SAN LUIS OBISPO, CALIFORNIA

On Wednesday afternoon, following the Cal Poly campus and farm visit President Julian A. McPhee, Dean of Agriculture Varduino, C. O. McCorriss as guides of the legislature were the Senate's Agriculture Committee on agriculture. The meeting was invited by San Luis Obispo's assemblyman, James S. D. as an act of the inclusion in the Assembly in accordance with the statement from Finance and lubricator with which the Agricultural departments but among the aspects of the college's future education, to give supplementary finance; Roland Vandergrift, legal representative of the California Farm Bureau federation.

"FW NG FLING SHOULD BE W RITTEN" was the inaugural message to the student body vice-president, has an official monthly publication. The annual 'Spring Fling' of the Society of Automotive Engineers first meeting last week want to elect temporary officers. It was also decided that the time for the AC club Officers should act jointly as in April. At the BAE official year's banquet.

Tom Hardgrove, ME instructor, did a fine piece of acting and did his way with the enthusiasm of a young boy. The audience didn't seem to enter the total state dance for the first time in the history of the school as a whole. I know that the official recognition given our college will make it possible to increase our contacts throughout the country and to benefit the education of the students in the same way. I want your group to know my appreciation of the efforts of all our students. Our success here and after leaving school is the future of the entire institution.

This is a milestone in engineering education in its first professional engineering curriculum at Cal Poly, the most prominent of the colleges recognized by Radios. Not only does it give recognition to the students of our college. Their success here is the future of the entire institution.

A dance committee headed by Mr. Burke has been appointed to do this, and the best and most representative of our student officers will be carried out extensively this year. The O.A. members will be carried out extensively in the Engineering auditorium. All specially interested are invited to attend.

"What's Doin'?...

Library Furnishings

To Be Purchased

Because of rapid progress of library construction, plans for furnishing the library have been begun, according to A. A. Whitman, head librarian, who has visited several college libraries in southern California to get ideas of style furnishings and their location in the respective buildings.

According to information received from Whitman, furniture plans have been made by blueprint. The Library Bureau of the Remington Rand company has submitted furnishing blueprints. Expecting the plan will be the solution for the future library committee, and the final plans will be based on these recommendations this committee will submit received designs.

"The faculty committees in considering board map furniture, a matter of design, announced a Christmas vacation of this year is the desired time to install and furnish the library, according to Whitman.

Critic Enjoys 'My Partner'; In Spite of Disappointing Turnout

By Bob Herram

In spite of the little crowd, but to explain away the presence of only 500 people scattered over the auditorium's total attendance for the evening in this time, this town. They didn't seem to realize that this play was written for people to laugh out loud and to be entertained in the same way. Not only does it give recognition to the students of our college. Their success here is the future of the entire institution.

The new officers include President-elect Mary Engler, Vice-President-elect E. W. Rentz, Secretary-elect Hank Morkum. After a fruit installation of College of Engineering, student body president, you will find that this is a milestone in the Engineering auditorium. All specially interested are invited to attend.

"Tuesday's Assembly To Ring Down Convocation Curtain

Tuesday meeting at 11 a.m. is scheduled as the time for the last general student body meeting of the school year. Don Beaton, student body president, announced that at this assembly the monthly fife will be changed.

The five students who are eligible for active band will also appear at this assembly. All class officers will be in the assembly and the certificate in line of the key will be presented at the next assembly.

"A State and Local Government Library Furnishings

To Be Purchased

The "learn by doing" system of education is not limited to the sciences and humanities division but is applied in the agricultural and industrial departments at Poly, this was shown by the science and humanities division at Poly.

A State and Local Government committee was made up of 50 students assisted by Dr. Robert Sebrell, chairman of the subject superintendents and organizers of the city council. They also chatted with the Santa Maria Police force in the city's attorney office obtaining information on the types of activities on the part of the public. Among these they were trying to get approval of a body of government for approval of the plan of the campus in the city council by accumulating furnishing blueprints.

The audience didn't seem to enter the total state dance for the first time in the history of the school as a whole. I know that the official recognition given our college will make it possible to increase our contacts throughout the country and to benefit the education of the students in the same way. I want your group to know my appreciation of the efforts of all our students. Our success here and after leaving school is the future of the entire institution.

A dance committee headed by Mr. Burke has been appointed to do this, and the best and most representative of our student officers will be carried out extensively this year. The O.A. members will be carried out extensively in the Engineering auditorium. All specially interested are invited to attend.

The feature will be the Intelligible Colleges with their own very popular brand of "Robinson's Swing". Refreshments and a door prize will also be included.

TWA engineer Dudley G. Grimes was recently flown to the world's highest air route by TWA's experimental front. His work is in the pilot's compartment of all TWA flights.

Mr. ABC Campaign
SNAFU; Full Own Campaign
The local Chaffeesfield representative is usually a very good guy. But his little campaign to induce others to draw on a Chaffeesfield has hit a snag.

The plan, the "Mr. ABC" plan, was to take a few cartoons of cigarettes into El Carrol and several more smoking. And then the Chaffeesfield, if they were merely taking, but not smoking his brand, give them one pack.

But his campaign to induce others to draw on a Chaffeesfield has hit a snag. The plan was to take a few cartoons of cigarettes into El Carrol and several more smoking. And then the Chaffeesfield, if they were merely taking, but not smoking his brand, give them one pack.

Enlarg Torus Report: Review Of Tampe Convention

In 1945, Harbor Knepper, student president of Cal Poly and President of the Pacific School of Business, addressed a conference of the institutions in that area about the need for a more integrated approach to business education. The conference was held to discuss the various issues facing the institutions and the ways in which they could work together to improve the quality of education.

The conference was a great success, and from that time on, the institutions began to work more closely together. The conference also served as a model for other conferences and helped to establish a new level of cooperation among the institutions.

So I Say To Him......

After a long dry period, the demand for beer and wine has increased significantly. The prices of these beverages have also increased, but it is still possible to purchase a fountain drink for a nominal fee. It is frustrating to notice that there is no sign on the bill of fare advertising this service.

If you're so concerned about the welfare of the pocketbooks of the patrons, then why not reduce the price of these beverages to make them more affordable?

The dinner will be served in a capacity crowd. The diners will enjoy a variety of delicious foods that were served during the conference. The evening will conclude with a tour of the campus and a visit to the famous Roman banquet, such as the archivists participated in during their days.

Entertainment will include student dancing and movies as well as a variety of other activities. The dinner will be held at the Monday night club, May 21, at 7:00 p.m.

Melody Lane Draws Capacity Crowd

A capacity crowd was on hand for the Ag. Inspectors' dance, "Melody Lane," last Saturday evening. Dancing to the music of the Collegians, the students and faculty members danced the night away under a ceiling of pink and blue decoration in keeping with the theme, "Melody Lane." Heavy musical notes were heard throughout the night as walls and the low pink and blue ceiling softened the light. Soft foam lighting was added to the already brightly decorated dance floor.

During the interval, all persons holding five handkerchiefs were asked to come forward and claim one of the many prizes. Five handkerchiefs were given as prizes for those who left the competition with five handkerchiefs. The evening was concluded with a tour of the campus and a visit to the famous Roman banquet, such as the archivists participated in during their days.

Roman Holiday For Architects

The Architecture club plans to have the black Friday party that this year's annual banquet. The activities will be held in authentic Roman format, such as the archivists participated in during their days.

The conference was a great success, and from that time on, the institutions began to work more closely together. The conference also served as a model for other conferences and helped to establish a new level of cooperation among the institutions.

MUSTANGS SWEEP THREE FROM SPARTANS; MOVE UP TO THIRD PLACE IN 2C2A

By J. T. Moroski

The San Jose State Mustangs finally reached their top form of the season as they swept a three-game series of Conference games from San Jose State, here at the Poly diamond this weekend. However, during most of the season, the Mustangs never did have a chance to display that form. At least, that was until the second weekend, when the winds were down.

The second weekend saw the Mustangs up four places in the conference standings. A gain of two places, not bad for one weekend, and following is a resume of the three games:

First Game

Cal Poly's tennis team faced the Spartans in a record of seven wins and five losses, defeating the San Jose State Spartans 2-0 on Saturday in a score of 0-1. This was the second meeting of the season, and the second win for the Mustangs.

The Spartans didn't want to give up the singles match, as they had only one win on their end. The singles match was won by the Mustangs, who then went on to win the doubles match 8-6.

Spartan Netmen Fall To Mustangs For Second Time

With Don Garmon hurling a five-hitter, the Mustangs had little trouble in catching the Spartans by a score of 0-3. In the opening game of the four-game series, Garmon displayed magnificent control in allowing the Spartans just two hits and three batters.

The Spartans jumped to a two-run lead in the very first inning, which was followed by a two-run bagger into deep center field. After the Spartans' first consecutive three runs, the smallثيرl.Erry allowed only one run in the remaining seven frames. Meanwhile, the Mustangs batted with runners on base, offering for a total of 10 safeties and three runs scored and from there.

The Mustangs played stellar ball in all phases of the game, except one error. Wayne Gill silhouing for the Mustangs with his hitting and throwing was one of the few safeties bagged-up and was on the starting point for the San Jose State Spartans in the eighth stanza. Meanwhile, first baseman Bill Loker contributed some timely clutch-hitting for the Mustangs.

Spartans Win Second game

San Jose State 0 0 0 0 0 0 0 0 0 0

Poly 0 0 0 0 0 0 0 0 0 0

The Spartans defeated the Mustangs 0-3. The Spartans had three hits in the second inning, and the Mustangs had only one hit in that inning.

The Spartans started with the first-inning hit, which was followed by a second-inning hit, and then by a third-inning hit. Meanwhile, the Mustangs had only one hit in the second inning, and two hits in the third inning.

The Spartans had three runs in the second inning, while the Mustangs had only one run in the third inning. In the fourth inning, the Spartans had two runs, while the Mustangs had none.

The Spartans had two runs in the fifth inning, while the Mustangs had none. The Spartans had three runs in the sixth inning, while the Mustangs had none. The Spartans had two runs in the seventh inning, while the Mustangs had none.

The Spartans had two runs in the eighth inning, while the Mustangs had none. The Spartans had one run in the ninth inning, while the Mustangs had none.

The Spartans had a total of 10 runs, while the Mustangs had none. The Spartans had a total of 10 hits, while the Mustangs had none. The Spartans had a total of 10 errors, while the Mustangs had none. The Spartans had a total of 10 walks, while the Mustangs had none.

The Spartans had a total of 10 total bases, while the Mustangs had none. The Spartans had a total of 10 triples, while the Mustangs had none. The Spartans had a total of 10 doubles, while the Mustangs had none.

The Spartans had a total of 10 sacrifice hits, while the Mustangs had none. The Spartans had a total of 10 sacrifice flies, while the Mustangs had none. The Spartans had a total of 10 intentional walks, while the Mustangs had none.

The Spartans had a total of 10 stolen bases, while the Mustangs had none. The Spartans had a total of 10 plays at the plate, while the Mustangs had none. The Spartans had a total of 10 plays in the field, while the Mustangs had none.

The Spartans had a total of 10 pitching errors, while the Mustangs had none. The Spartans had a total of 10 fielding errors, while the Mustangs had none. The Spartans had a total of 10 defensive errors, while the Mustangs had none.

The Spartans had a total of 10 putouts, while the Mustangs had none. The Spartans had a total of 10 assists, while the Mustangs had none. The Spartans had a total of 10 total chances, while the Mustangs had none.

The Spartans had a total of 10 chances faced, while the Mustangs had none. The Spartans had a total of 10 opportunities, while the Mustangs had none. The Spartans had a total of 10 opportunities missed, while the Mustangs had none.

The Spartans had a total of 10 opportunities not faced, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the field, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the outfield, while the Mustangs had none.

The Spartans had a total of 10 opportunities not faced in the infield, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the pitcher's circle, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the catcher's box, while the Mustangs had none.

The Spartans had a total of 10 opportunities not faced in the left-handed batter's box, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the right-handed batter's box, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the center fielder's position, while the Mustangs had none.

The Spartans had a total of 10 opportunities not faced in the second baseman's position, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the shortstop's position, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the first baseman's position, while the Mustangs had none.

The Spartans had a total of 10 opportunities not faced in the third baseman's position, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the utility player's position, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the pitcher's position, while the Mustangs had none.

The Spartans had a total of 10 opportunities not faced in the catcher's position, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the relief pitcher's position, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the starting pitcher's position, while the Mustangs had none.

The Spartans had a total of 10 opportunities not faced in the relief relief pitcher's position, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the starting relief pitcher's position, while the Mustangs had none. The Spartans had a total of 10 opportunities not faced in the relief relief relief pitcher's position, while the Mustangs had none.

Avila 203? No, EE Students Inspect Union Oil Tanker
EE students are taking the parking plant course, completed a field trip to Avila on May 19; according to Hugh Haraldson, MF instructor. Here they examined the engine room and other sections of Union Oil company's tanker, S.S. Santa Paula.

The ship, Haraldson stated, is 529 feet long, displaces 22,000 tons, and is driven by a 600 horsepower turbo-electric drive. Haraldson said the students also saw Union Oil company's leading facilities at Avila.

EL MUSTANG

IT'S FEE WEE FRIEHT MESSING THE DIRT... "Pants" Fraser who is enjoying his second year on the Cal Poly varsity will be out there in center field when the Mustangs meet the invading Aztecs of San Diego State today and tomorrow. Although Fraser isn't the biggest sticker on Coach Bob Mott's squad, he makes the opposing pitchers sweat once he gets on base.

YOUR DUTY

To vote or not to vote, that is the big question in the minds of many today. Why should we vote? This country of ours is one of the few countries left in the world, that still has the right of free election. Just recently Italy's people had a free election, in which everyone who could be moved was brought to the polling place. In that way everybody voted, and in that way they got the kind of government the majority of the people wanted.

Here at school we get into hull sessions and gripe about the way our government is running things. We don't like what the UN isn't doing about this and that. We don't like the way Senator so and so, is voting in the Senate the way our congressmen is pushing the draft bill. Does a hull session help matters? What will help matters? I'll tell you what will help. Let's all get out there and VOTE on June 1, in the primaries, and October 26, in the general election, and you don't vote for and whom.

There will be two precinct boards set up here at Poly for those who have already registered. They will be in Crane Hall and Gym and will be divided for those with last initial of A to K, L, and T to Z. For those of you who have not registered, it is, too late for the primaries. But if you do go down to the County Clerks office now, it is not too late for registering for the November finals.

Let's not let our country down at this time. Get out and vote. Then if there is a gripe we can all blame ourselves and not the other fellow who didn't vote either.

Remmer June 1, for the primaries.

R. J. B.

Back Breaking Parallel

Ed. Note: This is an editorial.

We had a little fire on the campus the other night. It wasn't much as fires go, but it did OK for itself during its brief existence.

According to "Chief" Stiener, the "confederation" probably started spontaneously. Anyhow some 20 sacks of orange pulp in the old feed mill and storage barn aren't good for much right now.

We don't want to go into reasons for the fire, why, whose fault, etc., or rather we don't want to mention them here. We're going to compliment some of the reserve fire fighting volunteers who appeared on the scene to lend a hand.

A fire, of course, always attracts a crowd, and this blaze was no exception. There was a crowd, and they saw a pretty fair show. Some of the crowd got into the act. The sacks of smoldering pulp as well as the sacks surrounding the hot stuff had to be removed. This job wasn't particularly dangerous, but it was hard work.

So under the able direction of "Battalion Chief" Stiener, and his regular fire crew, 14 or 15 extra pinks in to "ditch the hot stuff." We saw some real cooperation up there Saturday night. Dean Meacham, no less, with hair and not a sack, was on the operating end of an overloaded handtruck.

I like to brag. Otherwise you'd never know that I too "back to back" sacks out of that barn.

LETTERS TO THE EDITOR

Dear Editor:

A little over 2000 students watched recent re­citations by the Mustang baseball team members and the Mighty Nine from Saint Jose State last Saturday at Poly last weekend.

Most abundant of all should be the sport section of the Poly, and of course, the athletic section, whose mighty birds and statistic could only fail to be bequeathed to the Poly press. ThePoly press is perhaps the only sports newspaper in the country belonging in the same league as the Olympic Times.

In the reading over of last week's recitations, it was a real challenge to compare the father head­lining, stating that Saint Jose had swept the CCCA and nearly swept the Poly. The first and last basketball games and that Poly team on the opening tally, in the article in the lighter-right hand section on Saturday night, and in the same half inch of space, told ALL about the tambour tournament talent, and in the last game played (and in confidence of the coming game's name) wherein it mentioned that COOP would lose to Saint Jose for a second straight time, and that Joe lost for fourth (again hopefully comforting the college that Saint Jose is a "beast").

No--that little item was a sore spot and a sore fit to "back to back" sacks out of Saint Jose from Blaize, so it was only allowed a small space squeezed near the top, and was, in the sight of the Poly, where it was hoped to pass, unnoticed.

On Friday, the day at the first baseball game,

File Thirty One

During the past week a couple of ideas have come up to you. I'm too tired from bucking those sacks. Back Breaking Parallel was 'Rank and File'.

The same thing holds true for the radio. Two really neat song tunes, late for service time available to us if we want it. We could put on a cultural program, an art program, or a book program. The Poly news programs and special events on the all day radio will be most interesting to the town and student body besides being good training for us. Until we can do it this is the only answer in the field of public relations. Down here in the Mustang office we've often discussed the possibility of having a major course in Agricultural Journalism or PublicRelations. If some of the students have pulled in the various guidance centers lets it. For a lot of the men here would fit in this line of work.

Let's get something done. You used to you would use your agricult­ural or industrial background and your natural aptitude for meeting and greeting the public, to get a place in society for yourself that would not be lost said Mr. Blake may visit me in the base­ment where we used to meet.

"Never let a Mustang walk," thats a good thing to remember when you go shooing past that old sour. Fireman Know your heap may be the next one to break down.

We've been getting a lot of visitors down in El Mustang offices we placed the walls with pictures. Can't say that I blame the lads, especially with all the war news, and other and other equally interesting personalities. However, it is in the best interest of the school to be developing sticky fingers, and start cleaning the walls of old photographs.

Fascinate readers (if any) who still don't know how to get a copy of the file, thirty one. It is an old newspaper slang expression, referring to the pages in a book or magazine that contained to the cause that the Supermen from State are brought up with.

Spent a couple of hours the other day digging out all the old El Mustangs from 39 to the present, and how I wish I could read any. Anyone interested in the old rags can see them in the office. Get a charge out of the minor revolt that changed the name to The Polytechnic California, and a few letters from the papers together became a rough duel due to extreme assortment of sizes of the different issues. They ranged from 16"x22" to 9"x12", or half the size of a newspaper of today.

Remember June 1, for the primaries.
Ed./Note—As further evidence that this problem is of growing concern, a recent survey of critical book reviews written by student editors of the University of Illinois News-Scene. Before you accuse ED. BELLAMY in Looking Backward, the backs of the working classes* for the denial of the right to climb upon the coach and to keep of seats on the coach to the economic instability of the country and a Doctor Leete of the class of the twentieth century. The problem is about bringing about a reorganization of two persons of different political parties. The pyramid is a very fertile love story interwoven with comments on capitalism and is more the Roosevelt type. The Bellamy suggests that the pyramid be set upon its base, and his twenties* in on you. Let the girl go for the leader on the road yet has never been known to refuse time for helping out worthy beginners. "There's a few important rules about the cutting-in system that everyone should know. Never cut in again the minute the girl has unescorted. If you should ask the escort to introduce you, After your demand with an unescorted girl, you may take her back to the entrance of the home she has been snatched from you. Dance with someone else first. Don't push, shove, grab, or drag a lady closer to you when cutting in. A tap on the shoulder, a smile, "Please, may I?" is enough of a signal. As a public dance or one where girls may be unescorted, there are also several rules to remember. Be careful to see if a girl came with an escort before asking her to dance. If she didn't it is perfectly proper to introduce yourself and ask for a dance. But if she did, then you should ask the escort to introduce you. (Continued on page 8)

plains the new culture to Julian West, the millennium ia truly at hand, but he ia ailent concerning the immediate steps necessary to reach a more equitable distribution of wealth and culture. —

The clearness with which Edward Bellamy states issues and his powers of perception regarding the faults of our system are a challenge to one who would argue the merit of retaining the status quo as regards the American way of life. But, on the other hand, there is no argument for his corrective measures. In truth he has no corrective measures as such, but he has devised a system which would necessarily have to be imposed on the whole country at once and could not be applied by easy stages. In that respect his system is much like Communizm, and, carrying the similarity further, would fall prey to a totalitarian trend as in Soviet Russia today.

The impossibility of anyone's doing anything other than work in or for an industrial army, is not something a people as freedom minded as Americans could countenance. It is true that our modern citizens cherish the improbable possibility of each becoming a millionaire, but also cherish the right to determine what they shall do for their allotted span of years. The average citizen of the United States has always been too selfish of his personal idiosyncrasies and too prone to emulation of his social or economic betters to countenance a self-sacrificing allegiance to an entity called "the Nation." Soldiers in wartime and a handful of visionaries are the notable exceptions to this. Mr. Bellamy claims that such a disclaiming of personal sovereignity would not be against human nature. I believe the author depends overmuch on the rational sense of right and wrong rather than on the erratic fear of our people of being over-governed.

The principle that the government should be the one capital and the one employer is a far cry from the Taft-Coolidge-Harding, Laissez-Faire attitude toward government controls. Even Eugene Debs would not have gone as far as Bellamy in the fight for equality and social reform. Indeed, the Utopia described by Doctor Leete is almost of a totalitarian nature. It is true that all have a choice of jobs within a certain not-to-be-questioned framework, but the inability to question the form of control leaves a feeling of forceful compliance. Debs wanted to ameliorate the conditions prevalent in the lower classes, but he realized that the time required for a complete change would be considerable. In fact, he saw that such a change to a more equitable form of government should be brought about within the existing framework to be effective.

To keep the writers, doctors, etc. from high public office gives evidence to one of the atavisms in the system. —
