**McMillan Discusses 'Good Old Days' At Student Assembly**

Don C. McMillan, known as the "Bags of Bandon," and Democratic congresswoman candidate from the 11th District, addressed the students and faculty of Cal Poly in Wednesday's assembly. McMillan, an alumnus of 1919, described in a humorous vein the period during which he attended Poly. He pointed out the advantages and improvements the school has undergone since those days, indicating the opportunities that are now open to its graduates.

Rachel Ples, acting editor of the city of San Luis Obispo, spoke to the student body on the need for safe driving while in town and driving to and from school. Judge Paul K. Jackson, who was a Poly student 23 years ago, also talked to the students, emphasizing the careful driving for the prevention of accidents. He showed some outstanding pictures of accidents which prove that driving is a dangerous and difficult pastime. He stressed the need of thinking before driving.

The band played a few numbers which were brought forward by student body vice-president Fred Waterman and Bob Rayburn. "Sophisticated Swing" music will be furnished for your enjoyment by the Collegians when dancing begins at 9 p.m. in the gym, and its decoration will be a fine addition to the gaiety of the evening.

**Student Wives Carnival Boosts Playground Fund**

An estimated 500 people turned out for the Playground Carnival sponsored by the Student Wives' club, Saturday night in the Poly gym. Kegs, which offered many valuable prizes donated by the various local business concerns in the San Luis Obispo, was the game of the evening.

Music for dancing was furnished by the "Three Dukes." Other types of entertainment were the piano duet, a fona phone, two "pennies" and a table game.

Refusals were also served.

Carol McWilliams, state young farmer chairman, reports that a committee is being organized so as to possibly begin the construction of three playgrounds.

"Although the equipment is expensive, and will have to be divided into three areas," she continues, "no state legislature this session appears to have the facilities to supply the funds to get them started.

The chairman also states that there will be a committee of county. Poly Young Farmers and students that will be interested in contributing exceptionally good parents and students, and also the fact that it will be a chance to do something with the equipment that was ordered when the equipment was ordered.

"Although the equipment is expensive, and will have to be divided into three areas," she continues, "no state legislature this session appears to have the facilities to supply the funds to get them started.

Naval Reserve Unit Plans Flight Training

At the regular meeting of the San Luis Obispo Naval Reserve Unit, November 21, it was revealed that the unit's officers and enlisted men are now taking an active part in the program. "This is insufficient," Larry Ogelby, commanding officer of the unit said, "so justify our application for an outright allocation with pay for active members. Our application will be on the way to Washington, D.C. in order that it may be more effective as individuals and as an organization.

The San Luis Obispo unit is progressing rapidly, according to Ogelby. The unit has been in existence for two months and has already been notified that it will be granted an outright allocation with pay for active members. "I am confident that our application will be successful," Ogelby said. "I believe that our unit is well organized and that we are ready to take an active part in the program."

Poultry Class Freezes Its Toes In SLO Ice House

Last Tuesday, Feb. 10, the poultry market products class under Don Ebbott went on a field trip to the American Refrigeration Company. They observed the operation of the company's refrigerating system, as well as their equipment for handling frozen and chilled products. The company's equipment includes a temperature control system that maintains temperatures from 32 degrees above to 40 degrees below zero for the refrigeration of products. Poultry products that are now on display in the store and are being sold include chicken, turkey, and duck.

AUTOMOBILE RESALE

The security office of the San Luis Obispo city school district said, "We don't feel any different about the amount of general education we have received from the University of Southern California."

Dean of the division of science and humanities, who recently received his Ph.D. Degree from the University of Southern California, said, "I don't feel any different about the amount of general education we have received from the University of Southern California."

LADIES! THROW AWAY THOSE BEAR TRAPS

Lesm your Lil' Ahnnae come Valentine's Day with a couple of well-chosen Arrow ties.

We suggest a couple of Arrow knits in solid colors or stripes, $1.50 (made especially for college men) or some smart Arrow designs with English patterned foulards from $1.00.

Drop in at your Arrow store and pick out a couple of Arrow ties to give to your favorite. Arrow handkerchiefs with your man's initials from 35¢.

Basketball Ticket Procedure Changing for Coming Games

There will be a change in procedure for obtaining basketball tickets for the coming games with Fresno State and San Luis Obispo scheduled for February 22 and 25 at the high school court. In the future, tickets will be issued beginning Thursday evening.

Our all out effort to recruit men into the new civilian reserve unit has been well received by the community. We believe," Lewis said, "that there is a need for such a unit in our community."

NO TIE AND RACKET MEN PREPARE FOR MATCHES

Tennis practice is being delayed due to the wet weather in the Poly courts. This year, the tennis team will be able to compete in the first annual Tri-county doubles tournament scheduled for February 22 and 25 at the high school court. It is probable that Poly will enter two doubles teams.

A notice went out on the Poly bulletin board yesterday morning stating that tickets for the Fresno Poly game on Feb. 10, only those who have seen two or less home games are eligible for tickets on Wednesday, Feb. 10. The tickets will be issued beginning Thursday evening in room 61 Administration building.

Every week there is a change in the Poly courts. This week the courts are ready for the Tri-county doubles tournament. The first annual Tri-county doubles tournament is scheduled for February 25 at the high school court. It is probable that Poly will enter two doubles teams.

How to get your man the EASY way

1. Buy one of Arrow's neat-knotting ties (We have some brand new patterns for college men.)

2. Slip it around the Husband's neck.

3. Tie a knot! There! You have him! Life will be easier the day he wears his Arrow tie up to a full, formal bustle.

4. The cost? Very low—ties, 61 up. (Try it yourself; it's a box of handsome Arrow Handkerchiefs for 61 up at the store.)

FOR ARROW TIES & HANDKERCHIEFS
Dr. Carl D. Voltmer, Poly's director of athletics since September 1946, has resigned his position effective July, 1948.

P. E. Department Head Resigns

Position

President Julian A. McPhee today announced that he has accepted the resignation of Dr. Carl D. Voltmer, director of physical education and athletics at Cal Poly since September 1946. Voltmer's resignation becomes effective July 1, 1948.

President McPhee stated that he is seeking a man to take the vacant position which will be filled later by appointment in the field of physical education and athletics. His responsibilities will include the assignment of all duties in the department, including the nominating of the names of those entering physical education and athletics. His responsibilities will include the assignment of all duties in the department, including the nominating of the names of those entering physical education and athletics. His responsibilities will include the assignment of all duties in the department, including the nominating of the names of those entering physical education and athletics. His responsibilities will include the assignment of all duties in the department, including the nominating of the names of those entering physical education and athletics.

Dr. Voltmer has agreed to assist in the search for his successor.

Dr. Voltmer's resignation is effective July 1, 1948.

Dougherty attends Weed Control Conference

The 10th annual western weed control conference, recently held at Sacramento and attended by Paul Dougherty, crops department head, was held at Cal Poly. Dougherty commented on the achievements of several former Poly students and graduates now engaged in weed control work in California.

Low volume weed spraying using the little 3/4 horse power of spray gear at 40 pounds pressure is now being done successfully, according to Dougherty, and was demonstrated at the conference. New selective weed controls to stimulate growth among broad leaved plants such as alfalfa, flax, cotton, and celery, and onions have been successfully undertaken.

Pre-emergent spraying was also demonstrated at the conference. Some of the equipment that had disturbed the soil was run up on only one side of weeds. These weeds were killed immediately before the crop germinated, eliminating much weeding thereafter.

Dougherty also commented on the remarkable display of various companies manufacturing weed spraying equipment. Everything, from tractor drawn spray rigs to airplanes were present and because some 50 companies located in the western states.

AC Club Meets

The regular meeting of the AC club was held last Thursday with Bob Frandsen giving an interesting talk on the club's plans for Poly Royal. The next meeting of the club will be held on Feb. 13, in El Corral at 7:30 p.m. At this time the proposed field trip to Los Angeles will be discussed. The subject of the trip will be Frozen Foods. Plans were also made for the coming club banquet.

SKI Club News

Last week and, with the biggest snowfall this season on the ground, many Poly skiers headed for the hills with their skis.

One group consisting of Chuck Smith, Frank Laidalia, Ed Littman, and faculty advisor David Master, found the going rough when they had to spend the first day digging through snow drifts and pushing stalled cars. Arriving in time to eat dinner, they found themselves to be the only party to successfully reach Mt. Able Ski Lodge.

The next day, following the snow piste, six more carloads of Poly students came to enjoy skiing conditions.

AG. Engineering Club Meets

The guest speakers from the International Harvester Corp. spoke to the members of the AgEngering club at their regular meeting February 5. The two men gave some very interesting information on the agronomic system and plants conducted by their company. After the talks, a movie on weed control was shown to the group.

The next regular meeting of the Ag Engineers will be held on Thursday, February 13 at 7:30 p.m. in room 202. All members and guests are invited.

LOS LECHEROS ELECT OFFICERS

At the last meeting of Los Lecheros, officers for the next six months were elected. Dairy department plans for Poly Royal were also discussed.

The new club officers are: President, Bill Lupo; Vice-president, Ed Littman; Secretary-Treasurer, Ralph Tuggle. These men will replace Roland Westall, Walter Olsen, and Frank Ghisen.

It was decided to have two border again this year at Poly Royal, with Browns in charge of the production booth and Brewer in charge of the manufacturing booth. Ray House is to be in charge of sales and Bruce Borror is to be in charge of the showmanship contest.

Bill Lupo reported that the Dairy basketball team is in leading their league in the intramural basketball tournament, and the club decided to support the team next Thursday by turning out for their games.

There will be a short business meeting in CR 6 at 7:00 p.m. prior to the basketball game.

A. P. O.

There will be a meeting Monday, February 16, at 7:30 p.m. in El Corral of all who are interested in having a chartered chapter of Alpha Phi Omega on the campus.

When you help a brother up the hill, you get nearer to the top yourself.

**SPORTS**

Spartans Shut-Out Mustangs In Hard-Fought Casaba Clash

by Bill Roth

Displaying their usual fighting brand of play, but lacking the needed height, the Mustangs dropped their fifth straight conference game to a strong Spartan team from San Jose State, 58-62.

Taking the floor as the defense and offense showed a slight edge for the home team, the Spartans began the season with an eight points to seven lead. Baker repeatedly beat Watt to the hoop in the opening seconds of the game. Baker and Moroski took things into their own hands, outscoring Poly with 14 points, all made within the first four minutes of the game.

With just seconds of playing time remaining and Poly behind by 58-56, Baker hit the game-winning shot from the baseline. With the final seconds of the game counting down, the Spartans huddled in a circle on the sidelines. In the final seconds of the game, Tilstra sank two free throws to put the Mustangs ahead 60-58.

The first half was just a question of who was going to be able to keep their cool. Baker was able to hold on to his age. Sharpshooter Moroski was high man on the floor, but Cathcart in the final bout of the night. Cathcart in the final bout of the game.

Baker repeatedly beat Watt to the hoop in the opening seconds of the game. Baker and Moroski took things into their own hands, outscoring Poly with 14 points, all made within the first four minutes of the game. Baker hit the game-winning shot from the baseline.

The first half was all Pomona, but the second half was Poly's. The Sagaehens played a great preformance, even though they couldn't consistently knock them out of the game. The next time they meet, the Spartans should be a little more prepared to stop the Sagaehens.

A touch of the Gardens moved into Chandalli gym Monday night. Coach Chuck Pavelko and his match-makers put on a real show for the partisan fans. It seems impossible that it was just a year ago that we had to sit back and watch the big boys carry off all the marbles. But now, well they still carry off a few, but the Poly lads are getting sharper at the game.

Coach Bob Motz is readily whipping his pitchers and catchers into shape these days. With the season within smelling distance, which isn't too far off when you can smell victory, the Poly eight are getting ready to come up with a decision over Harry Kennison.

It was the first time he had even been on the Washington good mile on it the way it is now. It makes the goose pond almost booed off the San Jose courts during a recent Spartan-million into the new track. The "Biscuit" couldn't even run gift shots and Whitie obligingly put them both in to win the mechanism. The ref quickly awarded Tilstra a couple of points.

Tilstra, who used the bench for a table. Evidently it was for the best because no heated players exchanged teeth during the game.

The fair name of Pomona college received a slight blow when, on the last day, Ed Johnson and Bob Motz played the game. My mistake, it was the ref. Seems some gent by the name of Refeld never liked the way Tilstra was playing and decided to do something about it. When the two educators missed, the ref quietly stepped between them and to his surprise found one of the ref's wild punches landing on his chewing mechanism. The ref quietly awarded Tilstra a couple of points and Whitie obligingly put them both in to win the game 64-66.

Frankie Kudelka, St. Mary's high scorer this season, was almost booted off the San Jose courts during a recent Spartan-GoldenGate, I wonder how the high scorer from Moraga thought it. It was the first time he had even been on the Washington Square courts.

Coach Bob Motz's intramural basketball tournament, game, Jan. 12, last phase of this week with the seven champions in a series of elimination playoffs. The first of these playoffs is scheduled for February 12, the Jolly Poly quintet will meet the Dairy Club five.

The only league ending with a two-way victory for the first place team was the Old Times league. Due to Poly Phase's 9-3 victory over the Ball and Chain five, there became a deadlock between these two teams for first place honors. The Poly Phase quintet meets the Ball and Chain five on March 12 in a battle of life, hair and caustic by giving birth to a new idea.

The average person rarely suffers from San Jose has been a power in SCBA wrestling of late years, and looks more formidable than ever this season.

If the Mustangs do get over the 82 grapplers this week, only the San Diego Aztecs will stand between them and the conference championship.

The average person rarely suffers from depression, San Jose has been a power in SCBA wrestling of late years, and looks more formidable than ever this season.

Three By Eight...

In one of the journalism trade-journals we get around here is an ad with the action line reading, "Never Underestimate the Power of a Woman." After going to the Student's Wives carnival last Saturday night, I can see what they mean.

Those girls really knocked themselves out putting on a great carnival. The booths were well made and attractive. The food good... and that Bingo! I/man shot three of those darts and barely made a dent on the prize table.

It is my opinion that this year's moral from that prize table. The wives had called on practically everyone in the area and asked them to donate some item to be used as a prize. They have either used the gifts received or, if any have been returned, because no merchant refused. They had everything from aluminum doors to 1 dollar baskets of food and eight pound hams. In the future I think that girls should sell advertising for Poly publications. Show a pretty smile, etc., to the merchants and we can double our advertising rate.

But to get back to this Bingo, I went after that game with a passion. I bought three cards at a crack and shelled out quarters. Of course, the table was taken by our basic training. After every play I'd go home and study. I realized that this was something that can't happen to us so I'd better learn to read.

The need for a Student Union building is apparent. All we need is a better place to sit and talk in El Corral's "corral corner." Likewise, it's not much fun chatting with parents when Mom sits in the only available chair in a hotel room, and you and Pop share the edge of the bed while the single light glares overhead.

We would have no organization to give a party and invite wives and girlfriend's to your place, or go to someone else's. We would have a better place to sit and talk in El Corral's "corral corner."

The building would have tremendous public-relations possibilities, and many of these are conceived only after the fact. If we know of a student who is doing something interesting, we can get out there and help him.
Can We Stand Challenge?

by Philip Naarallah

Is he to be the master of the civilization he has created, or is he to be its victim? Will this intricate machinery which he has built out of the past, or will it be a Frankenstein monster that will destroy its own maker? These are the questions that Raymond Fosdick raised in his book "The Old Savage in the New Civilization," at a time when the world's most destructive weapons were not yet born, when there were neither Hidra nor V-2s, and the very thought of the atom was still a unveiled truth.

Before and after Fosdick, and especially today, these questions are being propounded with a force and insistence. The peoples of the world want to know their future and their children's future; they want to know if man's power to create is a factor for his destruction; they want to know if science is a curse or a blessing to human kind.

Energy—Blind and Dumb

The tremendous amount of energy lying dormant in nature is being liberated by science for man's use. But this energy is blind and dumb. It can destroy with exactly the same force and effectiveness it can build. A lack of dynamic may blow up a house with the innocent people or explode in a mine and provide coal for useful needs. To control this force and give it meaning and purpose is the toughest challenge to human will.

Let us follow briefly the implications of this simple atomic equation set by Einstein in 1905.

\[ E = mc^2 \]

Energy (E), equivalent to a mass (m) multiplied by the velocity of light squared (c squared), is the answer. To put it into the understanding of the layman, the equation states that if one pound of matter were entirely converted into energy, it would give as much energy as the total electric power output of the U.S. for three weeks.

This tremendous energy is a revolutionary achievement that has made all forms of dealing and thinking obsolete.

Thinking Revolutionized

In his message to congress in October 1945, President Truman stated "In international relations as in domestic affairs, the release of atomic energy constitutes a new force too revolutionary to consider in the framework of old ideas.

Albert Einstein, who may be worldly called the father of atomic energy, has stated, "Today the atom bomb has altered conventional wisdom. The peoples of the world find themselves in a new habitat to which it must adapt its thinking. ... A new type of thinking is essential if mankind is to survive and move to levels higher.

The world is accepted by pacifists, scientists, practical thinkers, and millions of common people.

Many see that competition and war today, far from being a way out of difficulty, have become human refuse. They all repeat with Phrill Nasrallah of a motorcycle using the so-called 'suicide' clutch.

It is told that an eager young reporter crossed the way of Einstein to inquire about the kind of weapons that will be used in the next war.

"If a fellow presses his hand on the accelerator, it eliminates the left foot in gear, but the operator. Thia view is accepted by pacifists, scientists, practical thinkers, and millions of common people.

They all see that competition and war today, far from being a way out of difficulty, have become human refuse. They all repeat with Phrill Nasrallah: "Will you find yourself in a new habitat to which it must adapt its thinking? ... A new type of thinking is essential if mankind is to survive and move to levels higher."

"Suicide" Clutch

Motorcycles Barred From Campus

"Suicide" clutch on motorcycles is prohibited by a new campus regulation that was adopted by the board of trustees last week. According to Vernon Meanam, dean of student affairs, the last accident in the Poly campus involved and was the direct cause of a motorcycle using the so-called "suicide clutch." Because of the potentiality of the situation, it has been suggested and approved that such motorcycles be restricted from traveling on the campus area, including Obispo main San Luis Obispo.

The one spring or "suicide" clutch on all modern motorcycles is not standard equipment. The standard clutch in such instances is modified by removing the clutch release lever spring so that the clutch is engaged all times when it is engaged by the operator. This is considered dangerous because it eliminates the foot rest if the motorcycle is in gear.

Altogether hopeful that the good fellows who gladly help you spay your pants will cut before harvest time.
Vets Eligible For Study Abroad

Veterans are eligible for overseas study under the G.I. bill on the same basis as in the United States.

According to information just received by the Veterans Administration, the number of World War II veterans studying abroad under the G.I. bill has increased almost 350 percent during the last year.

At the beginning of the current year, 4,558 ex-service men and women were studying in 428 schools and colleges in 44 countries. This is an increase of 4,748. Almost half of these veteran-students are enrolled in schools and colleges in the Philippines. Other countries in which vets are attending school are: Canada, France, Mexico, Switzerland and Great Britain.

These students going abroad for study must arrange for their own passes, visas, and transportation, the V. A. said. All arrangements for such study are made with the Department of State which administers the foreign training benefits of the G.I. bill.

Empty Extinguishers Create Fire Hazard

Students using fire extinguishers and returning them to their hooks are creating a serious fire hazard, according to E. A. Steiner, security officer.

He added that some people are under the impression that you can use a little of the solution and then hang it back up. This is a mistake. Once the two solutions are mixed, the extinguisher is said to be discharged and is absolutely no good in the event of an emergency. On the average, three or four extinguishers a week are found to be discharged.

"It is possible," Steiner also stated, "that some of the extinguishers found to be empty may have been discharged accidentally. In any case where an extinguisher is found to be empty, the fact should be reported to the security office."

Chesterfield Deal Making Big Hit With Dorm Students

The Chesterfield giveaway deal announced in last week's El Mustang is rolling along great guns.

In fact the cigarette's representative here on the campus had to go into El Corral and buy a few cartons to keep up with the demand.

The plan is that any man who requests and gets played any number by Perry Como or Jo Stafford on KPIK's nightly "Disneyland" program has won himself a pack of Chesterfields. He can pick up his loot from the giveaway agent in the various dorms, or if he can't find him, come by the El Mustang office and get the pack from the representative himself.

Remember, the song has to be played and has to be a number by Como or Stafford. That grim rendition of "Tea for Two" by Red Ed and and Green Eagle should be of interest only to one-inch snipes but currently it is quoted at the 60 cent pack per play.

"The more I smoke Chesterfields the more I appreciate how good they are"

'Jack Oakie

STARRING IN "NORTHWEST STAMPede" AN EAGLE-LION production

"WHY I smoke Chesterfield"

(From a series of statements by prominent tobacco farmers)

"When I bring my tobacco to market I'm always looking for the Lopriest & Mynx buyers because I know when I've got real mild, ripe sweet tobacco they'll pay the top dollar for it."

"I've been smoking Chesterfields for about 28 years. I like their taste and I know the kind of nicotine that's in them."

Arthur Williams

TOBACCO FARMER
GREENVILLE, N. C.

"YES-Chesterfields Smoke so MILD-
SO MILD THEY SATISFY MILLIONS-
SO MILD THEY'LL SATISFY YOU."
