Blood Drive Selected as Blue Key Project

The college-wide blood drive is a strong indication of Poly's share of the Tri-County Blood Bank, according to members of Blue Key. The drive will proceed on May 3 at the Poly Rose Bowl, according to President Shane Corporcos.

A scholarship program of hosting visiting team and other students to the campus, in action taken at the Wednesday meeting.

$150 Scholarship To Be Awarded by Printing Society

A Tom Boren, Memorial Scholarship, an annual award of $150, has been unanimously approved by Hal Pitt In, printing chairman, and Majors and Minor.

SAC Gets Careless

Student Affairs Council has unknowingly, or not, appropriated $1,500 for use by next year's AHB president for official expenses, if SAC minutes are accurate.

It began with a recommendation by Finance Committee to allocate the AHB president a yearly sum of $500 for full consideration for salary and all types of hosting expenses. Don Walker, AHB vice-president, moved that this be approved.

A substitute motion by Haydn Lee, after being amended, passed: An item not to exceed $500 be budgeted for the purchase of reimbursement and full consideration for salary and all types of hosting expenses. The motion was carried. Students' attention was apparently not being made to this motion at all meetings. It was then referred to the SAC and expires for approval in the next meeting.

More than 10 votes, negative votes and 3 abstentions.

On the heels of this, Steve Emanuel moved that the AHB president be allowed to use $500 for full consideration for salary and all types of hosting expenses. The motion was carried. Students' attention was apparently not being made to this motion at all meetings. It was then referred to the SAC for approval in the next meeting.

Two more items were brought to the committee, both dealing with insurance for travel. The first item was to cover the student body for travel to the state competition at the University of California. The second item was to cover the student body for travel to the state competition at the University of California.

The committee was told that 40 or 50 people were going to travel to the state competition at the University of California.

The committee was also told that 40 or 50 people were going to travel to the state competition at the University of California.

The committee was also told that 40 or 50 people were going to travel to the state competition at the University of California.

Poly Phase Club Gets Answers On Value of Campus Activities

"Of what value are extracurricular activities when you're considering a graduate for employment?" Seventeen industries, polled by the Poly Phase Club, represent a cross-section of potential employers for any Engineering graduate.

All of the industries agreed they are beneficial in providing a well-rounded education, although the value of these activities varied with different industries.

Nearly all of the companies feel the activity record was especially important when considering a person with academic honors plus work. Of special interest was the fact that several companies which indicated leadership ability was a big factor were the most enthusiastic about extracurricular activities.

Aircraft industries, one of the leading exceptions were the least enthusiastic about extracurricular activities, although many were the most enthusiastic.

The aircraft industries with one glaring exception were the least enthusiastic about extracurricular activities, although many were the most enthusiastic.

Somehow we forgot two of the industries which might be mentioned for any who are interested in landscape gardening and travel columns is great. May one in landscape gardening and travel columns.

Any campus club officers who would like to read the actual letters may do so by contacting Poly Phase Secretary (Jerald Bowles, Box 117, or any other Poly Poly Phase Club officer.)

"The Customers Always Write ..."

The other side

Dear Editor:

"A. C. Grisby" has written a most interesting letter. His suggestion for a feature to get opinions and travel columns in great. I add one request. Are internships with Foreign students, and then publish their views, so that we get American opinions, too. "The other side of the fence?" If internationalism is needed, let us discuss the field in El Mustang, then it would truly reflect American culture.

Yours very truly,
Bob Grisby

More on Internships

Dear Editor:

Here's an add on the Men's Colony story of last Tuesday:

Somehow we forgot two of the many specialties which might be mentioned for any who are interested. I mention engineering and one in food management.

Dr. Robert McQuade, Dean of Arts and Sciences (Editor's note: Other internships are available in the areas of dietetics, corrections, health, medical esthetics, medical laboratory, and social assistance.

Any male students interested, can see Dr. Mauer for details and job descriptions.

Ames Laboratory Site

Aerospace Engineering students are invited to go to a Public Lecture March 1, to Ames Laboratory, directed by Lester E. Cogswell, aerospace engineering department head.

...PLUS THE PURE WHITE MIRACLE TIP
Poly Punchers to Box Return Match with SJS

Coach Tom Lee and his Mustang "Leatherheads" travel to San Jose State College today in quest of their 14th straight win. Having defeated San Jose earlier this year, the Leatherheads would enjoy nothing more than to head to San Jose and repeat their victory. However, SJS is a formidable opponent and the Mustangs will be out to prove they are the better team.

The Mustangs have won every race this year and are looking for a chance to show off their power. Coach Lee is confident in his team and his Spartans will be out to prove they are the better team.

The Leatherheads arrived at San Jose State College yesterday and will be out to prove they are the better team. Both teams have met in mutual opposition this season, the Cougars from San Jose State College defeated them by a score of 4½-½ in the Spartan ring contest of previous to the Mustang win. The "Leatherheads" will be in top form and have been trained every single day. Expecting every victory for win number 14.

Following tomorrow night's boxing match, which will be held on the campus of the University of Nevada in Ogden, Utah, Coach Lee has a scheduled time off for his team. The Leatherheads will be in top form and have been trained every single day.

Personalities:

Poly Boxing Coach

Best in the West

To many of the Mustang boxers, Coach Lee is the man who teaches his fighters in every aspect of their craft. To those who know him, he is much more than a coach.

Lee's boxing team has been gaining momentum over the years. Each year he sets a goal to win a record amount of matches and they have been successful in matching that goal. Coach Lee is a defensive-coach and has been known to get the best out of his fighters.

After transferring from the University of Oklahoma, Coach Lee was hired as an assistant at San Jose State College in 1954. He has been with Old Poly for 20 years and has been a key part of the team's success.

With the return of heavyweight John Allen of the Mustangs, the Poly's chances of winning the Poly NCAA title grow. John Allen today is expected to face Sant Barba of Old Poly. The Mustangs should win this fight. Other matches include: Prem Ganes, 197-1 Axis, 196, Poland; John Walla, 197 Paul Walla, 197 and Phil on the 160 and 165 weight matches. Assistant to the Poly wrestling coach.

Instruction To Run

For SJO Councilman

E. Raymond Wallace, mechanical engineering instructor, has thrown his hat into the political ring by announcing his candidacy for city councilman. The Poly's head baseball coach is running for position to represent the Poly area and has made his intentions clear.

The Poly's councilman, who is a resident of the Poly community, is running on a platform of improving community services and facilities. He has a strong record of community service and has been active in local government for several years. His understanding of the Poly community has led him to perform his duties with enthusiasm and his name is respected by many.

He has a strong record of community service and has been active in local government for several years. His understanding of the Poly community has led him to perform his duties with enthusiasm and his name is respected by many.

The Mustangs have won each of their last two meetings, this high flying Mustang cage crew will be seeking revenge in their encounter with the Los Angeles State Diabetes in the Poly gym Saturday night. The Poly Mustangs are -7½ in a non-league affair at Santa Barbara Bakersfield tonight.

The Poly Mustangs are coming off an upset victory over the University of California in the Poly gym Thursday night. The Mustangs won the game 66-64 in the Poly gym, marking their seventh straight win. The Mustangs are looking for their third straight win over the University of California and are determined to put an end to the Mustangs' streak.

The Mustangs will be looking to upset the University of California in the Poly gym Thursday night. The Mustangs have lost five straight games to the University of California and are looking for a chance to end their losing streak.

The Mustangs will be looking to upset the University of California in the Poly gym Thursday night. The Mustangs have lost five straight games to the University of California and are looking for a chance to end their losing streak.
Power Poles May Be On Way Out
As Senior Project Seeks New Cables

The ugliness, yet essential, power poles that modern living has imposed on our landscapes may be on its way out. Disguised now being conducted at Cal Poly by H. Alcantar, an assistant professor of civil engineering, are new methods of grounding cables used in distribution of high voltage and need to be made of new poles.

The work is being conducted as Alcantar’s senior project with aid of the City of Los Angeles, department of water and power officials. They have supplied necessary materials. Alcantar is using college computer equipment. One part standing block, says Alcantar, has been his formation of “the underground power conductor method,” which will reduce pollution, noise and visual obstructions. Data obtained from the tests will be employed in planning future installations of underground power distribution systems, Los Angeles officials predict.

Initial cost will still be slightly higher for installation than the conventional power pole distribution system, says Alcantar. However, this would be offset by the savings of power poles, the removal of normally for pole maintenance. "The underground conduits will last longer than the exposed at Cal Poly, he was drafted into the army, then transferred to the air force, he served in Korea as a crane equipment operator. Returning from the service, he reentered Cal Poly to get his degree and is looking forward to his future in design and development engineering. In the fall of 1968, while in his junior year, he was drafted into the army."
