Hughes, Harden Headline First Week Instruction

Two of Cal Poly’s coaches will be headliners at the eighth annual California Workshop for Physical Education and Athletic Coaching which will be held here August 18. The annual workshop will present a varied instructional program for both the physical educator and the athletic coach.

Public Relations for School Personnel During Annual P.E. Workshop

The year’s physical education workshop will offer four outstanding features, which will present a program designed for the school district public relations personnel. The program is entitled Public Relations in Physical Education.

The workshop will feature a panel of speakers consisting of the following: Dr. W. E. Morgan, athletic director, University of Arizona; Dr. R. A. Brew, assistant athletic director, University of Southern California; and Dr. R. S. H. Simpson, athletic director, University of Oregon.

The workshop will also feature a panel discussion on the various phases of physical education and athletic public relations, and will be interpreted to the general public through press, radio and television.

There will also be 10 workshop sports annoucers who will be on duty to score for them the second week of the conference.

Polio Holstein Bolsters Guatemalan Herd

When Herman Ubloto, freshman majoring in animal husbandry,avinstered in the San Francisco Examiner in the beginning of the summer trade, says that he will go to Guatemala City in the fall to work as a dairy student at the Guatemala National Institute of Agriculture. Ubloto will also work with the Guatemalan government in the development of a program for the improvement of dairy cattle in that country.

Polio Holstein Sets Record; Top College-Owned Cow

Poly Governor Colantha, one of California State Polytechnic college’s leading Holstein producers, set a new record for college-owned cows in the nation. For the third successive year, the Cal Poly cow has produced over 11,000 pounds of milk and 1101 pounds of butterfat in a single season. The cow, named Miss Elliott, now with the teaching staff at the University of Chicago and UCLA, has a record of 28,839 pounds of milk and 108,333 pounds of butterfat at four years of age. At three years of age, she produced 25,479 pounds of milk and 91,991 pounds of butterfat. She is a Guatemalan dairy, purchased by Herman Ubloto, a rancher, as the first of Cal Poly’s Holsteins, purchased by the university. The cow was born in 1919 and has been the leading Holstein at Cal Poly for the past three years. She is a member of the Cal Poly dairy herd and is used for teaching purposes.

Annie P. Workshop

The workshop will offer an educational program designed to help in conjunction with the woman’s work, in which the students will be able to participate. The workshop will be held at the California Polytechnic College, and the theme chosen for the workshop will be "Teaching the New Student: A Liberal Education". The workshop will be given in the California Polytechnic College, and will be coordinated by the California Polytechnic College Association for Health, Physical Education, and Recreation.

Health Center Remodeling Plans Set For Next Year

The Health Center is being ready for a major overhaul of the facility. The remodeling plans set for next year will materially change the appearance of the building. The waiting area will be completely remodeled and one half of the rooms will be remodeled as well. The remodeling plans are estimated to cost $10,000.

"It will be a great improvement for the patients," says Dr. Lovett. "The changes are not scheduled to be completed until next year," says Dr. Lovett. "A budget expansion program will allow the health center to handle at least 25 women patients per day."

The present building is to be torn down, and a new shell of the emergency department will be made into a major addition. Rooms now occupied by student assistants and the adjoining isolation rooms will be converted into treatment rooms. One side of the wall will be used to house the society, isolation patients and the night nursery. Combination real, emergency operation and a treatment room will be included as well. The waiting room will remain essentially as is, Dr. Lovett says.

"The Health Center is better known for its care of the patients than for its history of the college," he adds. "We handle as many patients as we can, but we do it in a more efficient manner."

The new health center is expected to open on the building site next year. It will be a major addition to the college. Dr. Lovett says, "We are going to have a first class health center for the students."
RARE PAPER PLOW PLACED IN POLY PRINTING MUSEUM

A rare piece of printing equipment has been added to the Shakespeare Press printing museum, at California State Polytechnic college.

The paper plow, or cutter, is nearly 100 years old and is one of four known to exist in this country. All four are now in museums. The cutter consisted of an iron frame with a wooden base and a metal roll that ran over an old paper plow which is nearly 100 years old. The piece of equipment was recently placed in the Cal Poly printing department by the curator of a museum at Ben Lomond, Puerto Rico.

The paper plow was discovered by George Kahn, a former student, who was some 50 years ago an employee of the Shakespeare Press.

Kahn, who is now curator of the museum, said he had been looking for authentic equipment to complete the collection. He found the paper plow in the museum in Puerto Rico and decided to purchase it for the Cal Poly collection.

At present the paper plow is being used in printing and cutting for the collection. The Shakespeare Press Printing museum is open to the public.

Hughes Named A Commissioner In Midget Football

Lee E. Hughes, president of California State Polytechnic college, was named an official of the National Midget Football conference by the American Football Coaches Association. Hughes will serve as a commissioner for the 24th season of midget football.

The appointment is the result of a recommendation by the American Football Coaches Association. Hughes has been associated with the conference since its inception in 1932.

At present the conference has 12 divisions, including the Northern California, Southern California, and the Western states. The conference has grown from a small group of teams in the San Francisco Bay area to a national organization with teams throughout the country.

The conference is composed of 18 teams representing the major metropolitan areas of the United States. The conference is recognized as one of the premier athletic organizations in the country.

At Convention — Weat Const Elec to Give Scholarship

The Weat Const Electric Association will give a scholarship at the convention of the California Institute of Technology, held in San Francisco, to be held July 24, 25, and 26, and will bring together 25,800 engineers, scientists, and businessmen in the electronics field.
