman, Bill Hunter and Bob Rayburn. On the trombones are: Bob Romey, Darrell Davison, Bob Spooner and Darrell Rumley. Jim Cox will beat the traps and Kenny Hawkins will be the guitarist. Don Bubinga is on the bass and Jack Hallel on the piano.

PASSEY PICNIC BÜND Day

A parish picnic will be held in the Old Mission gardens Sunday, September 27, starting at noon. All Catholic students are invited to the picnic and are requested to bring their own dishes and utensils.

Auto Wash, Repair
Ramp Opens

By George Tallman

The long standing need of a suitable place for students to work on their cars has been alleviated, according to Eugene A. Egan, dean of student welfare. Recently the student foundation has allotted funds for the establishment of an area where students may do any necessary work on their automobiles. The newly designated repair and service lot extends from the University Avenue east, and directly south of the old shops here.

Equipment furnished by the school will include a concrete slab for washing or hosing, work benches with ample room for your tools, electricity for power tools and light and large drums for oil and fuel.

It is requested that no student drain oil or gas, or make any adjustments or repairs on his vehicle away from the authorized repair and service lot. The use of the facility is open now.

Cars found on campus in a condition of repair will be moved to the designated area by wrecker and expense of moving charged to the owner.

Student body card sales
(Continued from page 1) offering the fall quarter card in order to ease the hardship on students who feel that regardless of the value involved they cannot afford $18. By making the pro-

motion that these cards are transferable into full year cards, any student can spend the one purchase through two or more months. No one is getting full

value available by failing to con-

tribute the fall quarter card to those for the full year.
Mustangs Meet Bulldogs In First Season Game

Three teams of spirited Mustangs will entrain at noon today for Tempe, Arizona, where they will meet the Bulldogs in the initial grid game of the 1947 season. Head Coach Howard O'Dell is expected to unleash an efficient passing and a quick-breaking running attack to smother the Arizona Indians.

Leading the air offense will be quartermen "Pinky" Beberna, and Lee Rosa. Rosa last year sparked the Mustangs in their 21 to 13 upset of the San Diego State Aztecs. The running attack will be paced by two hard-driving halfbacks, Byron Culver and Gene Fimtena.

Billy Bloom, varsity B.M. Mary's

Naval Pre-flight player, has compiled at Cal Poly and will bolster the new defense. In the line, O'Daniel has been drilling Jack Bolton, a utility tackle and Chuck Huffman as a center.

Whether the coaches will inter-change free-separation teams, offensive and defensive, remains to be seen. However, with full pre-season practice, a wide open offensive show is expected.

The probable starting lineup has Jack Bolton at the end; Marshall Samuels and Don Van Harreveld, tackles; Joe Griffin and Bob Bennett, guards; John Fitzgerald, center.

Jack Bolton... A returning letterman, a rugged end, a hard worker, and a good blocker. This year Jack has been drilled as a utility tackle to bolster the forward wall.

"Pinky" Beberna... quarterback; Byron Culver and Gene Fimtena... halfback; and Stan Nigg at fullback.

Cal Poly will be after a first conference victory. The defense has lost four games in previous seasons.

HULLDOG PULLBACK... One of Arizona's greatest athletes will face the Mustangs in Saturday's opener. Pictured above is Norman Warren, a senior at Tempo, the outstanding grid gatherer from the 1946 team. Weighting 200 pounds, Warren is turned a plugging, hard running, rugged fullback.

Fall Baseball Brings Promising Candidates

Forty eager aspirants loosened up their arms andoot hopeful glances toward Coach Bob Mott as he greeted them for fall baseball practice. Most, except to practice regularly for six weeks or more, wear, however, the status of probationary preservers. Probable intersquad games are scheduled as proving grounds for leading candidates of the 1948 collegiate.

From the... End-o The Line

by I. Harry Kondo

ABOUT YOUR TEAM

The process of "separating the men from the boys" actually got under way this past weekend. Yes, while you and I were generally disparaging our rebuff boys engaged in serious head "bashling." Sunday's activities were in many ways a fast approaching pre-grid practice. A number of new faces appeared and first candidates, predominantly of the "aged" group, bore the materialized. The shadow of doubt caused to hover over the guards and tackles where there is a lack of depth and experience. The shifting of Dazaar's "space tire" Anderson from center to tackle and Chuck Hoffman from the backfield to the line is expected to ease the situation.

Charles McKee... "beef" 210 pounds and 6'1"... he has bolstered the backfield. Along with his aggressive defensive play he makes a transfer from Sunday, it is expected to.

Bob Ashby... a potential star halfback... an extremely deceptive player so as they say... runs with an explosive burst... speed... he contacts..."What is he doing now?"

BICK! LAME! LAY!... Nursing injured knees are Lew Bewley, end, and Bob McClurcan, backfield. Lee Rosa, quarterback par-excellent, is down with a flanker injury. Several other members of the line are also out of commission.

One of the most important games this year will be the contest against the Huskies of Washington, at Seattle, and this week will have a trial run for the team.

"Pleasure"... during the game against the University of Southern California, a Seattle player was given a severe "pleasure"... "Please give us a half back..."

Chuck Huffman, a member of the Crew of San Pedro, was invited to try out for this team. Huffman has played for the Los Angeles Grid Team.

Frosh Oppose Salinas J.C. In Initial Grid Game

By Russ Pyle

The Cal Poly frosh pigskin team in Cal Poly history will take to the road Friday morning for their initial game against Salinas J.C. Saturday night.

Dr. Carl Voltmer and Coach Ed Jorgensen, who handle the Colts' reins this year, report the team in top shape and ready for action. The game will be their first since the U. S. Air Force now offers you the chance of a lifetime to start your career in aviation.

The success of the initial intramural program depends greatly on the number attending this meeting. All dormitory and club representatives are asked to attend an important, organizational meeting for the intramural football to be held this evening at 7:80 p.m. in the athletic office (gym).

The backfield, combining speed and power, will feature Big Paul Spitzer and his running mate Stan Evers at halves, and tricky signal caller--Gene Massimo, from Los Angeles, at quarter.

The Cadets are flying again!

The U. S. Air Force now offers you the chance of a lifetime to start your career in aviation.

If you want to learn to fly, you have one of the finest opportunities ever offered in peacetime. Aviation Cadet pilot training has been reopened to qualified applicants presently serving enlistments in the Army, and to civilian young men who can meet the same high standards.

In order to be eligible, each applicant must be: a single male citizen, between 20 and 36 years old, of excellent character and physically fit. He must have completed at least one half the credits leading to a degree from an accredited college or university, or be able to pass a mental examination given by the USAF. He must now be living within the continental limits of the United States.

Upon successful completion of the training course, Cadets will be rated as pilots, commissioned Second Lieutenants, and assigned to flying duty.

Reactivation of Aviation Cadet pilot training is only one of the several choices open to outstanding men who want increased responsibility and advancement in the field of aviation. It is now possible for qualified men to apply for attendance at USAF Officer Candidate School and thus be able to equip themselves for such important specialties as engineering, armament, administration and supply.

You have a real chance to make progress and build a sound career for yourself in today's U. S. Air Force. Talk it over with the Recruiting Officer today at any U. S. Army and Air Force Recruiting Station.
We have been fortunate in that so far there has been no "Well as the other man's, see to it that your driving habits dents of California State Polytechnic College comes from government. Iowa State Becomes Loser While Poly Dairy Gains

By Edward O. Boettcher

"Cal Poly shows a very definite trend of progress and a bright future ahead of it," stated Elmer N. Hansen, Cal Poly's newest addition to the Dairy Production staff, who arrived here on September first, from Iowa State college.

Mr. Hansen was born in Minnesota and received his education at University of Minnesota College of Agriculture. World War I interrupted his college career when he entered the U. S. Marines as a member of the Second Division. At the end of the war he returned to college, working his way through, milking test cows.

In 1923 Mr. Hansen came to California and was employed by the Golden State Milk Products Company for a period of 18 months. He returned to Iowa State College at Ames, Iowa on a scholarship for his graduate work. In 1926 he accepted a position on the Dairy staff at the University of Nebraska. He held this position for four years, finishing them in 1929 to go to the Dairy Department at Michigan State College. In 1930 he returned to the Dairy Department at Iowa State College where he remained until this year.

Just before coming to Cal Poly on September first, Mr. Hansen spent six months with the American Guernsey Cattle Club at Peterboro, New Hampshire in organizing their type classification program, judging 7000 head in forty different states. He has judged four times at the National Dairy Show and several times at the Dairy Congress and at state fairs throughout the country. Since 1929 Mr. Hansen has coached twenty dairy judging teams for the National Dairy Show. Fourteen won first place at the Cattle Congress and eight teams placing first at the Dairy Show.

Mr. Hansen has this to say about Cal Poly and the practical setup that you have here. "I have seen college herds at Cal Poly better than those found at almost any other schools. The Hanford herd is superior to any college herd I have seen. My entire family is better than those found at almost any other schools. The Hanford herd is superior to any college herd I have seen. My entire family is

New High Speed Press Installed In Print Shop

by Donald Miller

A new Kelly press, the most recent addition to the Poly printshop, has begun its operation by rolling off football schedules. The new press embodies the latest in press design and is capable of making 5,000 impressions an hour.

The press will be used for high quality work heretofore impossible in the Poly printshop, such as color work and close register work, and will be used to print this year's annual, "El Rodeo."

According to A. M. "Bert" Fellows, printing department head, the new press does not take the place of any of the present equipment, but actually enlarges the scope of work taught in the printing course and definitely increases the printshop facilities.

Fellows stated further, "The erection of this precision machine was supervised by Dan R. Crowley, who works directly out of the factory. Crowley, better known as Dan, was extremely helpful in reorganizing the relocated printshop as well as in giving instruction on the new press."

Change Of Program Deadline Announced

Students wishing to change their programs for the fall quarter must do so before 5 p.m., Sept. 30. It was announced this week by Paul C. Winner, assistant dean of admissions, guidance and placement.

After this date students should not plan to add courses to their programs, but will be allowed to withdraw from any course with a grade of "W" provided the student is passing in the course at the time of withdrawal. Any student who drops a course in which he is not passing will receive an "F" in the course.

Reserve Officers Dine, Dance Tonight

The mid-coast counties chapter of the Reserve Officers Association will hold its regular bi-monthly dinner and dance tonight at 8 p.m. at Mattie’s, in Shell Beach. Refreshments will be served from 6:30 p.m. Dress is optional for the ladies, but gentlemen are requested to wear class "A" uniforms.

The $2.25 per plate cost will include tax and tips. All reserve officers, whether ROA members or not, are cordially invited to attend.
