

Queen's Assembly Set for Tomorrow Evening in Auditorium

CALIFORNIA STATE POLYTECHNIC COLLEGE ★

VOL. XVIII NO. 20

SAN LUIS OBISPO, CALIFORNIA

TUESDAY, FEBRUARY 19, 1957

Heading for the Hills... Over half-a-hundred cycle enthusiasts roared out of Poly Grove last Sunday for the annual Poly Penguin endurance test. Assisting in the test were members of the Amateur Radio Club which relayed information on times and progress, as well as standing by to report any accidents or other mishaps. Results of the 170-mile run were still being tabulated at press time. Photo by Kenneth Bailey

Colony Internships Made Available To Male Students

A student internship program between the College and California Men's Colony has been established, according to Dean of Arts and Sciences Dr. Robert Maurer.

Internships will be open in the areas of classification, correctional officer, education, recreation, chaplain, medical statistics, medical laboratory, radiology, and dental assistant.

Open to male students, objectives of the agreement, just approved by the California State Department of Corrections, include (1) giving students a chance to earn, (2) education, (3) provide senior project opportunities to internees, (4) provide help to the Colony and show opportunities in correctional work.

"Instruction is the emphasis in this program," commented Dr. Maurer this week. Written reports each quarter will be required to both Colony and College officials. Faculty sponsors will be assigned and following orientation instruction in all phases of correctional work, the internees will specialize in one of the fields mentioned above.

For ten hours work per week, room and board will be provided the internee as remuneration. Dr. Maurer may be contacted for details and job descriptions.

Women's Athletic Ass'n Meeting Tomorrow

All women students, regardless of major, have been invited to aid in the formation of the Women's Athletic Association tomorrow according to Mrs. Alice Reynolds.

The organizational meeting of the Association will be held following women's intramural basketball at 7 p.m. in the gym annex. Any women who cannot come to the meeting at this time but are interested in WAA may contact Mrs. Reynolds for information.

Follow The Leader

Deciding to follow the trend of coeducation, Everett "Catfish" Dorough, El Corral Fountain manager, is now the proud father of a baby girl, Romelle Ann. His hitherto all male cast of three boys wonder at the sudden change of color scheme from blue to pink in the Dorough household.

The little 6 lb. 4 oz. "catnip" was born Feb. 1 at Mt. View Hospital.

The Gavel's Beat

By ANB President Ed Stevur

For the past two weeks the main issue on Student Affairs Council agenda has been football seating. This item has bounced back and forth as much as any issue I have seen on the council and SAC representatives are still in disagreement. But this disagreement is not lopsided like many others. Deciding votes are very close and range from one to two members deciding the issue.

Because this item is a policy matter, and since there is a wide variety of feelings, I believe it should go to the students to decide in the coming Spring election. It is my belief that you should be allowed to make the final decision and this decision can be made by you only with this item on the ballot, come April.

Fluctuating Finances
Last night was the final budgetary group hearings before Finance Committee. Now the big job is in store for the committee. They must revise budgets by \$15,000, the difference between requested money and money available for allocation.

This is the time when special interests and prejudices will probably be shown. There are two main groups which budgets must pass before becoming a matter of policy. Finance Committee and SAC.

An annual question has already presented itself this year. Will SAC think in the best interest of the entire student body, or will (Continued on page two)

Rabbi Talks Tonight On Club Forming

Rabbi Jehudah M. Cohen of Los Angeles will speak to interested students tonight on the possibilities of forming a recognized group of students of the Jewish faith at Cal Poly.

Such a group, tentatively known as the Cal Poly Hillel Club, has been in existence for the last two quarters, and states as its purpose, "to fulfill the religious, cultural, and social needs of Jewish students at Cal Poly." This club hopes to become associated with the student body in the near future, according to Ben Friedman, president.

Tonight's meeting will be held at 8 p.m. in room 204, administration building. All interested students are urged to attend and present their ideas and opinions.

'Job Description' Lists Eight Points All Employers Want

There's a "job description" which every employer hopes some day to fill, Robert E. Kennedy, Assistant to President McPhee, told Blue Key members and pledges at a recent initiation banquet.

He listed eight points which he believed would be on the "Wanted" list. They were:

1. A man for hard work and rapid promotion, a man who can find things to do without the help of a manager and three assistants.
2. A man who gets to work on time in the morning and does not imperil the lives of others in an effort to be the first out at night.
3. A man who is neat in appearance.
4. A man who does not sulk for an hour's overtime in emergencies.
5. A man who listens carefully when he is spoken to and asks only enough questions to insure the accurate carrying out of instructions.
6. A man who does not pity himself for having to work.
7. A man who is willing to assume responsibility commensurate with the authority he is given.

APPLY ANYWHERE: The world is searching for such men. Nine pledges took the Blue Key oath at the banquet, in the Hotel Anderson. They included: John Cook, Steve Emanuels, Ed Holland, Larry Litchfield, Charles Peckham, Bill Pierce, Jack Rector, Bill Rohrer and Mike Simmons.

Poly Will Be Spain In 1957 Model U.N.

As one of sixty colleges participating in the Model United Nations Conference, Cal Poly will represent Spain this year, at Stanford University, April 10-13.

Nine delegates will be chosen by a joint student-faculty committee, in a meeting in Adm. 208 at 7:30 p.m. Feb. 27.

The Department of Social Sciences is providing a series of seminars and meetings which are concerned with Spain and the United Nations. Students who may be selected will be responsible for becoming informed on U. N. procedure.

Election Thursday, Friday

Poly Royalty Finalists In Assembly Tomorrow

Five finalists for the title of Cal Poly's first "home-grown" Poly Royal queen will be presented to the student body tomorrow night at an 8 p. m. assembly in the engineering Auditorium, according to Jim Troxel, queen contest chairman.

Engineering Week Draws G.M.'s Boyd

A visit by General Motors' research chief Dr. T. A. Boyd, Detroit, will highlight "National Engineering Week" here, due to end Friday.

Dr. Boyd, first G. M. representative to visit Poly, will be conducted on a tour of all Engineering Division departments, and will view senior projects, equipment installations, and students at work, according to Engineering Week officials.

"Your 1975 Model—I'd like to see it" will be the topic of a talk by Dr. Boyd Thursday at 8 p.m. in the Eng. Aud. A special invitation was issued to members of the Agriculture Council last week to attend the meeting.

Two other events are slated to help celebrate the week.

Al Hansen, a member of the Engineering Council at the University of Southern California and

G.M.'s Boyd

president of National Refrigeration, Los Angeles, will talk on "Problems of Tomorrow's Engineer" at a meeting Friday at 7:30 p.m. in Lib. 114.

The Architectural Engineering Department will erect a tubular-steel frame for its "plastic home." The structure is a copy of the famed architect Buckminster Fuller's geodesic dome. The event is to take place in the field next to the AE department building Saturday morning about 8 p.m.

Purpose of "Engineering Week" is to stimulate student and public interest in the field of engineering. Locally, the effort is to promote Cal Poly as the west coast's second largest engineering school.

According to Clem Kaltoff, Engineering Council chairman, energy and enthusiasm of the national observance is being checked to prevent anything from detracting from Poly Royal.

Accompanying music to suit the five lovelies will be provided by the Majors and Minors from the Glee Club, and a section of the Concert Band, Jim said. The finalists are Jan Angell, Val De Geus, Karna Thorson, Dorothy Tullock, and Pauline Woods.

A general election will be held next Thursday and Friday, in which one of the five will be elected by the student body to reign over the Poly Royal festivities. This is the first time in the 25-year history of Poly Royal that the students have been able to choose their own queen. Heretofore most of the queens have been chosen by the student bodies of their own schools.

Election booths will be placed in the post office and the library from 9 a.m. to 3 p.m. on the election days. Heading the Election Committee in making preparations for the two-day vote is Don Walker.

The first Poly Royal Carnival Committee meeting will be held tomorrow afternoon in Lib. 216 at 4 p.m. Jim Cody, Committee chairman, urges every club on campus to send a representative to this meeting.

'Egg-Za-Poppin' Is Sat. Dance Theme

"Egg-Za-Poppin'" is the theme of the Poultry Club dance, Saturday night in Crandall gym, to be highlighted by a drawing for a \$125 typewriter and the presentation of the Poly Royal queen candidates, as was disclosed by Dan Shuster, Poultry Club dance chairman.

"Unusual entertainment will be provided in the way of actual hatching of baby chicks—right out of the eggs—," adds Shuster.

Poultry Club members are selling tickets for the Royal Deluxe Portable typewriter, to be given away at the dance to the lucky ticket holder.

Cosmic Radiation Is Talk Tonight

"The Origin of the Cosmic Radiation" will be the subject of a lecture by Dr. Serge A. Korff, professor of physics at the New York University, tonight in Sel. E-32.

Dr. Korff is a Sigma Xi lecturer who has presented his topic at numerous colleges and universities across the country.

In his lecture Dr. Korff will cover the nature and characteristics of cosmic radiation, theory of the origin of radiation, and the importance of the study of radiation as a tool of geophysical research.

Dr. Korff has held numerous posts in his field including that of Senior Scientific Advisor to the UN Atomic Energy Commission.

Bill Brown Presented Link-Belt Scholarship

Billy P. Brown, senior mechanical engineering major, was recently presented with a \$500 scholarship by President Julian A. McPhee. The scholarship was given by the Link-Belt Company of San Francisco and Los Angeles. Brown served for four years in the U. S. Air Force in missile testing at Patrick Air Force Base in Florida before entering Cal Poly.

"The Customers Always Write..."

Long May It Roar

Dear Editor:
Hurrah for "The Customers Always Write." Long may it roar. Our safety valve, our megaphone and house-top. "I may not agree with what you say, but I will defend to the death your right to say it."

"Be Brave," Quoth the lion.
'Be Wise,' said the owl.
'Be Kind,' cooed the dove.
'Lift your voices and howl,' called the wolf on the hill.
And their cries made a song;
Different tunes rang in harmony
All their lives long.

L. Weber

Gavel's Beat

(continued from page 1)
they fall prejudice to special interest groups? My answer is a simple one.

Council members are supposedly mature, intelligent, competent men, doing their best to truly represent the students. That is why my answer has been:

POLY FIRST

I believe the majority of SAC reps will think of Cal Poly, the college, not Cal Poly, the group of organized special interests. For the good of the college and your AMB, let's hope I'm right!

In closing, I'll toss this out: Are you happy with our present form of government? Apparently the student government committee (in my opinion, one of the most up-and-coming on campus) does not think so. They are devising a plan which looks like a step in the right direction for improving our government set-up. You should be hearing about it, so keep posted as it will have a direct bearing on YOU.

As of 11 o'clock Friday, Feb. 15, the population of the United States reached the 170 million mark, according to the Commerce Department.

Lamb to Be Prize At Saturday Movie

Grand prize of a 100 lb. choice lamb, dressed, wrapped, and ready for the oven, will be given away at the showing of Walt Disney's technical picture "So Dear to My Heart" in the Eng Aud, Saturday.

Cal Poly Woolgrowers is sponsoring a donation drive with proceeds to be given to the Student Union, and the lamb as prize.

Special attraction to Poly students is the fact that Spelman Collins, sheep specialist here, has a part in the film. Many of Poly's prize sheep were used in the picture when it was filmed in 1949.

Students may purchase tickets from any Woolgrower for 10 cents or 8 for 25 cents. Holder of the winning ticket need not be present to win; however, admission is free to those with tickets.

The University of California has the nation's largest enrollment of full-time students with 40,788.

RO Head Comments On Possibility Here Of Air Program

The possibility of an Air ROTC here at Cal Poly in the near future is rather doubtful, according to Col. P. A. Lolselle, professor of military science and tactics.

"I don't feel that we have, at the present time, enough juniors and seniors to support such a program, for at least five qualifying members are needed and it would be next to impossible to get those five out of the small number of seniors we now have," said Lolselle.

"As I see it now, it will be at least two years before we can put such a plan into operation, for then the approximately 100 freshman and 50 sophomores will be upperclassmen," he added. Other complications which bring

about the delay of starting this program is the absence of a CAA approved flight school in this area. Only senior ROTC members who can pass both the physical and aptitude tests could be considered as possible applicants.

The course, when it is started, will require 5 hours air training and 85 hours ground training, on the student's own time. "If and

when we get the program started," said Lolselle, "classes will probably be held at the County Airport. But, here again, we have another problem, for the boys will have to furnish their own transportation to classes. All things considered, including going to and from the airport, the actual time put into this course will be more like 100 hours than 70 hours."

Cagers Face UCSB Lose To San Diego

The Mustang cage squad faces the conference leading Guachos from Santa Barbara tonight on the home courts at 8 p.m., and this game should be one of the best of the season. Santa Barbara is undefeated in league competition and boast a 5-0 record. Last weekend the Guachos knocked off Los Angeles State and the Long Beach 49ers to bring them up to their present record.

San Diego State nipped a rallying Mustang squad, 65-60, Saturday night to give the Mustangs their second straight loss in their last two conference outings.

Tony Pinkins, Astec forward, lived up to his reputation and led his teammates to their fourth conference win by sinking 25 points with his twelve baskets coming from all positions on the floor.

Big Theo Dunn led the Mustang crew with 14 points and Wil Strong sunk 13 points for the runner-up position. The Mustangs now have a 3-3 conference record.

The Astecs enjoyed a halftime lead of 30-20 and following the intermission came back to find themselves holding a 50-58 lead with only two minutes remaining in the contest. The Astecs went into a stall and that was all she wrote.

San Diego hit on 48 per cent of its field goals and the Mustangs, 39 per cent. Dunn, who slipped off his usual 20 point scoring pace, grabbed 17 of Poly's 30 rebounds. The Astecs gathered only 21 rebounds.

The following is a breakdown of the scoring in the Mustang-Astec game:

San Diego State 65; Pinkins, 20; Gillespie, 4; Rees, 8; Noonan, 12; Gehring, 0; Rimbeau, 4; Diahong, 2; Adams, 4; Brown, 6.
Cal Poly 60; Hardy, 0; Strong, 13; Grandberry, 8; Dunn, 14; Taylor, 4; Simmons, 9; Krienke, 2; Oswald, 10.

Watch The Birdie . . . Eduardo Labastida is shown above in his match with Washington State's Jerry Bagan. Poly's scrappy little 125 pounder was too much for his opponent and captured a unanimous decision in his bout, which helped Poly to win its fourth match of the season. Poly downed the Cougars 4 1/2 to 3 1/2. The Mustang boxers take a weeks rest before meeting the San Jose State Spartans in a rematch the 27th of February.

Mustangs Outslug Cougars For Fourth Straight Win

By Don Kearns

Cal Poly's "Lenthermen", in by far their toughest match, gained victory number four when they defeated the Washington State Cougars 4 1/2 to 3 1/2.

A capacity crowd had Crandall gymnasium shaking in its foundation from the opening bell to the final punch. If one had to pick out a dull bout, it would have to be the Friday night TV special from Madison Square Garden. Of the eight card event, each had its own spectacular moments.

Following the intermission, Bob Gow and Cougar's Joe Zeeben put on the best fight of the night. It was a good boxer, Zeeben, against a hard slugger, Gow. Both boys drew blood and when the leather stopped flying, Gow won the decision and tied the score at 2-2.

Washington State went ahead 3-2 when Jesse Klinkenberg hit Rudy Brooks with what looked like the ring post. Brooks stopped in his tracks; took two more quick punches and it was all over but the count. The end came in 1:15 of the third round.

Gordy Martinez brought the Mustangs up even when he won a decision over Dan Borosan. These boys slugged it out for six minutes with Borosan on the receiving end most of the time. When the fight ended, both fighters were so arm weary that neither could have broken an egg. Mustang fans couldn't help but wonder why Borosan didn't hit the canvas. Martinez hit the Cougar at will but he kept coming in for more. Borosan was in terrific shape as was the rest of his teammates.

Washington State forfeited in the heavyweight division thus enabling the Mustangs to win the team match.

The Mustangs, still undefeated, travel to San Jose State for a return match on Wed., February 27.

Personality:

"Flem" Hardy High Flying Poly Cager

Although he is not one of the leading scorers on the Mustang basketball team, Flemen Hardy is outstanding as a playmaker and rebounder. Hardy, one of Coach Ed Jorgenson's starting forwards, is a printing major, and currently calls San Francisco his home.

"Flem", as he is known by his teammates and friends, was born in San Diego and is well travelled. With his father, who will have completed 40 years in the U. S. Navy in September, Hardy has been in 45 of the 48 states, Hawaii, Mexico, Japan, South and Central America, Cuba and various points in between.

His education began in Los Angeles, and he attended schools in Portsmouth and Franklin, Virginia, before going to Mission High School in San Francisco from which he graduated.

At Mission High Flemen lettered in varsity basketball for three consecutive years, and when a senior he starred as an end on the football team. He received an honorable mention on the All-City gridiron squad.

Hardy came to Cal Poly last year, and immediately gained recognition as potential varsity basketball material by playing first string on the Junior Varsity and helping out the varsity on a few occasions during the '55-56' season.

Because of his tremendous ability to get up off the floor on his rebounding, he was asked why he didn't try out for the high jump on the track team. He replied, "I would like to participate in track but I need the time for my studies."

The Cal Poly wrestling team gained their first victories of the season over the weekend defeating San Francisco, 10-11, and San Quentin Prison, 23-8.

Circle K Tops M. E. In Playoff Tilt

A fired up Circle K bowling club spanked the M.E. Society 4-0 Saturday evening to capture the first-half crown of the Cal Poly Bowling Club. In the playoff tilt, Circle K led all the way inspired by the bowling of Clyde Dudley who set the pace for his teammates with a 505 series. Ed "ol' reliable" Fryk turned in his usual good performance for the losers to capture the high series of the evening with a 544.

Members of the winning team were: Stew Pritiken, Clyde Dudley, Bob Hoenig, Sam Kitaguchi and Mary Amatuts. In the losing corner, but fighting gallantly, were: Jim Spencer, Lee Reams, Jack Rector, Bill Lewis and Ed Fryk.

The league has now begun its second-half of their yearly competition. The winner of the second-half will meet Circle K in June to determine the Bowling Club's 1957 champions. Last year the championship was captured by Mat Pica Pl of the Printing Department. Mat Pica Pl, who was faced with the problem of rebuilding their team from the loss of three of their top bowlers, finished sixth in the first-half of this year's competition.

Mountain-Climbing English Teacher Is New Faculty Member

(Editors Note: The following is the first in a series about Poly instructors written by Dan Potter, news bureau writer. Similar articles will run from time-to-time in these columns.)

By Dan Potter

"I had just graduated from the University of Denver," recalls Mend Johnson, new English teacher at Poly, "and was looking for a job when I noticed an ad in the Denver Post that said 'Newspaper for sale! Cheap!'"

Johnson whittled the price from \$500 to \$300 and found himself the owner of a four-column shopper's guide with a circulation of 800 copies a week. "After eighteen months of hard work," continues Johnson, "which included training the staff in our own night classes, we had an eight-column paper with a full page of news, a full page of pictures, plenty of advertisers, and a circulation of 40,000 per week."

Then WW II

Johnson's career in journalism was interrupted by World War II. He enlisted, and one of his assignments included his first English teaching experience—instructing Puerto Rican GI's to speak English.

After the war, Johnson was advertising manager of the Sterling Farm Journal, taught English at the Colorado School of Mines, returned to the University of Denver for his master's degree, and taught English for three years at Central Missouri State College.

Climbs Mountains

"Mountain climbing is my hobby," says Johnson. "One of my first dates with the girl who became my wife was a mountain climbing expedition from which I was lucky to return alive. Four of us had driven to a remote mountain area in my Model A. We ran out of gas."

"We decided," continues Johnson, "to hike back toward civilization along an abandoned railroad track. I knew that some of the trestles were built against cliffs with a 2,000 foot drop. We were enveloped in a heavy late afternoon fog."

WHEE

"While crossing one of the trestles, I slipped and fell. Hurling through what seemed an eternity, I reviewed my past and was sure this was the end. Then I thumped against a projecting portion of

the cliff and rolled to where my frantic clawing grasped a support of the trestle. How I escaped uninjured remains a mystery."

Johnson says he was attracted to Poly because of its unique philosophy and the "near ideal student-faculty relationship". In addition to his full teaching schedule, he is working on a nearly-completed doctorate in higher education.

Volkswagen Movie

Want to find out what makes the Volkswagen tick? An hour and a half movie showing the production of the Volkswagen from the ground up will be shown Friday at 7:30 p.m. in Lib. 118. Anyone interested in seeing the movie is invited to attend the meeting, 7:00 p.m., in the same room, and stay for the movie.

Smart, smooth and sassy—that's Chevrolet all over. Above, you're looking at the Bel Air Sport Coupe.

*Clings to the
road like a
stripe of paint!*

The '57 Chevy can give lessons on taking curves and holding the road to just about any car going. Few cars at any price are so beautifully balanced and so smooth, sure and solid in action.

A car has to have a special kind of build and balance to keep curves under control. And nobody outdoes Chevrolet in that department! It "corners" with all the solid assurance of an honest-to-goodness sports car. Chevy doesn't throw its weight around on turns because it carries its pounds in the right places.

And if the road should turn upward, Chevy can take care of that nicely, too—with up to 245-h.p.*

Come on in and take a turn at the wheel of a new Chevrolet.

*270-h.p. high-performance V8 engine also available at extra cost

*Do You Have
a Career Plan?*
