Dear Editor,

In my last column, I mentioned that our suggestion should be compulsory. I now realize that this is not the case. The student body should be allowed to vote on the student body fee increase, this money will be included in the budget for next year and distributed according to organizational commitments and demands. This is why no one has been able to make any specific contributions concerning benefits.

Separate groups requesting money should be made optional to the student body.

Secondly, I suggest that instead of adding more clubs to the list, we should concentrate on the organizations already part of the student body.

Finally, I suggest that the purchase of ABB cards be made optional to the student body.

If our proposal is accepted, it will put our student government and its organization on a "free enterprise system." SAC would be forced to become better with student money, and if the student body does not use his ABB card, he is losing money. Isn't it obvious that some students should be exempt from the ABB card buying law?

We ask that the following proposal be placed on the ballot for the election:

1. Approval of an increase in ABB card fee.
2. Approval of an increase in the student body fee.
3. Disappearance of an increase in the ABB card fee.

Since we do not believe that "the ends justifies the means," the student body should be allowed to vote on the student body fee increase.
