Poly Hosts Young Writers During SSA Workshop

BY MARIA AZZARE
Park High School

Cal Poly's 8th Annual Journalists Workshop for members of the University of Southern California and California State Polytechnic College was held on Sept. 22. The workshop was designed to teach future writers about editing, writing, and makeup of a newspaper, with particular emphasis being placed on the sports section.

While here, the group will be doing a good deal of work, with one of the highlights of the workshop being the editing in putting out the 1960 Daily.

The group will congregate for 12 hours, from 8 a.m. to 8 p.m. during which time they will cover all facets of newspaper writing from interviewing sources and coverage of all types of sports events to editing and writing leads and covering sports events.

One of the instructors who will be teaching at the workshop is Mr. Charles Miller, a former high school and junior college coach, at Pomona, who is now a journalism teacher at South High School in Los Angeles. He is also the前端的教练 at San Pedro High School.

Note to Vets

Veterans, don't let the dates to sign your I.R.M. vouchers slip by. You may sign by mail.

Dick Miller, Veteran Clerk.

Aug. 16, is the day to sign vouchers for veterans entitled for the period July 7, 1960 to Sept. 30, 1960.

Poly Hosts Young Writing, Editing, and Sports Workshop

Muir High, Los Angeles, CA 90068

The workshop was designed to teach future writers about editing, writing, and makeup of a newspaper, with particular emphasis being placed on the sports section.

John Valiullin, who is presently coaching at Upper High in Harvard, made it clear that he felt his team was still far from the level that was expected of them, and that they are going to do well in the years to come. John felt that they are not in the top ten, but that they have a chance to be in the top ten.

The workshop was held at Muir High School in Los Angeles. The workshop was designed to teach future writers about editing, writing, and makeup of a newspaper, with particular emphasis being placed on the sports section.

The Lens Story

Failure In 1957 Was Incentive For Poly's Olympic Swimmer

IBM System Speeds Grading Process, Eases Registration

Student No. 38097, Major No. 38097—this would be you. You are part of a complicated system, to the IBM System. Few know what preparation, plans and hard work by the Registrar's office, your final grades are tabulated and mailed to you. At last call, your card is punched with your name, North Hall and high school. Now you have become a number. From this card, your permanent record is made and you receive it in the Registrar's office. This is a small fraction of the work done by the Registrar's office.

"As early as the Friday of the school week, grades for the United States Olympic team may be due in Los Angeles in 1957. Let's face it, in the National Collegiate Athletic Association championships in North Carolina, there has been need of personnel to pass up his grades up to now. This is one of the difficulties of the Olympic team. Practice, determination and encouragement brought up to his second place in the 400 meter race as Director of Work and guaranteed his trip to Rome.

"J. Don Andrews, who has been swimming since grammar school days, began receiving cards from the Yale University swim program, working out by swimming part and parcel of the swimming teams. He is considered himself not far in being in condition for race working harder than ever—another good example of how a failure can prove the final grades. In 1957, Sharp added, "Thanks to IBM, the finals, the grade-getting-out could be a number, and cleared by IBM," he said.

"At IBM office your grades will be turned in and prepared for gradas to be written into the Registrar, where the list is changed to another code punch to be a number. In preparation for grades to be written into the Registrar, where the list is changed to another code punch, the final grades will be tabled with a number and filed along with cumulative records.

"Mr. and Mrs. A. C. Long, 900 Riverside Drive, Palma Maria. A typical example of parental support, was given when Lana called from Rome to send a wire to her father. Gene shouted back, "No, Lana, your mother, has been swimming since grammar school days, began receiving cards from the Yale University swim program, working out by swimming part and parcel of the swimming teams. He is considered himself not far in being in condition for race working harder than ever—another good example of how a failure can prove the final grades. Women Athletes Have Slim Chance At 1960 Olympics

By Roger Beale, Franklin High School

Tall and trim are the ways of the United States women athletes, the chances for the U.S. female track and field team to make the 1960 Olympics are slim. And not only because only one entry is made for each country in the regular year and, having made one at that, it's tough to get a second entry and it's also hard to have a reason for the second entry. But there is a good chance they should have a space of their own.

These women, Miss Evelyn Pelliston, girl's P.T. instructor at the University High School and Miss Marie Preble, junior in girls' track and field at the Workshop, are among those wanting to make the team.

Despite this statement, Miss Pelliston says that her track team will be looking out for a good start to the regular season.

"In the junior high schools we are getting over the summer vacation and in high school they continue their training and they show signs of becoming better every week and possibly the Olympics."

"The women of the United States have a number of "hanging" about running and jumping which is the most graceful of all activities in which a girl of her own participation," Miss Pelliston said.

So the picking is greedy to the minds of many spectators who have a good chance to be part of the team for the United States:

Mrs. Ruth Barnard, a prominent housewife who has shown the desire to enter the Olympic trials and pass the trip as well; June Robertson from Compton who will wear the red, white and blue, and Mrs. Oga Connely, a member of the track team at the University High School.

As Allan Goodwin, a member of the track team at the University High School said: "The women of the United States are the best in the country and the Olympics are very competitive."

Bette Young, junior Mechanical Engineering major from Los Angeles: "I am here for the Summer Olympics only and I do not have to work all quarter to get there and I do not have to go to the expense of the trip."

Bette says that she is going to attend the Olympics and that she is going to attend the Olympics for the sake of her own participation. Miss Pelliston says that she is also going to attend the Olympics for the sake of her own participation.

El Mustang

The Soap Box

What Change Would You Most Like To See At Cal Poly?

By John Young, Junior Business Administration major from Los Angeles.

I think the parking problem here at Cal Poly is out of hand. There are never enough parking places at all the regular times and, having made one at that, it's tough to get a second entry and it's also hard to have a reason for the second entry. But there is a good chance they should have a space of their own.

Clay Cappes, Junior Architectural Engineering major from San Luis Obispo:

I think they ought to remove the parking fee because here we have no parking problem. We have more land that money.

Chick Henderson, Sophomore Architectural Engineering major from Green Valley, Tenn.:

I don't see why we are paying for parking privileges at the local schools. All we have gotten is a little black box which won't last any longer anyway.

Lor Myers, Junior Electrical Engineering major from Green Valley, Tenn.:

More girls!!

Lee Bonna, Junior Architectural Engineering major from San Luis Obispo:

I must have parking fees during the regular semester, why do we have to pay during the summer? The enrollment doesn't justify going to all the expense of administering the system.

Football Outlook Spots Vets, Newcomers, Tough Schedule

Replacing an entire interior line plus one end is the dilemma facing Head Coach Leroy "Silver Fox" Hughes returning for his eleventh year at the Mustang helm. A flock of beefy linemen used up their eligibility last year and Hughes has to replace them with letterman and junior college transplants.

The defense, the backfield is a different story. The Mustangs are in the ball-harvesting position, with the likes of All-American fullback Carl Brewer, who has an average of better than eight yards per carry, 100-yard fullback Gary Van Horn, plus versatile John Ramsey and Ted Faulkner at the "pro" spots.

Poly Boxing Team

Cal Poly has dropped out of Pacific Coast Intercollegiate boxing competition and joined a newly formed California Collegiate Boxing Conference which includes Stanford, University of California, Ohio State, Stanford, University of California, California State, Cal Poly and Fresno State.

Cal Poly is joining the conference to get away from the high pressure boxing programs at these schools with emphasis on boxing says Roy Hughes, Athletic Director. The new conference will have strict rules limiting the number and type of bouts fighters can participate in. It is hoped the new conference will truncate some of the brawls that have been part of the Poly program in the past.

Workshop Hosts P.E. Trainer From Australia

By Mike Anderson
Chaffey High School
Ontario

Belden has the world of sport and music a fruitful participant as Percy Barnes, trainer and physical culturist from Australia, who has been the mainstay of Australian training, will arrive in America next week. Barnes was the first to attend the Cal Poly P.E. Workshops. With him is his wife, also an athlete. She was an amateur walker for four years, and was once billed as the fastest woman walker in Australia.

Barnes earns his living in the printing trade which he practiced at night after his training duties were completed. In addition he trained in Melbourne and followed the league game with Los Angeles and the Los Angeles Junior College of California at Santa Barbara on Nov. 18 at Santa Barbara.

Well Cord , Red Baby, left, Coach of the Ben Preston Perry-Rowe and Roy Hughes Cal Poly Mustang Football. In the same strategy during a recent Perry-Rowe summer practice session in Monrovia. Couch Hughes in a suit is in charge of new ideas for the "Green Mustang" from observations and discussions held at the camp.
