AH Student Begins Instruction At Boys Town World-famed Boys' Town in Nebraska has added another Cal Poly student to its staff. Robert Murphy, senior animal husbandry student, has just begun directing its wildlife husbandry activities. A native of Boys Town, Robert graduated from Poly last year. He next year will attend the University of Nebraska in Lincoln, majoring in animal husbandry. Murphy, who is highly qualified for the position, is expected to join the staff this summer.

Convenes On Campus Ag Teachers Workshop

At an all day conference, highlighted by a barbecue at Poly Grove, Cal Poly's printing department last Saturday hosted the second regional conference of the National Graphic Arts Education Association. The meeting was attended by over 50 of the top educators and men from industry of the 13 western states. At the morning session, held in the engineering auditorium, A. M. (Bert) Fallow, director of printing at Cal Poly, presided over the morning and introduced President McPhee who welcomed the conference delegates to the campus. McPhee urged all present to "do feel free to use all of the college's facilities at any time."

Charles E. Knott, dean of the Industrial division of the college, made the opening remarks. One of the most interesting talks of the entire conference was made by Charlie Palmer, owner of the Shakespeare Press and one of the oldest and most famous printers in the United States. Palmer's presentation, "The Whims and Wonders of Printing," in historical and antique type and printing equipment in the United States, is highly recommended for the printing student.

Preparing Men for the Graphic and Industrial Future Men, the afternoon session opened with a presentation by Ernie G. Kramer, regional spokesman for the Bureau of Agriculture Education. Kramer's talk on "What Schools Should Do In Agricultural Education" was well received by the audience.

Workshop classes will be held at the ag mechanics shops, poultry and dairy units, and at the various campus classroom rooms. Such topics as farm power, irrigation, poultry processing, cattle judging, stock judging, teaching aids, current research, and the like, were taught by Cal Poly faculty members.

No social events have been scheduled for the workshop course which ends on Saturday, June 21. But the reverse will be true of the convention which will follow the workshop on June 28. "An eight team softball tournament will highlight the Ag Teachers Convention," George Couper, Bureau of Agriculture Education manager, said today. He added that the visiting wives will also have an opportunity to meet and operate with the business discussions of the meeting.

Visiting teachers and their wives and families are quartered on the campus and at Camp San Luis Obispo, according to Cooper.

Beberebns Awarded Van Horn Trophy At Block "P" Finale By Jim Tieren Vernon "Finky" Bebeeres, campus athlete who has won the Van Horn perpetual trophy at the last Block "P" meeting for the spring quarter, May 28, Finkly was named outstanding Cal Poly athlete of the year by his presentation was made by President McPhee, former on both the gridiron and the field of Track, at the annual banquet held by the Interfraternity Council of Poly. At the banquet, President McPhee and Fellows were highly praised by those attending for their program of printing instruction and the modern printing plant here on the campus. While in high school, Finkly led his team to victory.

WORKSHOP ENROLLMENTS BOOM Summer Quarter Enrollment Records Score Reveling to a total of 804 students, the largest summer quarter enrollment ever recorded at Cal Poly, begins this week as over a third of last year's student body returned for the warmer months. Of this total, 728 are students in regular "A" and "B" sessions, according to the registrar, Dr. Ralph C. Chappell.

Although not in college basketball competition, Beberne was a main spring on one of the downtown league teams. During the summer he is holding down the third base spot on the San Luis Obispo team. The Van Horn trophy, now in the possession of Finky because of his fine showing last year, has been awarded annually since 1944-45. It is in perpetual honor of students who have won on the campus during three seasons: of baseball.
Summer Topic

Every issue of the paper has to have an editorial. We can’t go around making exceptions to this rule just because it’s summer, so El Mustang will give editorial views on a few topics pertinent to the times.

We all know there are some 800 students here at Poly for the summer. Most of them are here because of finances. We know it costs less to attend Cal Poly than any other college on the coast. Housing is less expensive and the costs of food, clothing and keeping up with the Joneses’ is considerably less than in most other towns. Probably the majority of summer students are married and have families living in or near San Luis. For these men to move to another locality for the couple of months would be prohibitive to their pocketbooks, so they too stay at college.

Anyone who started summer session with the idea in mind that he was going to pick up a few easy units in a short time has already changed his mind about how easy it is. Concentrated study is about the roughest thing on the mind and nervous system there is. The teachers have an equally rough time during these months. It is their job to put across a full quarter’s work in a few short weeks.

Security Rules . . . This is just a reminder that campus rules are in effect even during the summer. If you aren’t sure about what you can or cannot do, take a fast look into your old frosh manual. Car parking rules are the same as they have been. It might also be added that in spite of the warm nights and beautiful scenery around the Poly campus, this is not the place to park with your girl friend while discussing life, liberty and your own private philosophy on sex. The weather is also prime for plinking with your rifle, but all students should remember that the campus is a state game preserve and no shooting on the school ground is allowed.

We haven’t heard or any club or organization planning any activities for the summer. If there is a club functioning and they do decide to put on a dance or anything else, let’s let El Mustang know about it. We’d all like to do something this summer besides crack books. San Luis isn’t the hottest town to be in during these months and a few activities on the campus would be a big help.

SURVEYING COURSE CONCENTRATED

Three quarters of engineering surveying are being taught during this first summer session. Tom Hardgrove, instructor, announces that the students will have to work hard and long in order to accomplish all the required work in the six-week period.

One hour of lecture and a three hour laboratory each day, Tuesday through Friday, and also, in order to eliminate Saturday classes, a two-hour lecture and a six-hour lab will be held on Monday. During this time, the students will learn the fundamentals of surveying including the use of the various instruments.

In order to fit three quarters of work into this one six-unit course, the six weeks are broken down into three two-week sections. During the first two weeks each student learns how to use the engineers level and the steel tape for establishing levels and making contour maps. In the next two weeks he learns how to use the engineer transit for mapping, and finishes the course in the allotted time by completing a mapping project. Thirty-two students are now enrolled in this course.

Coffee Shop Floor Welcomes Trampling; Floor Test Begins

Want to help conduct an experiment? Then walk into the El Corral coffee shop section. That's all. By doing so, you will help the maintenance department determine the lasting qualities of a new surface finish.

This product, Troy rainbow color finish, is a combination of clear seal, synthetic resins, and various pigments. Its purpose is, basically, to seal and protect the concrete floor. In addition, it prevents chaffing and scaling, also presents a hard, smooth surface that is easy to clean. In addition, it allows for the alleged long wearing qualities under rigorous use, the finish is of such a type that waxing is unnecessary to prolong its usefulness.

Under the direction of the Globex Supply Co. engineers, the floor was chemically cleaned, washed and dried thoroughly. The liquid finish was then applied and rubbed into the concrete surface until penetration was of sufficient depth. A second coat 24 hours later permanently bonded the colored finish into the concrete.

If this finish shows no signs of wear during the forthcoming year, other corridors will be conditioned with this new product next summer.

The Department of Finance, U. S. Army, is also conducting tests on this finish in several mess halls and the officer’s club at Camp San Luis Obispo.

Dispensary Warns Against Tetanus, Poison Oak, Burns

Nurse Imogene Gow, in an interview today, has recommended to all students of the summer session the following three points. These points will do a great deal to help insure the continued good health of the campus population. Observance of them will also prevent the loss of time, which is so important during these accelerated quarters.

1. Take your sunbathing in small doses. There are few things that can be more painful and annoying than sunburn.

2. Be careful of poison oak. There is plenty of it in the vicinity of the college. Those who are susceptible to it should learn to identify it and in that way be better able to avoid a period of discomfort.

3. All agriculture students, particularly those working in and around cattle and barns, are urged to come to the dispensary for tetanus shots. These shots are most important at this time of the year, and their importance cannot be stressed too strongly. The shots are free to all agriculture students and the dispensary will extend to you through the month of June.

Summer Sports To Begin Wednesday

This summer’s athletic program on campus will start on Wednesday, June 21, lasting through the rest of the first six week period. Coach Bob Hively, present acting summer director of athletics, said today.

Intramural teams are slated to be organized for softball, tennis, and horse-shoe pitching. The teams will be run according to the rules that have been prevailing during other quarters. Teams will be nominated by P.E. majors.

Those wishing to enter into competition should have their lists completed by Tuesday evening, June 21, be added.

Latrines, Mess Halls Attract Student Maintenance Crews

Responding to a request from the San Luis National Guard unit, the Cal Poly maintenance department is assisting the Guardmen in their preparation for the California Cadet Corps and State Guard encampments at Camp San Luis Obispo this summer.

Under the direction of Alvin Almonette, Poly painting instructor, two crews of students and five crews of contract painters are spraying the interiors of 48 mess halls and 18 latrines.

Averaging four mess halls and two latrines a day, the Poly painters will complete their quota of work before the July 1 deadline.

Maintenance students Don Fletcher and Willard Wyatt became familiar with spray painting through their major work last winter quarter. Electrical engineering students Deane Aboudara and Dale Daniels and AC major Ken Westmoreland are receiving a more all-around education than is offered in their respective fields of study, according to Almonette.

Coaches, Athletes Devote Summer To Racehorses, Baseball, School

Although there is no UCLA competition this summer in which the Mustangs can distinguish themselves, it looks as if we are still well represented in the sporting world.

Don't Robertson, Larry Garman, and Bobby McCutcheon are playing for the San Luis Blues. If this is summer's end, they are all holding down their respective positions, but corner, center, and second base, and so doing have made a name for themselves and Poly.

Big John Williams seems to be doing pretty well for himself, also. He e fief the hurling chores the other day for a Tulare team and the reports pre that he went the whole distance, Just allowing a handful of hits.

Kay Brocker is doing a spectacular job on the receiving end of the battery at Marysville. He's also collecting his usual large amount of singles against good pitching.

Coach Chuck Pavelko is down south at the looking over next year's races. Perhaps he's some sprinters for Mustangs. The only thing wrong is that these are Thoroughbred horses and the going up here might not be rich enough for them. Besides—we'd let a horse play in a football game anyway.

Maybe he is just looking over the egges to supplement his salary. The truth of the matter is he's at Poly just to keep his training schedule a little ahead of the rest of the world. Seems he wants to keep tabs on one of his most promising running artists for next season, Bob Hardy. Chuck certainly doesn't want anybody else swiping his quarterback while his back is turned. He got him a job at the farm one, Bob is doing his quarterback assignments on the parking lot instead of on the playing field.2

One of the coaches who has a great deal of sense is up in A-
