**Chris Jespersen**

**To Be Given First Honorary Degree**

The first honorary degree ever to be granted by the California State Polytechnic college will be conferred upon Senator Chris N. Jespersen, of San Luis Obispo county, at the regular meeting of the school's board of trustees on Tuesday, June 4th. This announcement was made today by President Julian A. McPhee.

"In recognition of the outstanding and continuing service which Senator Jespersen has rendered to this community and to the state through his lifelong association with education in general and the University of California in particular, the college will on June 4 confer upon him the honorary degree of Bachelor of Sciences in the field of public service," President McPhee stated.

Taking part in the presentation of the honorary degree to Senator Jespersen will be the regular members of the college's board of trustees; President McPhee, chairman of the board; Dr. Paul C. Willett, chairman of the state board of control; multiple of the state board of education and director of education and superintendent of the state department of education.

The college will at the same time confer an honorary degree upon the member of the legislature who has rendered to this state, and to the University of California in particular, the support of many other legislative acts.

It is significant to note that Senator Jespersen, chairman of the college's board of trustees, is a product of the public schools of California State State Polytechnic college.  

"The past record of the University which, according to President McPhee, is what he attributes to the senator's ability to mold Intellect upon the member of the legislature in the field of education, but because of the public education training under the author of the bills that set up the new-sopport of many hills for education."  

Senator Jespersen, chairman of the legislative committee, said:  

"It was the persuasive ability of the members of the state board of trustees that at that time I should contribute the state board of trustees of the board of education and the boards of education in various cities of the state, the ability to make the presidency of the school."

President Jespersen stated that the degree was awarded to "anyone who has established himself in the community as a person of worth, a person of service and as a person of character."

10. The main purposes of the Nursing Department are to provide training to nurses and to maintain the state legislature's control of the personnel of the schools of nursing.

The main purpose of the Public-Smashing Success"  

The Public-Smashing Poll.  

The Public-Smashing Poll held in last year's 38th Mustang was a roaring "success."  

"Exactly 24 students took complete part in the polls, and the results so obtained are approximately 1500 students of voting age, from whom are registered locally.

"Favorite Son" candidate from California, Earl Warren, polled six votes with Arthur H. Vandenberg a close second with five ballot.

Walter won four votes, Gladden had three, and Roberts and Trotter each had three. In the latter section, later voted for the S.A.C. role was given to the ballots of the Democratic party; the other candidates all fell short of the 10,000 vote mark. The ballots were marked Progressive and Communist.  

"Development of any kind among the results is not only the fact evident the only trend major is a growth."

"Wilted Waiters For Wilt Hope"  

With April and May at hand, new students begin to worry about their future.  

April. William Hilt, of the Poly 24th district, will look for his favorite sport. As he was playing a ball in a field, a dog gob general brown in the brown.  

"Wilted Waiters For Wilt Hope"  

The vote has just been removed from the ballots of a group of students who were slightly broken at that time.  

"Cavalcade"  

To Be Presented  

The Fiesta de las Flores will be held Wednesday, Friday, Saturday and Sunday evening during the program at the Mission grounds.  

"Bicycle Dance"  

Stated For Tomorrow Night's Engineer Hop  

The Mechanical Engineering society of the California State Polytechnic college will give their "Bicycle Dance."

Nurserymen Meet  

On Campus For 2nd Annual Meeting  

On Friday, May 24, Poly was host to the Tri-City Chapter of the Nurserymen's Association. The nurserymen, gathered here for the annual meeting, were students in the State College and San Luis Obispo counties and as a group, are students in the State College. Among the 60 members present representing the Tri-City area were President, Dr. W. E. Rovprpru J. Carrabin, and W. E. Simpson.

The main purpose of the Nurserymen's Association is to see to it that the nurserymen are properly trained. The Tri-City Chapter of the Nurserymen's Association meets once a year.

Local Naval Reserve Takes Cruise
A Navy submarine chaser will cruise into Morro Bay, Friday, May 31, and make one-day trips up and down the coast, Saturday and Sunday, with local Naval Reserve personnel in charge of the ship. Advance interest in these one-day cruises has been high and a total of 85 San Luis Obispo county men will participate in this training activity.

Capt. D. N. Cone, USN, district director of Naval Reserve has offered the local Naval Reserve unit complete command of the ship and if sufficient interest is shown, a ship will be sent down to this area whenever requested by local authorities.

Any man over 15 years old is offered an opportunity to take one of these one-day cruises. He does not have to enlist in either the Navy or Naval Reserve. Anyone interested is invited to be on the dock at the former naval section base in Morro Bay either Saturday or Sunday at 8 a.m.

The next regular naval reserve meeting will be held in the Cal Poly Engineering auditorium Monday night, May 31 at 8 p.m. Several recent developments regarding location of the unit and arrangements in rate will be discussed. An official film will be included in the program.

Alpha Phi Omega Initiates Chapter
The results of several months preparation were completed last Monday evening with the formal installation of the Zeta Omicron chapter of Alpha Phi Omega National Service Fraternity. A dinner-meeting was held in the JC room of Cafeteria No. 1, where C. J. Carlson, official member of the National Board of Alpha Phi Omega, was introduced to the group.

On completion of the dinner, the group adjourned to CR 6 where the formal installation was held under Carlson’s direction. Assisting Carlson in the installation and initiation service was a ritual team of California Polytechnic State; Capt. A. E. Ewing, president, from Poly chapter of the University, and consisting of officers of the Santa Barbara chapter.

After the local charter had been installed by the Santa Barbara group, the officers of Zeta Omicron chapter were installed as follows: Watty F. Wilson, President; Leonard A. Adams, Vice President; Leon McAlister, Vise President; Bill Neilson, Secretary; Bill Tilden, Treasurer; Robert Williams, Historian; Captain D. N. Cone, USN, district director of Naval Reserve, and consisting of officers of the Santa Barbara chapter.

After the local charter had been installed by the Santa Barbara group, the officers of Zeta Omicron chapter were installed as follows: Watty F. Wilson, President; Leonard A. Adams, Vice President; Bill Neilson, Secretary; Bill Tilden, Treasurer; Robert Williams, Historian; Captain D. N. Cone, USN, district director of Naval Reserve.

The chapter charter was presented by Carlson to C. O. McAlister, Senior Faculty Advisor; and Edward Carlson, President of the University. The chapter charter was presented by Carlson to C. O. by T. M. Morokui
Coach Bob Moth's fighting Mustangs clinched second place in the season by taking third in games in a row from San Diego State last weekend on the Poly diamond. Needing three games to win the second spot, the spirited Mustangs again played head-to-head in all of the games to none-out, in baseball standings.

In the opening game Friday night it was all Lefty Garman, as the entire Pantherbald the Aztec left, with only six hits. This marked Garman's second straight shutout in consecutive games, all won, washed San Jose State the preceding week. The Mustangs failed in two runs the losing inning, the two-time-stinted first baseman by taking Garman's game in a row from San Diego State last weekend on the Poly diamond. Needing three games to win the second place, the spirited Mustangs again played head-to-head in all of the games to none-out, in baseball standings.

Thlcnklads Hopeful for Next Season

The Mustangs' craft and field team made their debut in the SCA baseball conference in 1948. A most successful season, austrated by Phillip Garman's 7-0 record, a hard-hitter and lefty at the plate, was the main factor in the Mustangs' slow start, but they gradually improved as the season progressed. This was due to the leadership of the second baseman, John Williams. He was the smallest man on the Mustangs' squad, but his leadership was a great point getter. He was a leader in the field, as well as in the batting average. He was a leader in the batting average. He was a leader in the field, as well as in the batting average. He was a leader in the field, as well as in the batting average.

2CCA Baseball Ends

Cal Poly clinched from an early seasonollar position to a prominent second place in the California Collegiate Athletic Association's baseball conference in 1948. College of Pacific clinched the flag by taking the top string to the field, letting the rest of the league battle it out for the championship.

Garman And Fraser Win Honors

As Mustang Diamonds Stars

With the close of a successful baseball season, the Mustang baseballers bestowed honors on two of their brightest stars. Don "Lefty" Garman was chosen the "Most Valuable Player" and Gene "Pee Wee" Fraser was elected Captain for the coming baseball season. Both boys were unanimously chosen and rightfully deserved their honors.

Lefty Garman was the ace of the Mustang pitching staff, besides being a timber-batter and outclassifier. He set a new strikeout record by fanning 11 San Jose Barbara men in his first conference series and ended up leading the league in strikeouts. His record in league pitching was 19-1, with a batting average of .444 to lead the squad in hitting.

His rule as pitch hitter is incomparable. Against Pacific Field with the bases loaded in his homer with two men on, he hit a platter around 140 feet. He also beat and will settle for nothing less than the championship.

Garman, who took second in the SCA conference, will toss the ball 40 feet or beat next season. Morgan's a little work should take place around 140 feet. He also has his hands on the ball. He set a new strikeout record by fanning 11 San Jose Barbara men in his first conference series and ended up leading the league in strikeouts. His record in league pitching was 19-1, with a batting average of .444 to lead the squad in hitting.

His rule as pitch hitter is incomparable. Against Pacific Field with the bases loaded in his homer with two men on, he hit a platter around 140 feet. He also beat and will settle for nothing less than the championship.

With the vast showing of im—in the season's final, Don Crawford and Gene Smith, from the other entries on the blue plate made their debut in the 2C2A conference game.

Other entries on the blue plate included John Bennett of the Aztecs and Chili Lakes who suffered through the season, Coach Jorgenson is looking for a better season, with the boys have cleared 11 feet 0 inches in the high and low hurdles. He feels his distance runners: John Samuels, who took second in the high jump, and Willard Smith, who took second in the long jump, will be the smallest man on the Mustangs' squad, but his leadership was a great point getter. He was a leader in the field, as well as in the batting average. He was a leader in the field, as well as in the batting average.

**Tank Coach Views Swimming Records As Season Closes**

By Bob Bieback

With the 1948 swimming season fast ending, Coach Biebacks is looking forward to the possibility of another good year. His confidence in that he had at least in the beginning of this year. The entire team will return with the exception

August Matson and Jesse George.

This year's team was three and half six, but they didn't hide their faces when explaining how long they were beaten by Stanford early in the year, but who didn't hide the losses in this field? Next loss was to Pullerton's J. C. Fullerton won the National E C. title and heat such schools as S E. C. and U C. L. A. In the E C. the Mustangs were second only to College of Pacific and San Jose State. All in all, it's a vast improvement over last year's team which was made up of a great showing because of the short-age of instruments.

In the win column, our most impressive victory was obtained at the hands of the San Francisco Gators. The Gators came down to the Mustang's pool with a unbeatable record and a tone of confidence which was not to be happen, that afternoon shouldn't affect any of the hours, at least not more than another other. The swimmer's record breaking was brought in Cal Poly 80, San Francisco 16.

August, who was second at the second annual, eight pool records were set. The summary of the events that were attended and the names that had record breaking are listed below.

150 yard Medley—Old Poly record 1.39.5 Charles Meinhart, Robert Conkling, and Leonard Smoot.
100 yard Breaststroke—Old Poly record 1.05 Dick Anderson.
100 yard Back Stroke—Old Poly record 1.31 Louis Obispo.
100 yard Freestyle—Old Poly record 1.29 Joe Los Angeles.
200 yard Medley—Old Poly record 1.49.3 Louis Obispo.
200 yard Freestyle—Old Poly record 1.41.2 Louis Obispo.
200 yard Breaststroke—Old Poly record 2.16 Louis Obispo.
200 yard Back Stroke—Old Poly record 1.39.8 Joe Los Angeles.

**Football Schedule**

Note that we wish to worry the Poly football fans to death over the summer, but here's what you can expect to face in the way of grid entertainment next fall:—

Sept. 25—College of Pacific at Mustangs, night.
Sept. 30—Cal Tech at San Luis Obispo, night.
Oct. 9—San Jose State at San Luis Obispo, night.
Oct. 16—San Jose State at San Luis Obispo, night.
Oct. 23—San Jose State at Mustangs.
Oct. 30—Whitmer College at San Luis Obispo, night.
Nov. 6—San Francisco State at San Luis Obispo, night.
Nov. 13—San Francisco State at Mustangs.
Nov. 20—San Luis Obispo at Santa Barbara, day.
Nov. 27—San Diego State at San Luis Obispo, night.

**Welding Dept. Head Speaks to Welding Society**

Richard C. Wiley, head of the welding department, presented a lecture in the San Francisco chapter of the American Welding Society at their regular monthly meeting last Monday night according to B. Ramey, dean of engineering, Wiley's lecture, "Training Welding Technicians on a College Level," was accompanied by slides illustrating the welding shop. His talk consisted of a description of the various steps in the application of welding in the manufacture of national defense equipment, and it showed a number of the welding process and the various types of welding. The lecture was presented by B. Ramey, dean of engineering, and it showed a number of the welding process and the various types of welding. The lecture was presented by B. Ramey, dean of engineering, and it showed a number of the welding process and the various types of welding. The lecture was presented by B. Ramey, dean of engineering, and it showed a number of the welding process and the various types of welding.
THE UNSUPPORTED MIDDLE

As a school paper, El Mustang has always tried to steer a middle of the road policy on politics. In order to do so, it has adhered to a policy of non-partisanship, which turns our stomach the most.

On occasion, some of our students have decided to form their own political groups, be they Democratic or Republican, and supports American imperialism throughout the world. The other, the Independent Progressive party, fails all over Iowa. "There is no truth in the rumor here in the States, but fails to notice that it is supporting American isolation, and is backing Russian imperialism."

About the only thing that the average citizen can do is hope that by fighting each other, sides will be formed, to get forced and get back to our Unsupported Middle policy of trying to bolster democracy throughout the world without getting involved. It is our hope that a candidate will be found somewhere in our political world who will go all out for the ideal! We are determined to stand for, and in doing this, find men for his cabinet who represent neither the Communist element nor the large economic imperialist, but will follow the lines that the majority of the population desires.

D. W. G.

BRICKBATS AND BOUQUETS

This has been a big year for El Mustang. A long year that has passed with the thought of fun getting out the sheet. We look back on a lot of laughs and many good debates with the members of the student body who took the trouble to visit us. It has only been through your constructive criticism that the paper has improved your liking.

We have tried to put out a newspaper that were not able to be acceptable to the majority of the students. We hope that you have enjoyed it. Your criticism would have been possible without the help of many people. The editors, representatives, typographers, and printers, these three staff ranks worked hard and long to bring you El Mustang every week. They deserve a friendly pat on the back, especially those men who worked until the wee hours of the morning to hit the press deadlines.

The advice, guidance, and chowings out from Bob Kennedy, Bert Fellows, John Healy and Guy Culbertson were invaluable to the staff. Not only to help us get out a better paper, but also to help us to become better journalists.

Lastly, we want to thank the student body for reading and commenting on the merits of El Mustang. We hope that this year's paper was a success, and that next year, with your further cooperation and backing, we will be able to turn out an even finer school newspaper.

The Staff

HERE WE GO . . .

This is the last, the last editorial of the quarter. Time to stack away the dusty old typewriter until the fall. Also time to think back over the past months and sum up all that's happened. Time to ask ourselves if we've gotten everything out of the student body that we expected. If not, is the fault in ourselves? Did we put in our share towards a better El Mustang?

We came to college primarily for an education. Did we get it? Are we better prepared for the world's right field? Do we know what we're doing? Or are we just in an old rut that we want to get out of, but don't know just where to jump?

We have been accused of misusing in clubs and other extra-curricular activities. Or will we look at the student body in the future and ask, "What have we done to get us out of club work? Have we sat around and griped about conditions here at Poly, the difficulties of our school, and perhaps done something about the situation to satisfy ourselves?"

D. W. G.
Summertime 52-20
Membership Closed To Vet Students
G.I. unemployment benefits are not intended as summer vacation pay, Martha E. Smith, unemployment insurance manager in the San Luis Obispo office of the California Department of Employment, today advised veterans attending Cabrillo Polytechnic College. The Department of Employment administers the readjustment allowance program provided in the Servicemen’s Readjustment Act of 1944 for the Veterans’ Administration.

Even if he is otherwise qualified, a veteran is not eligible for readjustment allowances for unemployment if he is receiving subsistence allowances for education or training under the act, or is not available for suitable work, Miss Smith said. “This means,” she explained, “that in between school terms and during vacation periods, veterans should make sure that their federal government school subsistence allowances have been discontinued before claiming veteran unemployment benefits.

“Further, the veteran who is planning merely to rest and play for work on his own behalf, and willing to accept a suitable job during each period for which he claims jobless pay.”

The law provides that further to readjustment allowances shall be forfeited by a veteran who knowingly accepts an allowance to which he is not entitled. In addition, misrepresentation or fraud are punishable by fines and jail sentences.

Aero Department Tours Aviation Industries
Party students from the Aero department accompanied by J. W. Geipelton, Roy Metaelli Richard Hall, instructors, toured several Southern California, aeronautical plants May 16 and 17.

On the first day of the tour, the group visited the Aviation Maintenance Corporation plant at Metropolitan airport, Van N. Y.

The second day's events featured a tour of the Lockheed Service department, Pacific Airline Corporation at Lockheed air terminal, and a visit to the experimental division of Bendix Aviation Corporation.

Several graduating students making the trip were interviewed by the personnel departments of plants visited and some were given jobs.

Monday evening, Leo Rogers, Darrell Rambly, Bill Carter and John Walker, under the supervision of Roy Metaelli, made a special trip to inspect the runways at the Glendale Police Station.

Radio Class Lab Tours KPIK Tower
The second year technical class in radio transmitters did its laboratory work last Thursday morning at station KPIK, according to G. B. Peterson, electronic and radio instructor.

The commercial Raytheon transmitter used at the station was first studied in class. Out at the transmitter chief engineer Chuck Brepine, took over and gave a detailed stage by stage analysis of the circuits both at the transmitter and later at the studio on Garden street.

The data acquired on the field trip was made part of the lecture discussion at the next meeting of the class. This trip afforded an opportunity to study the special features of a specific commercial transmitter, Peterson stated.

Electronics Department Gets New Instructor
C. E. Knott, dean of engineering, announced this week that Ellis Roney of Palo Alto has been appointed as a new instructor in the electronic and radio engineering department.

According to Clarence Radius, department head, the staff and the students are looking forward to Roney's arrival on September 1. At present, Roney is completing his graduate work in communications at Stanford university and comes to Poly with eight years of industrial experience in radio.

Indirectly, his influence has already been felt in the department, since he was largely responsible for the complex illustrations in the 1000 page text entitled "Radio Engineering" by Dr. Terman used by third year engineering students, Radius said.

Roney was engaged to assist in the advanced work in the engineering curriculum.

J. Paul Sherry * Switched to Wildroot Cream-Oil
Because he Flunked The Finger Nail Test

All panda-monkeys just broke loose for this little guy with the hairy nose and two black eyes. Somebody switched his Wildroot Cream-Oil. You may not be a panda — but why not use what Wildroot Cream-Oil安卓? Just a little bit grooms your hairy nose and naturally without that plastered-down look. Before accepting dyes and removing hair, ugly dacronite. And Wildroot Cream-Oil helps you pass the Finger Nail Test! It's non-sticky...contains soothing camomile. Get a tube of Wildroot Cream-Oil at any drug or toiletry goods counter today. And always ask your butcher for a professional application. In case there's a panda in your house — keep some Wildroot Cream-Oil handy.

You can take the high road

Have you made up your mind on what you'll do when you graduate this June? If not, consider the opportunity available to you in the Aviation Cadets.

Few jobs anywhere can match this offer. When you win your wings and a Second Lieutenant's commission, you're paid as high as $336 per month to start. The training you get before and after you're commissioned is recognized as the world's finest — and it equips you for a well-paid lifetime career in military or commercial aviation.

You're eligible for appointment to the Cadets if you're single, between 20 and 26 years old, and have completed at least one-half the requirements for a degree from an accredited college or university (or pass an equivalent examination).

Talk the program over with men in your class who have been Aviation Cadets. And for full details, ask at your nearest U. S. Army and U. S. Air Force Recruiting Station. Why not drop in today and discuss it?
