World Government Discussed At Panel Meeting

"I'm in favor of world government and am willing to give up my national sovereignty for a world government," said Dr. Neil Daniels.

Dr. Daniels was one of five speakers on the panel discussion held Monday evening in the Engineering Auditorium. The five speaker panel was moderated by Waler Saborn, Allen Connor and Michael Furst. W. W. Dills was the second faculty speaker and the third, Vaughn S. Lewis, was not present because of illness.

Dills took the International Relations class of lectures to students and stressed that we as a nation must work together with other nations in the future.

RCA President McPhie was the fourth speaker and also expressed the need to establish three playgrounds for children living on the campus. The ballots and the final plans for the playgrounds will be discussed at the Poly gym Saturday evening at 8 o'clock.

The council will have three directors and eight advisors. The director will be selected by the Student Wives' club and the advisors will be selected by the students. The council will have three directors and eight advisors. The directors will be selected by the Student Wives' club and the advisors will be selected by the students.

Faculty Personality
A. Norman Crunkhush

By Gane Rame

"One of my chief interests and occupations is in the field of community forums and panel discussions," began A. Norman Crunkhush when asked of his opinion of the recent discussion held in regard to the Western College Congress.

He continued by saying that he liked the discussion and was glad to be invited to take part in the discussion of this type.

With regard to the Marshall Plan, he replied, "Of all the problems we have confronted the American people in my administration, I think that the Marshall Plan is the most important."

Crunkhush, born in Ireland, graduated from the University of California with his A. B., and attended Stanford University for his M.A.

After receiving his master's degree he worked around the Pacific in a tramp freighter. He feels that some of his most valuable experiences has been gained through his contacts with the people he meets during these travels.

Crunkhush began teaching here a few years ago and likes it. He closed the interview by saying, "If the student attitude and the subjects I am teaching are any indication, I am completely sold on Cal Poly."

**Procedure Announced for Graduates**

When the SAC, or Student Activity Council, meets, it often advertises the new procedures or regulations for the student body. One of these procedures is the reorganization of the Focus program for the graduating class. The purpose of the reorganization is to make Focus more a part of the living atmosphere to promote the student's interest in the college, its facilities, and its organization.

"I am glad to announce to the Ranger's office that room 101 Adm. building, was arranged and will be utilized for Focus meetings and make application for graduation," said Paul C. Winner, director of Focus.

Winner continued, saying that this is a most important change of the regular college application for graduation. The students can now make and pay application for graduation, said Winner. As a result, the procedure of the Focus program for the graduating class is now made more efficient and easier for the student body.

"If you are interested in the Focus program, you should make application for graduation," said Winner. "This is the only way you can ensure your place in the Focus program and receive the benefits that it offers."

**Lost and Found**

"The lost and found department at Cal Poly," said Winner, "is designed to help you find lost items. We have a system of lost and found records to help you locate your belongings."

"If you think that you may have lost an item," said Winner, "please come to the Focus room and let us know. We will do our best to help you find your belongings."

**SAC Approves Music Department Budget Increase**

The Student Affairs Council approved last week an additional $200 increase in the budget for the Music Department. The increased budget will help defray the increased costs for the department. Officials stated that the money will be used for the purchase of sheet music, additional uniforms, instrument repair, and other incidental expenses for the music department's FM system.

"The SAC approved a loan of $125 to the Ag Engineers for the purchase of two Coca Cola dispensers," said John Boriack, director of Focus for the Music Department. "This loan will help defray the increased costs for the department."

**VA Explains Proposal to Return to California**

The Veterans Administration has requested the following information for their use in order to more efficiently handle inter-regional transfer of the type involved between the San Francisco and Los Angeles regional offices.

A number of complaints have been received that delays in transfers or records and subsequent receipt of the veteran's records are inefficiently handled. According to this report, the problems involved are inefficiencies in the system. The veteran's records are transferred to the Los Angeles regional office for the spring quarter, school year 1946-47, where those records are transferred to the Los Angeles regional office for the spring quarter, school year 1946-47. It is therefore requested that the veteran involved in such a change and subsequent delays, contact the local Veterans Administration office at 864 Santa Rosa street, where a report on this delay can be made in order to handle such cases more expeditiously in the future.

Those who initially enrolled at California Polytechnic college for the fall quarter, 1946-47, are not included in this report.

"If also installed eating equipment as the relocation of the Denny's Dining Room!"
Engineering Students Inspect Steam Power Plant

By Clifford Anderson

Before five stories high with steam drum walls six inches thick—what was the sort of thing the students in the Kern County steam power plant of the Pacific Gas and Electric company near Bakersfield last Sunday by 19 Mechanical Engineering students.

The group was accompanied by Rush Harrelson, mechanical engineering instructor, and was shown around the plant by two PG&E engineers, G. V. Ayer and R. A. Baehr. These men gave a general description of the plant, then acted as guides.

The trip afforded an excellent opportunity for the students to see the equipment on the inside. The turbines were not assembled in the group was able to inspect the return and the blading.

The first turbine to be installed at this plant will have a capacity of 2,025 kw. and will take steam at 160 lbs. abs. and 923 degrees F. During normal operation the steam lines will be a dull red due to the high steam temperature.

The house turbine, which supplies emergency power to the plant offices, is rated at 59 kw. capacity. (More than ten times the load on the Poly campus.)

To supply fuel oil to the boilers, PG&E has contracted to take the total output of two nearby oil refineries. At normal load, 3,486 million cubic feet per day.

During normal operation the Poly campus load on the Poly campus. *

Zuncho Sired Stock Places In Santa Anita Races

Lyman Benson, Animal Husbandry department head, announced the successful mating of Cal Poly raised Thoroughbred fillies at the Santa Anita race track.

See Ma First, a two year old filly by *Zuncho out of Danne Light Feather, ran three races at the Santa Anita track last week. The filly came in fourth, third, and first. It placed first ahead of a $10,000 filly from the east coast King Zuncho, five colts from *Zuncho ran in three fertility races, but had bad luck and didn’t place. Top Lift, two year old colt from *Zuncho, is in training now and will race soon.

*Zuncho, the sire of these race horses, was presented to the Cal Poly Thoroughbred unit by Walter T. Walls. Only school horses are being bred to *Zuncho at present.

Last year, yearlings from *Zuncho were sold for as high as $1445. This price is remarkable considering that 60 percent of the buyers did not want race horses. At present, plans are being made to sell the yearlings this fall. By March, five mares will have foaled. Of these, eight foaling this year will be from *Zuncho. Burnover and Flirtations, imported from the area of the other two expected foals.

Born to Mr. and Mrs. Joseph W. Murphy, a girl, Gail Meredith, at Mountain View Hospital on January 26.

Student Swine Projects Pay Off

G. V. Ayer, Swine unit head, recently announced that student-owned swine projects are proving remarkably well.

William Graham and Charles Greenner, in a partnership swine project, recently sold out. Their project consisted of 2 feeder pigs. David Chapman and Milen Rigg also had a similar project which they recently sold.

The feeder pigs were purchased when they weighed 500 pounds each and were raised to the weight of 200 to 300 pounds each before they were sold bringing a substantial return to the owners. In return for the use of the equipment, the students are required to turn in 1/8 of the net profit on their projects to the Cal Poly project foundation fund.

Other students in the swine production department who have projects are Raymond Brother, Frank Dayer, Arthur A. Hall, Herbert Chadwell, Charles Warner, Joe Mills, Bill Kewan, Richard Roberts, Vernon Cole, and Ralph Wright. These students have five student-owned projects consisting of 13 feeder pigs to a project.

Another difference between a bachelor and a married man is that when a bachelor walks the floor, he's dancing.

Naval Reserve Unit Plans Personnel Jobs

February is Naval Reserve month for San Luis Obispo county. Local Naval Reserve will discuss timely naval topics at a regular meeting Monday night at 8 p.m. in the Engineering auditorium.

"We are definitely going to submit our official application for an organized battalion on March 1, 1948," Larry Oglesby, commanding officer of the county's volunteer battalion, said today. "Personnel interested in a part-time job at $1.25—$2.76 per hour, attending weekly night meetings and advancing in rank, are urged to attend our meeting Monday night." Oglesby continued.

New developments in the Naval Air Reserve program will also be discussed, according to Oglesby.

Code Violation Causes Campus Grass Fires

According to E. A. Backer, security officer, one or two of the recent campus grass fires were probably started by persons who violated section 600 of the California Motor Vehicles code. This section in brief states that to light a match, such as cigarettes or matches, shall be thrown from a moving vehicle.

Someone shipped two rabbits to the area by air. The crate arrived with the rabbits. That's what we call fast transportation.

Maybe the government knows what it is doing. But we have a cousin who got the habit of spending more than he earned, and he wound up in the poor-house.

Mustangs Swamp Americans

As Home Team Scores Freely

By Bill Roth

Scoring at will, the Mustangs cagers dumped a ragged Santa Barbara team, 68-42, Friday evening in Cramdell gym.

From the opening whistle on, the semi-pro outfit was never in the game as every man on the home team managed to hit the scoring column at one time or another. With the game about 12 minutes old and the score board reading 11-8, Coach Jorgensen jerked his first team and sent in the reserves. The visitors managed to get a little warm when they brought the scores up to 26-22, but this was about as close as they ever got to the red hot men from Poly. Neil dropped in three points just before the end of the half to put the Mustangs out in front 29-22 at intermission time.

The starting five of Moroski, Ellis, Baldwin, Coghlan, and Tillett opened the second half and ran the score up to 41-22, but this was about as close as they ever got to the red hot men from Poly. Neil dropped in three points just before the end of the half to put the Mustangs out in front 29-22 at intermission time.

We Don't Talk Enough

The panel discussion held on Monday night was a good example of what we need a lot more of: meaningful engagement in higher learning. The talks proved to be informative, interesting, and entertaining.

There are many subjects of interest to the citizens or our community that could be discussed in the manner of the panel reportorial in or in debates. There are more than enough intelligent people on this campus, students and faculty, to carry on such programs.

The only question is: do you want them?

From the attendance on Monday night it doesn't seem we do. So far we have tried to have a debating society, they don't come.

We keep hearing that Mustang men aren't interested in anything that takes thought. Is this true, is it possible? We're not just a mob of clown-jockeys and metal-benders. What is the matter with us?

This isn't a vocational school, this is a college that hands over 4,300 a month to spend. We need an opportunity to educate ourselves to listen to such radio programs as the Town Meeting of the A.M. which is good.

The Republicans want a graduated reduction in income taxes. It's difficult to see just how this would make the taxpayers better off when you take into account the fact that a man with a personal income of $5000 would pay 423.84 a year under the Republican plan, whereas under the Democratic plan he would pay 365 a year. The extra 623.84 this plan would cost this man would probably be used for other purposes, but it would be the wrong kind of spending.

What confuses me is: Why does a man with an income of $5000 get an additional $623.84 a year in taxes? Is it possible that this man is better off under the Democratic plan because he is spending his money in a more intelligent fashion?

In answering to the "Switch List" which appeared in the previous issue of El Mustang, our staff, would like to enumerate several factors affecting the judgement of the selection of material for the Roundup.

1. The Roundup is not to stimulate the intellectual faculties as the Roundup is an excellent example of opening the intellectual faculties and the Roundup is the Roundup.

I have just finished reading Phillip Nasrallah's book, "The Roundup," and I was impressed with the way in which he managed to present his ideas. He has a very good sense of humor and he manages to make his readers laugh while at the same time forcing them to think about the issues he is discussing.

A Look Into Gandhi's Teachings

by Philip Narvahr

A great sacrifice, a heroism, the man whose first loyalty was to humanity and India—the man who, before the last days of his life, was lost to the world. At the last, the man who lived in the faith in the human element that binds love in every heart—the man who actually lived his enemy as himself. And last 300 million Indians do the same thing he said to the treacherous bullet of one of his people. "I do not believe in India to be helpless. One hundred thousand men had not fought these hundred million human beings. Seizing, binding, and success; but no longer, my friend, have I been, a weak and helpless coward. They are meaningful. They are a shot in the arm of the world to this progress. The child may love, Progress, to be measured by the amount of suffering undergone... the sufferer the greater is the progress."

"I want India to practice non-violence being conscious of her strength and power. I want to recognize that she has a soul that cannot perish and that can rise triumphant above every grief and woe, above the fire. Gandhi's life was consistent with his teachings. His teachings were not: 'You must not fight, but big enough to shatter the realization of his ideals and expose. In a world where right, where kind and weak are synonymous, where forgiveness and courage have to mean the same thing."

"Honor Must Be Defended"

Adams Takes Second in AAU Wrestling Meet

Frederick Adams, Cal Poly wrestling grappler of the 175 lb. class, gained second place in the AAU meet of Southern California wrestlers last weekend. Adams gained his place in the AAU meet by falling Pruntlce of San Diego State at the El Centro Invitational, defeating Ingwood, before losing a decision to Hansen of San Diego State.

Although only seven Poly men had their names included in the 186 entries only Adams came near to the top in his class. The best AAU competitors, Southern California, had to offer was in this meet and in general this was a distinctive contest.
Chesterfield Offers Deal To Dancingtime Listeners

In a highly beneficent and at the same time slightly commercial frame of mind the local representative of the makers of Chesterfield cigarettes has arranged with men in many dorms to act as his agents in giving away free packs of Chesterfields to practically any boy who neglects his studies every night to listen to "Dancingtime" on KPIK (which includes just about the entire student body) from ten to midnight.

All they have to do to get a free pack is to request a song by Perry Como or Jo Stafford dedicated to them and if it is played they will receive their loot from the dorm agent.

Some dorms have not been covered in this deal as yet. If yours is one of them, come down to the El Mustang office and look up the Chesterfield man and get on the wagon. For every three packs the agent passes out to qualified winners he pulls down one.

Looks like the popular stars of the "Chesterfield Supper Club" are in for a workout and that we'll be seeing a lot of Chesterfield smoke around here... which is what the representative is after.

Tennis Courts Receive New Dress

According to Dr. Carl Voltmer, director of athletics, the resurfacing of the Poly tennis courts should be completed shortly. He said that after completion the courts will be ready for play within three or four days, or when the new surface acquires its "bed.''

The resurfacing, started last week, is being done by Walter B. Kostich, local building contractor. Gene Smith, Poly tennis coach, was heard to say that he was glad to see the work progressing so well.

Prof.: Young man, how dare you swear before me!

Student: How the hell was I to know you wanted to swear first.

A highbrow is a person who can use "whom" in conversation without feeling self-conscious.

Definition of a censor: A guy who can see three meanings to a college joke that has only two meanings.
