INSTRUCTORS ALSO LEARN BY DOING . . . The hard way to build a house is to do it yourself.

The housing project located in San Dimas, California, Park Street, San Luis Obispo, shows that the talents of several Cal Poly instructors are many and varied. These diverse skills are used in a cost-effective basis, are building their own homes. They have not only turned carpenters and, as architects, on site for a few months. They have only turned carpenters and as architects, on site for a few months. This week the project was completed and the house, now complete, will be turned over to the instructors. It will have a built-in bookcase, glazed shower stall, and a built-in kitchen and dining area.

On the other side of the street, the architects are working on an early stage of construction. They have been instructed by Governor Warren, president of Cal Poly, in the process of framing his two-story residence. The instructors have a corner of the residence that will be used as a laboratory.

Ultra-modern Trend

The most interesting, and somewhat of a surprise, is the construction of the house for Dr. Walter G. Bright. The front of this house will be designed for the use of the instructors. It will be a one-story structure with a large living room and a separate garage. The house is under construction and will be completed in the next few months. The instructors are working on the plumbing, shingling the roof, and doing the electrical work.

Governor Warren's house

Governor Warren's residence is under construction. The house will have a built-in bookcase, glazed shower stall, and a built-in kitchen and dining area. New Column Starts Today in Mustang

I'm starting this week we are featuring the column of science writer, Bob Chatterton, who will let his staff go under the title of "Idale Chatter." Basically it will be in the form of a sports feature. We are running it in the front page this week by way of an illustration introduction. We will take from there. Look for it next week in the sports section.

Voorkamp Unit Visit by State Bureau Men

Mr. members of the student-body of agricultural education with of the state bureau of agriculture, visited Cal Poly's southern campus this week with a bureau staff member.

The purpose of the visit was to be acquainted with the students and the state bureau of agriculture.

Where to turn with this?

Great points of palm trees instead of palm trees, the students installed in the Orange Bowl stadium and expansion of the stadium. The projects are many and varied. These diverse skills are used in a cost-effective basis, are building their own homes. They have not only turned carpenters and as architects, on site for a few months. The instructors have a corner of the residence that will be used as a laboratory.

Expanding Faculty To Meet Needs Of Increasing Fall Enrollment

The appointment of five new instructors to the Science and Humanities division at Cal Poly was announced this week by President Julian A. McPhee.

Poultry Sales-Room

Planned

Plans are in progress to construct a 1,000 foot extension of the west side of the poultry plant this fall and winter.

Room.

Gotts, a candidate for a doctor's degree, graduated from Beloit college and received his master's degree from Lehigh University. He was a successful in engineering and was a master's degree from Alfred University. He is a native of Michigan.

Maurer, a graduate of Westfield State University, recently received his bachelor's degree from the University of California. He has been a assistant professor of agricultural education with the exception of installing the plumbing, shingling the roof, and doing the electrical work.

The project has been underway for the past few months. The instructors are working on the plumbing, shingling the roof, and doing the electrical work.

It will have a built-in bookcase, glazed shower stall, and a built-in kitchen and dining area.

In virtually every case, the instructors are working on the plumbing, shingling the roof, and doing the electrical work.

Governor Warren Visits Poly Campus

Governor Warren, president of Cal Poly, was in attendance at a meeting of the National Student Association at the University of California.

The meeting was held at Cal Poly and the work being done, and at least wish to return serving a school day.

The instructors, who will report on September 1, are part of 25 additional faculty members expected to be instructing at Poly this year. THE HOT DOPE ON HOT-RODS

CON

California is famous for having among its inhabitants, characters, events of which the Fargo has been well known for a century. The Fargo has been the center of the world's hot-rod activities for the past 20 years. The hot-rod is a vehicle capable of accelerating to a speed of not more than 75 miles per hour in low gear within 20 to 30 seconds. The definition of a hot-rod is usually considered to be a car that has been modified to exceed this speed. The hot-rod is a vehicle that is considered to be a vehicle capable of accelerating to a speed of not more than 75 miles per hour in low gear within 20 to 30 seconds. The definition of a hot-rod is usually considered to be a car that has been modified to exceed this speed.

War Declared On Underground Resident

By Carter Camp

Gus Gopher, otherwise known as "old chisel tooth," long time non-paying Pol student, has developed a community of his own that is comparable though slightly below the Poltech city. Under trees, shrubs, and lawns Pol's gopher gathering places have spent more than ten unsavory years in attempting to establish a law-breaking rodent. According to Ted Hues, O.H. department head, "It gets to where one is afraid to walk around at night for fear of falling over a mound of gopher dirt." An old adage says, "If a house steps into a gopher hole he will break his leg." Howe says, "Around Pol day use gopher holes for fun." No one would want to ride his horse around here for fear the steel would break off all four front ones at once.

Gopher Haven

Park avenue for gophers on Pol campus, mainly under the student parking lot, where they burrow into the soil, build their homes, and surf the streets. They burrow into the soil, build their homes, and surf the streets. They create a nuisance for the students who have to walk around the area, and cause problems for the campus security personnel.

Dependents Padre in Poly Plunge

An all-time record was set last week, when the campus administration decided to open the library to the public for the first time. The administration decided to open the library to the public for the first time. The administration decided to open the library to the public for the first time.

McPhee Announces Staff Changes For Library

New appointments to the California State Polytechnic college library staff were announced today by Julian A. McPhee, president of the college.

Appointed as assistant reference librarian is Miss Isabelle Stickler, a graduate of the University of California at Berkeley, and as assistant cataloger is Miss Mary Ellen Dunkelburger, a graduate of the Pennsylvania State college.

Miss Mary Ellen Dunkelburger, also a graduate of the library service school at Columbia, has been named assistant cataloger. Miss Dunkelburger graduated from the service school in June of this year. She has served as assistant in the cataloging department in the New York Public library in York, Pa. She is a graduate of Pennsylvania State college.

Marcia Gold, formerly the assistant reference librarian, has assumed duties as the assistant director in charge of the audio-visual education section of the college. This is the first time in the history of the college that any member of the library staff has been able to devote full time to the section. Albert H. Whitman, head librarian at State college, has named Miss Gold assistant in the physical education department.

For Library

More on "Gus"

(Continued From Page Two) and warded it against the roof of the converted tin house. Gus, aware that the trap now acts higher, blithely gives himself the squeeze play.

Strictly Homebody

An interesting note here is that a gopher seldom goes more than one-eighth of a mile from the place of his birth. When he does travel, which he does constantly, he moves about in a limited area just looking for food or another likely spot to settle down for a night.

As on the campus many species are used to exterminate gophers—such as the Marchesa trap, rat- and mouse-hole poison, and strychnine on carrots. The latter two are used only as a last resort when the burrows are too deep to dig. Poisoning is hazardous to pets and it does not deter the number of gopher destroyers.

Notwithstanding the vigilance of the "police force" and the various traps and poisons used to trap him, Gus and his family are on the increase. E. A. Steiner is here warned that he may have another traffic problem on his hands.

Expanding Faculty

(Continued From Page One) the past six years he has been assistant professor of biology at Southwest Missouri State college.

Two instructors have been added to the physical education department—Theodore Matthew and Ed ward H. Clark.

Matthew, a graduate of the University of California, will instruct in chemistry. He has done additional study at Stanford University and at the College of the Pacific. He served as vice-president of Haight Elementary school in Alameda, instructed at Richmond high school, instructed at San Francisco junior college, served as a colonel in the U. S. Army where he directed civilian pilot training, and was in the United Fruit line in San Francisco for a year.

Clark, physics instructor, received his B.S degree from the University of Rochester and his master's from UCLA. He served as undergraduate teaching assistant at the University of Rochester and as a graduate assistant at UCLA.

518 Count Shows Slump For Second Summer Session

Registration figures boomed at Cal Poly last week with 518 students registered for the second summer session which will run until September 2. C. Paul Winner, assistant dean in charge of admissions, guidance and placement, stated this figure exceeds what was expected during the second summer session. However, the enrollment is below the 711 that registered for the first six weeks.

Winner stated that only 400 were expected to register for this session.

In breaking down this figure, 17 are new students, 46 are former students who did not register for the first session, and the rest are holdovers from the first quarter.

(Continued From Page One) summer enrollment. A registration of 500 is seen for this fall, Winner announced, and if this enrollment, 900 will be freshmen. This figure will be the largest registration ever held at Cal Poly. Some departments are nearing capacity, the dean stated, and there are still students applying for admission. The enrollment will be held to 500, he added, because of limitations to facilities.

Classes for the fall quarter will begin September 15.

In THERE such a thing as a small apartment or house, furnished, near Poly, available for students and working wives? No children on pets; references; call 1708-M evenings.
