Slevin, Walker, Duffy Win Student Offices

3 Branches Defeated Again; 75% Turnout At The Polls

Ed Slevin, agricultural journalism major from San Francisco, was elected president of the Associated Student Body this week in one of the closest races in some time, coupled with the largest vote in the history of the college. Don Walker, aeronautical engineering major from Placerville, whipped the vice-presidential candidate by a substantial margin while Jimmy Duffy, dairy manufacturing major from Marysville, eked out a win over Al major Roger Packard and Don Crippen, poultry major also run by the Walker-Brandlin crop.

Duffy, however, will have to seek the second largest vote ever before he can claim a final tally. A second runoff will come next Tuesday, the state and the taxpayers are under the impression that there is a move to allow the foundation to go into the second year of its existence.

A second runoff will come next Tuesday, the state and the taxpayers are under the impression that there is a move to allow the foundation to go into the second year of its existence.

Local Housing Is Offered PR Guests

Several downtown residents have volunteered sleeping arrangements for guests during Poly Royal activities.

Thousand Expected For Poly Royal

Nearly 28,000 visitors are expected to attend Poly Royal activities this weekend, according to an official Poly Royal estimate. The event is expected to bring in $1 million to the city of San Luis Obispo.

Growth Control Is Topic Of Lecture

Dr. Bertram B. Hendrickson, U.S. Department of Agriculture's assistant agronomist for the Pacific Northwest, was the featured speaker at the lecture series in the Cal Poly gymnasium.

Room and Board Not Money-Maker

Brendlin Informs Domitory Residents

By Alton Fryer

Students are faced with either of two alternatives concerning the board and room plan offered by the foundation. They may either accept a plan which provides no more than a 25% discount, or they may choose to take no action at all.

Car Wash

Newman Club will sponsor a Car Wash Monday at Villa's 15th Street wash bay. Proceeds will be used to help the Newman Club.

Cycle Enthusiasts Warned On Noise

A word of caution to motorcyclists was contained in the noise problem. A movement is under way to have noisy vehicles away from the class room during teaching hours. The cooperation of these riders is required to terminate the noise problem, according to Capt. Richard H. Melvin.

Counselor Claims Success Depends Upon Cooperation

Success is not to be easy if you are confident, expressed Howard Zimmerman, instructor and counselor for the engineering department. "If you can control a problem as you control your own behavior," he says, "then in almost any person."

According to Zimmerman, the most important aspect to consider in the solution of any problem is that of satisfaction, which you will derive from it. He claims that meaningful solutions are those you dislike. The counselor feels that attention to this point will help to enter the field of education. When did you ever dislike something you enjoyed?

"Frankly, I enjoy teaching and the pride of coming to that teaching as long as possible."

College Employee Wins $50 Reward

A time saving idea, and consequently a money saving idea, has been made one state employee $50 richer.

Miss Grace Honor, veteran's counselor at Cal Poly, levered the $50 reward for her suggestion to the state college employees. The idea is to have all employees to sign and return the union card.

After evaluating the suggestion, Miss Honor wrote an immediate note and sent her suggestion to all state college personnel. "We'd heard about it before," Miss Honor stated, "and I believe it might be popular just because of the idea alone.

"I don't know how many hours it saved," said Miss Honor, "but it did lots of good." She will receive a certificate signed by Governor Edmund G. Brown as a testimonial.

Miss Honor has been at Cal Poly for three years and is considered the most valuable employee in her department of 18, besides being one of the nicest people at Cal Poly.

Colleges are being notified of their problems by the councilmen. Ms Honor has written letters to all instructors and students in the past few months, reminding them to keep noise down in the classrooms and out of the campus areas.

The EL Instructor claims it is the most desirable trait in a person to have. Further he states an engineer is more apt to succeed If "ho can keep the solutions.

"If you even concede a problem exists you will receive a certificate signed by Governor Edmund G. Brown as a testimonial."

EE Display Wins $500

For the second consecutive time the electrical engineer- ing department's exhibit entered in the University class of the Electrical Maintenance Engineers association's Electrical Industry show held in Los Angeles was awarded first place. Don Howell of Pasadena, student chairman, accepted the first place plaque and $500 check and the congratulations of Charlie Hayes, show director. Illustrating EE Journey

The exhibit entitled, "The Power Behind Engineering," illustrated by use of local photographs and cartooning the journey of a typical EE student from high school through the curriculum to completion. The display was judged to reveal the workmanship of the junior EE class under the leadership of Howell and assistants Herbert Hunt, Jesse Jolly and Bert Lynch. The students were kept continually busy during the 20 hours of the show explaining the Cal Poly engineering program to prospective students, parents and leaders of industry.

Quick Public Relations

Warren Anderson, EE staff member accompanying the group said, "The student attendants of the Poly students, parent or leading all other sectional competi- tions are that by 1960 California will he the undisputed center of electronic research and development in the country."

SPORTS

BY JACK RECTOR

Mats Pi found the head raw
this week and shut out Hawaii 4-0 to retain the lead in the Monday night bowling league.

Huston House, who is presently in second place, finished fast to win their contest, 4-0, over Bishop.

In two weeks another challenge will be added against Mat's Pi and Huston House, and both clubs should be a deciding factor in this year's championship race for the Monday night crown.

If Mats Pi should win this week they will have a seven-game margin or better for first place which will be pretty hard for any team to overcome. If they should lose to Mustang House, their present five-game margin would decrease and their position could be easily overridden. A word to the wise is sufficient.

The third place Fighting Cockles started fast in their contest this week with Bill Laverdich and John Martin leading the way. However, they could only come up with a 5-4 win over North S. Bill Laverdich turned in the top effort for North S. with a 650 series. He had games of 500, 500, and 185 for a total of 1185.

In the Thursday night league action the former Poly met once again in the ring. But this time it was Mustang's who prevailed.

John Malone led the Mustang's with a 600 effort in their 6-3 with the Fighting Cockles. Despite their troubles getting started, came up with a win over Poly Pi.

No Trophy, But Mustangs Turn Out 'Good Showing'

By Ken Jones

El Mustang Sports Staff

The Mustangs, along with eighty-two other colleges, have arrived from Wisconsin without knowing what drives, but knowing the forecasted national competition wasn't second-rate by any means.

Men from twenty-one schools participated in the National Intercollegiate Boxing Finals with many of the nation's Olympic hopefuls

Auburn State, Idaho State, Idaho, Wisconsin, Indiana, Cal Poly, and Illinois State were the night favorites, and as it turned out, neither one lived up to predictions of the experts. Each school presented but one man in the individual weight classes of Wisconsin turned in five champions.

Four Poly Men

On opening night Poly was represented in the ring by Peter Wright, in the 112-pound division. But a drop in the cut of 109 pounds, starting at 147-pound and 155 pounds for overweight boxers, the only first fighter to garner a victory was Wright who won by decision over John Jennings of Marquette University.

Brooks and Ruecio both lost decisions that could have gone their way. Brooks lost to Cal Poly, Brooks lost to the Valencias, and Ruecic lost to the Gardiners.

In the Friday night session the second decision went to Billy Ray Chapman, fighting for the title of Arkansas. Luecic lost in the tournament to Los Angeles

The second night Edward Labatlda continued the Dons' winning streak, dropping in the initial round on a decision date. This third, eliminated Westmont.

Two remaining Mustangs drew for the first night at 171 and Vic Huecola got the better of the two.

Friday, March 5. Two Mustangs drew for the second night, Edward Lacheda and Vic Huecola.

No Tally Win, Match Tomorrow

Chalking up their third win in four against the Fresno State Bulldogs, Coach Jorgensen's Mustangs prepare for the Westmont college Warriors this afternoon on the local courts.

If Mustang's win this afternoon, they will have a pretty good chance to win the weekend. But it may not be enough, for the Warriors but I think that it will be a good match, Jorgensen pointed out.

"If the Mustangs display the same form of competition they showed in their three wins this week, it won't be an easy matter of using the Fresno Bulldogs, they shouldn't have much trouble handling Westmont."

Jorgensen's natters defeated the Bulldogs 8-1. Poly's lone defeat was in the sixth singles match where all other Poly's before the Mustangs started dominant. Hard-fought match of the afternoon came in the fifth singles when Pica Pi's Jim Brincher edged out Bulldog Sam Martin in a 6-3, 6-3 marathon.

Taking the Westmont, Mustangs will move into the next level and beyond.

They have gone with the wind.
Those mammaths of steel.
Just like the monsters of old.
We'll mine that stering red learn.
That said, "We will get there or bell."
Now the fire box is empty and cold.
But aren't we all like those monsters now gone?
In this gay life of ours and space.
If you don't learn something new,
It's small exists for you.
Let's consider the Diesel.
Take heed!

Caldwell, Kipp
Honored By IRE
Two Cal Poly electronic engineering seniors have been specially recognized by the National Institution of Radio Engineers (IRE) branch.
Harold Caldwell, a senior from the Los Angeles branch, was awarded a certificate in recognition of his excellent work as the outstanding senior student in Cal Poly's student IRE branch. Similar awards were made to students in branches at Cal Tech, University of Southern California, and Loyola at Los Angeles.

Prowler Run Off By Alert Student
It was late, past midnight, in Poly View. Larry was out one light from the married students' trailers when two strange men were being turned out.

There was only one thing, a silent intruder was waiting for the girls to go to sleep. He knew that if he waited a short time longer, he could strike again as he had done every night for countless nights.

Just a few more minutes.
Now! Now the time!

Slowly, silently, the shadowy figure stole between the trailers, always mindful to keep in the shadows.

"There's one," thought the forbidden one as he crept upon the small patch of No. 354.

Inside 354, the occupants were not yet asleep. The wife turned to the husband and whispered, "Did you hear something on our porch?"

"Yes," said the man, "I'll bet he's back again to do his dirty work. Well, this time I'm ready for him!"

He boomed out of bed and in his right hand a heavy skillet was lightly clutched.
The door flew open and the silent intruder, startled by a noise, made a dash for safety, the skillet whizzed harmlessly over his head.

Back into bed the man crawled and his wife asked him, "Did you get him?"

"No," came the reply, "Did one of these guys kill me?"

"I don't know, but that D—garbage-stalking dog!"

Two EE Seniors Help Nurses Overcome Laws Of Gravity

By Errol Bailey

Two electrical engineering seniors have answered a call for help by designing a senior project to fill a commercially need.

Dan Spangle and Al Marlin are building an electric-powered garnet for the French hospital that will pull their 12.85 per cent ramp and eliminate the work of from four to six nurses to move a patient from floor to floor on the hospital's fourth floor.

Two electrical engineering seniors have answered a call for help by designing a senior project to fill a commercially need.

Dan Spangle and Al Marlin are building an electric-powered garnet for the French hospital that will pull their 12.85 per cent ramp and eliminate the work of from four to six nurses to move a patient from floor to floor on the hospital's fourth floor.

This week's three laws help pull turning wheels of the cart to the curb, driving on the wrong side of the street, and parking on the wrong side of the street.

According to "Andy," they were "due to students who parked down the street, not turning wheel* of the cart, and parking on the wrong side of the street."

The French hospital needs to be moved, it should work exactly anywhere."

It'll work there. It should work just about anywhere."

The problem, as originally stated, called for a design that would attach to any number of movable items, besides the garnet, such as a bed and the laundry cart.

"We are designing it for the French hospital. However, we expect it to be used in other hospitals. The French hospital is noted for its steep ramps, narrow doors and sharp corners. We do not want it to be used just in any area."

The garnet is used in a specific order for the French hospital by a manufacturer failed to work. Designed on the principle of lifting up two of the garnet wheels by a lever and dropping one drive wheel in its place, it was effective on three wheels, lacked the traction necessary to climb the slopes, and had no braking.

The design of the Spangle-Marlin garnet power cart involves a three-wheeled cart with motor and handles, and will attach to almost any wheel* from the hospital wheel* to move. It will weigh about 400 pounds, have two drive wheel* and a steering wheel, and will put out a maximum of 12.7 foot-pound* of torque. The batteries will supply enough power for two hours of continual running and the cart will have a built-in trickle charger to recharge the cell when not in use.

The 27 volt, 1 A 0  ampere aircraft type motor will turn at 1550 revolution* per minute and develop a maximum of 1.25 horsepow*.

Each student is assigned on* duty every day, and the garnet will feature a reverse.

"We are designing the garnet for the French hospital, and it should work just about anywhere."

Northland Invaded By Poly Tankers

Coach Dick Anderson and his Mustang swimming team will dive into action this week after being idle for the past seven days. On Friday the Mustang swimmers will travel to the Cal Poly pool in San Luis Obispo to compete in the annual Spring relays.

Coach Anderson expects big things from his swimmers at San Luis Obispo. He has stated that the entire Mustang swimming team is in top condition and that first place is his goal for the team.

Fractions of a second will be the deciding factors in the various events at San Luis Obispo. Anderson has named the athletes who will compete in the different events.

Coach Anderson will announce the performers for the various events at Davis on Saturday night. Although the team will be off this week, all three of the state college swimming meets will be held in the Cal Poly pool. The return of the State College Meet from the local pool will bring practically every State College swimming team in the state into competition.

Thousands Expected
