Hydraulics Lab Demonstration Prepared For Poly Royal

A demonstration of the equipment in the hydraulics lab this week followed months of work by Keith Mikesell and John B. Collette.

With most of the mechanical work completed, Mikesell and Collette are starting preparations for a demonstration at Poly Royal. This will be the first chance for the public to see the finished job in operation. In addition to the lab there will be models and cutaways of pumps and other equipment set up.

Rules Announced For Poly Royal

Flower Show

The rules and regulations for the Poly Royal Flower show have been released by the committee in charge of the show. The exhibits are to be held on April 8-11. Any man, woman,会员, members, or foreigner are eligible for the competition, or at least for the judging. The exhibitions will be judged on April 10 at 7 p.m. in class 2A and 1B. All entries must be brought to the show on the same day. Each entry will be judged by the same judge.

Endowment

A $10,000 endowment has been donated to the Poly Royal club by an anonymous donor. The endowment will be used to support the club's activities and to help fund future projects.

State Touring Shorthorn Sire Returns To Campus Home

By Robert Novick

California Polytechnic—the school's rodeo team, comprised of six men and seven horses, will take to the Cow Palace arena to corner the Intercollegiate rodeo championship or know the reason why.

A caravan of big-hatted, high-heeled athletes pulling trailers behind their automobiles and pick-up trucks left for the Bay area late yesterday afternoon. A second caravan of rosettes takes off when classes are finished today—the campus cowboys are well assured of adequate grandstand support when they bring the green and gold colors out of the chutes.

Hoping for the Temples collegiate rodeo at Phoenix some weeks past, the Polyrotes will be favored in the Cow Palace contest. However, wary of any over-confidence, the rodeo men have put in many hours of training at the practices arena down by the track.

Four of the six men who won for Cal Poly at Phoenix are set for tomorrow's big pay rides. They are team captain Bob Doser, Len Boughner, Tom Andere and Cotton Rossiter. The other two men are Hank Winters and Dick Hutchinson, who wrestles when he isn't astride the Brahmas.

It is reported that both men and mounts are in top shape and, after the dust settles at sundown tomorrow, perhaps the team will be the winner of the National Intercollegiate Rodeo Association championship.

Good Luck!

Poly Royal Brochures

Now Ready For Mail

Poly Royal Brochures were made available to students yesterday—they are now in the St. Castle for mailing.

These pamphlets, which are mailed free of charge by the school, contain a program for the Poly Royal activities. They are also available in the Student Union and junior college, and industrial, agricultural, and student organizations are represented in pictures and text.

WINDY DAY...

Lovy Wells, right, points out the more minute items of interest in an airplane crash which involved the Mustang Flyers when moored at the Christopher airport. His companion, Jim Menger, left, is not on the crash site, as he is not present in the aircraft.

The Mustang Flyers have purchased the Warplane Flying Club to re-establish the J-2 Piper Cub trainer in the school's aviation program. After some complications at the meeting April 8, the club decided to purchase the plane at a cost of $1,000, using money from their insurance adjustment claims, which will then leave them $100 with which to buy another ship. It was decided to use the $900 to buy another Piper Cub trainer rather than re-establish insurance adjustment claims, which paid the Piper Cub damaged.

Nurserymen Report
Slackened Sales

Spring sales of nursery stock are 60 per cent below last years totals, stated Howard C. Brown, instructor of ornamental horticulture, in a recent interview. Brown further stated that this is especially true of field grown stock and pot plants due to unusual cold weather.

"The shrub sales were above those of last year, being used to replace frozen shrubs in the landscape. The flowers for the rest of the year are expected to be good," Brown said.

Campus Staff Donates
$350 For Red Cross

A check for $350 has been sent to the chairman of the San Luis Obispo Red Cross drive by the employees Association at California State Polytechnic college.

The money was contributed by employees of the college, including faculty and staff members, during an all-college drive conducted on the Cal Poly campus last fall.

Contributions were evaluated at that time for drives to be made in future humanitarian organizations during the coming year, among them the annual Red Cross drive.

Sixty-five Plants
For Forage Crops

Over 60 different varieties of grass stock have reached the Cal Poly campus recently. These plants were sent from the University of California at Davis. All of the plants are from free 

mowed and shi. the grasses which hinder the growth of other crops. Students in the forage crops sections of weed of agricultural interest.

Sixty-five Plants
For Forage Crops

For Crops Courses

Sixty-five plants were received this quarter for this forage crops course is including three trips to various sections of the county in their lab classes this quarter.

Finger-Nail Test and switched to Wildroot Cream-Oil.

Future plans for the campus are to continue the growth of grape vines.

ARMY RESERVE CORPS SEeks

College Men For Officers

With the opening of Army Day last Wednesday, this year college men will be needed by the Army. In line with its current expansion program, it is offering reserve second lieutenant commissions for two years active duty.

Members of any of the Reserve components not in active duty and who meet the following qualifications are eligible under this program.

Placement Service
Lists Age Openings

Three permanent openings on the California coast recently have been established. Civilian positions are available in the Signal Corps, the Enlisted Men's Reserve, and the Army Nurse Corps.

Jug Jones urged that all students interested in enlisting for active duty sign up as soon as possible. Applications blanks are available at the placement office, Adm. 7th.
Where It’s Deep

By Bruce

OK, OK, so what’s with the E. Mustag Mustangs, eh? What sort of mystery-front-office men are you running here? Too much mental stress from the mental capacity of this mass of personnel? It’s not that my Blake, the one-time editor of the Mustang, has deserted, he’s just graduated. I mean, what sort of = that’s exactly what I mean to say! What do you mean, this is an

And Furthermore—where is the "Windsor," the place that old-timers claim was the hostelry of the horsemen? Where are the local clergymen? Where are the old manuscripts? Where are the old horsemen? Where are the old horsemen? Where are the old horsemen?

WSSF Makes Faux Pas

Solid evidence that the average American will react violently to any attempt to coerce him was vividly illustrated last Monday in El Corral.

Cigarette smokers received a rude shock upon discovering that the price of their favorite brand of smoke had been upticked to twenty-five cents. Inquiries brought forth the explanation that the extra cent rate was required because of the WSSF being “contributed to” the World Student Service Fund. The WSSF, which had the unwise sanction of the college administration, was finally dropped after El Corral personnel were bombarded with verbal abuse from indignant students.

The WSSF has suffered irreparable damage. This is substantiated by numerous times to the editor that have been received condemning the method that was employed to raise funds.

The prices in cigarette was in itself negligible. The majority of students suffered no hardships. However, if the WSSF had been more sympathetic with the aims and ideals of the WSSF, Students throughout the world are in dire need of assistance toward gaining an education. But we do feel that we have a chance to uphold good moral standards and methods in their fund-raising campaign. The mistakes by the organization should serve as a guide for future campus philathropic drives.

Dormitory Crackdown

Last week President M. P. Young toured the campus dormitories and found conditions sad, to say the least. He then called in all of the dorm superintendents and advised them to look after current conduct.

A list of rules and regulations has been posted in all dormitories since this meeting and dorm residents were asked to comply—or else.

Living according to these rules will put little or no strain upon the student. The rules were compiled to help students to become better citizens of the world, in other words, good citizens.

A list of rules and regulations has been posted in all dormitories. The WSSF makes no mistake of violating the democratic principles upon which it based its campaign platform. It made the mistake of trying to force students to do otherwise. It was not unnatural for students to become upset, and those who are not acquainted with the policies of the WSSF, these are the same policies that the blank check list tenets and condemn the general principles of this organization.

The rules that we favor include: keeping dorms quiet at night, no cooking in rooms, no liquor in dorms—plenty of gin-mills in town. Regulations that seem out of order include: making your rooms—plenty of gin-mills in town. Regulations that seem out of order include: making your rooms quiet at night, no cooking in rooms, no liquor in dorms—plenty of gin-mills in town.

Behind the Chutes

By Edie Allen

Intercollegiate rodeos will hold the entertainment spotlight this weekend. Spectators are expected to join the cowpokes, to watch collegiate cowboys make their rounds in the arena.

The raise in price of cigarettes was in itself negligible. The majority of students suffered no hardships. However, the WSSF failed to employ good judgment to crack down on any students who ignore rules of civilised campus philanthropic drives.

Overheard on the Arthur Godfrey program: "Two green onions on a round reward. York street car and before they got off, they were thrown off the rear end of a Cal Poly float in the Rose Parade." A grant of $5,000 has been received from the John J. Batten Fund for the promotion of activities which may be used to control certain diseases in the domestic animals. The fund is administered by the Department of Animal Husbandry. The money will be used to create new scholarships in the field of animal husbandry. Out of Town—

Visit to Los Angeles

FILE THIRTEEN...

By Dave Goodman

Visit—This column is written from all kinds of places and on all sorts of topics. This week's column was written at the office of the WRFB in Los Angeles. I was looking over the set-up to see how the outfit works. The office is on the top floor of the YMCA. Funky place—now more gái than it was when I was last there. The WRFB has been going on all over the southeast. You wouldn't realize how many college towns are around the state until you see all of them in the WRFB map.

It is a mercy that we have to endure our ears with this drivel on WRFB, but if you have read this far, you have endured it. The WRFB is a station that is trying to fill a niche. The WRFB is a station that is trying to fill a niche. The WRFB is a station that is trying to fill a niche. The WRFB is a station that is trying to fill a niche.

This week it was composed in the regional office in L.A. I was looking over the set-up to see how the outfit works. The WRFB is a station that is trying to fill a niche. The WRFB is a station that is trying to fill a niche. The WRFB is a station that is trying to fill a niche. The WRFB is a station that is trying to fill a niche. The WRFB is a station that is trying to fill a niche.
By RUTH CARLEY

The Cleft Rock

Cal Poly was favored with another beautiful weekend made for outdoor living. One group of Poly students, in fact, had traveled to Mt. Abi for snow sports last Saturday. Sunday's sunny weather was a surprising contrast to their day in the snow. Ah, California—even the rugged New Yorkers had to admit that the weather was wonderful!

The tropical island evening presented by the Poetry club at their dance was delightful. Brita Bevery carefully wrapped up a lovely miral for the occasion.

The home concert, the other weekend highlight, proved to be a wonderful evening's entertainment. The Glee club members certainly are ambassadors of cheer for the whole for Cal Poly's entire campus.

One San Luis Obispo was so moved by her performance that she decided to recruit the next oiler to order it. Chas. It can't be anything that has to do with what has been responsible for such a great program. The "Davey boys" might work up a side line for next year's "t'is the season to be jolly" program.

News from the outside world reports that the Norman Pioneers are now much more traveled. Norma is teaching agriculture. Chuck and Minnie Pierce left Poly last week. He is to fill in the teaching capacity as assistant at Royal High. We shall all our Poly friends at Poly Royal.

Wires And The World

By RUTH CARLEY

During the war, women were forced to grow up. After years of maneuvering, sacrificing, and changing, the American woman finally discovered the tricks of survival. For many, this meant an adjustment. For others it was an expansion.

For the women who were already trained in the art of survival, the war brought new challenges and new responsibilities. Many had left work or school for home economics, cooking, or other domestic tasks. Now, as the war dragged on, they were called upon to take on new roles.

The women who lived through the war were the women who lived through the men. The women who lived through the war were the women who lived through the children. The women who lived through the war were the women who lived through the food. The women who lived through the war were the women who lived through the air. The women who lived through the war were the women who lived through the water. The women who lived through the war were the women who lived through the fire. The women who lived through the war were the women who lived through the cold.

For many, the war brought an expansion of their roles. For others, it brought a contraction. For all, it brought a change. But the women who lived through the war were the women who lived through the world.
Architects' Projects Enter Catholic Design Contest

By Don Johnson

Extending the purpose of the work, architecture students in William H. Riske's advanced design course have recently started a project that hopes to accomplish more than a required course of study. The student's projects are to follow the requirements for the design of a single archway with a large window above it in the church of the National Catholic Convention and National Catholic Coalition. The design is to be submitted to an architect's competition at the annual convention of the railroad industry, where the design is to be submitted for a final decision. The competition is to be held in the spring of this year, and the students are to be responsible for the design of the archway, which will be constructed in the church of the National Catholic Convention and National Catholic Coalition.

When the design is selected, the students will be responsible for the construction of the archway, which will be located on a 100' x 180' lot by the railroad tracks, and will be required to take a physical examination to regain their original insurance.

The project is to be located at the corner of a prominent street intersection. The students are under the supervision of John Priestly, architectural engineering head.

Golfers Improve
But Drop Close Match To Gators

Cal Poly's golfers surprised everyone, including coach Dan Wold, when they held a very highly regarded university team to a close match. The gators had been favored to win by 40 strokes or more.

The Cal Poly golfers have played well in the past few weeks and their team has been improving steadily. The team has won two matches in a row and is looking forward to a strong performance in the upcoming tournament.

Next Thursday the Mustang golfers will travel to Santa Barbara to take on the UCSB Gauchos. The Gauchos are an unknown quantity in the region and the Mustangs will be looking to continue their winning streak.

Polo Altans Nip Mustangs 6-5 In Close Ten Innings

In a close fought battle, the Mustangs were able to come back from a 5-4 deficit in the ninth inning to win the game. The Mustangs scored two runs in the bottom of the ninth inning to secure the victory.

The game was played in front of a packed crowd and both teams played well. The Mustangs were able to make a strong comeback in the late innings to pull out the win.

Mustang Trackmen Break Old Records

The Mustang Trackmen have broken several old records this season. They have set new records in the long jump, high jump, and shot put.

The Mustang Trackmen have been training hard this season and their efforts have paid off. They are looking forward to the upcoming conference meet and are hoping to break even more records.

Swimmers Swamp Davis Team 44-31

For First Victory

The Mustang swimmers had their first victory this year with a 44-31 win over the Davis team. The Mustang swimmers swam well in all events and were able to pull away from the Davis team in the final set.

The Mustang swimmers have been working hard this season and are looking forward to the upcoming conference meet. They are hoping to continue their winning streak and break even more records.
DEAR EDITOR,

I believe everyone has noticed the block selection box that the students have cut on display.

I have no idea whose idea this is, but it is obvious to see if anything of interest was on display.

Sincerely,

[Signature]

LETTERS TO THE EDITOR

Pansy Pickers

Dear Editor,

Have you been near Jasper dorm lately? If you have, you know the theme of this is something about the "tree, tree, tree," flowers and generally, almost everything. I can't stand it. Just why the grass will NOT grow if the students walk on it, generally. It is something I have in my present state. Why, only the BARRED wire! Why, the "barred" wire!

Well, I may be "barred," but I don't think that the grass will just stop. I think the grass will start growing again. I hope it will. I don't like to see the students having to work so hard for something that is going to be taken away from them. It is a waste of time and money. Please don't let this happen again.

Sincerely,

[Signature]

Bowling Loop

This year the high school bowling team has done quite well. Now that the team has finished the season, the members are looking forward to next year's season. The team has been working hard to improve their skills and win matches. They hope to continue their success in the upcoming season.

Fishing Tackle and Guns

We would like to introduce a new product that we believe our customers will appreciate. Our fishing tackle section now includes a variety of high-quality rods, reels, and lures. We also carry a wide selection of hunting equipment, including guns, binoculars, and outdoor gear. We are confident that our customers will find our products to be reliable and of great value.

Full House At Home Concert

The California State Polytechnic college Men's Glee club and Collegian orchestra directed by Ralph Davidson, surprised themselves in performance when they presented their home concert at the Sono high school auditorium Thursday and Friday nights. This was the eighth annual concert since their organization in 1936 and enjoyed by a capacity audience in the auditorium.

The performance showed a polish melodious and charming music, worthy of a professional group. The program numbers were arranged with a cosmopolitan style to bring in a variety of compositions, and exhibited wide versatility, showing members of both the glee club and orchestra.

It ranged from humorous skits in romance and reverent spirituals.

From the effective opening on a dimmed stage with their banner highlighted as they sang the Cal Poly Flag song, to the closing "All Hail," to their close numbers, there was a distinct trend in a melodious unity of tone.

Pembroke, Graduate Farrier, Finds Trade Profitable

By Paul Trinebach

A part-time horseshoeing business started last summer is growing into a full-time business major, valuable experience in that field, besides a little extra spending money. Horseshoeing is a new illustration of the Cal Poly slogan "learn by doing" and "earn while learning".

Pembroke, who is also doing experimentation in sheep and cattle, states that his "business" started last summer after he had taken Poly's horseshoeing courses. "At the present time I shoe two or three horses a week, from this area south to Arroyo Grande," he said. It takes about one and a half hours to fit and bubble with the latest in footware. The enterprising farrier, which means horseshoe, outs most of the necessary tools, but uses the large 30x60 at the horseshoeing shop, across from the dairy mill. While not a college project, the result, self-teaching, is the name.

After graduation with a Bacher of Sciences degree this June and a year old Pembroke plans to build up his business in the Napa valley. "Maybe I can get into Davis and study veterinary medicine, but for the present horseshoeing will be my trade, he stated. Being an independent but a way a way, and working students were two essentials, he gave for his success.

A good deal of Pembroke's schooling was received from Ralph Hoover, horseshoeing instructor here, graduate of Michigan State's course and an experienced farrier. Hoover is assisted in various related subjects by faculty members James Heron, Dr. Dean Lindsey, and Ernest Flinn.

Graduation Candidates Must Evaluate Credits

Students preparing to graduate this June 6, 1949, must report to the registrar's office, Adolph, make a final evaluation of past completed courses so that graduation arrangements may be made and a certificate of degree ordered. C. Paul Winner, dean of admissions.

Diplomas will only be ordered for those students who have made application for graduation prior to April 28. All industrial technology students should report to this office if they wish to remain in school another year. In this case, a three year certificate will be applied for. Winner also cautioned that degree candidates submit their theses at the earliest possible date.

Hydraulics Laboratory

from supply houses. Actually the cost has been only a fraction of this due to the ingenuity of the new student in building it.

Cooper stated that the cooperation received from all departments has contributed greatly to the success of their work. Part of the work was done by other MIE members, those who helped work on the pump test stand, and Donald B. Hunter who riveted the office plates.

Two pumps were given to the lab by the James-Ponti company, Virgil Jacobwitz, who is now in charge of scales in the northern territory is a former Cal Poly student.

CHESTERFIELD

"There is nothing like a MILL. cool smoke - that's why I smoke Chesterfields."

- Fred Mac Murray

"FAMILY TO SERVE YOU"

"THE TOP MEN OF AMERICA'S SPORTS
smoke CHESTERFIELDS"

SID GORDON says...

"Sure they make a hit with me —
they're better-tasting and MILD.
MUCH MILD...it's MILD, cigarette."

More college students smoke CHESTERFIELDs than any other cigarette
