Optimism Seen in RVOT Tests

Concerted efforts were registered Tuesday night during what was billed as the last on RVOT—the proposed closed circuit student radio station.

The "Radio Voice of Poly" spoke for the first time and played music for more than an hour under the watchful eyes of Gordon Brown, electronics major heading the project, and Robert Molln, and Cadet Lt. Tom Kennedy.

The idea is to use the equipment and vote and select one of the five young ladles to be their queen Jan. 30 and 31.

This will be furnished by the Dana. Guests of the cadets are welcome and may acquire their tickets at the ROTC administrative office.

The entire cadet battalion will attend the Tewar Cela for senior cadets and their dates.

Chalkboard Notices

Get Policy Review: Rules Now in Effect

Use of chalkboards by student organizations for notices is once again permitted. In The Fifth Amendment, Everett M. Chandler, KOTC student admiral, announced that he allowed to use chalkboards in classrooms, gymnasiums, and activity notices.

Only under the following conditions will permission be granted:

(1) Only regular white chalk will be allowed.
(2) Each notice may not occupy a space no larger than 16" by 20"
(3) Must be confined to the right-hand corner of the chalkboard.
(4) Notices will contain titles of college events by college recognized organizations.
(5) Notices should contain at least the following data: the name of the organization, and a brief statement of what is being sponsored.
(6) No more than three notices may be posted on the chalkboard at one time.
(7) No notices may be posted outside the designated areas.

Again, students who may have questions or comments are invited to submit them to the Activities Office for priority, time of posting.

Queen Race Draws Three; Need More

At least three votes had started forward early this week to contest for queen of Poly Royal: April 26-27, at least for a position according to Student Body Secretary, John Keller, student body secretary.

The three candidates are: 1) Dorothy Zell, a sophomore in psychology, and Phil Hill, another student from the student body office and returned by Friday, Feb. 1st.

Engineers Plan Erection of Dome

Almost a year of research, calculation, and manual labor may bear fruit next month when four architects, headed by William reducing an all-metal structure for Poly Royal.

In observations of Engineering Building, in the early stages of a preliminary study, which will be hampering in shape and size. The plans have been put up to pre-drafts on student body office.

Scheduled for erection Feb. 12, is a project of Bill Ruck, Bob Barker, Dan Tackings, Dick Nielson, and John Pinnel.

Chuck Cummings . . .

...revives his intentions of running for ASB president and envisions the SAC Council meeting this week.

First Hat in Ring For ASB President

Chuck Cummings kicked off for the expected heated campaign for ASB president by announcing this week that he is in the ring for that office.

The first to announce his position was Jerry Prep. Heski, president, and immediately there will be a total of three candidates for the office.

Chuck Cummings

...kicked off for the expected heated campaign for ASB president by announcing this week that he is in the ring for that office.

"If these policies are to be followed, there will be no need for any other candidate," he said. Abo on the agenda for the SAC Council meeting this week was the ASB President.

Non-Student Club Members

Not to be left out, Poly Royal members who are not student members will not be able to hold office this spring.

This was the decision Acted on Finance Committee that was taken by the committee.

"To encourage the non-student groups would be a waste of time," said one member of the committee.

New Course Gives Info On Problems Of 'Having A Baby'

Man seem to be just as worried about bringing a baby as prospective mothers are, according to home economics instructor Margaret E. Elliott, who is teaching a class called "The Problems of Beginning Motherhood." Several men were enrolled in the class. Both male and female students observe or interview in homes of prospective fathers or mothers, or in homes of mothers and fathers of children under two years of age. The students then report the comments to one of the class members who is major, who is engaged, believes that the course will help great many people, and who has known about raising children in many homes.

More On Library:

Dear Editor:

As an engineering student who

was a member of the Board of Pub-

lic Affairs, I should like to bring a

few comments on El Mustang.

All of us would like to see a

bigger and better library. The presen­
ttant equipment is the lack of printing facilities. The only college on the West

coast which provides its own press is CalTech. In keeping with the "learn by doing" policy the paper is printed by students at least two times a week outside the school.

By utilizing all facilities at

hand, the staff of El Mustang is doing an admirable job ofprinting. We are not, and people are still of the opinion that El Mustang is supported by Rich Body funds. With the increased budget of the ad­

vertiser and the decrease in advertising income, each student is paying 0.95 cents for his copy.

About the salaries of KM staff

first, they are not given school

credit for their position. They are given a salary ranging from 40 cents to 50 cents, according to the Editor of the College Press. A price of 40 cents will be awarded to the PPA in the Division of Humanities, and 50 cents to the Ap, Ed. office, Cir 16.

The design of El Mustang is

the fault of the students. El Mustang is the official organ of the Polytechnic College; and a design representative from the college. It should be five inches in diameter. The final product when

the design is to be two inches in diameter, and it will be green and silver.

Cash Prize Awaits

Winning Design of Poly Royal Button

The search is still on for a Poly

Royal campaign button design according to Dale Andrews of the Cal Poly Press. A prize of $15 will be awarded to the PPA in the Division of Humanities, and 50 cents to the Ap, Ed. office, Cir 16. The design must be submitted in the fol­

lowing form:

1. A design for the Poly Royal button.
2. A design for the Poly Royal logo.

The design must be submitted in the fol­

lowing form:

1. A design for the Poly Royal button.
2. A design for the Poly Royal logo.

If I the person anonymously

therefore, we believe it more de­

sirable to utilize a Poly Royal button. The purpose of Interlibrary loans is to make available for research and

for serious study library materials that in a given library, due to provisions made by the lending library, may not be available.

Increased budget of the semi­

annual fees is a courtesy and a privilege, not a right, and is dependent upon the financial condition of the Poly library. Because of the cost of the service, we cannot guarantee for certain classes of materials, that Interlibrary loans will be made. However, we will continue to make them available to the extent of our facilities, and we encourage students to make more use of the library's resources.

El Mustang recently, the library has been made available, through direct loans from

the Poly Royal data, April

Hoopsters Seeking Third CCAA Win Against L.B. 49ers

Still seeking their third CCAA Win, the Mustang five will try to snap their four-game skid against L.B. State this afternoon. Having already thrown the past five games away, the Mustangs will have to play a near-perfect game to come away with any kind of a victory. 

Coach Ed Jorgensen's team comes into this game after two straight losses, and with the Mustangs at the edge of their rope, and the L.B. 49ers at the peak of their schedule, it is difficult to predict the outcome of this game.

One thing is certain, though. Unless Coach Ed is willing to make some changes in the starting lineup, there is little hope the Mustangs have of winning against the 49ers. The Mustangs already trail the 49ers by three games this season, and with the season coming to a close, the Mustangs are in a desperate situation.

Coach Ed has already hinted at the possibility of making changes if the Mustangs lose this game, but it remains to be seen if he will follow through with his threat.

In other games, the Mustangs were defeated by Davis, 100-68, and Bend, 97-72. The Mustangs are currently 4-8-1 on the season, and with only three games left to play, their season is all but over.

On the other hand, the Mustangs are still alive in the conference race. With a win against the 49ers, the Mustangs could still make the playoffs, but with a loss, their season will be over.

The Mustangs will need to play a near-perfect game to have any chance of winning against the 49ers. If Coach Ed is willing to make changes, the Mustangs might have a chance to surprise everyone.

What a MATHENATICIAN can do at IBM

Mathematics is an ancient and ever-advancing science that contains many forms. It shouldn't surprise you that there are many people who make their living from it.

First of all, what's it all about? What does a mathematician do all day? In his own words, "I keep in touch with the executives of many different companies—advising them on the use of their IBM electronic data-processing computers, and helping them to use them properly. I also help them to develop and analyze their scientific and technical problems for solutions by IBM.

Occasionally, I'm asked to write papers, and give talks and demonstrations on electronic computing. All in all, it's pretty fascinating—something new goes on every day.

In other words, John is a full-legged computing expert, a consultant. He has a mathematical background in both of those areas, and he's now an Applied Science Representative in IBM's Sales and Technical Services. Why not drop in and discuss IBM with your Place-Mate or Friend?

Act Now!! To Get In On WASHERS DRYERS

IBM hopes that this message will help you to give some idea of what a mathematician can do at IBM. There are equal opportunities for B.E.'s, M.E.'s, Ph.D.'s, and Liberal Arts majors in IBM's Engineering Divisions. Manufacturing Engineering, Production and Technical Services. Why not drop in and discuss IBM with your Place-Mate or Friend? IBM is an Equal Opportunity Employer.
Indian Electronics Major
Like Education Methods

by Ben Adams

Were you a student in India, you would need to fall only one of the three-hour exams given on all subjects in the three-year course in order to flunk out of the entire course! So say A. B. Chhina and Singh Prilpal Hans of Punjk, India, who have entered Cal Poly this quarter to study electrical engineering. The two men, who are cousins, each hold a diploma in the field from an English University in Punjab.

"Having gone as far as we could go in electrical engineering in India, we came to the United States to continue our study as engineers.

Hans and Chhina are noticeable on campus for the turbans which they wear. They must wear these turbans because their religion prohibits cutting their hair, shaving, or being seen in public without their turbans. If they violated these taboos, they said, they would be ostracized not only from their religion but from their homes as well.

India Going Modern

Education in India presents other difficulties for its students, the two relate. For instance, each student must visit the district of the neighboring states, the English language, and the languages of the parents. Students also study the history of each nation very thoroughly.

"India is becoming more modern every year. We are now moving at a step in the establishment of more schools and modern homes in the various parts nation much after those of the United States," said Hans, who lives in Model Town, Ludhiana, Punjab. The homes there have been constructed in the pattern and design of American living.

Marriage Customs

Not since 1860 has a member of the Sikh religion been allowed to have more than one wife, the men said. There are some love marriages as allowed now, but the old custom of the parents arranging the marriage remains. The men may not work, but must attend to their homes and families. In these homes and child care are taken for the husband, but the woman does all the work. Most of the disadvantages of the household are the wife's.

Hans and Chhina arrived in the United States by way of San Fran-

American vs. India—A. B. Chhina, left and Singh Prilpal Hans of Punjab, India, inspect equipment in Cal Poly's electrical engineering shop. The two students went as far as they could go in India, and have come to Cal Poly to complete their education.

HAVE A REAL CIGARETTE...have a Camel

"The most important thing to me in a cigarette is flavor. Camel always taste good and rich, never thin or flat. They're my smoke."

MARGUERITE BEGGAM
FOREIGN CORRESPONDENT AND POLITICAL PHOTOGRAPHER

A. B. Chhina, Indian electronics major, with Singh Prilpal Hans.

Discover the difference between "just smoking"...and Camel's!

Taste the difference! Not taste, frilla, or fancy stuff — simply the finest taste in smoking. Camel's are rich, full-flavored, and deepy satisfying.

Feel the difference! The unique Camel blend of quality tobaccos is unequalled for smooth smoking. Camel never let you down.

Enjoy the difference! More people smoke Camel, year after year, than any other cigarette of any kind. Try Camel—and they’ve really got it!
