Welcome All You Mustangs

Every year Cal Poly has a get-acquainted party for its new students. All told, this year you, the new student, with your equipment will be familiar enough to say, "I know you." "I know you," "I know you," and "I know you." These "I know yous" are given a re-think every year to determine your likes, dislikes, and scale of social adjustment. During the off hours of these tedious operations various events and functions have been held for the pleasure of the incoming class. These events have been held in various locations throughout the campus. Through these, new students have been introduced to practices which will endure throughout your college career.

President Johnston, in mechanical engineering, and Bill Dean, and science faculty, have been appointed chairman of the freshman orientation committee. These men are in charge of the organization and preparation of every department. To bring the new students up-to-date and to familiarize them with the various activities which have been going on during the past summer, President Johnston has made a brief summation of some of the major changes and activities which have been going on or are in progress, a brief summary of which is below.

The mechanical engineering lab and the new facilities and power distribution building, which bring new electrical power to all facilities under one roof, a new C.P.R. test equipment has been installed in the building, plus a new dynamometer.

Building in Progress

The campus has received several visitors this summer by blasting operations for the foundations for the new $50,000 building. Forty of these are now being poured and the building is expected to be ready for the structural steel girders. The engineering department has been moved to the hill behind the Poly View building, after a site clearance was made.

President Julian A. McPhee announced that thirty-four new students have been added to the staff of faculty members at Cal Poly, President Julian A. McPhee announced that the college faculty are as follows:

- Liberal arts division shows the most growth with 18 followed by mechanical engineering with 12 and its respective programs

- Those joining the Cal Poly faculty are as follows:
  - Liberal Arts—Economics and liberal studies

LA Fair Sets 'Cal Poly Day'

"Cal Poly Day," at the L.A. County Fair Sept. 21, and 22, 23, 24, 25, and 26, will provide an opportunity for students who wish to attend the county fair to do so free of charge. The fair will be held at the Los Angeles County Fairgrounds and will feature exhibits of the Los Angeles County Fair, "Cal Poly Day" will be held on Saturday, Sept. 21, and Sunday, Sept. 22, and will provide an opportunity for students who wish to attend the county fair to do so free of charge. The fair will be held at the Los Angeles County Fairgrounds and will feature exhibits of the Los Angeles County Fair, "Cal Poly Day" will be held on Saturday, Sept. 21, and Sunday, Sept. 22, and will provide an opportunity for students who wish to attend the county fair to do so free of charge. The fair will be held at the Los Angeles County Fairgrounds and will feature exhibits of the Los Angeles County Fair, "Cal Poly Day" will be held on Saturday, Sept. 21, and Sunday, Sept. 22, and will provide an opportunity for students who wish to attend the county fair to do so free of charge. The fair will be held at the Los Angeles County Fairgrounds and will feature exhibits of the Los Angeles County Fair, "Cal Poly Day" will be held on Saturday, Sept. 21, and Sunday, Sept. 22, and will provide an opportunity for students who wish to attend the county fair to do so free of charge. The fair will be held at the Los Angeles County Fairgrounds and will feature exhibits of the Los Angeles County Fair, "Cal Poly Day" will be held on Saturday, Sept. 21, and Sunday, Sept. 22, and will provide an opportunity for students who wish to attend the county fair to do so free of charge. PARKING FACILITIES ARE OUTLINED

Chief Security Officer Robert C. Krug explains that parking facilities for Cal Poly students will be 10 to 15 per cent greater than last year. Campus parking facilities last year accommodated over 7,000 cars.

"Both sides of the recently completed paved parking lot located on the southeast side of the campus, will be used for parking," says Krug. "All automobiles brought on the campus must be registered with the security department. When you register your car, you are given a sticker which will allow you to park on certain areas on the campus. Without this sticker you are not authorized to park on the campus.

Krug explains that the student must maintain their car on campus and must notify the security department of change of address, change of license number, or sale of the car.

All parking regulations are strictly enforced. It is necessary to provide parking space for every- one, to maintain traffic control and for the safety of all persons on the campus, he says.

The fee for the first citation is $5, payable to the student body government of Cal Poly. In line with Cal Poly’s learning philosophy, this early training program which was designed to provide specific skills and new content life located.

These shop’s handle the sale of parts and services to Cal Poly students and employees, and are operated by students of the department under the California Polytechnic foundation, a nonprofit corporation. The shop’s handle all forms of sales and services rendered by the various departments.

Uranium Present In Local Area? Could Be!

With the rapid growth of the tourist industry in the United States, it is inevitable that uranium deposits will be found. Erwin Woelfle, Electronic Engineering freshman, explains that a quick method to determine if an area is of uranium-bearing potential is the Geiger Counter.

"Rock Hound" Krug says that a Geiger counter is not as complicated as it first appears. The Geiger counter is a device that detects radiation and indicates it in the form of an electrical impulse.

Erwin says that the Geiger counter is not as complicated as it appears. The Geiger counter is a device that detects radiation and indicates it in the form of an electrical impulse.

"Uranium is a valuable element", says Krug. "If you have a Geiger counter and you can detect it, you can make money from it."

"That’s what Geiger counters are for. They are used to detect radiation and indicate it in the form of an electrical impulse."

Krug explains that the Geiger counter is not as complicated as it appears. The Geiger counter is a device that detects radiation and indicates it in the form of an electrical impulse.

Grid Season Underway; 49 Mustangs Turn Out

Forty-nine prospective football players will respond to head football coach Leroy Hughes' call, Aug. 21, when uniforms will be issued. Practice sessions will continue until school starts. The team will scrim­mage Saturday beginning at 9:30 to 11 a.m., and 3:30 to 5 p.m. Two-hour practice sessions will continue until school starts. The team will scrim­mage first, under the watchful eyes of some 80 Pacific Coast Conf­ERENCE officials, who will be meeting on campus.

With 20 returning lettermen and a host of high school junior college hopefuls, the 1954 football season looks bright.

Coach Hughes will have a tough job trying to replace men like halfback Alex Bravo, fullback Bob Lawson and Little All-American center Rite Shirreff. Bravo and Shirreff were drafted by the Los Angeles Rams and Bravo was picked by the world champ­ions, Detroit Lions.

Assistant coach Sheldon Harden will put the boys through condi­tioning drills beginning Sept. 1. From which two work his starters for the games.

Assistant coach Norm O'Con­nor will put the linemen through drills and will help five centers, eight guards, and 10 tackles to get ready for the season opener.

All Veterans.

The prospective first eleven lists a complete squad of lettermen and in some cases are backed up by three-year veterans.

Clive Remond may get the starting call at center. Clive is a San Luis Obispo boy and was prep All-American in 1953. He lettered at Cal Poly in 1954 but injured his ankle and did not return last year.

Position-by-position run down follows.

**AL MILLIARITY**

Four-Game Fresh Football Slate Anounced By Hughes

A four game Cal Poly freshman football schedule has been an­nounced by Leroy Hughes, athletic director.

Hughes states one item being sought is round out the Freshmen campaign.

Fresh Coach Tom Los estimated dates in all former high school grids are expected to report Sept. 1 for fall grid drills. The Freshmen will work with the varsity until the night of games.

Sept. 14 Santa Maria Junior college at Santa Maria, 8 p.m.

Oct. 2 College of Sequoias at Visalia, 8 p.m.

Nov. 6 Martinez college at Cal­ifornia, 8 p.m.

Nov. 12 Calpoin Junior college at Visalia, 8 p.m.

Calendar—Fall Quarter

(All Dates Inclusive)

Monday, Sept. 10—Beginning of Academic Year (Faculty Only)

Wednesday, Sept. 12—Opening of Student Stores

Friday, Sept. 14—Registration and scheduling of new students

Saturday, Sept. 15—New student orientation and settlement of old students

Tuesday, Sept. 21—Classes begin for all students

Tuesday, Sept. 28—Last day to drop or add for Fall Quarter

Last day to return registration books

Last day to add courses

Tuesday, Oct. 12—Last day classes may be dropped without penalty

Saturday, Oct. 15—Homecoming

Oct. 23—Mid-Term Examinations

Thursday, Nov. 1—Admission Day—Academic Holiday

Saturday, Nov. 6—Pre-scheduling for Winter Quarter

Monday-Wednesday, Oct. 6—Final Examinations

Oct. 28—Last day to add courses

YEAR-END

Dec. 6—Last day to drop or add courses for periods of two hours each.

Dec. 18—Pre-scheduling for Spring Quarter

Monday—Friday, Dec. 6-10—Final Examinations

Dec. 18-Jan. 5—Christmas—Academic Holiday

Campus Postoffice Plays Vital Role

Freshmen at Cal Poly will receive extra dollars from dad or a Aid with the sales window open during his morning and afternoon deliveries at all campus offices.

McMillan stressed the importance of a box number on mail addressed to students for faster distribution. He added that it is advisable to check the mail box at least once each day as many freshmen will be receiving government subsistence, administrative notices and other important mail.

The post office is located near the central part of the campus.

Front Office and pickup is twice daily with the sales window open for periods of two hours each.

The post office is located near the central part of the campus.

During the summer months, a new campus mail system was established. A new system that will provide efficiency, speed, and family correspondence.

McMillan traveled ten miles during his morning and afternoon deliveries at all campus offices.

It's a fact that when you type, you have fewer hours on your homework. And you have time for fun and speed typing. It saves retyping lets get you acquainted. We'll do all possible to make this your home away from home!

A Welcome To New Poly Men

Cal Poly was founded by a state legislative act which defined purpose of the school as "to furnish to young people of both sexes mental and manual training in the arts and sciences, including agriculture, mechanics, engineering, business methods, domestic economy, and such other branches as will fit the students for the nonprofessional walks of life."

Under the name of the California Polytechnic School, Poly opened its doors to students for the first time October 1, 1906. When the cornerstone for the administration building was laid on January 81 of that year, the road to the campus was a wagon track through a muddy field. On the opening day the main building was not completed and the debris left by the builders had not been cleared from the dormitories. Nevertheless, director and Mrs. Leroy Anderson moved into the dormitory and called together the three faculty members and 15 students in the unfinished part of the building.

In 1921 it was found necessary and desirable to raise the level of instruction to that of a junior college. In 1928 enrollment of new students was limited to men. In 1938 the institution was changed from a junior college to a two-year technical college, offering terminal instruction in agricultural and industrial fields. A third year of terminal instruction was added in 1938 and, in 1940, a fourth year, and the college was authorized by the State Board of Education to grant the bachelor of science degree. First baccalaureate exercises were held in 1942.

Cal Poly, with its famous "learn-by-doing" approach, last year served 2,239 students of whom 887 were in agricultural, 1,039 in engineering and 423 in liberal arts. The enrollment represented 83 per cent from 53 California counties, 87 per cent from 22 other states and 7.0 per cent from 81 territories and foreign countries.

Poly's system of student government is one that controls the range of campus activities. Four boards of control operate the college-wide activities—athletics, music, publications, and Poly Royal, two-day open house staged by students in the spring of the year.

Poly Royal features work and facilities of the college departments, a country fair carnival, barbecue, stock-judging contests, intercollegiate rodeo and many other attractions.

The Journalism instructors and faculty, with 1,089 in engineering and 428 in liberal arts. The enrollment represented 83 per cent from 53 California counties, 87 per cent from 22 other states and 7.0 per cent from 81 territories and foreign countries.

Cafeteria Staffers

Lloyd Bertum, cafeteria operation supervisor, and his staff are now preparing to feed an estimated 2,700 students a day in the fall term.

"Our goal," announced Bertum, "is to provide better food and more efficient service."

Meal Staggered

Bertum announces that through a new system of staggering meal hours they will be able to provide longer and more convenient eating periods. For instance, between the two cafeterias there will be a two-hour breakfast period between 6:00 and 8:00, a half hour lunch from 11:00 to 12:15, with lunch from 11:15 to 12:00 and dinner from 5:00 to 7:00. Bertum predicts that by having longer eating periods they will be able to eliminate the jams at each meal making it possible to provide faster and more efficient service. There should be less time wasted waiting in long lines now.

For 2,700 Students

Six-day Service

Cafeteria No. 1 will be open six days a week. It will be closed Saturday. Sunday breakfast will be served between the hours of 6:00 and 8:00, with lunch from 11:15 to 12:00 and dinner from 5:00 to 7:00.

Cafeteria No. 2 will be open Monday through Saturday. Breakfast will be served from 6:15 to 12:15 and dinner from 5:00 to 7:00.

For the information of the freshmen cafeteria No. 1 is located across the street from the football field and No. 2 is located in the male dormitories.

SMITH NOT RETURNING

Word has been received that Bill Smith, named chairman of the music board last spring, will not be returning to Cal Poly for fall quarter. A successor will be chosen by the music board at their first regular session.

47 Poly Grad Receives Wisconsin Fellowship

Graduate of Fowler High school, El Mustang of 1947, was a recent campus visitor bearing news that he has been granted a fellowship from the University of Wisconsin.

Graduates of Fowler High school, El Mustang will study for his master of science in county extension administration and agriculture economics. While at Cal Poly he was editor of El Mustang and president of the student body.

For seven years he has been county agent at .C.l.t.c.m.s. county office, a member of the faculty at Oregon State college, and an editor of the Oregon County Extension quarterly, he was originally elected a fellow of the University of Wisconsin because of his work in agriculture economics.

The former Cal Poly student married a San Luis Obispo girl, the daughter of Mr. and Mrs. John Ritter, 6118 Market street. They have two children.

ME Division States Move To New Power Building

ME Division states move to new laboratories on Monday, May 16th, when all buildings in the central heating and power plant will be supplied by the new boiler facility and all electrical work will be done there. The old power house and ME building on the north side of the central heating and power plant have been torn down and replaced with a new building.

The new building provides space for all departments of the ME Division and can house all equipment under one roof. Before the completion of the new building, there will be a new boiler plant and a new power house.

Both new buildings are located across the street from the old buildings and the ME building, and the new power house, says Richardson.

Richardson, getting a new building, the ME department has obtained a CBS fuel tester and a dynamometer, and has three more people associated with the budget, says Richardson.

The building is brightly lighted with modern water lamps in the main lab and fluorescent lights in the classrooms, says Richardson. They have pink 'black boards', which look like the color (red, green and chocolate) interior decorations.

The steam heat for the campus will be supplied by the new boiler house, which has a distribution wing and the building itself will also be equipped with a central communication sound system. Richardson says the ME students have the best opportunity there has been in years, and he has been busy with the installation of the new lab. The ME students have the best opportunity there has been in years, and they will run for the first time, says Richardson.

A famed film beauty applying for a visa story to the "Basic Life" film, said the girl was about 25.

"I've heard for the past week you've been working all over town," said the girl who had been working for the past week.

"You're right," said the girl, "I've heard for the past week you've been working all over town."
Poly Health Center Gives Students Medical Protection

The principal problem in operating the student health center is to keep students the health center in San Luis Obispo with the knowledge that the medical personnel and facilities are readily available. The student health center is open from 9 a.m. to 5 p.m. Monday through Friday with other times available upon request. Treatment is given for all health problems and injuries except for those that require hospitalization. The center is located on the second floor of the student union building.

Dr. R. B. Lovett, chief health officer and chief of the student health service, stated that the student health center is a valuable asset to the student body and is an important part of the educational program.

Chandler Explains Poly Housing To New Students

Cal Poly has three types of housing on campus, each staffed by students. The new students are encouraged to move into the dormitories and live with their peers.

Scholarship Grants Are Awarded To Martin, Strong

Richard Martin, a sophomore in social science, and James Strong, a junior in engineering, have been awarded scholarships by the Poly Health Center.

In addition to the physical check-up, each student is interviewed by a registered nurse, validated for influence and given a chart. If there are any tuberculosis or other conditions of the student's physical health which may affect his ability to function normally, or if the student has been exposed to any communicable diseases, further studies will be made.

The health center is recognized as a hospital by the American Medical Association, but it is a hospital and isolation case room. The University Medical Center includes two full-time physicians, a nurse, and a full-time nurse's aide. The center is staffed by faculty and staff members.

Where Do You Get Those Big 19c Hamburgers?

That's Easy

Ed's Take-Out

We Use Only Top Quality Ground Beef. Fresh Buns!

These Are Real American Hamburgers—That You've Been Hearing About. Try One—Try A Bag-Full—They're Ready To Go Hot. Volume Sales Are Answer To That Low, Low 19c Price.
