**Cal Poly Students to Exhibit Projects Dealing With Short-Term Bike Plan, Transportation Problems**

SAN LUIS OBISPO – Cal Poly civil engineering students will have a “Short-term Bike Plan” exhibit on display at 6:30 p.m. Wednesday, May 31, in the Berg Gallery in the Architecture and Environmental Design Building on campus.

Students in the sustainable mobility class will present their innovative ideas for dealing with transportation problems at Cal Poly and enhancing bicycle access on and around the campus. The students were “given” a $500,000 budget to come up with innovative solutions to the campus transportation problems.

The teams will show their short-term bike plans, including new pedestrian walkways, bike paths and lanes, and a bike center. In addition, teams will exhibit their transit demand management ideas to help encourage alternative travel modes on and around campus.

The public is invited to comment, critique and grade the students’ projects. For more information about the event, contact Professor Eugene Jud at 756-1729 or Jennifer Donofrio at (571) 921-2700 or jenndonofrio@gmail.com.
