Avila Beach Warning...

By THE GRAPHIC

Avila Beach 911 operators are warned that the blink rate could reach this weekend.

The Los Angeles County Supervisors heard reports earlier this week of an increased number of calls to 911 from Avila Beach, with an estimated 15,000 visitors planned to spend the long weekend at the beach.

A special team of local emergency responders is expected to patrol the streets in the future. Also expected to visit the area are members from the Department of Public Safety, the county's Central Police, and the California Highway Patrol, checking for building in and about the water.

Official Results

1574 Votes Registered
In ASB Election Race

A tumultuous campaign greeted Leo Foreman, Dave Hat- tings, and Mary P. Morris, three elected Associated Student Body officers, as the official announcement was released in the new El Centro Bar on Wednesday night. The election brought out 1,574 votes to the polls which registered only 68 per cent of the student body.

Foreman, 20, a Freshman, was the lone candidate in the presidency race. He was unopposed in the election, which was held in the main auditorium on campus.

Paxton, Killigore, McDouar take Presidential Posts

Class elections are truly easy when someone is willing to work for them. As a matter of fact, when someone is willing to work for them. As a matter of fact, the office held by 150,000 people is the one that is the most popular.

A Poly Royal information center will be set up in Ms. Stuart's office in the Student Union to handle any questions that may arise. The hours for department dial lines will be from 10 a.m. to 6 p.m. each day.

Peace Corps Volunteers Deferred From Service

BY MIKE CASSITY

Can Peace Corps candidates expect to go abroad and return home and train for peace and then return home to train for war under the current draft system? The Selective Service Act established in 1980 made it mandatory for every United States male citizen who met the qualifications for active duty to register for the draft. The act allowed for a two-year period for those who were deferred from service.

First Spring Sing Attracts 16 Clubs

College Union and Residence Halls Council will hold its first Spring Sing Contest May 15 at the Poly Royal in the basketball. Women's Residence Halls, Santa Lucia Hall, Home Economics Club and Trinity Hall have entered the contest.

The relationship of the Selective Service System to the Peace Corps is important in that the Peace Corps is not a draft alternative. Peace Corps volunteers may be deferred from service while serving in the Peace Corps, and Peace Corps volunteers who have completed their service may be reentered into the draft system upon returning home.

The power to defer registrants in order to perform functions in national health, safety, or interest new service is controlled by the Selective Service System. But what happens to the Peace Corps candidate when he reports for his Peace Corps job? The Selective Service System must determine whether a Peace Corps candidate will be deferred upon return from service. The Peace Corps candidate may be deferred upon return from service, and he will be deferred if it is determined that he would be deferred if he had not been a Peace Corps candidate.

The Selective Service Act also provides for a deferment from service for Peace Corps candidates who have served on active duty for five years or more. Peace Corps volunteers who have served on active duty for five years or more may be deferred from service upon return from service.

Spikers To Host LA State In CCAA Clash Tomorrow

Track Coach Walt Williamson sends his charges against the Los Angeles State Bulldogs tomorrow at 8:30 on the local oval in what promises to be the biggest meet staged at Cal Poly in quite some time. An exhibition hammer throw by Tom Pagani at 2:15 will precede the afternoon's CCAA action.

Walt Williamson stated, "The track is in the best shape of its history and it will be a popular fast track for this meet against the Bulldogs. In years of a lack of depth in athletes, we are showcasing a meet that will set the pace for the sport in our area." He further added, "The NAIA top finishers, Yakima, Colo., and Elmhurst, Ill., will go all the way and will be considered a threat to the title." The NAIA championships will be held in April.

No doubt the CCAA's top performers, A. J. McFarland and Jack Adam, will be on hand to take on the Bulldogs, along with the NAIA runners. "We hope to do well tomorrow," stated Pagani, "Elmhurst, which has the third best team in the nation, could cause some trouble for us. But we are most concerned about the NAIA runners, as we have a 15-point lead in the NAIA meet." McFarland, who will be in the 200 and 800 meters tomorrow, is the nation's top man in both.

Tires Need Recapping

The communication needs of our nation become steadily greater and more complex, with the Bell Telephone System continuing its pioneer work in microwave by "looking to the air," and more and more to get the word across.

To this end, Western Electric—the manufacturer of the Bell System—has the monumental task of developing a large part of the microwave transmission equipment that will link our country together by stretching thousands of miles in mere seconds.

In spite of its great technological strides, the science of radio relay is a rapidly-changing one. And new breakthroughs and applications are common occurrences. A case to point is our Bell System "TH" Microwave Radio Relay. This newest development is long-distance telephone transmission which eventually will triple the present message-carrying capacity of existing long-haul radio relay installations. A full-time network of microwave channels can handle 11,000 telephone messages simultaneously.

This newest development is long-distance telephone transmission which eventually will triple the present message-carrying capacity of existing long-haul radio relay installations. A full-time network of microwave channels can handle 11,000 telephone messages simultaneously.

To make microwave work takes a host of specialists and components: towers, antenna, waveguides, traveling-wave tubes, transistors, etc. But just as important, it takes top-caliber people to help us tend our horizons into such existing new areas as communication by satellite.

And microwave is only part of Western Electric's opportunity story. We have—right now—hundreds of challenging and rewarding positions in virtually all areas of telephony, as well as in development and building of defense communications and missile guidance systems for the Government.

So, if your future is "up in the air," you owe it to your career to see "What's Up" for you at Western Electric.

Western Electric

Opportunities exist for electrician, machinist, industrial engineer, computer programmer, as well as electrical, chemical, mechanical, and business sciences. Several branches have immediate openings for engineers and technicians. For more information, write to your nearest Western Electric Office or write to: Personnel Department, 195 Broadway, New York 7, N. Y., or to: Personnel Department, Western Electric, Box 423, Monrovia, Calif. (Schuylkill, S. E. 16) or to: Personnel Department, 720 Michigan Avenue, N. W., Washington 6, D. C. (Office of Regional Representatives, 20th Floor, 400 South Michigan Avenue, Chicago, Ill.) for a data sheet. Ask for your nearest Western Electric Office or write to the Personnel Department, 195 Broadway, New York 7, N. Y.

Principal Manufacturing locations: Chicago, Ill.; Providence, R. I.; Schenectady, N. Y.; Indianapolis, Ind.; Pittsburgh, Pa.; Columbus, Ohio; Fort Wayne, Ind.; Oskaloosa, Iowa; Milwaukee, Wis.; Kansas City, Mo.; St. Paul, Minn.; Bayonne, N. J.; Indianapolis, Ind.; San Francisco, Calif.; Houston, Texas; St. Louis, Mo.; Dallas, Tex.; Los Angeles, Calif.; Long Beach, Calif.; Santa Monica, Calif.; and New York, N. Y.
1574 VOTE
(Continued from page 1)
Council and the student body, "I wasn't satisfied with the election turnout because we were hoping for a hundred per cent," said George K. Maybou, Election Chairman, "but in comparison with the previous election, the turnout was gratifying."
Officer-elect will assume office next Fall Quarter.

A room hung with pictures is a room hung with thoughts.
